With a land area of about 313,000 square kilometres, Poland is the sixth-largest country in the European Union. Its population of about 38.5 million represents the third-largest consumer market in Eastern Europe. The Polish economy has undergone a remarkable development since its transition to democracy. The government is continuing to pursue a course of liberalisation and deregulation, which includes the privatisation of government companies. This now makes the country a major sales market and manufacturing site for foreign businesses. In recent years, Poland has consistently registered positive growth.

REPORT OF THE SUPERVISORY BOARD

Dear Shareholders,

.....
Düsseldorf,
10 December 2014

The global economy picked up at best a bit of speed in the period between October 2013 and September 2014. Overall, though, the recovery that followed two years of economic weakness remained modest and generated little momentum for retailing. As a result, the development of METRO GROUP during financial year 2013/14 received no significant boost from the economy. In light of this situation, the sales growth generated during the reporting period clearly underscores the successes produced by the transformation of the group: adjusted for portfolio changes and currency effects, METRO GROUP increased its sales by 1.3 per cent during financial year 2013/14. The company's like-for-like sales also rose again slightly by 0.1 per cent, compared with –1.3 per cent in the previous year. This positive development is a clear sign that the steps taken and investments in the future initiated by the Management Board will prove effective.

We, the members of the Supervisory Board of METRO AG, closely monitored the transformation of the group's business models and strategic portfolio changes during the reporting period and actively supported this process with our decisions. The planning and decisions of the Management Board received our full support.

We would like to express our special thanks to the employees of METRO GROUP who demonstrated their entrepreneurial spirit and energetically and passionately implemented these decisions.

Consultation and supervision of executives

The Supervisory Board carried out the duties set forth by law and by the company's Articles of Association during financial year 2013/14. We extensively advised the Management Board on the operations of METRO AG and the group and continuously supervised the company's executives. In line with its reporting obligations, the Management Board provided us with regular, timely and comprehensive written and oral reports about all developments of material importance for METRO GROUP. The reports covered, in particular, fundamental questions about company planning, the company's profitability, current business developments and operations of material importance. The Supervisory Board thoroughly discussed and reviewed all reports and documents that were submitted to it. No objections about the legality, advisability and regularity of the Management Board's activities were raised. We approved individual business matters insofar as this was required by law, on the basis of the Articles of Association or by proprietary determinations. We made no use of the rights of inspection and audit granted under § 111 Section 2 Sentence 1 and 2 of the German Stock Corporation Act (AktG) because no matters requiring clarification arose.

.....

FRANZ M. HANIEL

Chairman of the Supervisory Board

Profile: Franz M. Haniel became Chairman of the Supervisory Board of METRO AG in November 2011. He had previously held the same position from November 2007 to May 2010. Mr Haniel, who was born in Oberhausen in 1955, holds a degree in mechanical engineering and an MBA from the international graduate school INSEAD. He initially worked as a consultant for Booz Allen Hamilton. In 1986, he joined the investment companies of the Quandt family. In 2000, he became managing director of Giesecke & Devrient, a manufacturer of bank notes, security and identification documents. Since 2003, he has been the Chairman of the Supervisory Board of Franz Haniel & Cie. GmbH.

For more information about the other members of the Supervisory Board, see the Company – Supervisory Board section of www.metrogroup.de.

During financial year 2013/14, the Supervisory Board held nine meetings, two of which were unscheduled. Four decisions were taken outside a Board meeting. In my function as Chairman of the Supervisory Board, I remained in constant contact with the Chairman of the Management Board and discussed important business transactions and upcoming decisions with him during regular face-to-face meetings.

The German Corporate Governance Code recommends that a statement be included in this report if a member of the Supervisory Board attended fewer than half of all Supervisory Board meetings in any given financial year. Baroness Lucy Neville-Rolfe resigned in writing from the Board on 18 July 2014. As a result, she did not attend half of the meetings that the Supervisory Board of METRO AG held during the reporting period. Apart from this exception, no member attended fewer than half of the meetings.

No conflicts of interest involving members of the Management Board and Supervisory Board requiring disclosure to the Supervisory Board arose in financial year 2013/14. One member of the Supervisory Board informed the body that he was considering an offer to work as a consultant for a third party and that this relationship could result in conflicts of interest in individual cases. A specific threat to the company's interest did not exist. As a precaution, the affected member of the Supervisory Board announced that he would not take part in any future Board discussions or decisions that could result in a conflict of interests.

Key issues covered by Supervisory Board meetings and resolutions during the year

October 2013 – During the first meeting of financial year 2013/14, the Supervisory Board decided to re-appoint Mr Heiko Hutmacher to the Management Board of METRO AG and to the position of Chief Human Resources Officer for the period of 1 October 2014 to 30 September 2017. In addition, we approved the employment contract between Mr Hutmacher and METRO AG for this term. Other key points included the report of the Management Board about business developments and the governance functions in the group, in particular risk management, the internal control systems and the compliance system. During the Supervisory Board meeting held in October 2013, we also examined the efficiency of our committee work. The foundation of this efficiency review was an internal company questionnaire.

December 2013 – Our audit meeting held on 10 December 2013 focused on the annual and consolidated financial statements for the short financial year 2013, the combined METRO AG and group management report for 2013, the Management Board's proposal for the appropriation of the balance sheet profit to the Annual General Meeting 2014 as well as the Management Board's report about relations with associated companies in 2013. The auditor attended this meeting and reported on the key findings of his audits. Another focal point of the meeting was a resolution regarding a new variable remuneration component for members of the Management Board that is designed to act as a long-range incentive. The new remuneration component was presented to the Annual General Meeting in February 2014. The meeting then approved it by an overwhelming majority. Other issues addressed by the Supervisory Board in December 2013 were the report of the Supervisory Board and the corporate governance report for the short financial year 2013, preparations for the Annual General Meeting 2014, recent business developments, individual projects, legal issues and the donation report of the Management Board. Subject to the election of the auditors by the Annual General Meeting 2014, we also adopted the audit assignments for the annual and consolidated financial statements, the combined management report and the dependency report for the financial year ending on 30 September 2014. Also subject to the election of the auditors, we approved the request for the review of the abbreviated consolidated financial statements as of 31 March 2014 and the consolidated management report covering the period from 1 October 2013 to 31 March 2014.

January 2014 – In this unscheduled telephone conference, we renewed Mr Mark Frese's appointment to the Management Board of METRO AG for the period of 1 January 2015 to 31 December 2017 and concluded an employment contract for this term. Furthermore, we closely examined the Management Board's plans for a listing of minority interests in METRO Cash & Carry Russia and approved resolution proposals related to this plan. In the months that followed, market conditions for a listing worsened as a result of the political conflict between Ukraine and Russia. For this reason, the plans are currently on hold.

February 2014 – In a meeting held immediately before the Annual General Meeting on 12 February 2014, we discussed performance-based Management Board remuneration for the short financial year 2013. To ensure the individual performance orientation of Management Board remuneration, we reserve the general right to reduce or increase the weight of individual annual performance-based remuneration by up to 30 per cent, respectively, at our discretion. The necessary decision regarding how this discretion would be applied for the short financial year 2013 was outlined in a Supervisory Board resolution. We also discussed the key criteria related to the future application of this discretion after the end of the ongoing financial year 2013/14. The Management Board reported about the latest business developments and a planned real

estate project. As a precaution, the Supervisory Board passed a resolution on the hiring of a law firm in preparation for the eventuality of legal challenges or complaints for nullity against resolutions passed during the Annual General Meeting 2014.

In a written procedure initiated immediately after the conclusion of the Annual General Meeting, the Supervisory Board reappointed Dr Fredy Raas to the Accounting and Audit Committee. The reappointment was necessary because his membership on the Supervisory Board ended with the adjournment of the Annual General Meeting on 12 February 2014 and his appointment to the Board was renewed on the same day by the Annual General Meeting.

April 2014 – In this meeting, we approved the appointment of Mr Pieter Haas to the Management Board of Media-Saturn-Holding GmbH and relieved him of all responsibilities extending beyond the Media-Saturn sales line that arose from his position on the Management Board of METRO AG for the duration of his appointment. We then modified the assignment of responsibilities on the Management Board to reflect this change. Furthermore, we approved the purchase of pension reinsurance to cover risks from pension obligations outside Germany and the repurchase of a real estate portfolio. The Management Board reported about the latest business developments, the status of plans for a listing of minority interests in METRO Cash & Carry Russia and a number of other current projects and issues. In addition, the Management Board presented two projects that were the subject of Supervisory Board resolutions passed outside a Board meeting in May 2014.

May 2014 – Outside a meeting, we approved the divestment of METRO AG's indirect stake in Booker Group PLC and the purchase of three properties used by the Real sales line.

June 2014 – Also outside a meeting, the Supervisory Board approved the sale of a portion of properties in Düsseldorf used by group companies and the subsequent renting of the objects that had already been presented during the February meeting.

July 2014 – In financial year 2013/14, two Supervisory Board meetings were held in July. This is a proven practice that creates sufficient time to discuss strategic issues with the Management Board. Both meetings were held on consecutive days in Paris, France. The key issue addressed during the first day's meeting was the METRO Cash & Carry sales line's strategy, with a particular focus on France. Other issues addressed during this meeting were macroeconomic conditions, the current business developments of METRO GROUP and the strategic priorities of the group. Following this meeting, we joined the Management Board and other group executives on a tour of two stores operated by the METRO Cash & Carry sales line in Paris and learned about the store-specific concepts developed there. Subjects addressed during the second day's meeting included the strategy for Media-Saturn with a special focus on the dialogue with the minority shareholder as well as the strategic responsibilities of human resources, including long-term succession planning on various levels of the group. During this second meeting, the Supervisory Board also approved a new company car policy for members of the Management Board, was informed about key legal changes and approved the hiring of a service provider who will assist with successor planning for shareholder representatives. Finally, the Management Board informed us about the planned disposal of METRO Cash & Carry's business in Vietnam.

August 2014 – In an unscheduled telephone conference, we approved the disposal of METRO Cash & Carry's operational business in Vietnam, including the related real estate portfolio.

September 2014 – On 24 September 2014, we renewed Mr Olaf Koch's appointment to the Management Board of METRO AG and to his position as Chairman of the Board for the period of 14 September 2015 to 13 September 2018. We also approved the conclusion of an employment contract between Mr Koch and METRO AG for this period. The Management Board informed us about the latest business developments. We also approved the budget plan submitted by the Management Board. Other resolutions dealt with the annual declaration of compliance issued pursuant to § 161 of the German Stock Corporation Act (AktG) as well as the latest version of the by-laws and objectives regarding appointments to the Supervisory Board and the Management Board. In September, the Supervisory Board also carefully examined the group's governance functions (internal control system, risk management system, internal auditing and compliance) as well as additional personnel matters regarding the Management Board and was informed about the status of the legal dispute with the minority shareholder of Media-Saturn-Holding GmbH. In a final matter, we elected Dr Florian Funck to the Supervisory Board's Accounting and Audit Committee. The election was necessary because I decided not to take the seat on the committee that had been reserved for the Chairman of the Supervisory Board.

Work of the committees

Five committees support the Supervisory Board in its work, greatly contributing to the Board's overall efficiency: the Presidential Committee, the Personnel Committee, the Accounting and Audit Committee, the Nominations Committee and the Mediation Committee pursuant to § 27 Section 3 of the German Co-determination Act (MitbestG). The committees prepare resolutions and discussions of the Supervisory Board. In addition, decision-making responsibilities have been transferred to individual committees within legally allowed parameters. The work of the committees is described in detail in the annual statement on corporate management pursuant to § 289 a of the German Commercial Code (HGB). It can be found on the website www.metrogroup.de in the Company – Corporate Governance section. I, as Chairman of the Supervisory Board, chair all committees with the exception of the Accounting and Audit Committee. The contents and results of committee meetings are reported to the Supervisory Board in a timely manner. The committees of the Supervisory Board currently take the following forms:

— **Presidential Committee:**

Franz M. Haniel (Chairman), Werner Klockhaus (Vice Chairman), Dr Wulf H. Bernotat, Uwe Hoepfel

— **Personnel Committee:**

Franz M. Haniel (Chairman), Werner Klockhaus (Vice Chairman), Dr Wulf H. Bernotat, Uwe Hoepfel

— **Accounting and Audit Committee:**

Dr jur. Hans-Jürgen Schinzler (Chairman), Werner Klockhaus (Vice Chairman),
Dr Florian Funck, Rainer Kuschewski, Dr Fredy Raas, Xaver Schiller

— **Nomination Committee:**

Franz M. Haniel (Chairman), Jürgen Fitschen, Dr jur. Hans-Jürgen Schinzler

— **Mediation Committee pursuant to § 27 Section 3 of the German Co-determination Act (MitbestG):**

Franz M. Haniel (Chairman), Werner Klockhaus (Vice Chairman), Uwe Hoepfel,
Dr jur. Hans-Jürgen Schinzler

As of 10 December 2014

Accounting and Audit Committee – The Accounting and Audit Committee primarily handles accounting and auditing issues as well as the oversight of governance functions (the internal control system, risk management, internal auditing and compliance). Eight meetings were held in financial year 2013/14. The Chairman of the Management Board and the Chief Financial Officer attended all meetings. Representatives of the auditor and the managers of the relevant departments of METRO AG attended certain meetings to address particular agenda items.

The Accounting and Audit Committee prepared the Supervisory Board's balance sheet meeting in December 2013 and reviewed the annual and consolidated financial statements for the short financial year 2013, the combined management report of METRO AG and the group for 2013 as well as the report of the Management Board on relations with associated companies. The committee discussed the results of the audit in the presence of the auditor. On this basis, the Accounting and Audit Committee made concrete recommendations to the Supervisory Board after holding detailed discussions. These included, in particular, the recommendation to approve the annual and consolidated financial statements for the short financial year 2013 and the Management Board's proposal to the Annual General Meeting 2014 on the appropriation of the balance sheet profit.

Another focal point of the committee work was the selection of the auditor for financial year 2013/14 by the Annual General Meeting and preparation of the mandates related to the Supervisory Board's implementation of this decision. The members of the Accounting and Audit Committee discussed quarterly financial reports and the half-year financial report for financial year 2013/14 prior to their respective release. Other issues addressed by the committee were the Management Board's budget planning, the auditing plan of the selected auditor, the plan for a listing of minority interests in METRO Cash & Carry Russia and the governance functions in the group (internal control system, risk management system, internal auditing and compliance). The committee was also informed about continuing changes in international accounting standards and discussed the status of a sampling audit conducted by the German Financial Reporting Enforcement Panel, the updating of business by-laws and the objectives regarding appointments to the Supervisory Board and the Management Board. The Accounting and Audit Committee also addressed group tax planning and the distribution of donations. Furthermore, it received regular reports about legal issues. These issues included the management and status of antitrust proceedings, the status and implications of a challenge filed against a resolution of the Annual General Meeting 2013 and the dispute with the minority shareholder of Media-Saturn-Holding GmbH. Finally, the committee conducted an efficiency review on the basis of an internally developed questionnaire and prepared the declaration of compliance pursuant to § 161 of the German Stock Corporation Act (AktG).

Personnel Committee – The Personnel Committee deals primarily with personnel issues concerning the Management Board. During financial year 2013/14, five committee meetings took place, of which four were held together with the Presidential Committee. One resolution was prepared outside a meeting. The Personnel Committee discussed the composition of the Management Board, its assignment of responsibilities, employment contracts and other personnel matters, and prepared the corresponding decisions for

the Supervisory Board during the reporting period. In particular, these issues included the reappointment of Messrs Heiko Hutmacher, Mark Frese and Olaf Koch to the Management Board, the renewed appointment of Mr Olaf Koch as Chairman of the Management Board and the new individual employment contracts. In financial year 2013/14, the committee reviewed the individual performance targets of the members of the Management Board. The achievement of these goals is a key criterion for the exercise of discretion related to the Supervisory Board's determination of the annual performance-based remuneration paid to the Management Board. Other key issues discussed by the committee were the preparation of a Supervisory Board resolution regarding a new variable remuneration component that is designed to serve as a long-range incentive as well as the long-term successor planning for the Management Board. Finally, the Personnel Committee discussed the amendment of the business by-laws made during the reporting period as well as the objectives regarding the composition of the Supervisory Board and the Management Board. As required, the committee conducted its regular review of expenditures on the basis of the travel cost guidelines that apply to members of the Management Board.

Presidential Committee – The Presidential Committee deals with the monitoring of compliance with legal regulations and the application of the German Corporate Governance Code. Until its remit was changed in September 2014, it was also responsible for strategy. In consideration of § 107 Section 3 Sentence 3 of the German Stock Corporation Act (AktG), the Presidential Committee takes decisions about urgent matters and matters submitted to it by the Supervisory Board. The Presidential Committee met four times during financial year 2013/14, each time with the Personnel Committee. As part of its joint work with the Personnel Committee, the Presidential Committee discussed strategic aspects of incentives and successor planning for the Management Board. Other key issues addressed by the Presidential Committee included corporate governance at METRO GROUP, including the corporate governance report for the short financial year, and the preparation of the declaration of compliance in accordance with § 161 of the German Stock Corporation Act (AktG). No resolutions about pressing issues or issues delegated by the Supervisory Board were required.

Nomination Committee – The Nomination Committee is responsible for proposing suitable candidates for the Supervisory Board's election proposals to the Annual General Meeting. During financial year 2013/14, the Nomination Committee held one telephone conference. The Nomination Committee recommended to the Supervisory Board that an external consultant should be hired to assist with successor planning regarding representatives of shareholders on the Supervisory Board.

Mediation Committee – The Mediation Committee formulates proposals for the appointment and dismissal of members of the Management Board in cases pursuant to § 31 of the German Co-determination Act (MitbestG). The Mediation Committee did not have to meet in financial year 2013/14.

Corporate governance

The Management Board and the Supervisory Board report on METRO GROUP's corporate governance in the corporate governance report for financial year 2013/14. Together with the statement on corporate management pursuant to § 289 a of the German Commercial Code (HGB), the report is also published on the website www.metrogroup.de in the Company – Corporate Governance section.

In September 2014, the Management Board and the Supervisory Board of METRO AG issued their most recent declaration of compliance with regard to the recommendations of the Government Commission on the German Corporate Governance Code pursuant to § 161 of the German Stock Corporation Act. The declaration was made permanently available to shareholders on the website www.metrogroup.de. It also appears in full in the corporate governance report 2013/14.

Annual and consolidated financial statements, report on relations with associated companies

The annual financial statements of METRO AG for financial year 2013/14, in consideration of accounting, that were submitted by the Management Board pursuant to the regulations laid down in the German Commercial Code (HGB), the consolidated financial statements compiled by METRO AG according to International Financial Reporting Standards (IFRS) – as they are to be applied in the European Union – and the group's combined management report for financial year 2013/14 were reviewed by KPMG AG Wirtschaftsprüfungsgesellschaft and were given unqualified approval. The auditor provided a written report on the findings.

We, the Supervisory Board, reviewed the annual financial statements of METRO AG and the consolidated financial statements for financial year 2013/14, the combined management report of METRO AG and the group for financial year 2013/14 as well as the Management Board's proposal to the Annual General Meeting 2015 on the appropriation of the balance sheet profit. For this purpose, these documents and the reports of the auditor were provided to us in a timely manner, and were discussed and reviewed in detail during the Supervisory Board's annual accounts meeting held on 10 December 2014. The auditor attended this meeting, reported the key findings of the reviews and was at the Supervisory Board's disposal to answer questions and provide additional information – even in the absence of the Management Board. The auditor did not report any material weaknesses of the internal control and risk management system with regard to the accounting process. The auditor also provided information on services rendered in addition to auditing services. According to the information provided, no disqualification or bias issues arose. We concurred with the findings of the auditor's review. In a concluding finding of our own review, we determined that no objections were necessary. We support, in particular, the conclusions reached by the Management Board in the combined management report of METRO AG and the group's management report and have endorsed the annual financial statements compiled by the Management Board. As a result, the annual financial statements of METRO AG have been adopted. Following careful consideration of the interests involved, we endorsed the Management Board's proposal for the appropriation of the balance sheet profit.

Pursuant to § 312 of the German Stock Corporation Act (AktG), the Management Board of METRO AG prepared a report about relations with affiliated companies for financial year 2013/14 (in short, "dependency report"). The auditor reviewed this report, provided a written statement about the findings of the review and issued the following opinion:

"After our due audit and assessment, we confirm that

1. the factual information in the report is correct,
2. in the legal transactions listed in the report, the company's expenses were not inappropriately high,
3. no circumstances related to the measures listed in the report required an assessment deviating materially from that of the Management Board."

The dependency report was submitted to us together with the audit report in a timely manner and was discussed and reviewed particularly in terms of thoroughness and accuracy during the annual accounts meeting that the Supervisory Board held on 10 December 2014. The auditor attended this meeting, reported the key findings of the review, and was at our disposal to answer questions and to provide information – even in the absence of the Management Board. We concurred with the findings of the auditor's review. In a concluding finding of our own review, we determined that no objections have to be made with respect to the statement of the Management Board at the conclusion of the dependency report.

The aforementioned reviews by the Supervisory Board accounts were carefully prepared by the Accounting and Audit Committee on 08 December 2014. The auditor also attended this committee meeting, reported on the key findings of his review and was available to answer questions. The Accounting and Audit Committee urged the Supervisory Board to approve the financial statements prepared by the Management Board and to endorse the Management Board's recommendation for appropriation of the balance sheet profit.

Appointments and resignations

Upon the order of the Local Court in Düsseldorf, Dr Fredy Raas joined the Supervisory Board in July 2013. As planned, his court-approved appointment ended with the conclusion of the Annual General Meeting of METRO AG on 12 February 2014. On the same day, Dr Raas was elected to a new term on the Board by the Annual General Meeting.

In financial year 2013/14, Baroness Lucy Neville-Rolfe was appointed Parliamentary Under Secretary in the British Department for Business, Innovation and Skills and as a result had to resign her seat on the Supervisory Board of METRO AG as of 18 August 2014. The Supervisory Board congratulates Baroness Neville-Rolfe on her appointment to the government position and thanks her for her energetic and expert work on behalf of METRO AG. Upon the order of the Local Court in Düsseldorf, she was replaced on the Supervisory Board on 9 December 2014 by Ms Gwyn Burr.

Düsseldorf, 10 December 2014

The Supervisory Board

FRANZ M. HANIEL
Chairman

CORPORATE GOVERNANCE REPORT

Pursuant to the recommendation of Subsection 3.10 of the German Corporate Governance Code, the Management Board and the Supervisory Board of METRO AG deliver the following report on corporate governance at METRO GROUP.

The Management Board and the Supervisory Board of METRO AG are firmly committed to the principles of transparent, responsible corporate governance and supervision. They attach great importance to good corporate governance standards. Their voluntary commitment to the German Corporate Governance Code is reinforced by the following provision in the Boards' by-laws:

"The Management Board and the Supervisory Board of METRO AG base their actions on the relevant valid recommendations of the German Corporate Governance Code and only deviate from the Code's recommendations in well-founded exceptional cases. If the Management Board or Supervisory Board intends to deviate from a recommendation, the organs inform each other of the planned move prior to its implementation."

Implementation of the German Corporate Governance Code

During financial year 2013/14, the Management Board and the Supervisory Board of METRO AG discussed METRO GROUP's implementation of the recommendations of the German Corporate Governance Code in detail and issued the following declaration pursuant to § 161 of the German Stock Corporation Act (AktG) in September 2014¹:

"The Management Board and Supervisory Board of METRO AG hereby declare

¹ After approving this Corporate Governance Report, the Management Board and Supervisory Board of METRO AG issued a new declaration pursuant to § 161 of the German Stock Corporation Act (AktG); it has been made permanently available on the website www.metrogroup.de.

that the recommendations of the Government Commission on the German Corporate Governance Code published by the Federal Ministry of Justice in the official section of the Federal Bulletin in the version of 13 May 2013 have been complied with in full since the last declaration of compliance was issued in September 2013.

The Management Board and Supervisory Board intend to comply with the recommendations in the version of 13 May 2014 in future."

This and the declarations pursuant to § 161 of the German Stock Corporation Act (AktG) made over the last five years are permanently available to METRO AG shareholders on the website www.metrogroup.de.

In addition to recommendations, the German Corporate Governance Code contains suggestions that listed companies can – but do not have to – address. METRO AG follows the vast majority of these suggestions. In financial year 2013/14, there was only one suggestion that the company did not fully implement:

Subsection 2.3.3 of the German Corporate Governance Code calls for enabling shareholders to follow the Annual General Meeting via modern communication media such as the Internet. As in previous years, METRO AG only broadcast the speech by the Chairman of the Management Board in financial year 2013/14. This practice will be continued.

Division of duties and areas of responsibility between the Management Board and the Supervisory Board

The clear division between corporate management and corporate supervision is a key element of corporate governance for

German stock corporations. Duties and areas of responsibility are clearly divided between the Management Board and the Supervisory Board.

The Management Board of METRO AG, which has four members, is responsible for running the company. The management duties of the Management Board of METRO AG include defining corporate objectives and determining the strategic positioning for the group as well as managing the company, monitoring and planning. In addition, the Management Board of METRO AG ensures the availability of investment funds, decides on their allocation within the group and is responsible for attracting and supporting highly qualified managers.

Pursuant to the German Co-determination Act (MitbestG), the German Stock Corporation Act (AktG) and the Articles of Association, the Supervisory Board of METRO AG is composed of ten shareholder representatives and ten employee representatives. The Supervisory Board appoints the members of the Management Board, advises them and monitors their corporate management, including the attainment of long-term corporate objectives. The Supervisory Board is brought into the planning of the development of METRO GROUP by the Management Board to the same degree that it is included in decisions about important measures. Aside from its legally prescribed approval obligations, the Supervisory Board has determined its own approval requirements for certain actions and business dealings of the Management Board.

————— For more information about members of the Management Board and Supervisory Board, see the notes to the consolidated financial statements of METRO AG in no. 55 Corporate Boards of METRO AG and their mandates.

————— The modes of operation of the Management Board and Supervisory Board, the composition and functions of the Supervisory Board committees and information on key corporate management practices are described in the statement on corporate management pursuant to § 289 a of the German Commercial Code (HGB). The declaration of compliance pursuant to § 161 of the German Stock Corporation Act (AktG) also appears in full in this report.

————— The statement on corporate management is available on the website www.metrogroup.de in the section Company – Corporate Governance.

Objectives regarding the composition of the Management Board and Supervisory Board

To properly carry out its duties, the Management Board and the Supervisory Board must possess a broad range of knowledge, skills and experience.

Requirements related to appointments to the Management Board

The decisions taken by the Supervisory Board regarding the composition of the Management Board are based on careful analysis of current and future business challenges. Potential members of the Management Board must not only have solid general qualifications, but must also be individuals capable of helping the company to address its current situation and future challenges.

Diversity on the Management Board

In selecting members of the Management Board, the Supervisory Board also heeds the recommendations of the German Corporate Governance Code. In particular, the Supervisory Board considers the issue of diversity and strives to provide adequate consideration of women. In the calendar year 2017, the share of women on the Management Board of METRO AG should amount to at least 25 per cent (total as of September 2014: 0 per cent). To reach this target, the Supervisory Board will consider this issue as it searches for suitable candidates for the Management Board in the future.

The Supervisory Board's planning corresponds with the Management Board's goals regarding the promotion of female executives at METRO GROUP. As part of this effort, the share of women in the first two management levels below the Management Board of METRO AG should also amount to 25 per cent in 2017 (total as of September 2014: 23.7 per cent).

Requirements related to appointments to the Supervisory Board

To ensure that the Supervisory Board of METRO AG can duly perform these responsibilities, its members have formulated certain objectives regarding appointments. These objectives are:

Diversity on the Supervisory Board

Bearing in mind METRO GROUP's international expansion, the Supervisory Board should include both retailing experts for Western European markets and individuals with in-depth experience in the growth regions of Eastern Europe and Asia. The current composition of the Supervisory Board fulfils this objective. Employee representatives on the Board contribute experience from each of the group's sales lines in Germany. Two shareholder representatives are former METRO executives who have special national and international retailing expertise. Other shareholder representatives have gained extensive experience in the growth regions of Eastern Europe and Asia while serving in high-ranking managerial positions.

As early as 2010, an objective regarding female representation on the Supervisory Board was defined to make better use of the pool of qualified candidates available for appointment to the Supervisory Board. Following the Supervisory Board election in 2013, at least 20 per cent of the Board's seats were to be held by women. The objective for 2018 was set at 30 per cent. The company not only fulfilled the first step of this objective in 2013, but also surpassed it, achieving 25 per cent.

In September 2014, the Supervisory Board of METRO AG updated and raised its target: following the regularly scheduled Annual General Meeting in 2016, women and men should each make up at least 30 per cent of representatives on the Supervisory Board. The minimum requirement should be fulfilled by representatives of both shareholders and employees. The new objective reflects the plans of Germany's governing coalition regarding the continued promotion of women and men in management positions. At the beginning of December 2014, the share of women on the Supervisory Board amounted to [25 per cent]. Broken down, the share of female shareholder representatives was [20 per cent] and the share of employee representatives was 30 per cent.

Impartiality of the Supervisory Board

In accordance with legal stipulations, the Supervisory Board of METRO AG is composed of ten employee representatives and ten shareholder representatives. At least five shareholder representatives are to be impartial in accordance with Subsection 5.4.2 of the German Corporate Governance Code. The current composition of the Supervisory Board of METRO AG fulfils this objective.

Accounting and Audit Committee, impartiality of the committee Chairman

To ensure a qualified appointment to the Accounting and Audit Committee from the members of the Supervisory Board, at least one member of the Board must fulfil the requirements stipulated for the chairperson of the Accounting and Audit Committee. Pursuant to the by-laws of the Accounting and Audit Committee, the committee chairperson must be impartial and possess professional knowledge in the areas of accounting and auditing as well as internal control measures (financial expert). The other committee members should possess sufficient professional knowledge and experience in these areas. Ideally, one potential member of the Accounting and Audit Committee should also possess special knowledge in the area of compliance.

These objectives are implemented through the current composition of the Supervisory Board and its Accounting and Audit Committee. The committee is chaired by Dr jur. Hans-Jürgen Schinzler.

Potential conflicts of interest on the Supervisory Board/age restrictions

To prevent potential conflicts of interest, members of the Supervisory Board of METRO AG may not assume board functions, consulting tasks or memberships on the supervisory boards of German or international, direct and material competitors. This requirement, which is laid down in the by-laws of the Supervisory Board, must be considered in the identification of candidates for the Supervisory Board. The same rule applies to another regulation in the by-laws that stipulates that members of the Supervisory Board may not remain in office, except in justified exceptional cases, after the end of the Annual General Meeting following their 75th birthday. The Supervisory Board decides what constitutes a justified exceptional case at its own discretion.

The Supervisory Board of METRO AG currently meets these objectives. No member of the Supervisory Board has passed the age limit of 75 years, and no member has a seat on the supervisory board of a direct and material competitor. One member of the Supervisory Board will turn 75 in 2015 and is to remain on the Board until the end of the Annual General Meeting that will formally approve the actions of the Management Board for financial year 2016/17. As a result, the Supervisory Board of METRO AG identified one justified exceptional case in the short financial year 2013. The Board determined that the in-depth knowledge and experience of the member in question were particularly valuable to the future work of the Supervisory Board.

Compliance and risk management

The activities of METRO GROUP are subject to various legal stipulations and self-imposed standards of conduct. METRO GROUP has bundled its measures securing compliance with these rules and regulations in its group-wide compliance management system.

The aim of the compliance management system is to systematically and sustainably prevent regulatory infringements within the company. METRO GROUP regularly identifies behavioural compliance risks, establishes the necessary organisational

structures and rigorously monitors and controls these risks through the responsible divisions. The company practises systematic group reporting. This ensures that the key compliance risks and measures are transparent and documented. The need for the further development of the compliance management system is ascertained from the results of regular employee surveys, internal reviews and audits.

METRO GROUP's risk management forms another integral component of value-oriented corporate management. This takes the form of a systematic, group-wide process that helps company management identify, assess and manage risks and opportunities. As such, risk and opportunity management is a uniform process. Risk management renders unfavourable developments and events transparent at an early stage and analyses their implications. This allows us to put the necessary countermeasures in place. At the same time, it allows us to systematically exploit emerging opportunities. Both the risk and opportunity management system and the compliance management system are continually refined.

In addition to these systems, further management systems include internal control systems (ICS) and internal auditing. In financial year 2013/14, METRO AG further modified its management systems. In addition, selected subsystems were tested to determine their effectiveness. The results of the reviews have confirmed that METRO GROUP has adequate management systems. The reviews also provide an important foundation for the continued improvement of the systems and their continuous modification in response to changing business processes in METRO GROUP.

For more information about the subjects of compliance and risk management, see the combined management report in chapter 12 Risk and opportunity report as well as the statement on corporate management pursuant to § 289 a of the German Commercial Code (HGB). The declaration is available on the website www.metrogroup.de in the section Company – Corporate Governance.

Transparent corporate management

Transparency is an essential element of good corporate governance. The website www.metrogroup.de serves as an important source of information for METRO AG shareholders, the capital market and the general public. Aside from a host of information on METRO GROUP's business segments and sales lines, the site contains the financial reports and ad hoc statements of METRO AG as well as investor news and other publications pursuant to the German Securities Trading Act (WpHG). METRO GROUP publishes the dates for the most important

regular publications and events (announcements of annual sales results, annual reports as well as quarterly and half-year reports, the annual business press conference and the Annual General Meeting) in a financial calendar on its website with a reasonable lead time. The website also offers information shown as part of annual business conferences, roadshows, investor conferences and information events for private investors. Furthermore, an electronic investor relations newsletter can be subscribed to.

The Annual General Meeting

The Annual General Meeting of METRO AG gives shareholders the opportunity to exercise their legal rights – in particular, to exercise their rights to vote (where these apply) as well as to address questions to the company's Management Board. To help shareholders exercise their individual rights at the Annual General Meeting, METRO AG posts documents and information for each Annual General Meeting in advance on its website.

The registration and legitimisation procedure for the Annual General Meetings of METRO AG complies with German stock corporation law and international standards. Each shareholder who would like to participate in an Annual General Meeting of METRO AG and exercise his or her voting right there must register and supply proof of the right to participate and exercise voting rights. Written proof of share ownership in German or English from the institution maintaining the securities deposit account satisfies this requirement. A deposit of shares is not necessary. Proof of share ownership corresponds to the beginning of the 21st day before each Annual General Meeting. Like the registration for the Annual General Meeting, it must be submitted to METRO AG at the address specified in the invitation within the time frame specified by law and in the Articles of Association. Concrete registration and participation conditions are made public in the invitation for each Annual General Meeting.

Shareholders who are unable to attend the Annual General Meeting in person may exercise their voting rights through a proxy. The necessary voting right authorisation must be provided in writing. To the benefit of shareholders, eased formal stipulations apply in certain cases. These are described in the invitation to the Annual General Meeting, for example, for issuing voting right authorisations to banks or shareholder associations.

Shareholders may also authorise company-appointed proxies to exercise their voting rights (known as proxy voting). The following rules apply: in addition to voting right authorisations,

shareholders must also provide instructions on how to exercise these voting rights. The proxies appointed by the company are obliged to vote according to these instructions. For the assignment of voting rights during the Annual General Meeting for those shareholders who initially participate in the Annual General Meeting but who want to leave early without forgoing the exercise of their voting rights, proxies appointed by METRO AG are also available. Naturally, the right to appoint other proxies to exercise one's voting rights is not affected by this. The details on proxy voting are listed in the invitation to each Annual General Meeting.

In the interest of shareholders, the Chairman of the Annual General Meeting, as a rule the Chairman of the Supervisory Board, works to ensure that the Annual General Meeting is conducted efficiently and effectively. The objective is to complete a regular METRO AG Annual General Meeting within four to six hours at the most.

Directors' dealings, share ownership by members of the Management and Supervisory Boards

Pursuant to §15a of the German Securities Trading Act (WpHG), members of the Management and Supervisory Boards must inform METRO AG of any transactions involving their own METRO shares or related financial instruments (directors' dealings). This obligation also applies to persons who have a close relationship with members of these two corporate bodies. No disclosure requirement applies as long as the transactions conducted by a member of the Board and the person who has a close relationship with the member of the Board do not reach a total amount of €5,000 by the end of the calendar year.

————— Notifications of directors' dealings during financial year 2013/14 have been published on the website www.metrogroup.de in the section Investor Relations – Legal Announcements.

The ownership of METRO AG shares held by all members of the Management and Supervisory Boards totalled less than 1 per cent of the shares issued by the company as of 30 September 2014.

Audit

Audits 2013/14

On 12 February 2014, the Annual General Meeting of METRO AG elected KPMG AG Wirtschaftsprüfungsgesellschaft (KPMG) to be the auditor for financial year 2013/14. The Supervisory Board's commissioning of the contract to carry out the accounts audit considered the recommendations listed in Sub-section 7.2 of the German Corporate Governance Code.

Throughout the audit, which was completed in November 2014, KPMG made no reports to the Supervisory Board regarding grounds for disqualification or conflicts. There was also no evidence that any existed. Furthermore, in the course of the audit, there were no unexpected substantial findings or events concerning Supervisory Board functions. As a result, an extraordinary report from the auditor to the Supervisory Board was not required. The auditor found no deviations from the Management and Supervisory Boards' statements of compliance with the German Corporate Governance Code.

Auditor's impartiality

The auditor fulfils two key functions. The auditor supports the Supervisory Board in exercising corporate control. In addition, the audit activities provide the basis for the trust of the general public and capital market participants, in particular, in the accuracy of the annual accounts, notes to the financial statements and the management reports. The auditor's impartiality is a key precondition of fulfilling these two functions. To strengthen the impartiality of METRO AG's auditor, the Management Board – after coordination with the Supervisory Board's Accounting and Audit Committee – decided – at the end of 2011 to introduce a voluntary commitment going beyond the legal regulations and recommendations of the German Corporate Governance Code. Under this commitment, the annual fees for non-audit services rendered by the elected auditor and the members of its network must amount to no more than one third of the total annual fee for the audit and audit-related services starting in 2012. The Management Board requires the approval of the Accounting and Audit Committee to commission or approve non-audit assignments exceeding this threshold.

————— For more information about the topic of corporate governance at METRO GROUP, see the website www.metrogroup.de in the section Company – Corporate Governance.

COMBINED MANAGEMENT REPORT

Overview of financial year 2013/14 and outlook

Earnings position

- Sales at METRO GROUP climbed by 1.3 per cent in financial year 2013/14, adjusted for portfolio changes and currency effects
- Reported sales for financial year 2013/14 decreased by 4.0 per cent to €63.0 billion (in local currency: –1.7 per cent).
- EBIT before special items: €1,727 million, (2012/13: €2,000 million; comparable prior-year figure: €1.7 billion)
- Net profit for the period before special items rose by 16.0 per cent to €673 million (2012/13: €580 million)
- Earnings per share before special items increased by 24.7 per cent to €1.84 (previous year €1.47)

Financial and asset position

- Net debt declined markedly by €0.7 billion to €4.7 billion (30/9/2013: €5.4 billion)
- Investments totalled €1,209 million (2012/13: €1,175 million)
- Cash flow from operating activities reached €2.0 billion (2012/13: €2.7 billion)
- Total assets amounted to €28.0 billion; (30/9/2013: €28.8 billion)
- Equity: €5.0 billion; (30/9/2013: €5.2 billion); equity ratio: 17.9 per cent (30/09/2013: 18.1 per cent)
- Long-term rating of BBB– (Standard & Poor's) and Baa3 (Moody's)

Outlook of METRO GROUP

The outlook is based on the current group structure and adjusted for currency effects. It also assumes a stable geopolitical situation.

Sales

For financial year 2014/15, METRO GROUP expects to see a slight rise in overall sales, despite the persistently challenging economic environment.

In like-for-like sales, METRO GROUP foresees a slight increase that will follow the reporting period's small rise of 0.1 per cent.

Earnings

In financial year 2014/15, earnings development will also be shaped by the persistently challenging economic environment.

Nevertheless, METRO GROUP is confident that it can again achieve a slight earnings increase as a result of the progress it has made and will continue to make in transforming its business models. In addition, METRO GROUP will again closely focus on efficient structures and strict cost management in 2014/15.

For these reasons, we expect EBIT before special items to rise slightly above the €1,727 million achieved in financial year 2013/14, including usual levels of income from real estate sales.

Change of financial year

In 2013, METRO GROUP moved the end of its financial year from 31 December to 30 September. For transition purposes, financial year 2013 was a nine-month short financial year (1 January 2013 to 30 September 2013). The current financial year 2013/14 from 1 October 2013 to 30 September 2014 is once again a normal twelve-month financial year.

To ensure comparability in the combined management report, the previous year's period refers to a twelve-month period for 2012/13 (1 October 2012 to 30 September 2013) which comprises the fourth quarter of 2012 as well as the short financial year 2013. Because the figures from the fourth quarter of 2012 were not reviewed by an auditor, the 2012/13 period is unaudited.

1. Group business model

METRO GROUP’s corporate structure is characterised by a clear division of responsibilities. The company is headed by METRO AG. As a central management holding company, it oversees group management functions, including, in particular, Finance, Controlling, Legal and Compliance. The central management and administrative functions for METRO Cash & Carry are formally anchored within METRO AG.

The group’s operational business is handled by our four sales lines. In some cases, the sales lines operate in the market with several sales brands or through subsidiaries, depending on the respective strategy, segment and specific competitive environment.

METRO Cash & Carry is responsible for the group’s wholesale business, Media-Saturn for consumer electronics retailing, Real for hypermarkets and Galeria Kaufhof for department stores. All sales lines have undivided responsibility for their entire value chain – from procurement to logistics to stationary and online sales.

So far, we have bundled our real estate capabilities, structures and functions in the service company METRO PROPERTIES. To ensure more efficient processes within our company, the operational real estate activities were integrated into the METRO GROUP sales lines on 1 October 2013. Real estate activities will therefore no longer be separately disclosed.

Service companies support all METRO GROUP sales lines with services in such areas as procurement, information technology and logistics. Together with METRO AG as a management holding, they are recognised under “Others”.

Overview of METRO GROUP

Overview of METRO GROUP

METRO Cash & Carry is a leading international player in self-service wholesale trade. Its brands METRO and MAKRO operate in 28 countries throughout Europe and Asia. The wholesale stores offer products and services tailored to the specific needs of professional customers, such as hotels and restaurants, catering firms, independent retailers, service providers and public authorities. In financial year 2013/14, both MAKRO Cash & Carry stores in Egypt were closed and an agreement concerning the sale of the wholesale business in Vietnam was signed. In addition, the sales line's withdrawal from Denmark was decided in October.

Media-Saturn is Europe's number one consumer electronics retailer. In nearly all 15 countries where the sales line is active, the stationary business of Media Markt and Saturn is closely dovetailed with the online offering. The pure online retailer Redcoon, in which Media-Saturn holds a 100 per cent stake, sells its products in eight countries. The online shops in Denmark and France were closed. In Russia, the online shop is operated by 003.ru. A decentralised organisational structure, attractive offers, dedicated employees and innovative marketing all contribute to the success of Media-Saturn.

Real is one of the leading hypermarket operators in Germany, where it runs both stationary stores and an online store. All Real hypermarkets are characterised by a large proportion of high-quality fresh produce, a wide range of non-food articles and attractive prices offering good value for money. The sales line's business operations in Turkey, which comprise twelve hypermarkets and its head office, were sold to the retailer Hacı Duran Beğendik in financial year 2013/14. The remaining Real hypermarket in Moscow was taken over by METRO Cash & Carry. The sales transaction in Poland was completed.

Galeria Kaufhof is the market leader in the department store segment in Germany and Belgium. In Germany, the sales line is active under the name Galeria Kaufhof, in Belgium it uses the name Galeria Inno. Its stores are characterised by high-performance assortments with international brands and top-quality own brands. Its stores' event-oriented product presentation provides for a special customer experience. Galeria Kaufhof is positioned as a modern retail brand with an unmistakable profile.

2. Management system

METRO GROUP's rigorous focus on creating added value for customers is also reflected in our internal management system. The primary objective is to create sustained value for the company by focusing on added value for customers. For this reason, METRO GROUP has been using value-oriented performance metrics since 2000 to plan, manage and monitor business activities. The corresponding value drivers that have a direct impact on value creation form the core of our operational management system. Our focus in this process is on growth (sales), operational efficiency (EBIT) and optimised capital deployment.

Please note that, in line with the formal specifications of German Accounting Standard No. 20 (GAS 20), only the most meaningful key performance indicators (sales growth as well as EBIT before special items) are part of the outlook and the comparison with actual business developments in the following year that is based on this outlook. Voluntary forecasts of other key figures will no longer be included in the outlook, but in the respective chapters of the combined management report, which are indicated in the following. Unless otherwise stated, the key figures in the consolidated financial statements, which are prepared pursuant to International Financial Reporting Standards (IFRS), are used.

Key performance indicators: earnings position

For METRO GROUP as a retail company, **sales growth** represents a key operational performance indicator. As a result, sales growth is one of the key metrics of METRO GROUP and is reported both as total sales in euros and as like-for-like sales. To enhance its assessments of operational developments, the Management Board also regularly informs itself about the key drivers of sales development, such as the online or delivery business.

Alongside sales growth, **EBIT before special items** is one of the group's key performance indicators. Adjustment for special items reflects a focus on operational developments and serves to enhance comparisons between the reporting periods.

For more information about special items, see chapter 4 Earnings position.

Earnings per share and profit or loss for the period are also included in METRO GROUP's key performance indicators. They integrate the tax and net financial result into management of the earnings position and enable shareholders to better assess the group's earnings position.

For more information about these performance metrics, see chapter 4 Earnings position.

Key performance indicators: financial and asset position

METRO GROUP manages its financial and asset position to ensure the long-term liquidity of group companies and cover their funding requirements in a cost-efficient manner.

For more information about the financial and asset position, see chapter 5 Financial and asset position.

Key performance indicators include investments, which are planned and reported on aggregate group level as well as separately for the sales lines. In addition, the Management Board conducts differentiated assessments of different investments (for example, expansion and online business) with a view to enhancing customer benefits and METRO GROUP's company value.

Aside from the focus on investments, regular **net working capital** analyses are carried out to maintain a focus on operations and optimised capital deployment.

For more information about the composition of net working capital, see the notes to the consolidated financial statements in no. 41 Notes to the cash flow statement.

Investments and net working capital not only impact customer benefits and the company's value creation, but also have an effect on the company's indebtedness and financial position. In this context, **cash flow before financing activities** and **net debt** serve as key performance indicators for liquidity and the capital structure.

For more information about these performance metrics, see chapter 5 Financial and asset position.

Value-oriented performance metrics

As METRO GROUP's management system is strongly focused on value creation for the company, it also comprises value-oriented key performance indicators such as **EBIT after cost of**

capital (EBITaC) and **return on capital employed (RoCE)**, which are based on the aforementioned operational key performance indicators.

For more information about these performance metrics, see chapter 4 Earnings position.

3. Macroeconomic and sector-specific parameters¹

Global economic momentum increased slightly during the past financial year. Following two years of economic crisis, recovery remained modest with several setbacks during the course of the year. More sustainable economic growth was hampered in particular by problems related to government debt. At 2.4 per cent, projected global economic output for 2014 is just marginally above the 2.3 per cent generated last year. Economic performance varied greatly in the developed world and emerging countries: while recovery was observable in the United States and the eurozone, economic momentum slowed considerably in many emerging countries. A key trigger for this was the US Federal Reserve Board's decision to gradually wind down its expansionary monetary policy in autumn of 2013, causing investors to withdraw funds from emerging countries. In addition, specific national problems resulted in slower economic growth in the respective countries.

At the same time, many political crises and conflicts intensified during the year, particularly in the Middle East. In Europe, the Ukraine conflict cast a long shadow over the political agenda. It led to significant economic problems in Ukraine and continued to negatively impact the already sluggish economic performance of Russia as well. The Russian economy was weakened as a whole by declining investor confidence and the sanctions imposed by the European Union and the United States.

The currencies of many emerging economies weakened substantially as investors withdrew funds and current account deficits climbed to high levels in some cases. The Ukrainian hryvnia lost more than half its value, while the currencies of Russia, Turkey and India declined over 10 per cent in value over the course of financial year 2013/14.

The falling value of these currencies resulted in an above-average increase in consumer prices, in particular in Russia, Turkey and India. By the end of the financial year, the increase in consumer prices in these countries was in the high single-digit range. By contrast, inflation in most European countries was below average in light of the ongoing muted economic growth overall. Consumer prices actually decreased in several countries. This was especially true of food prices: following record-breaking increases in the eurozone in 2012 and 2013, a decline of 1 per cent and thus a deflationary trend was registered at the end of the reporting year.

In terms of the regions in which METRO GROUP is active, growth in Germany continued to outpace that in other Western European countries. While most Western European countries were able to pull themselves out of the recession during the reporting period, high levels of government debt and the rocky path to consolidation continue to hinder dynamic growth. At the same time, recovery was very uneven.

Central European countries benefited from the slight recovery thanks to their economic ties to Western Europe and experienced somewhat stronger growth than in 2013. In contrast, the economic situation in the emerging countries of Eastern Europe was considerably more difficult, due in part to political crises. Economic momentum lagged behind the previous year's level particularly in Russia and Ukraine, but also in Turkey. The projected growth rate of just under 1 per cent for Central and Eastern Europe as a whole is therefore below the previous year's level yet again.

The highest growth rates were once again seen in the emerging countries of Asia. However, investors' withdrawal from these countries hurt economic growth there as well. Projected economic growth for this region as a whole in 2014 is just under 4 per cent, slightly below the previous year's level.

¹The numbers indicating the development of gross domestic product in the chapter Macroeconomic and sector-specific parameters represent the entire years of 2013 and 2014. As such, the figures for 2014 represent projections. Unless otherwise indicated, the qualitative statements in the text refer to the reporting period.

**Development of gross domestic product
in key global regions and Germany**

Percentage change year-on-year

	2013 ¹	2014 ²
World	2.3	2.4
Germany	0.1	1.3
Western Europe (excl. Germany)	-0.2	1.0
Eastern Europe	1.2	0.8
Asia	4.0	3.8

Source: Feri

¹ Previous year's figures may deviate from the Annual Report 2013
if final figures were not yet available at the reporting date

² Forecast

Below-average growth continues in consumer goods retailing

The impact of economic developments on retailing in the regions where METRO GROUP does business was varied. After two years of declining sales, the retail industry made a gradual recovery in Western Europe with a slight nominal plus of nearly 0.5 per cent in the past financial year. On a price-adjusted basis, sales were slightly higher as a result of declining retail prices on the whole. Nominal growth rates in the retail industry were indeed higher in Eastern Europe and Asia, with Asia once again posting the strongest growth. However, growth in both regions lagged behind the rates seen in the same period of the previous year. At the same time, sales were driven much more strongly by prices.

Germany

The German economy continued to outperform other Western European countries in the reporting period. After a dynamic first half of the year, the second half was marked by a slowdown. Overall, the economy is expected to grow 1.3 per cent in 2014 (previous year: +0.1 per cent). Unemployment continued to decline in comparison to the same period of the previous year, and disposable income generated solid growth. Real consumer purchasing power increased as a result of low inflation. This had a correspondingly positive impact on consumption and retailing. The retail industry generated nominal growth of nearly 2 per cent (real: approximately 1 per cent) in the reporting period and thus expanded at a somewhat faster pace than in the previous year. In addition, sales growth in food was still somewhat higher than growth in non-food.

Western Europe

Economic growth in Western Europe remained modest despite the gradual recovery. Following a downward trend in the previous year, gross domestic product is expected to increase by approximately 1 per cent in 2014. The unemployment rate only slowly declined in the reporting period from the record level reached in autumn 2013. Despite some exceptions, crisis-hit countries and more robust core markets continued to develop at different paces. Aside from Germany, the economy grew at an above-average rate, particularly in Sweden and Switzerland. In addition, the former crisis country of Spain performed very well, with an expected real increase in its gross domestic product of 1.5 per cent in 2014. In comparison, Italy's economy is expected to continue shrinking slightly, and France's economy barely generated any growth at all in 2014 as a result of structural problems.

As a result of slightly improved conditions, the retail industry in Western Europe generated a nominal gain of just under 0.5 per cent in the reporting period (2012/13: -1.0 per cent) in the reporting year. In most countries, the different economic development trends were also mirrored in the retail industry. In addition to Germany, the retail sector performed especially well in Austria and Sweden. The economic upswing made itself felt in Spain with a slight upturn in retail sales following several years of decline. By contrast, retail sales declined in France and Portugal, among other countries.

Eastern Europe

On the one hand, Eastern European countries benefited from the gradual recovery due to their economic ties to Western Europe. On the other, political and economic conditions deteriorated, in particular in Russia and Ukraine as a result of their political conflict. The Turkish economy also cooled noticeably in 2014. Overall, growth in Eastern Europe continues to fall short of its economic potential. Projected economic growth of just under 1 per cent for 2014 is once again just below the previous year's level (1.2 per cent). Poland and Hungary are performing exceptionally well, however, with expected growth rates of 3 per cent each. By contrast, economic performance is declining in Russia and Ukraine as well as – prospectively – in Croatia and Serbia and once again Greece. As a result, retail performance was particularly weak in Greece and Croatia. Russia and Turkey continued to record high nominal retail growth despite the economic downturn. However, increases in prices were also above average, meaning that growth was substantially lower in

real terms. Furthermore, the weakening of both countries' currencies against the euro reached double-digit figures in percentage terms. By contrast, retail sales developed positively in Hungary and Romania, even on a price-adjusted basis.

Asia/Africa

The emerging economies of Asia were once again the source of the greatest growth in the past financial year. The projected growth rate of just under 4 per cent for Asia is only slightly below the previous year's level. However, the emerging economies of Asia had to contend with weaker economic momentum. In China, another government stimulus programme shored up the economy and enabled growth to remain above 7 per cent. Solid growth of 1 per cent is forecast for Japan in 2014. A special development affecting consumption occurred in April when the value added tax was increased 3 percentage points from 5 per cent to 8 per cent. Prior to the increase, consumption and retail sales rose at an above-average rate and then decreased again afterwards. Over the course of the entire financial year, retail trade experienced above-average growth at a nominal rate of approximately 2 per cent.

Retail growth remained high in the emerging countries of Asia. In China, the retail business again grew by more than 10 per cent nominally during the past financial year. Other emerging economies in Asia also produced growth that nearly reached double-digit levels. But inflation hit high single-digit levels particularly in India and Pakistan, meaning that real sales were significantly lower.

Development of gross domestic product in METRO GROUP countries

¹Previous year's figures may deviate from the Annual Report 2013 if final figures were not yet available at the reporting date

²Forecast

METRO Cash & Carry: sector development in the cash-and-carry business

In terms of sales, METRO Cash & Carry is the global market leader in self-service wholesale. Although the sales line closed its operations in Egypt during the reporting period as part of the continual strategic portfolio optimisation process, its presence in 28 countries undisputedly gives it the highest degree of internationalisation worldwide.

In Germany, sales generated by the self-service wholesale trade during financial year 2013/14 remained at approximately the same level seen in the comparable prior-year period. The cash-and-carry segment performed slightly worse than food retailing as a whole, which was above the previous year's level. Increases in food prices are slowing, causing the positive momentum created by such trends for sector development to subside. METRO Cash & Carry remains the leader in the self-service wholesale trade in Germany. Its market share remained relatively unchanged in financial year 2013/14.

Sales in self-service wholesale trade in Western Europe decreased slightly during the reporting period. However, this decline was smaller than the decrease recorded in the previous year. Deflationary tendencies are also evident here in many cases, in particular in food prices. Development in the cash-and-carry segment in the individual countries was varied again. The crisis countries in the eurozone enjoyed a modest recovery in financial year 2013/14. The sales decline in self-service wholesale trade in Portugal and Spain, for example, lessened in comparison to the same period of the previous year.

In Eastern Europe, sales generated by self-service wholesale trade in local currency increased once again in financial year 2013/14. Overall, development in the region is very non-uniform due to the different economic conditions. Sales continue to grow in Poland and Turkey. In Ukraine, business has been hurt by the worsening political situation between Russia and Ukraine. Economic sanctions imposed against Russia are causing food prices to rise sharply. In conjunction with the slowdown in economic growth, the final quarter provided indicators for changes in food shopping behaviour. As a whole, however, sales in Russia continue to develop positively.

In Asia, growth in self-service wholesale trade continued in financial year 2013/14. With its expansion in the region, METRO Cash & Carry was once again the growth driver in the sector and increased its market share in the reporting period. China and India are the main focal points of METRO Cash & Carry's strategic expansion. Thanks to the continued low market concentration found in many countries and the higher number of small, traditional retailers, the region continues to exhibit tremendous growth potential. In India, METRO Cash & Carry has little international competition due to the existing restrictions on foreign retailing activities on the Indian market.

Media-Saturn: sector development in consumer electronics retailing

The Media-Saturn group of companies maintained its leading position among consumer electronics stores in Europe during financial year 2013/14 and further increased its market share. The sales line is focusing in particular on generating growth via multichannel sales and so-called online pure play concepts.

Following a weak Christmas quarter, the German consumer electronics retailing segment gained significant momentum from January onwards, growing more than 3 per cent during the reporting period. As expected, major sports events such as the Olympic Games and the FIFA World Cup had a positive impact, in particular on the entertainment electronics product groups TV and audio.

The economic upswing in the overall economy in the first half of the reporting period fuelled growth for IT product groups. However, this momentum was stronger in the business-to-business segment and thus of less relevance to the speciality centre segment.

In Southern Europe, sales generated by the consumer electronics stores remained non-uniform. In particular, the Iberian countries, whose economies were under pressure for a long period of time, returned to a growth path in the past financial year. Greece has almost been able to halt its downward spiral, while Italy is still grappling with significant market contractions.

The situation in Eastern Europe is also varied: while Hungary has enjoyed continuous double-digit growth rates for months now, electronics stores in Russia and Poland are currently down approximately 2 per cent and 1 per cent, respectively.

In comparison, Turkey benefited from the current instability in neighbouring countries and generated double-digit growth rates.

The other, more saturated markets in Belgium, the Netherlands, Austria and Switzerland contracted slightly, while the market in Sweden generated slight growth.

Real: sector development in the food retail business

On a price-adjusted basis, the food retail business in Germany regressed in the first half of financial year 2013/14. Key factors in this development included in particular decreasing customer frequency as well as a shift in the Easter business from March to April. On a price-adjusted basis, sales at large-area supermarkets likewise declined during the first half of financial year 2013/14. At the same time, sales also declined at Real.

In the second half of the financial year, sales in the food retail business, particularly in the segment of fast moving consumer goods (FMCG), rose at a higher rate than the otherwise moderate price increases. This is also the case for large consumer stores.

Following the successful sale of Real Turkey and the executed sale of its business in Poland, Real is now exclusively focusing on the still highly competitive German market.

Galeria Kaufhof: sector development in the department store business

Sales in the department store segment in Germany rose in financial year 2013/14 for the first time in years. By contrast, textile and clothing sales, the focal points of the department stores, declined slightly overall as a result of the weak development in the fourth quarter.

The conflicting market trend taken by different sales channels continued in the reporting period. While mail-order sales continued to rise significantly as a result of online sales in the textile and clothing market, sales produced by stationary stores continued to decline.

In Belgium, the market environment remained challenging due to the economic crisis.

4. Earnings position

Overview of group business development

In financial year 2013/14, METRO GROUP sales, adjusted for portfolio and currency effects, grew by 1.3 per cent. Like-for-like sales also grew, increasing slightly by 0.1 per cent. Significantly negative currency and portfolio effects, especially through the disposal of Real Eastern Europe, led to a 4.0 per cent decline in sales to €63.0 billion.

Group EBIT reached a total of €1,273 million in financial year 2013/14. EBIT before special items totalled €1,727 million.

Comparison of outlook with actual business developments

Sales

For financial year 2013/14, METRO GROUP, adjusted for portfolio changes and based on the assumption of nearly consistent exchange rates, forecast a slight rise in overall sales. With an increase of 1.3 per cent, METRO GROUP exceeded this target.

In like-for-like sales, METRO GROUP expected a trend improvement and a level of sales that would roughly equal the previous year's level. With a 0.1 per cent increase in like-for-like sales, this target was met.

For the sales lines METRO Cash & Carry and Media-Saturn, a slight gain in total sales measured in local currency was forecast. This guidance was met, as sales rose by 2.0 per cent and 0.8 per cent, respectively. On a like-for-like basis, sales in both sales lines were expected to remain at the previous year's level. While METRO Cash & Carry boosted like-for-like sales by 1.0 per cent, these fell slightly by 0.9 per cent at Media-Saturn. At Real Germany and Galeria Kaufhof, like-for-like sales were also expected to remain at the previous year's level. This figure declined slightly by 0.9 per cent at Real Germany and climbed by 0.5 per cent at Galeria Kaufhof.

EBIT

For EBIT before special items, METRO GROUP had forecast a distinct increase compared with the previous year's €1.7 billion based on the assumption that exchange rates would remain virtually unchanged. The target was later specified at

€1.75 billion at unchanged exchange rates. METRO GROUP's actual EBIT before special items reached €1,727 million. The impact of markedly negative currency effects totalled €82 million. Furthermore, income from real estate made a positive contribution to earnings. As a result, METRO GROUP hit its target.

As forecast, EBIT before special items was largely determined by METRO Cash & Carry and Media-Saturn. Earnings at Media-Saturn rose sharply. In line with projections, the comparable earnings of METRO Cash & Carry rose slightly. As forecast, Real also achieved a slight increase due to income from real estate. Galeria Kaufhof almost achieved the previous year's figure with a similar earnings level.

Sales and earnings development

In financial year 2013/14, group sales totalled €63.0 billion, 4.0 per cent below the previous year's level (2012/13: €65.7 billion). Sales declined by 1.7 per cent in local currency. The decrease primarily resulted from the disposal of Real in Eastern Europe. Adjusted for portfolio changes and currency effects, sales rose by 1.3 per cent. Like-for-like sales rose by 0.1 per cent.

In **Germany**, sales fell slightly by 0.6 per cent to €25.5 billion (2012/13: €25.6 billion).

In **international business**, sales adjusted for portfolio changes and currency effects rose by 2.5 per cent. However, as a result of negative currency effects and portfolio changes, sales fell by 6.2 per cent to €37.6 billion. The decrease primarily resulted from the disposal of Real in Eastern Europe.

The international share of total sales declined from 61.0 per cent to 59.6 per cent.

Sales in **Western Europe (excluding Germany)** declined slightly by 0.6 per cent to €19.1 billion (in local currency: -0.4 per cent). This was largely the result of developments in Belgium, the Netherlands and Denmark. By contrast, the development in Spain was very pleasing.

Sales in **Eastern Europe** adjusted for currency effects and portfolio changes increased by 4.6 per cent. In particular, Russia and Turkey contributed strongly to this rise. But as a result of currency effects and the disposal of Real Eastern Europe, sales fell considerably by 14.1 per cent to €14.8 billion. Sales declined by 6.5 per cent in local currency.

The **Asia/Africa** region continued to generate strong growth. Adjusted for portfolio changes and currency effects, sales climbed by 7.8 per cent. As a result of the closure of business operations in Egypt and currency effects, sales rose only by 1.0 per cent to €3.7 billion. However, they rose by 6.2 per cent in local currency. As a result, Asia/Africa is the fastest-growing region at METRO GROUP.

During financial year 2013/14, EBIT at METRO GROUP totalled €1,273 million, a total of €415 million below the previous year's level (2012/13: €1,688 million). This figure contains special items amounting to €454 million (2012/13: €313 million). These special items can be broken down into portfolio changes totalling €19 million (in particular from METRO Cash & Carry's withdrawal from the Danish market as well as the divestment of Real Turkey and Real Eastern Europe), restructuring and efficiency improvement measures totalling €264 million (primarily the planned closures at Real and restructurings at METRO Cash & Carry in Belgium and the Netherlands as well as at Real and Media-Saturn), impairment losses on goodwill totalling €88 million (affects METRO Cash & Carry in the Netherlands) as well as other special items totalling €83 million.

Special items are non-recurring transactions such as restructuring or changes to the group portfolio. Reporting before special items better reflects the company's operating performance and thus renders the earnings presentation more meaningful.

— An overview including the reconciliation of special items can be found on pages 92 and 93.

In financial year 2013/14, EBIT before special items at METRO GROUP fell from €2,000 million to €1,727 million. In this regard, it should, however, be noted that the comparable result from the previous year totalled about €1.7 billion. The lower comparable figure for the previous year was adjusted for unusually high income from real estate disposals and earnings contributions from portfolio changes. In addition, earnings were hurt during the reporting period by negative currency effects totalling €82 million.

Sales and earnings development of the sales lines

METRO Cash & Carry

Like-for-like sales at METRO Cash & Carry rose by 1.0 per cent during financial year 2013/14. As a result of very negative currency effects, sales fell by 2.1 per cent to €30.5 billion. However, sales rose by 2.0 per cent in local currency.

Sales generated by the delivery business continued to show a dynamic development, climbing by 9.5 per cent to €2.8 billion (2012/13: €2.5 billion). In local currency, sales even rose by 13.6 per cent. The sales share of own brands continued to rise. In financial year 2013/14, this share rose from 16.8 per cent in the previous year to 17.0 per cent.

In **Germany**, sales decreased slightly by 0.4 per cent to €4.8 billion during financial year 2013/14 (like-for-like -0.3 per cent). A slight trend reversal occurred during the financial year thanks to the success of a modified product range.

In **Western Europe (excluding Germany)**, sales in financial year 2013/14 declined slightly by 1.1 per cent to €10.5 billion (2012/13: €10.7 billion). Like-for-like sales declined by 1.5 per cent. While sales in the Netherlands, Denmark and Belgium declined markedly, sales trends in France and Spain were positive.

In **Eastern Europe**, sales fell by 5.0 per cent to €11.4 billion due to distinctly negative currency effects. However, sales rose markedly in local currency, gaining 4.2 per cent. Like-for-like sales also rose markedly by 2.9 per cent. In Russia, like-for-like sales continued to climb sharply in spite of the difficult political situation and rose by nearly a double-digit percentage. By contrast, Ukraine saw a decline in sales. The recovery continued in Poland, where like-for-like sales increased markedly. The sales trend in Turkey was also very positive.

Sales in **Asia/Africa** totalled €3.7 billion, an increase of 2.5 per cent. Exchange rates had a negative impact here as well. Sales rose by 7.9 per cent in local currency. Like-for-like sales also climbed sharply in virtually all countries and rose by 4.4 per cent in the region. India performed well, recording double-digit growth in like-for-like sales. China also showed a positive development.

² Before special items

Sales of METRO Cash & Carry 2013/14
by region

In financial year 2013/14, the share of international business in the total sales of METRO Cash & Carry fell slightly from 84.5 per cent to 84.2 per cent as a result of currency effects.

EBIT at METRO Cash & Carry totalled €904 million in financial year 2013/14 (2012/13: €1,205 million). This figure includes special items of €221 million. The largest individual item was non-cash impairment of goodwill at METRO Cash & Carry in the Netherlands (€88 million). The figure also includes portfolio measures as well as restructuring and closing costs that involve a large number of individual measures. These are primarily related to the withdrawal from the Danish market as well as restructurings in Belgium and the Netherlands. EBIT before special items amounted to €1,125 million (2012/13: €1,379 million). This decline was mainly the result of the lack of earnings from the real estate transaction in France in the previous year's period as well as negative currency effects. Adjusted for these effects, earnings before special items improved.

On 30 September 2014, METRO Cash & Carry operated 766 stores located in 28 countries. Of these stores, 107 were in Germany, 238 in Western Europe (excluding Germany), 290 in Eastern Europe and 131 in Asia.

Media-Saturn

Sales of Media-Saturn grew by 0.8 per cent in local currency in financial year 2013/14. In euros, they fell slightly by 0.3 per cent to €21.0 billion. Like-for-like sales declined by 0.9 per cent. A significant trend improvement occurred as the financial year progressed. In addition to successful marketing campaigns launched, among others, as part of the football World Cup, rising multichannel sales contributed to this positive reversal.

Online sales continued to grow dynamically. These sales increased by nearly 30 per cent to €1.4 billion during financial year 2013/14 and achieved 6.9 per cent of total sales.

In **Germany**, sales totalled €9.8 billion during financial year 2013/14 and were therefore slightly below the previous year's level. Like-for-like sales declined by 1.9 per cent. However, trends improved considerably as the year progressed. In addition to positive stationary sales, the increased multichannel sales of Media-Saturn contributed to this turnaround.

Customer demand for the multichannel offering remains very strong. The online product range was expanded once again. At the end of September 2014, it consisted of nearly 66,000 items at mediamarkt.de and more than 49,000 at saturn.de. The in-store pick-up rate was about 40 per cent.

Sales of Media-Saturn 2013/14
 by region

In **Western Europe (excluding Germany)**, sales rose by 0.2 per cent to €8.4 billion. In local currency, sales increased by 0.5 per cent compared with the previous year's level. Like-for-like sales decreased only marginally. In many countries, additional market share was captured. Like-for-like sales declined in Sweden and Italy. But they rose in Spain, Portugal, the Netherlands and Switzerland.

In **Eastern Europe**, sales rose slightly by 0.4 per cent to €2.8 billion. They were softened in particular by negative exchange rate effects. In local currency, however, sales rose steeply by 8.8 per cent. Here, too, sales trends became very positive as the year progressed. Like-for-like sales rose by 0.7 per cent. In this area, Hungary and Turkey performed extremely well, generating double-digit gains.

The **international share of sales** was unchanged at 53.3 per cent during financial year 2013/14.

EBIT at Media-Saturn climbed to €244 million (2012/13: €184 million). This figure includes special items of €91 million. These items involved numerous restructuring and efficiency improvement measures, particularly in Germany. EBIT before special items climbed sharply from €299 million to €335 million. Sales-related declines in earnings were compensated through cost savings and margin improvements. In addition, the required risk provisions came in lower compared with the previous year and positively impacted earnings.

On 30 September 2014, Media-Saturn had 986 consumer electronics stores in 15 countries, including 415 in Germany, 367 in Western Europe (excluding Germany) and 204 in Eastern Europe.

Real

Sales at Real fell by 18.7 per cent to €8.4 billion during financial year 2013/14 due to the disposal of Real Eastern Europe (in local currency: –18.3 per cent). Like-for-like sales, in turn, declined by just 0.8 per cent.

In **Germany**, sales fell by 1.3 per cent to €7.9 billion. The like-for-like decline was 0.9 per cent. Trends improved as the year progressed. Real's improved positioning played a major role in this business, which is known for its aggressive pricing. In particular, Real's refurbished stores developed positively.

The sales share of own brand products continued to increase during financial year 2013/14, rising from 16.1 per cent to 16.3 per cent.

Sales in **Eastern Europe** dropped by 78.8 per cent to €0.5 billion as a result of the disposal of Real Eastern Europe.

Sales of Real 2013/14

by region

EBIT at Real totalled €19 million during financial year 2013/14 (2012/13: €224 million). This included special items of €62 million relating almost exclusively to the closure of stores in Germany and the disposal of Real Turkey. By contrast, a special item resulting from the disposal of Real Eastern Europe had the opposite effect. EBIT before special items amounted to €81 million, compared with €145 million in the previous year's period. This decline was largely due to the loss of earnings contributions from Real's divested business in Eastern Europe. In Germany, EBIT before special items rose, largely due to earnings contributions from real estate transactions.

On 30 September 2014, Real had a total of 307 hypermarkets in Germany and 4 in Romania.

Galeria Kaufhof

Sales of Galeria Kaufhof rose by 0.5 per cent to €3.1 billion during financial year 2013/14. Like-for-like sales also grew by 0.5 per cent.

In **Germany**, sales of Galeria Kaufhof totalled €2.9 billion, an increase of 0.7 per cent compared with the previous year's figure. Like-for-like sales rose by 0.8 per cent. In addition to the department store's attractive product range, the sales growth in online retail also contributed to the increase. The online operations developed very positively. Galeria.de and sportarena.de boosted sales by 64 per cent to €63 million during financial year 2013/14.

Key figures Galeria Kaufhof 2013/14

in year-on-year comparison

	9M 2013 € million	12M 2012/13 € million	12M 2013/14 € million	Change in % compared with the previous year's period

¹ Revised presentation (for more information, see the notes to the group accounting principles and methods); the comparative periods have been adjusted accordingly

² Before special items

In **Western Europe (excluding Germany)**, sales fell by 2.8 per cent to €0.2 billion. This was largely the result of a slight decline in the Belgian textile market.

EBIT at Galeria Kaufhof totalled €193 million during financial year 2013/14 (2012/13: €214 million). EBIT before special items also amounted to €193 million (2012/13: €229 million). Among other things, the decline was due to income from real estate transactions in the same period of the previous year.

As of 30 September 2014, the store network of Galeria Kaufhof comprised 137 department stores: 122 locations in Germany and 15 in Belgium.

Sales of Galeria Kaufhof 2013/14
 by region

Others

The Others segment comprises, among others, METRO AG as the management holding company of METRO GROUP, the procurement organisation in Hong Kong, which also operates on behalf of third parties, as well as logistics services and real estate activities of METRO PROPERTIES, which are not attributed to any sales lines. These include speciality centres, warehouses and head offices.

In financial year 2013/14, sales in the Others segment totalled €10 million (2012/13: €14 million). Among others, sales included commissions from third-party business via METRO GROUP's procurement organisation in Hong Kong.

EBIT totalled €-91 million in financial year 2013/14 (2012/13: €-145 million). This figure includes positive special items totalling €85 million (2012/13: €91 million). Among other things, this comprises risk provisions for legal disputes. EBIT before special items improved significantly from €-54 million to €-6 million. This turnaround primarily was the result of increased income from real estate transactions. Individual office properties at the Düsseldorf headquarters was sold at the end of June. The timing for such a transaction was very favourable due to the positive development of the real estate market.

Net financial result and taxes

€ million	9M 2013	12M 2012/13	12M 2013/14
Earnings before interest and taxes EBIT	703	1,688	1,273
Result from associates and joint ventures	6	6	9
Other investment result	7	19	78
Interest income/expenses (interest result)	-365	-517	-409
Other net financial result	-162	-148	-242
Financial result	-514	-640	-564
Earnings before taxes EBT	189	1,048	709
Income taxes	-260	-990	-527
Profit or loss for the period	-71	58	182

Financial result

The financial result primarily comprises the interest result of €-409 million (2012/13: €-517 million) and the other financial result of €-242 million (2012/13: €-148 million). The interest result improved thanks largely to the repayment of high-interest debt that was then refinanced at lower rates and reduced debt. The change in the other financial result of €-94 million was caused primarily by negative currency effects that had been recognised as equity outside of profit or loss up to now and that are recognised in profit or loss as a result of the disposal of subsidiaries and in the year the subsidiary's business activities were discontinued. These currency effects were recognised as special factors and amount to about €-122 million in the current financial year, which can be primarily attributed to Real Turkey and Real Poland. The corresponding total from the previous year of €-66 million primarily involved Real Russia and Real Romania. Furthermore, income of €62 million from the disposal of a 9 per cent stake in Booker Group PLC impacted the other investment result.

For more information about the financial result, see the notes to the consolidated financial statements in no. 6 Result from associates and joint ventures, no. 7 Other investment result, no. 8 Net interest income/interest expenses and no. 9 Other net financial result.

Taxes

The rise in recognised tax expenses from 9M 2013 to 12M 2013/14 was primarily caused by the increased pre-tax result in the reporting year compared with the short financial year 2013 and can largely be attributed to the sales lines Media-Saturn and METRO Cash & Carry.

The decline in income tax expenses reported in the above table from 12M 2012/13 to 12M 2013/14 is a calculated value that results from adding the tax expenses of the fourth quarter of the 2012 calendar year to the tax expenses of the nine-month short financial year. For systemic reasons, however, comparability is limited. A detailed actual tax calculation for the twelve-month comparable period is not available. For this reason, a detailed itemisation of the tax positions for the twelve-month comparable period is not possible in the following table.

€ million	9M 2013	12M 2013/14
Actual tax	232	496
thereof Germany	[67]	[128]
thereof international	[165]	[368]
thereof tax expenses/income of current period	[240]	[473]
thereof tax expenses/income of previous periods	[–8]	[23]
Deferred taxes	28	31
thereof Germany	[–9]	[43]
thereof international	[37]	[–12]
	260	527

Compared with the previous year, deferred taxes on balance only changed insignificantly.

In the reporting period, the group tax rate stood at 74.32 per cent (9M 2013: 137.81 per cent). Adjusted for special items, the rate amounted to 45.41 per cent (9M 2013: 94.50 per cent). The group tax rate represents the relationship between recognised income tax expenses and earnings before taxes. The major difference between the reported tax rate and the tax rate adjusted for special items largely results from the fact that the expenses related to the special items generally have no corresponding tax effect (in particular, expenses related to portfolio changes as well as impairment losses on goodwill at METRO Cash & Carry in the Netherlands).

For more information about income taxes, see the notes to the consolidated financial statements in no. 11 Income taxes.

Profit or loss for the period and earnings per share

Profit for the period in financial year 2013/14 totalled €182 million, an increase of €124 million over the previous year's result (2012/13: €58 million). Net of non-controlling interests, profit for the period attributable to the shareholders

of METRO AG totalled €127 million (2012/13: €–35 million). This represents a significant improvement of €162 million.

Profit for the period included special items totalling €491 million (2012/13: €522 million). As a result, profit for the period adjusted for these special items stood at €673 million (2012/13: €580 million).

In financial year 2013/14, METRO GROUP improved its earnings per share to €0.39 (2012/13: €–0.11). The calculation for the reporting period continued to be based on a weighted number of 326,787,529 shares. Profit for the period attributable to the shareholders of METRO AG of €127 million was distributed according to this number of shares. There was no dilution from so-called potential shares in financial year 2013/14 or in the previous year.

Earnings per share before special items totalled €1.84 (2012/13: €1.47). This result forms the basis for the dividend recommendation.

Value-based management

METRO GROUP's strength is reflected, among other things, in its ability to continuously increase the company's value through growth and operational efficiency as well as optimal capital deployment. METRO GROUP has also been using value-oriented performance metrics which draw on operational key

performance indicators since 2000 to ensure the company's sustained value creation. Since 2009, we have measured the value contribution in terms of EBITaC (EBIT after cost of capital). Under the EBITaC concept, a positive value contribution is achieved when earnings before interest and taxes exceed the cost of capital needed to finance the average capital employed.

$$\begin{aligned}\text{EBITaC} &= \text{EBIT}^1 - \text{cost of capital} \\ &= \text{EBIT}^1 - (\text{capital employed} \times \text{WACC}^2)\end{aligned}$$

¹ Special items generally periodised over four years

² WACC = weighted average cost of capital

The use of the performance metric EBITaC generally enables METRO GROUP to focus on the key drivers of the operating business that management can influence: value-adding growth, increases in operational efficiency and optimisation of capital employed. Value-adding growth is achieved through our strategy of focusing on like-for-like sales growth in the company's existing markets, complementing the stationary business through targeted new sales channels such as online retail and delivery services as well as accelerating its expansion in select countries. In each case, our customers are at the core of our thinking and acting. As part of the expansion strategy, we have now added India to the list of key expansion countries for our wholesale business. The other countries are Russia, China and Turkey. In addition, we continue to implement measures to ensure operational and administrative efficiency and are forging ahead with the optimisation of capital deployment. We are achieving this latter goal by taking such steps as offering tailored solutions for individual customer target groups. In this work, customer-focused product group management based on specific needs in terms of product range, price groups, packaging and marketing plays a key role.

The cost of capital reflects the expected remuneration of investors for the capital they provide and for their investment risk before taxes. It is calculated by multiplying the average capital employed by the weighted average cost of capital before taxes (WACC).

The cost of capital before taxes is calculated on the basis of capital market models. It corresponds to the minimum return on capital demanded by capital providers. As such, it reflects the total cost of capital employed and thus consists of equity and debt capital costs. In financial year 2013/14, METRO GROUP's cost of capital before taxes amounted to 9.0 per cent. This is calculated on the basis of an aggregation of segment-specific cost of capital.

Capital employed represents interest-carrying assets. It comprises segment assets plus cash and cash equivalents less trade liabilities as well as other operational liabilities and deferred income. We use an average capital employed calculated from quarterly financial statements in order to also consider developments in capital employed that occur during the relevant period.

In the calculation of EBITaC, special items are generally distributed over four years on a straight-line basis and considered in EBIT. As the respective positive EBIT effects largely arise with a time lag to expenses, the distribution of these special items over several years provides for an improved presentation of operating performance. As a result, short-term special effects do not fully impact earnings during the period in which they occur.

€ million	2012/13 ¹	2013/14	Delta
EBIT before special items	2,000	1,727	-273
EBIT after periodisation of special items ²	1,680	1,376	-304
Capital employed	15,076	13,579	-1,497
WACC before taxes	9.0%	9.0%	
Cost of capital	-1,357	-1,222	135
EBITaC	323	153	-170

¹ Previous year adjusted for comparability reasons

² The effect of the special items is spread over four years

In 2013/14, EBIT after periodisation of special items from previous years (2010/11: €177 million, 2011/12: €463 million, 2012/13: €313 million) and periodised one-time expenses from 2013/14 totalling €454 million amounted to €1,376 million. Given an average capital employed of €13,579 million, the cost of capital amounted to €1,222 million. Despite the slow pace of the economy, METRO GROUP successfully deployed its capital in 2013/14 and achieved a positive EBITaC of €153 million. The decrease was due in particular to the decline of income from real estate transactions as part of the transformation of the real estate strategy, the loss of earnings contributions resulting from the disposal of Real's business in Eastern Europe and negative currency effects.

Alongside EBITaC, the metric return on capital employed (RoCE) is used for the purpose of better comparability of the individual segments. RoCE measures the return on business assets deployed during the review period. For the purpose of this segment comparison, business assets also include cash

rental values to account for the different ownership structures of real estate assets. METRO GROUP bases its calculation of RoCE on EBIT before special items because it adequately reflects the units' operational earnings strength independent of special effects.

$\text{RoCE} = \text{EBIT}^1 / \text{business assets including cash rental values}$

¹ EBIT before special items

RoCE is contrasted with the segment-specific capital cost rate before taxes as the latter represents a market-oriented minimum rate of interest on capital employed based on capital market models.

The results of the EBITaC and RoCE analysis are used, among other things, for the management of METRO GROUP's portfolio as well as for the allocation of investment funds. Medium-to-long-term effects on value creation are the key factors determining the allocation of investment funds. As a result, the present value of future value added represents the key criterion for all investments within METRO GROUP. In order to also consider tax aspects in decisions on future expansion, value added after taxes is calculated. Additional criteria used to assess investment projects include in particular discounted cash flow and the cash recovery period as liquidity-based key performance metrics. As part of the continuously strong prioritisation during the allocation process of investment funds, profitability metrics relating to the funds deployed are used in addition to strategic relevance to assess alternative investment projects.

Financial management

Principles and objectives of financial activities

The financial management of METRO GROUP ensures the permanent liquidity of the company, reduces financial risks where economically feasible and grants loans to group companies. These activities are monitored and performed centrally by METRO AG for the group through guarantees and letters of comfort. The objective is to ensure that group companies can cover their funding requirements in a cost-efficient manner and, where possible, via the international capital markets. This applies to operating activities as well as to investments. As a matter of principle, METRO AG bases its selection of financial products on the maturities of the underlying transactions.

Intra-group cash pooling reduces the amount of debt and optimises the money market and capital market investments of METRO GROUP, which has a positive effect on the interest result. Cash pooling allows the surplus liquidity of individual group companies to be used to internally fund other group companies. METRO GROUP's financial activities are based on a financial budget for the group, which covers all relevant companies and is updated monthly. In addition, METRO AG provides a 14-day liquidity plan.

METRO AG's current long-term investment grade rating of BBB-/Baa3 and short-term rating of A-3/P-3 support access to capital markets.

Capital market access is supported by an intensive dialogue with bond investors and credit analysts. Our Creditor Relations team also presents our company to all key European financial markets during its annual roadshow. In addition, investors and analysts can learn about METRO GROUP's high-performance capabilities in face-to-face meetings and tours.

The following principles apply to all group-wide financial activities:

Financial unity

By presenting a single face to the financial markets, the group can optimise financial market conditions.

Financial leeway

In our relationships with banks and other business partners in the financial arena, we consistently maintain our leeway with regard to financial decisions in order to stay independent. In the context of our bank policy, limits have been defined to ensure that the group can replace one financing partner with another at any time.

Centralised risk management

We conduct financial transactions to cover our financing requirements and hedge risks related to underlying business transactions. METRO GROUP's total financial portfolio is centrally controlled by METRO AG.

Centralised risk monitoring

Changes in financial parameters, such as interest rate or exchange rate fluctuations, can impact the financing activities of METRO GROUP. Associated risks are regularly quantified in the context of scenario analyses. Open risk positions – for example, financial transactions without an underlying business transaction – may be concluded only after the appropriate approval has been granted by the Management Board of METRO AG.

Exclusively authorised contractual partners

METRO GROUP conducts financial transactions only with contractual partners who have been authorised by METRO AG. The creditworthiness of these contractual partners is tracked on a daily basis based on their ratings and the monitoring of their credit risk ratios (essentially credit default swap analyses). On this basis, the Treasury Controlling unit of METRO AG continuously monitors adherence to the authorised limits.

Approval requirement

As a matter of principle, all financial transactions of METRO GROUP companies are conducted with METRO AG. In cases where this is not possible for legal reasons, these transactions are concluded on behalf of the group company or directly between the group company and an external financial partner in coordination with METRO AG.

Audit security

The two-signature principle applies within our company. All processes and responsibilities are laid down in group-wide guidelines. The conclusion of financial transactions is separated from settlement and controlling in organisational terms.

For more information about the risks stemming from financial instruments and hedge accounting, see the notes to the consolidated financial statements in no. 43 Management of financial risks.

Ratings

Ratings evaluate the ability of a company to meet its financial obligations. They communicate the creditworthiness of a company to potential debt capital investors. In addition, ratings facilitate access to international capital markets. METRO AG has commissioned the two leading international rating agencies – Moody's and Standard & Poor's – to continuously analyse METRO GROUP's creditworthiness.

The development of METRO GROUP's long- and short-term ratings over the past five years is depicted in the following graph:

The current METRO GROUP ratings awarded by Moody's and Standard & Poor's are as follows:

2014		
Category	Moody's	Standard & Poor's
Long-term	Baa3	BBB-
Short-term	P-3	A-3
Outlook	stable	stable

Based on these ratings, METRO GROUP has access to all financial markets.

Financing measures

The company's medium- and long-term financing needs are covered by an ongoing capital market issuance programme with a maximum volume of €6 billion. In financial year 2013/14, we conducted no new transactions in the context of this programme. The €500 million bond that matured in November 2013 and the €600 million bond that matured in July 2014 were repaid according to schedule.

As of 30 September 2014, a total of €3.4 billion was utilised from the ongoing issuance programme.

Short-term financing requirements are covered through the Euro Commercial Paper Programme and a commercial paper programme geared especially to French investors. Both programmes have a maximum volume of €2 billion each. The average amount utilised from both programmes during the reporting period was €782 million. As of 30 September 2014, the used volume totalled approximately €938 million.

In addition, METRO GROUP used bilateral lines of credit totalling €865 million as of 30 September 2014.

For more information about financing programmes and lines of credit, see the notes to the consolidated financial statements in no. 36 Financial liabilities.

Aside from the established issuance programmes, the company had access to sufficient liquidity via comprehensive, generally multi-year lines of credit at all times. These are listed in the following table.

Unutilised lines of credit of METRO GROUP

€ million	30/9/2013

Total unutilised lines of credit	3,090	40	3,051

Investments/divestments

In financial year 2013/14, METRO GROUP invested €1,209 million and thus €34 million more than in the same period of the previous year. Despite reduced expansion activities, investments increased overall, mainly due to concept and modernisation measures, a major real estate transaction at Real and the acquisition of a real estate object at Galeria Kaufhof, which is leading to a consolidation of the property. Among other things, 50 hypermarkets were refurbished as part of the Big Bang project at Real in order to better cater to customer needs. The reduced expansion activities are reflected in a smaller number of 68 store openings including additions compared with 91 store openings in the previous year's period.

¹ Revised presentation (for more information, see the Notes to the group accounting principles and methods); the comparative periods have been adjusted accordingly

In financial year 2013/14, **METRO Cash & Carry** invested €441 million and thus €63 million less than in the previous year's period. The significant decline in investments is, alongside currency effects, the result of reduced expansion activities (17 new store openings including takeovers in 2013/14 compared with 31 new openings in 2012/13). The expansion activities continued to focus on China and Russia, where 10 and 3 new METRO Cash & Carry stores, respectively, were added to the existing store network. 1 new METRO Cash & Carry store each was opened in India and Turkey; 2 new stores were opened in Belgium. 1 store was closed in China, and 2 were closed in Egypt.

In financial year 2013/14, investments of **Media-Saturn** amounted to €244 million, €32 million less than in the previous year's period. The decline in investments can be primarily attributed to reduced investments in the expansion of the store network. During the reporting period, 50 new stores were opened (previous year: 54). The focus of the expansion was on Eastern Europe, where 28 new consumer electronics stores were opened. In this region, 14 new stores were opened in Russia and 9 new stores were opened in Turkey. 5 new stores were added in Poland. In Western Europe (excluding Germany), the store network was expanded by 10 stores: 4 in the Netherlands and 2 each in Belgium, Italy and Spain. 12 stores were opened in Germany. In addition, 12 stores were closed during the financial year. In Turkey, 4 stores were closed. In addition, 2 stores each were closed in the Netherlands, Sweden and Germany. 1 store each was closed in Russia and Belgium.

Real invested €172 million in financial year 2013/14, €56 million more than in the previous year's period. The increase in investment was mainly due to the acquisition of three hypermarkets in Germany that had previously been rented. The invested funds were also used to advance the business model through concept changes. After the move in Essen, the most state-of-the-art Real hypermarket in Germany opened its doors in October 2013. The new concept implemented at the store introduced a broader assortment with a larger share of fresh produce from the region

alongside a diverse product range. During the financial year, 50 additional hypermarkets were transformed according to this new concept. In financial year 2013/14, Real expanded its store network by 1 store in Germany and disposed of a total of 74 stores. This concerned the disposal of Real Poland (57 stores) and Real Turkey (12 stores). In Germany, 4 stores were closed. The remaining Real hypermarket in Moscow was transferred to METRO Cash & Carry.

Investments at **Galeria Kaufhof** totalled €208 million in the reporting period, an increase of €111 million over the previous year's period. This marked increase in investments can be primarily attributed to the additional purchase of a stake in a store, which led to consolidation. In addition, the investments primarily involved concept and modernisation measures. In financial year 2013/14, no new stores were opened and no existing department stores were closed.

Investments in the **Others** segment totalled €144 million in financial year 2013/14 (2012/13: €181 million). The investments were largely attributable to intangible assets and business and office equipment. In addition, investments were made through the exercise of purchasing rights and further real estate transactions.

Investment obligations incurred for the acquisition of property, plant and equipment, intangible assets and investment properties amounted to €129 million.

For more information about this, see the notes to the consolidated financial statements in no. 19 Other intangible assets, no. 20 Property, plant and equipment and no. 21 Investment properties.

From divestments, METRO GROUP received cash and cash equivalents amounting to €534 million, which stemmed primarily from the disposal of shares in Booker Group PLC (€244 million) as well as the sale of individual office properties at METRO GROUP headquarters in Düsseldorf (€187 million).

For more information about divestments, see the cash flow statement in the consolidated financial statements as well as the notes to the consolidated financial statements in no. 41 Notes to the cash flow statement.

Liquidity (cash flow statement)

METRO GROUP's liquidity is calculated on the basis of the cash flow statement. The cash flow statement serves to calculate and display the cash flows that METRO GROUP generated or employed in the financial year from operating, investing and financing activities. In addition, it shows the total change in cash and cash equivalents between the beginning and end of the financial year.

Cash inflow from operating activities in financial year 2013/14 amounted to €2,008 million (2012/13: €+2,667 million). Investing activities led to cash outflow of €715 million (2012/13: €+721 million). Compared with the previous year's period, this represents a decrease in cash flow before financing activities of €2,095 million to €1,293 million. The cash flow from financing activities totalled €1,448 million (2012/13: €–2,814 million).

For more information about divestments, see the cash flow statement in the consolidated financial statements as well as the notes to the consolidated financial statements in no. 41 Notes to the cash flow statement.

LIABILITIES

- E** Trade payables (current) **G** Debt capital (non-current)
F Other debt capital (current) **H** Equity

As of 30 September 2014, METRO GROUP's balance sheet showed equity of €5.0 billion (30/9/2013: €5.2 billion). This reduction was largely due to the change in the reserves retained from earnings. They have declined by €191 million since 30 September 2013. The decrease was mainly the result of the remeasurement of defined benefit pension plans. The increase in other reserves retained from earnings, which largely stemmed from profit for the period, had a positive impact. The equity ratio stood at 17.9 per cent (30/9/2013: 18.1 per cent). The share of reserves retained from earnings in equity totalled 32.0 per cent compared with 34.4 per cent on 30 September 2013.

€ million	Note no.	30/9/2013	30/9/2014
Equity	31	5,206	4,999
Share capital	835		835
Capital reserve	2,551		2,551
Reserves retained from earnings	1,793		1,602
Non-controlling interests	27		11

Net debt improved significantly by €736 million to €4.7 billion as of 30 September 2014 (30/9/2013: €5.4 billion). This is calculated by netting borrowings, including finance leases of €7.1 billion (30/9/2013: €8.0 billion) with cash and cash equivalents according to the balance sheet of €2.4 billion (30/9/2013: €2.6 billion) as well as monetary investments of €7 million (30/9/2013: €8 million).

€ million	30/9/2013	30/9/2014
Cash and cash equivalents according to the balance sheet	2,564	2,406
Monetary investments > 3 months < 1 year ¹	8	7
Borrowings (incl. finance leases)	7,963	7,068
Net debt	5,391	4,655

¹ Shown in the balance sheet under Other financial and non-financial assets (current)

As of 30 September 2014, non-current liabilities amounted to €6.9 billion (30/9/2013: €8.0 billion) and were thus reduced by €1.1 billion. This was primarily achieved by reducing non-current borrowings by €1.3 billion (30/9/2014: €4.5 billion; 30/9/2013: €5.8 billion). The decline largely stems from the reclassification of a bond with a nominal volume of €1 billion that matures in March 2015 to short-term financial investments as well as the reclassification of liabilities to banks at METRO Cash & Carry Vietnam totalling approximately €97 million to liabilities related to assets held for sale. The opposite effect was produced by the €176 million increase in provisions for pensions and similar obligations to €1.7 billion (30/9/2013: €1.5 billion). This was in some cases caused by significantly lower actuarial interest rates, which led to an increase in pension obligations.

As of 30 September 2014, METRO GROUP had current liabilities totalling €16.1 billion (30/9/2013: €15.6 billion). The increase can primarily be attributed to the €415 million rise in current borrowings (30/9/2014: €2.6 billion; 30/9/2013: €2.2 billion). The increase compared with 30 September 2013 is largely attributable to the reclassification of a bond with a nominal volume of €1 billion that matures in March 2015 from non-current to current borrowings as well as a €555 million increase in the commercial paper programme. The redemption of two bonds with a total nominal volume of €1.1 billion had a very positive effect.

Compared with 30 September 2013, the debt ratio increased by 0.2 percentage points to 82.1 per cent. Current liabilities accounted for 69.9 per cent of total debt compared with 66.1 per cent as of 30 September 2013.

For more information about the maturity, currency and interest rate structure of financial liabilities as well as the lines of credit, see the notes to the consolidated financial statements in no. 36 Financial liabilities.

€ million	Note no.	30/9/2013	30/9/2014

Borrowings	34, 36	2,200	2,615
Other financial and non-financial liabilities	34, 37	2,531	2,528
Income tax liabilities	34	181	198
Liabilities related to assets held for sale	30	264	198

For more information about the development of liabilities, see the notes to the consolidated financial statements in the numbers listed in the table. Information about contingent liabilities and other financial liabilities can be found in the notes to the consolidated financial statements in no. 44 Contingent liabilities and no. 45 Other financial liabilities.

Asset position

In financial year 2013/14, total assets decreased by €807 million to €28.0 billion (30/9/2013: €28.8 billion).

In financial year 2013/14, non-current assets declined by €1.0 billion to €15.6 billion, primarily due to a reduction in property, plant and equipment of €684 million to €10.0 billion (30/9/2013: €10.7 billion). This reduction is attributable to negative currency effects particularly in Russia and Ukraine, the disposal of property, plant and equipment as well as re-classifications to assets held for sale. In addition, long-term financial investments were €248 million lower than in the previous year (30/9/2014: €71 million; 30/9/2013: €319 million). This decline essentially resulted from the disposal of 9 per cent of the company's shares in Booker Group PLC. These shares were gained as part of the agreement regarding the sale of METRO GROUP's wholesale business in the United Kingdom. In addition, goodwill impairment losses related to METRO Cash & Carry in the Netherlands of €88 million also caused goodwill to decline (30/9/2014: €3.7 billion; 30/9/2013: €3.8 billion).

Non-current assets

€ million	Note no.	30/9/2013	30/9/2014
Non-current assets		16,646	15,572
Goodwill	18	3,763	3,671
Other intangible assets	19	393	380
Property, plant and equipment	20	10,709	10,025
Investment properties	21	156	223
Financial investments	22	319	71
Investments accounted for using the equity method	22	132	95
Other financial and non-financial assets	23	337	272
Deferred tax assets	24	837	835

For more information about the development of non-current assets, see the notes to the consolidated financial statements in the numbers listed in the table.

Current assets rose by €267 million to €12.4 billion. This increase is largely due to the €235 million increase in the item other financial and non-financial assets (30/9/2014: €2.8 billion; 30/9/2013: €2.6 billion). In particular, the main reason for this gain was the higher amount of receivables due from suppliers and the significant increase in entitlements to value added tax refunds. In addition, assets held for sale increased by €168 million to €460 million (30/9/2013: €292 million). This was mainly the result of the reclassification of assets held by METRO Cash & Carry Vietnam to this item as well as the first-time recognition of ten properties used by the Real sales line that were immediately recognised in assets held for sale given the intention to sell these in the near future. The deconsolidation of Real's business in Poland had a negative effect.

Current assets

€ million	Note no.	30/9/2013	30/9/2014

Assets held for sale	30	292	460

For more information about the development of current assets, see the notes to the consolidated financial statements in the numbers listed in the table.

Overall statement by the Management Board of METRO AG on the business development and situation of METRO GROUP

For METRO GROUP, financial year 2013/14 was a particularly challenging one. This was due largely to geopolitical events. Nonetheless, the Management Board can look back at a successful year overall. The transformation of METRO GROUP was successfully continued and our efforts to focus our portfolio progressed well. In addition, we could further reduce our debt level.

Overall, the Management Board is very pleased with the company's performance, especially because all communicated goals for METRO GROUP were achieved. As a result, we will propose a dividend to our shareholders once again.

We believe we are well prepared for the Christmas business and have started financial year 2014/15 on an optimistic note.

6. Employees

Sustainable human resource policies

It is the goal of our company to ensure that it produces long-term growth in sales and earnings. To achieve this goal, we need dedicated employees who bring our strategy to life on the job every day, and, above all, create added value for our customers. One thing is certain: METRO GROUP can only grow if we support our employees. Our human resource strategy focuses on two key aspects: on human resource management, which includes employee recruitment, retention and development, and on occupational safety and health management. Our objective is to attract the very best employees, to support them in accordance with their drive and abilities, and to strengthen their long-term connection to our company. By taking this approach, we are determined to become an employer of choice among current and future employees.

Recruiting employees

In the competition for the most highly skilled employees and executives, we take steps to polish our image among potential applicants. Our initial training and trainee programmes give young people the opportunity to join METRO GROUP.

Initial training at METRO GROUP

With a vocational training rate – including interns and students – of 7.7 per cent (2012/13: 7.8 per cent), we are one of Germany's largest training providers. We also provide young people an opportunity to enter the world of retail in other countries where our sales lines do business. During the reporting period, our company had a total of 9,109 trainees around the world (2012/13: 9,262). This represented a decline of 1.7 per cent.

In Germany, we hired 2,247 new trainees during the reporting period. The total number of our trainees during the reporting period was 6,745 (2012/13: 6,917). This was a 2.5 per cent decline from the same period of the previous year. We focus on needs-based training with the aim of hiring a large number of trainees at the end of the programme. Together with our Group Works Council, we defined this objective in a group works agreement governing the hiring of trainees that was completed during the past financial year. In this agreement, management and the Group Works Council agreed that trainees who complete the programme with a positive aptitude assessment will

generally be hired for permanent, full-time positions. The individual companies of METRO GROUP defined their own specific requirements and possible exceptions. In the reporting period, 60.4 per cent (2012/13: 61.4 per cent) of trainees who completed the programme subsequently received an employment contract. We also profit from the good performance of our young staff: after all, 95.0 per cent (2012/13: 94.9 per cent) successfully completed their training programme in the reporting period. In July 2014, five trainees at Media-Saturn even received the Bavarian State Prize for outstanding performance.

In addition to traditional training content, we also teach our young employees how to quickly take on responsibility and become involved in social causes. One such activity is the "Zu schade für die Tonne" (Too good for the trash) project initiated by our Real sales line. In more than 30 hypermarkets, trainees conducted a campaign to reduce food waste. Trainees at the Real store in Iserlohn launched a Mother's Day campaign as well as an 18-day customer rally to raise awareness for fair-trade products. Their creativity and efforts earned them third place in the "FABI – Deutschlands fairste Azubis" (FABI - Germany's fairest trainees) competition conducted by the non-profit organisation TransFair.

In addition to dual vocational training, we offer young people the opportunity to attend a dual course of study with practical modules. During the 2013/14 reporting period, 295 students in Germany were enrolled in nine degree programmes.

METRO Potentials

After conducting assessment centres in the summer of 2014, METRO Cash & Carry launched the METRO Potentials programme in all 28 countries where the sales line does business in October 2014. The programme targets the best university graduates and young professionals worldwide who have two to three years of career experience at METRO Cash & Carry or other companies. Its aim is to develop a sufficient supply of future managers and executives. During the two-year trainee programme, participants broaden their knowledge in various hands-on projects. They are also coached by their local mentor, a member of the responsible country management. Trainees complete various stations in their own country and abroad as well as at headquarters in Düsseldorf. After completing the programme, they are able to assume a management position, such as store manager. But the career path can go far beyond that, up to a position in country management.

Employer brand and personnel marketing

To enhance our profile among job applicants, we have partnered at the central level with universities and organisations such as the international student association Enactus. By contributing funds and ideas, we play a role in the scholarship programme AccountingTalents at the University of Münster, which recognises outstanding work performed by students in the areas of accounting and controlling. METRO GROUP promotes dialogue with students and graduates through the career network "careerloft". Through this programme, we support members in finding internships and offer exclusive events organised in conjunction with our sales lines.

In 2013, METRO GROUP created a company profile in the XING social network. The page's 2,244 subscribers (2012/13: 1,418) are continuously informed about group news and job openings.

Our sales lines also conduct their own personnel marketing measures. One example are the career information events that Real offers at schools. The hypermarkets also take part in national campaign days such as Girls' Day and Boys' Day: in the 2013/14 reporting period, about 400 young people took a look behind the scenes at the company for an entire day and learned about various training opportunities. To recruit young people, Real also takes advantage of a number of other channels. These include broadcasting national radio commercials in Germany, providing information about training on own-brand products and adding content to the sales line's Facebook page.

During the reporting period, Media-Saturn also participated in Girls' Day once again. The group of companies provided information in particular about the technical jobs available in information technology (IT). In February 2014, the sales line's IT company promoted itself as an employer at the CeBIT computer expo in Hanover. In March 2014, the Saturn sales brand launched a new personnel marketing campaign called "Meine Welt. Mein Beruf." (My world. My career.): in it, Saturn employees tell their stories. The campaign comprises such communication media as a new career website, flyers and posters, and supports the consumer electronics store in its search for staff.

At Galeria Kaufhof, recruiting activities focus on the needs of individual target groups and regions. In the Munich area, for instance, a movie ad was developed with the aim of piquing the

interest of younger target groups in retail training positions. In addition, the microsite Wir-lieben-ecommerce.de, which was launched in July 2014, is aimed especially at applicants who are interested in new technology, multichannel marketing and online shopping. It is intended to raise this Internet-savvy group's awareness of Galeria Kaufhof as a modern employer.

During the reporting period, our biggest sales line, METRO Cash & Carry, developed a uniform international employer brand for the first time in its 50-year history. The brand is based on the wholesaler's new brand positioning and is also being creatively implemented as part of the YOU & METRO claim. By taking this approach, METRO Cash & Carry is boosting its image as an employer and can ensure a uniform image with consistent messages worldwide. Employees of the company are at the heart of the campaign. They explain what features distinguish METRO Cash & Carry as an employer, what kind of people the sales line is looking for, what it expects of employees and what it offers in return. A total of more than 30 advertising images as well as an image film were created.

Employer of choice

Independent rankings confirm the appeal of METRO GROUP as an employer in Germany and abroad. For instance, MAKRO Cash & Carry Belgium and MAKRO Cash & Carry Spain were once again named Top Employers during the reporting period, while METRO Cash & Carry Italy earned the honour for the first time. MAKRO Cash & Carry Spain was also awarded the Great Place to Work seal. METRO Cash & Carry India is one of its country's best employers, according to the study India's Best Companies to Work For 2014. The Galeria Kaufhof sales line also demonstrated its attractiveness by being recognised with the distinction Top Employer.

Media-Saturn's Italian subsidiary was named Top Employer Italy 2014 for the second time after earning the title for the first time in 2013. It also earned tenth place in the 2014 Great Place to Work competition. In addition, Media-Saturn's Ingolstadt location was given the distinction Fair Company by the online portal karriere.de.

Employee retention

Our remuneration models provide incentives for employees and managers to perform and to carry out their work in accordance with our guiding principles. Our systematic succession planning enables our skilled employees and managers to develop attractive careers within METRO GROUP.

Performance-based compensation for executives

Our PERFORM & REWARD remuneration system comprises a fixed monthly base salary and variable compensation components whose total is tied to our company's business performance. The total amount of variable compensation is determined in part by the individual's role in creating customer value and his or her efforts to practice the guiding principles of our company in their daily work.

Remuneration principles

The remuneration model for the approximately 600 top executives of METRO GROUP worldwide is based on the following four principles:

- Fair and consistent compensation
- Performance-based pay
- Market-driven and appropriate salaries
- Encouragement of role model behaviour

The primary elements of our remuneration model are the base salary, one-year variable compensation and multi-year variable compensation. As with the compensation of the Management Board, the first tranche of the new sustainable performance plan was allotted during the reporting period. We also introduced a green car policy during the reporting period, which, besides capping the CO₂ emissions of the company's vehicle fleet, also offers alternative mobility concepts. Unused funds in the car leasing budget can be converted into pension benefits. In addition, we provide our top executives with a company pension scheme that includes both contribution-based and performance-based components.

During the reporting period, we began to apply these remuneration principles to the compensation of other managers. Among other things, a specialist career model that also applies these principles is being developed for Germany. Plans also call for this prototype to be adapted and implemented internationally.

For more information about the remuneration system, see chapter 9 Remuneration report.

Performance reviews and succession planning

At METRO GROUP, systematic executive development is a central responsibility of the companies' general management teams as well as of the strategic management holding company, METRO AG. By taking this approach, we ensure that the skills and abilities of our managers are consistently aligned with the requirements and strategic objectives of our company. It also allows us to systematically offer international career paths to our executives – regardless of the sales line or segment in which they work. Moreover, our career planning processes enable us to identify the right candidates for key positions in the company and to support them. As a result, we can fill vacancies from our own ranks. In the reporting period, the in-house succession rate for the senior management level – in particular the managing directors of group companies as well as divisional heads of METRO AG – was 88 per cent.

Individual job performance reviews

Once a year, we conduct an individual job performance review with our top managers as part of the RESULTS & GROWTH process. The objective of these reviews is to better measure progress and abilities as well as to create a culture of feedback that focuses on individual job performance and professional growth. At the beginning of each financial year, priorities are defined as a way of providing direction. These goals are reviewed during a half-yearly interview and modified when necessary. The job performance review is held at the end of each financial year. This meeting includes a feedback interview that covers both the achievement of priorities and observance of the guiding principles.

Systematic succession planning

As part of the Leadership Talent Review (LTR) process, succession planning is conducted for our core positions once a year. During this review, we examine the skills, abilities and experience of every potential succession candidate and rate these individuals according to the particular responsibilities of the positions. The process ensures that we identify and support suitable candidates for key positions at an early stage. During a subsequent professional development evaluation, employees and their supervisors jointly create a career development plan and determine targeted measures. As a result, the Leadership Talent Review acts as something more than a succession planning tool. It also serves as a long-term development process for our candidates for top positions in our company. This process is supported through other methods such as the development centre and 360-degree feedback meetings. These indicate the development potential each employee possesses.

Executive development

With the goal of supporting the personal development of our employees, talented employees can be nominated for the development centre, where their strengths and areas for improvement are assessed. Based on this assessment, they are asked to create their own plan for development.

We select the candidates for the Excellence, Impact and Connect programmes for executive development according to the decisions made during the systematic succession planning process. Each of these programmes is designed to address the varying needs of the groups of participants. Some of the facilitators are members of our top management. We also bring in well-known international trainers in order to ensure that our instruction and discussions reflect the latest developments and case studies. These external partners include the Business School for the World (INSEAD) in France and Ashridge Business School in England. During the reporting period, more than 100 future and current managers took part in the programmes.

As part of the activities celebrating the 50th anniversary of METRO Cash & Carry, our sales line conducted the Crossing Borders initiative for the first time in 2014. This initiative is specifically designed for the managers of tomorrow. The 50 participants traded jobs for 50 days. Employees from the country headquarters, for example, worked in a store in another country in order to learn about operations there. Conversely, store employees gained insight into administrative work. This real-world change in perspective in a host country gave participants the opportunity to develop both personally and professionally.

Employee turnover rate

During the reporting period, average job tenure rose by 0.5 years to 9.5 years. The group-wide turnover rate totalled 17.5 per cent (2012/13: 18.1 per cent). In Germany, the turnover rate was 8.6 per cent (2012/13: 7.7 per cent). Turnover rates varied widely according to region. The development of the fluctuation rates by region are shown in the following graphic for comparison.

METRO GROUP turnover rate
by region

Further training for employees

METRO GROUP is determined to promote lifelong learning among its staff as a way of responding to current and future challenges in retailing. The following training methods are used in our company:

E-learning is the most effective way to train a large number of learners. Today, most of the sales lines as well as various METRO GROUP companies use this method to provide instruction on product knowledge, product presentation and sustainability. More than one million modules in 40 different languages have been completed since 2009.

Seminars allow interactive communication with other participants and are ideal for smaller groups that are led by an experienced trainer. This method is applied to convey in-depth knowledge, hone skills, rehearse behaviour and profit from personal feedback. Increasingly, local trainers conduct on-site seminars to ensure a high degree of practical relevance.

On-the-job training is conducted locally at the respective workplace and places the instructional content in the actual business context. This involves the transfer of newly acquired knowledge, new skills and conduct to daily workflows.

Webinars are a virtual form of seminars. The content is communicated online through presentations, demonstrations and discussions. This form of training aims to provide information about standards and processes and to encourage participants to contribute their own comments.

At METRO Cash & Carry, for example, the House of Learning is responsible for employee development programmes. Since its founding in 2004, it has continuously expanded its programmes and adapted them to the needs of daily business. The focus is on the qualification of employees and managers who work in sales, purchasing, marketing and finance. During the reporting period, METRO Cash & Carry conducted a total of 333,709 e-learning courses with 247,636 participants and 327,562 participant hours. In addition, 34,770 seminars or on-the-job training sessions were completed by 299,796 participants in over 2,312,563 participant hours. In total, there were 369,376 training sessions with 550,827 participants and 2,646,203 participant hours.

The training content of the House of Learning is comprised of the corporate strategy, successful activities and guiding principles of METRO Cash & Carry. There are a total of six teams of experts for management skills, marketing, operations, purchasing, systems and finance. The experts develop the training solutions together with didactics specialists. In addition to the methods described above, the House of Learning team continuously explores new training concepts, including self-organised learning environments, educational games and simulations. Moreover, the unit pursues the goal of establishing a learning culture within METRO GROUP by, among other things, creating an open learning platform.

The other sales lines also invest in further training for their employees. At Real, for example, another 58 employees successfully completed the programmes offered by the German Chamber of Commerce and Industry that qualified them as specially trained employees for quality baked goods or for fresh fish and seafood delicacies. At the end of the reporting period, around 600 Real employees had taken part in the two qualification programmes.

Media-Saturn's e-learning programme that offers product and technical training to store employees was nominated for the Human Resources Excellence Award – one of the most prominent honours for human resource management in Germany – in the knowledge management category and achieved second place in December 2013.

Embedding the guiding principles

During the reporting period, the process of cultural transformation was advanced in particular by METRO Cash & Carry. The goal is to increase value for customers. The effort is based on the guiding principles developed in 2012:

- Customer orientation
- Global entrepreneurship
- Success through excellence
- Trust in our people
- Authentic leadership
- Sustainability

During the reporting period, these guiding principles were further integrated into personnel programmes and processes as part of employee development. By taking this approach, we provide support to the company's new direction with the aim of creating a corporate culture characterised by mutual support, individual responsibility and personal growth.

As part of Leadership for Growth workshops conducted by METRO Cash & Carry, around 91,000 employees and managers from 26 countries talked about cultural change. All of the employees in 18 national subsidiaries completed the workshop – from top managers to store employees. This is the first step in the change process. The aim of Leadership for Growth is to hone the ability of each individual employee to manage himself or herself and to create the necessary conditions for cultural change.

In the next step, twelve national subsidiaries of METRO Cash & Carry started the follow-up workshop Leadership for Growth 2 for managers in administrative positions and stores during the reporting period. The workshop focuses on developing management skills that effectively improve cross-departmental collaboration. Twelve additional national subsidiaries plan to begin conducting the workshops in the next few months.

The company's other sales lines are also systematically working to shape and fuel cultural change. At Real, for instance, managers in administrative positions and hypermarkets are participating in Leadership for Growth workshops as well. Galeria Kaufhof, on the other hand, actively supports employees during the sales line's transformation from purely stationary to multichannel sales. To this end, more than 1,000 training sessions were held between July and November 2014. They aimed to pique employees' interest in the topic of multichannel sales and train employees to use tablets to advise customers according to their needs.

Employee commitment

One critically important element in our effort to measure our staff's morale and commitment to our company is the global employee survey that we regularly conduct in the countries where METRO Cash & Carry does business, in the cross-divisional service companies and in the headquarters. As part of the follow-up process, executives obtain in-depth insights into the survey results, discuss these with their teams and develop measures to improve employee commitment. In the reporting period, the data were collected for the seventh time. In the company units that were surveyed, 87 per cent of employees responded to the questionnaire. A total of 100,000 employees participated – more than ever before. The results of this effort: since the last survey, the commitment score has increased from 66 per cent to 72 per cent and was thus significantly above the 58 per cent Global Retail Benchmark of Aon Hewitt. This score shows the share of employees that are committed to the company. Commitment means that these employees are proud of their company and speak positively about it, they are loyal, feel a connection to the company and demonstrate above-average levels of dedication. The positive trend can be attributed to both an intensive succession process and to the group-wide initiatives we use to increasingly promote a focus on innovative ideas and encourage the recognition of our staff.

Occupational safety and health management

METRO GROUP places high priority on ensuring fair working conditions for all employees. Occupational safety and health management are fundamental to this effort. In a personnel-intensive industry like retail, prevention, safety and health are essential – and we take action accordingly within clear and efficient structures. A specific organisational structure for occupational health and safety (OHS) has been defined for all METRO Cash & Carry countries, to be achieved through such measures as the designation of an Occupational Health and Safety Officer. The countries are working on implementation. The principle of acting as locally as possible is retained here. METRO AG initiates OHS projects that are of interest across multiple companies and countries. For example, an SAP system developed by Real that documents workplace accidents was adapted for international use. This system facilitates the identification of the primary causes of accidents and possible training needs. During the reporting period, the system was introduced in twelve countries where METRO

Cash & Carry does business. In all other countries that use SAP, implementation is in progress.

At the national level, a decline in accidents was recorded during the reporting period compared with the same period of the previous year. The 1,000-person rate for METRO GROUP companies in Germany was 23.45 for financial year 2013/14. This figure shows the relative frequency of accidents per 1,000 full-time equivalents. In total, 2,177 accidents were reported.

In the operating business and under the leadership of the Global Store Sales department, which is responsible for delivery service and store solutions, the OHS organisation of METRO AG is assisting in the development of a pioneering new cashier desk model for METRO Cash & Carry wholesale stores. It combines productivity and customer orientation with ergonomic aspects. Specific strains on employees have been considered during development. The model is currently being tested in selected countries.

METRO GROUP has launched a range of projects to assess the risks of psychological stress in the working world: Real is working with the Dresden University of Technology and the trade and logistics guild Berufsgenossenschaft Handel und Warendistribution to develop the "Gesunde Arbeit im Handel" (Healthy work in retail) project. The pilot phase is currently under way.

MIB METRO GROUP Insurance Broker GmbH carried out a risk assessment regarding psychological stress using the simplified psychological stress method for its employees at the Düsseldorf location. The results offer a good working basis with an initial step that defines possible fields of action. MIB shared the results of its risk assessment with the other group companies in order to offer them access to possible solutions.

Stress prevention continues to be a focus at Galeria Kaufhof. Managers play a key role when it comes to creating a good working climate as well as maintaining performance and motivation up to retirement age. For this reason, the company offers managerial seminars on such subjects as "Gesundes Führen" (Healthy management).

Another objective of METRO GROUP in the context of occupational safety and health management activities is to address the growing demands of the working world and demographic trends. In this context, METRO Cash & Carry Germany and the German Sport University Cologne are working on a project

called “Gestaltung von alter(n)sgerechten Arbeitsplätzen” (Designing age-appropriate workplaces). As part of this project, the workplaces in the Incoming Goods department were analysed and fields of action defined. Seven stores are currently undergoing a six-week intervention phase in which the implementation of defined recommendations is being tested.

Other examples of OHS initiatives can be found in many countries of the METRO GROUP, including France, where a survey regarding the psychological stress of employees was conducted. The results will be incorporated into management training. An external psychological emergency team was established. Prevention guidelines that consider individual physical risks are being prepared for each job and each store.

Diversity management

METRO GROUP is one of the leading international retail and wholesale companies. Our employees are just as diverse as our customers, stores and suppliers. During the reporting period, people from 170 countries worked for METRO GROUP. The average age of our workforce was 38.7 years (2012/13: 38.2). We also open the way for older workers to participate in the working world. During the reporting period, METRO GROUP hired 861 full-time equivalents (2012/13: 717) in the 50-plus age group. Internationally, the total was 974 (2012/13: 1,027) employees. The share of members of the workforce in this age group totalled 20.0 per cent (2012/13: 18.8 per cent). In Germany, they made up 34.5 per cent (2012/13: 33.0 per cent). During the reporting period, we also employed 6,082 (2012/13: 5,883) people whose level of disability is recognised as severe in Germany. As a result, the rate exceeds the minimum legal requirement of 5 per cent. Our company also works to support the long-term provision of training positions for people with disabilities: in one reflection of this effort, our sales lines began in 2007 to promote the “Verzahnte Ausbildung mit Berufsbildungswerken” (Integrated Training with Vocational Education Centres) project organised by the “Bundesarbeitsgemeinschaft der Berufsbildungswerke” (German Association of Vocational Education Centres). This programme makes it possible for young people with disabilities to receive occupational training.

Since July 2014, Galeria Kaufhof has worked in cooperation with vocational training centres to allow people who are unable to carry out their previous jobs to re-enter the workforce. Our sales line enables participants to complete the practical por-

tion of their retraining to become retail sales specialists in the department stores.

Our Real sales line has also directed its attention to young people who have been unable to find a training position or are not fully prepared to assume such a position, who have learning difficulties or are socially disadvantaged. They are given the opportunity to take part in a company job-entry qualification “Einstiegsqualifizierung, EQ” programme. This is a national occupational orientation programme in Germany that is part of the National Pact for Career Training and Skilled Manpower Development. The young people get acquainted with working life over a period of six to twelve months. The initial qualification programme serves to open doors to a training position or job. During the reporting period, more than 70 young people at Real took part in the EQ programme. About 50 per cent began an apprenticeship position after having completed the programme.

In addition, many Media Markt and Saturn consumer electronics stores are cooperating with the German Federal Employment Agency to, for example, support young people by providing job-entry qualification programmes while they become integrated into the vocational process.

During the reporting period, METRO GROUP refined its strategy for promoting inclusion and diversity. Our company strives to take a leading position in this area within the trade industry. As part of this effort, we are initially concentrating on our METRO Cash & Carry sales line, which operates 766 stores in 28 countries. The goal is conscious recognition and appreciation of varying needs so that employees are able to commit themselves to the company and a wide range of resources can be employed. The strategic approach consists of the elements Lead, Link and Live. The Lead element targets the activities of managers, who are to promote inclusion and diversity within the organisation and live these principles in their leadership style. The Link approach connects worldwide programmes with the activities of the decentralised and centralised units. It also reinforces the integration of inclusion and diversity into human resource processes. The Live element involves the practical transfer of inclusion and diversity to daily company life, such as in employee networks and at events. In addition, employees and managers are to consider inclusion and diversity in their daily business decisions and dealings with each other.

METRO GROUP has been represented on the board of directors of Charta der Vielfalt e. V. (Diversity charter) since 2013. During

the reporting period, we teamed up with 16 other companies to create a regional diversity network. For the second German Diversity Day in June 2014, the partners organised the first event in Düsseldorf for the North Rhine-Westphalia region. The focus of the event was on allowing the nearly 100 top managers who were invited to share their experiences.

Equal opportunities on the job

As part of our diversity management, we promote equal professional opportunities for men and women. In 2011, together with other listed German companies, METRO GROUP voluntarily pledged to increase the share of women in management levels one to three. During financial year 2013/14, METRO GROUP renewed its voluntary pledge to increase the share of women in management positions. By 2017, the share of women in management positions (levels one to three) is to reach 25 per cent. At METRO AG, the share of women in the first two management levels below the Management Board should also amount to 25 per cent by 2017. These objectives have been incorporated into our recruiting and succession planning and correspond with the Supervisory Board's objectives for the Management Board.

For more information about the objectives regarding the composition of the Management and Supervisory Boards, see the corporate governance report.

The share of women in the entire workforce was 53.8 per cent as of the closing date of 30 September 2014 (30/9/2013: 55.1 per cent). In management levels one to three, 18.5 per cent of managers were female as of the closing date of 30 September 2014 (30/9/2013: 18.5 per cent). The share of women in management positions is particularly high in countries outside Germany: as of the closing date of 30 September 2014, 21.0 per cent of managers in countries other than Germany were female. The Women in Trade (WiT) employee network now has about 130 members. The network intends to help to raise the share of women in management positions over the long term, to promote internal and external dialogue and to create better working conditions for women in the company. The network is internationally active and is aimed at colleagues in all countries.

Work-life balance programmes based on phases of life

Our headquarters in Düsseldorf has three day care centres with 238 full-time slots for children from the age of four months. The staff speak German and English to the children. In 2014, we once again offered a holiday childcare programme at our company headquarters. More than 150 children of employees took part.

Galeria Kaufhof opened a new parent-child office in its headquarters in Cologne so that parents can bring their children to work with them in emergencies. Since 2010, the headquarters of Media-Saturn in Ingolstadt has been certified as a family-friendly company by the Hertie Foundation. As part of an array of measures aimed at supporting work-life balance, Media-Saturn in Ingolstadt offers holiday childcare as well as nursery slots for children of employees.

The share of part-time employees at METRO GROUP rose slightly to 28.4 per cent compared with the previous year's period (9M 2012/13: 27.8 per cent). In Germany, 44.8 per cent of our staff work part-time (2012/13: 44.8 per cent).

METRO GROUP wants to support employees in all phases of life – and that includes the care of loved ones. In cooperation with the German carers' organisation Deutscher Pflegering, METRO AG began offering its employees two service models in March 2014: The online care portal offers information about the topic and includes an index with more than 25,000 care providers. The care hotline allows employees to discuss their questions directly with caregiving experts.

Employer-employee relationships

METRO GROUP supports open dialogue at various levels between its management and employees or employee representatives. We want to ensure good long-term working conditions for employees and thus contribute to growth. In concrete terms:

- We apply the principles of fair working conditions and social partnership in all of our activities.
- We encourage our management to create an open and trusting work environment in which people share their ideas and problems.
- We regularly meet with our employees and/or their representatives to inform them about the business situation and ask them for feedback.
- We regularly check that our stores and offices observe our principles governing fair working conditions and social partnership.

METRO GROUP pledged its commitment to this approach by signing a joint declaration with the international trade union UNI Global Union in December 2013. This declaration underscores the shared commitment to a good and long-term partnership. It affirms our efforts to promote fair working conditions.

METRO GROUP plays an important role in the annual meeting of the UNI Global METRO Alliance. In October 2013, employee representatives met with management representatives in Bucharest to discuss their views regarding developments within METRO GROUP in the various countries.

At the European level, the METRO GROUP Euro Forum acts as a European works council. Negotiations for a new Euro Forum agreement were successfully concluded in the 2013/14 reporting period. The agreement reflects the changes in legislation regarding European works councils.

At the national level, METRO GROUP continued its social dialogue with employee representatives such as works councils and unions. This resulted in several collective labour agreements at the business unit, country or store level, depending on local laws and customary practices.

Development of staff numbers

During the reporting period, METRO GROUP employed an average of 226,934 full-time equivalents (2012/13: 242,967). This is a decrease of 6.6 per cent from the same period of the previous year. The majority of our employees work outside of our home market of Germany. In Western Europe (excluding Germany), Eastern Europe and Asia/Africa, we had 139,510 full-time equivalents, 9.9 per cent less than during the same period of the previous year. A key reason for this decrease was the disposal of Real's Eastern European business. In Germany, the number of full-time equivalents fell slightly by 0.9 per cent to 87,424.

During the period under review, our METRO Cash & Carry sales line had an average of 110,483 full-time equivalents. This is a decrease of 1.7 per cent from the same period of the previous year. Media-Saturn employed an average of 57,553 full-time equivalents in the reporting period, an increase of 1.2 per cent over the same period of the previous year. At Real, the number of full-time equivalents fell by 30.4 per cent to 32,322, due to the sale of Real's Eastern European business. At Galeria Kaufhof, the number of full-time equivalents decreased by 0.1 per cent to 17,536 compared with the same period of the previous year. The number of full-time equivalents in the Others segment decreased by 7.1 per cent to 9,040.

Development of employee numbers of METRO GROUP annual average

Workforce by headcount

	Germany	International	Total
2012/13	105,517	167,350	272,867
2013/14	104,616	150,417	255,033 [–6.5%]

Workforce by full-time equivalents

	Germany	International	Total
2012/13	88,180	154,787	242,967
2013/14	87,424	139,510	226,934 [–6.6%]

Development of personnel expenses

Our personnel expenses fell by 1.8 per cent to €7.2 billion compared with the same period of the previous year (2012/13: €7.3 billion). Of that amount, €5.8 billion (2012/13: €6.0 billion) was attributable to wages and salaries, including income taxes and employee contributions to social insurance programmes. The rest was attributable to social welfare contributions, post-employment benefits plans and employee benefits.

Employees by segment
 full-time equivalents

Employees by region
 full-time equivalents

We encourage our staff to set up their own private pension accounts. Our group-wide future package provides them with voluntary benefits that exceed the collective bargaining standards generally seen in the industry. In the reporting period, 55,064 employees in Germany took advantage of these benefits (2012/13: 55,579 employees). This represents a share of 53.9 per cent (2012/13: 53.9 per cent).

For more information about personnel expenses, see the notes to the consolidated financial statements in no. 16 Personnel expenses.

7. Innovation management

As a retail company, METRO GROUP does not make its own products and therefore does not conduct research and development in the strict sense of the term. When it comes to innovation management, we concentrate more on pursuing the objective of fuelling our transformation within a world that is constantly reinventing itself.

After all, our industry is in the midst of a profound evolution that will especially be driven by digitisation. It is for this reason that devices such as smartphones and tablets have become fixtures in our lives. The resulting permanent accessibility of information about products and services generates a high level of price transparency, and online retailers have become serious competitors. In pursuing a successful repositioning, we are focusing on the continued improvement and optimisation of our stationary retail formats: proven practices will be enhanced with new elements to create innovative sales formats. When adapting strategy and technology from the digitised world, we see an opportunity for our company to reach existing and potential customers in new ways.

For this reason, METRO GROUP must leverage synergies between online and stationary retailing. Our sales lines began developing strategies at an early stage to tap the potential of

the online business and digital technology, thus supplementing and supporting the stationary business. In November 2013, METRO GROUP created a new organisational unit called Business Innovation that systematically and intensely works with innovation and new business models in five focal areas (see graphic).

The responsibility for the actual shaping of innovation lies with the sales lines. The new organisational unit's primary task is to bundle and support existing activities and to fuel the implementation of innovation projects. This includes promoting discussions across sales lines among internal experts, external partners and universities. In addition, METRO GROUP plays a role in start-up companies by providing venture capital. Within our innovation management, we distinguish between evolutionary and revolutionary processes. The former describes the improvement and optimisation of existing sales formats; the latter describes the evaluation, testing and realisation of new business models.

In this way, our innovation management helps us to create advanced multichannel forms of retail. Generally speaking, the idea is to reach customers where they take purchasing decisions: sitting at the computer in the office, on the sofa holding a tablet, on the go with a smartphone or in the store, where our sales lines can be experienced and our employees can provide face-to-face assistance.

The five areas of innovation at METRO GROUP

Our sales lines have already begun testing numerous new ideas in the five aforementioned areas of innovation and are successfully putting them into practice. Selected examples are outlined below.

At certain **METRO Cash & Carry** pilot stores, customers receive personalised deals tailored to their preferences in the form of coupons. This helps to minimise waste coverage in advertising. Since introducing targeted marketing in October 2013, numerous multi-step campaigns have been conducted in Germany, the Netherlands, Poland and Romania and have reached more than ten million people.

Media-Saturn is in the midst of a fierce battle with online competition and must measure up to these retailers' fast delivery of goods in particular. Media Markt and Saturn have been testing a more customer-friendly delivery service since April 2014: Upon checkout, customers can now choose between an order that arrives within three hours (express delivery) or an order that arrives at a designated time of their choice. For now, express deliveries are being tested in seven selected German cities. After a successful test phase, the service is scheduled to be rolled out in other German urban centres. In September 2014, Media Markt opened the world's first drive-thru store for electronics in the southern German city of Ingolstadt. Here,

customers can simply drive up, present their order confirmation at the window and then pick up their purchase.

Real has introduced a new app. Customers can do more than just check current specials in a digital sales catalogue; they also receive detailed product information. The app also features a product search engine. In addition, the barcode on a product's packaging can be scanned with a smartphone camera to access more detailed information. One important feature of the app is a digital shopping list that can be used and edited by several people at the same time. The related data are saved on an online server. Additional functions include a digital coupon organiser for Payback points and Real loyalty points as well as an option that allows users to rate the sales line's own brands. With this approach, Real can take customer feedback into account in the development of new products and in the improvement of existing items.

To facilitate future growth, **Galeria Kaufhof** is rigorously forging ahead with its effort to dovetail its department store and online businesses; that is, integrating stationary and digital business concepts into customer assistance and sales. In mid-2014, employees in our sales lines began using tablets while advising customers. Using the device, they can access inventory information about products that are not available at the department store or are not part of the outlet's usual product range.

Employees can process orders right on the tablet. Delivery can be made to either the address of the customer's choice or to the respective department store. Roughly 1,100 tablets are currently in use.

Other new technologies have also made their way into the stores and outlets of our sales lines. Both Galeria Kaufhof and Real offer their customers new payment systems. This includes

self-checkouts and cash registers equipped with wireless near field communication (NFC) transaction technology. With NFC, contactless purchases can be made using compatible cards or mobile phones. METRO Cash & Carry, on the other hand, has installed electronic shelf labels at all of its whole-sale stores in Germany. Future versions of these labels may even offer our sales lines an innovative way of providing customers with new obligatory consumer information.

8. Sustainability management

METRO GROUP views itself as a member of society that contributes to value creation. As part of its corporate responsibilities, our company strives to create a strong bond that links economic goals that extend beyond legal requirements

with the needs of society as well as those of customers, employees, investors and partners. In the process, we must respect the limits placed on us by the environment. By taking this approach, we act today for the good of tomorrow. Viewed in terms of METRO GROUP's sustainability vision "We offer quality of life", our business activities are designed to create value while reducing negative effects.

We offer quality of life ...

... for our customers, ...

... by providing them with safe, high-quality products and services locally and around the world, and by constantly improving our processes. And with products that are produced, processed and recycled in a socially responsible, environmentally sound and resource-friendly manner. This enables us to secure our future.

... for our employees, ...

... by respecting, protecting and helping them to grow professionally at all times, and by building trusting relationships with them. This enables us to create an attractive working environment.

... for all who work for us, ...

... by doing business fairly and responsibly and by providing good living and working conditions. This enables us to demonstrate responsibility in the supply chain.

... for society, ...

... by protecting the environment, conserving natural resources and minimising our effect on the climate. This enables us to create a sound foundation for retailing of tomorrow.

Because we are acting more sustainably, ...

... we are working on a responsible range of products and assortment design.

By 2015, we will have defined processes that will enable us to evaluate the impact of the own-brand products of METRO GROUP's sales lines on sustainability. By continuously carrying out our general METRO GROUP purchasing policy on sustainability, we will adjust all relevant product categories to reflect aspects of sustainability.

... we systematically make sustainability a part of our work.

Sustainability will be integrated into all (fundamental) business processes by 2016. Our employees' awareness of sustainable behaviour will be sharpened through information campaigns. Training programmes focused on corporate responsibility will be developed and offered to all employees.

... we support humane working conditions.

Inclusion of all non-food own-brand suppliers¹ in a BSCI or equivalent social standard system by the end of 2014 if the final product is produced in a risk country (risk country based on BSCI definition). This effort involves suppliers from whom we acquire products in a decentralised manner and suppliers with whom we maintain a direct relationship through MGB Hong Kong.

... we are working on solutions to global challenges with a steadfast commitment to the issue and a trusting relationship with our stakeholders.

Our contribution to climate and resource protection: by 2020, METRO GROUP will have cut its greenhouse gas emissions by 20 per cent since the reference year of 2011.

¹ This covers the producers of merchandise (own brands and own imports) who carry out the final significant and value-creating production step

Embedding sustainability

The strategic integration of sustainability into our core business operations is an essential aspect of our work to carry out our sustainability vision. We use a number of channels to ensure that this happens. These channels include our Sustainability

Board and its committees as well as modifications of relevant business processes and decision-making procedures along with changes in our individual behaviours. The issue can indeed be encouraged from the top down, but it must be carried out by everyone.

Our sustainability management

Sustainability management is designed to facilitate the integration of sustainability into our core business operations and to consider the interplay between economic, environmental and social aspects in an efficient, solution-driven manner. It is closely tied to risk and opportunity management at METRO GROUP. In this process, the company's management is supported in its work to systematically identify, assess and manage possible deviations from the sustainability goals; that is, risks and opportunities.

For more information about risk and opportunity management, see chapter 12 Risk and opportunity report.

As an organisation of METRO GROUP, the Sustainability Board ensures that the strategic objectives regarding the group's sustainability performance are defined and that fundamental issues are reflected in corresponding goals.

The round table on corporate responsibility serves as the interface between the strategic and operational aspects of sustainability. This body lays the groundwork for decisions taken by the Sustainability Board and helps to carry them out.

Assessment of relevant sustainability indices and rankings

Index/ranking	Rating/points	Scale	Year
Dow Jones Sustainability Index (DJSI) – World/Europe	71 listed	0 to 100	2014
Oekom Corporate Rating	C	D– to A+	2014
CDP Climate Disclosure Leadership Index (CDLI) Germany, Austria, Switzerland	98/A– (disclosure/performance) listed; sector leader consumer staples	0 to 100 / E to A	2014
FTSE4Good Global/Europe Index	listed	–	2014

On the operational level, the sales lines are charged with defining specific goals and programmes, putting them into practice in their daily business operations and reaching these objectives over the long term. They report their progress to the Sustainability Board through the round table.

The sustainability measures carried out by METRO GROUP are evaluated in part by ratings prepared by our stakeholders. These ratings provide important motivation to us and serve as a management tool because they demonstrate the progress of and potential to improve our activities.

Supply chain activities

We concentrate our sustainability activities on the parts of the value chain and our interaction with society where our influence on processes relevant to sustainability is the greatest. Here, our actions have an accordingly efficient impact. Our exemplary supply chain comprises the following areas:

- Procurement, production and processing
- Transport, warehousing and stores
- Customers
- Disposal
- Social commitment

In the following section, we will provide an overview of our activities in the individual areas that we initiate to address specific challenges. In the process, we also use sustainable development key performance indicators (SD-KPIs) that are relevant to the group management report.

For in-depth information and other key performance indicators relevant to the topic of sustainability, see the METRO GROUP Corporate Responsibility Report 2013/14 as well as the Responsibility section of our website.

Procurement, production and processing

In terms of procurement, production and processing, it is important for us to know which resources and raw materials are used to produce our products and under which social and environmental conditions our products are made. In managing these issues, we draw on our group-wide and cross-product purchasing policy “Sustainability”. In this policy, we have formulated the fundamental requirements for sustainable supply chain and procurement management. At the same time, our purchasing policy forms the framework for guidelines that address specific issues related to individual product and raw material categories. By developing and implementing guidelines for sustainable purchasing, we are strengthening our procurement channels and helping to improve the sustainability of our products.

To ensure socially compatible working conditions within our procurement channels, we are committed to the implementation of social standard systems in our suppliers’ business operations.

All of our producers in defined risk countries (based on the assessment of the Business Social Compliance Initiative, BSCI) who supply us with clothing, shoes, toys and hardware through our import company MGB METRO Group Buying Hong Kong undergo audits conducted in accordance with BSCI or equivalent standards. As of 30 September 2014, 835 producers had been audited. Of this group, 58 per cent received a grade of “good”. Producers who fail to pass the audit have 18 months following the audit date to improve conditions at the site. Should these improvements not be made, the production site will receive no more orders until it can demonstrate that it has sustainably improved its organisational processes. In financial year 2013/14, 12 per cent of suppliers who had not passed the audit demonstrated improvement. Overall, though, the share of suppliers who passed audits declined. This is primarily the result of stricter BSCI requirements for audits.

Topic	Goals	Status goal	Measures	Status measures
INTERNATIONAL LABOUR STANDARDS/SOCIAL STANDARDS	METRO GROUP expands its commitment to fair working conditions at its suppliers.		Inclusion of all non-food own-brand suppliers ¹ in a BSCI or equivalent social standard system by the end of 2014 if the final product is produced in a risk country (risk country based on BSCI definition).	

¹ This covers the producers of merchandise (own brands and own imports) who carry out the final significant and value-creating production step
You will find annotations to the symbols on page 124

Transport, warehousing and stores

As a retail company, we assume responsibility for climate and resource protection within the areas of the value chain on which we can have a direct impact: from the warehousing and refrigeration of products to transport and the operation of our

stores and administrative offices. We pursue two central goals in this effort: First, we intend to reduce climate-relevant emissions produced in connection with our business operations. Second, we intend to lower our consumption of resources. By taking this approach, we also help lower our operating costs.

Topic	Goals	Status goal	Measures	Status measures
CLIMATE PROTECTION/ RESOURCE MANAGEMENT	METRO GROUP will reduce its greenhouse gas emissions by 20 per cent from 330 kg/m² in 2011 to 264 kg/m² in 2020.		Continuation of "low-hanging fruit programme" as an energy-saving programme; additional Energy Awareness Programme (EAP) started in 2013.	

You will find annotations to the symbols on page 124

Status climate protection target

From October 2013 to September 2014, METRO GROUP generated 273 kilograms of CO₂ equivalent per square metre of selling space. As a result, our group-wide emissions fell by about 28 kilograms of CO₂ per square metre of selling space compared with the same period of the previous year. As a result, we are coming closer to our target of 264 kilograms of CO₂ per square metre. The decline in emissions primarily stems from three factors: measures to reduce energy consumption, the sale of stores in Eastern Europe and Turkey that generally had high emissions as well as the general technical and scientific developments that are reflected in the emission factors for calculating CO₂ equivalents of consumption.

Status climate protection target
greenhouse gas emissions in kg CO₂ (CO₂ equivalent) per m² of selling space

Unlike in previous years, we will no longer make portfolio adjustments (divestment of Real in Poland, Russia, Ukraine, Romania and Turkey in 2012 and 2013) for environmental metrics starting this reporting period. For this reason, the previous year's figures presented in this report and the figures for the reference year 2011 deviate from the figures in last year's report. In addition, the volume of emissions may deviate from those specified in previous reports due to an update of emission factors and estimate corrections. This leads, particularly in terms of emissions caused by refrigerants, to a slight change in the figure extending back to the reference year of 2011.

Customer

The specific product mixes of our sales lines are designed in such a way that they optimally meet the wide range of needs of our private and professional customers. These products and services must not just meet quality and safety requirements. Increasingly, they must also fulfil critical requirements regarding social compatibility and environmental consciousness – from production and procurement to usage and disposal. One of our primary concerns is that our customers can put their faith in these qualities when they purchase and use our products. For this reason, we systematically introduce measures that we can use to influence the safety, quality and sustainability of our product range. We achieve this in our supply chain and product management by implementing our guidelines on sustainable purchasing. These guidelines define quality and sustainability criteria, and require regular audits to determine whether quality and sustainability standards are being observed. We also create transparency by maintaining direct relationships with our business partners and employing innovative technical solutions that can be used to monitor the individual links of the supply chain. Furthermore, to underscore our customer orientation we use product labels that indicate our compliance with certain quality or sustainability standards. We also label our own brands accordingly. In addition, we accompany this by providing specially prepared information in our stores and engaging in dialogue with our customers. By doing so, we support and encourage responsible consumption by our customers.

Our sales lines' assortments include fair-trade products as well as foods that bear the European organic symbol. In financial year 2013/14, our sales lines METRO Cash & Carry, Real and Galeria Kaufhof generated sales of products certified by the EU Regulation on organic farming totalling €96 million in Germany. Our stores also offer products from sustainable, environmentally conscious fisheries. The seal of the Marine Stewardship Council (MSC) communicates this fact to customers. In financial year 2013/14, the sustainable fish product range of our sales lines METRO Cash & Carry, Real and Galeria Kaufhof in Germany comprised 90 MSC-certified own-brand

products and 775 brand items. These products generated sales of approximately €56 million.

Our sales lines also provide customers in other product groups with a broad range of environmentally conscious and socially responsible products. These products include

- efficient electric appliances bearing energy labels from A+ to A+++,
- stationery based on the standards of the “Blauer Engel” (Blue Angel), a German environmental seal, or of sustainable forestry,
- natural cosmetics in accordance with BDIH and NATRUE standards and
- textiles made from organic cotton or cotton produced in accordance with the “Cotton made in Africa” standard.

As a helpful guide to customers, our Galeria Kaufhof sales line adds the logo “natürlich GALERIA” (naturally GALERIA) to products that meet the requirements of a defined sustainability standard. Nearly 13,600 products in the Kaufhof assortment now fulfil this standard.

METRO GROUP is taking innovative approaches to traceability: in 2013, we began to work with other retailers, well-known partners and the standardisation organisation GS1 Germany on an international cross-industry solution. Our goal is to create complete transparency regarding the resources that have been used and the procurement of products throughout the value chain. The key element of this solution, which we call “Traceability in the cloud”, is the electronic collection of relevant data and consolidation of these data on an integrated software platform. This platform significantly improves access to this information and arranges it intuitively, creating more transparency throughout the entire value chain – all the way to the end consumer.

Topic	Goals	Status goal	Measures	Status measures
CONSERVATION OF RESOURCES/ SAFEGUARDING OF FOOD SUPPLIES/ SUSTAINABLE SOURCING	METRO GROUP initiates and supports the development of an international, intersectoral and product-spanning technical solution for traceability.		Following a successful test phase of the traceability solution for fish and meat at MCC in Germany and its subsequent roll-out, we will introduce this solution in other countries at the beginning of 2015. The project will also be expanded to other interested suppliers of selected product categories in 2015.	

You will find annotations to the symbols on page 124

Disposal

As a retail company, METRO GROUP needs resources that will be available far into the future. These raw materials are essential because they are required to produce and package the company’s products. At the end of a product’s usage phase, we consider whether and how the raw materials used in it can be recycled or disposed of in the most environmentally conscious manner. The first component of this programme is the avoidance strategy. Its aim is to prevent waste from being created in the first place. One way it accomplishes this goal is by optimally using resources in the manufacture of products and packaging. A second component involves resource recovery. Instead of

throwing out products and packaging that are no longer needed, we repurpose them. The third component of this approach – recycling – has commercial potential. For this reason, we are committed to promoting innovative manufacturing and recycling technologies and to thinking in terms of cycles. Because consumers are in possession of products and packaging when they reach the end of their useful lives, we consider it our duty to advise customers about disposal: we provide our customers with information about resources, encourage them to avoid waste and create incentives and opportunities for correct disposal. In this manner, we do our part to ensure that waste materials can once again be used as raw materials.

Waste generation in kg per m² of selling space at METRO GROUP locations / recycling rate in %

METRO GROUP views its commitment to society as a form of value creation because it plays a role in addressing social challenges. Our broad range of activities is designed to promote intercultural dialogue, support our stores and the communities where they are located and systematically facilitate help for the needy.

9. Remuneration report

The following report describes the remuneration received by the Management Board and the Supervisory Board of METRO AG for financial year 2013/14 (1 October 2013 to 30 September 2014) compared with the short financial year 2013 (1 January 2013 to 30 September 2013) paid in accordance with the standards laid down by the German Commercial Code (HGB) and the German Corporate Governance Code. It outlines the system of compensation for the Management and Supervisory Boards and contains information about share-based compensation for METRO GROUP executives.

The remuneration system for the Management Board is approved by the Supervisory Board of METRO AG and is prepared by its Personnel Committee. The current remuneration system, including the performance-based remuneration scheme with a long-term incentive effect (sustainable performance plan) that was introduced at the beginning of financial year 2013/14, was approved by a majority of 98.43 per cent at the Annual General Meeting held on 12 February 2014.

The remuneration system for members of the Management Board

Management Board remuneration consists of a fixed salary and two variable performance-based components: the short-term incentive and the long-term incentive. The company also offers pension provisions and other supplemental benefits.

Remuneration system for the members of the Management Board

(Schematic illustration)

As a rule, the fixed salary and the variable remuneration paid to new members of the Management Board are reduced on a percentage basis in the first two years of service.

Total remuneration and the individual compensation components are appropriately geared to the responsibilities of each individual member of the Board, his or her personal performance and the company's economic situation. They fulfil legal stipulations regarding customary remuneration. Variable remuneration serves as an incentive for the Management Board to increase the company's value and is designed to generate sustainable, long-term company growth. In financial year 2013/14, the individual components of Management Board remuneration were as follows:

Fixed salary

The fixed salary is contractually set and is paid in monthly instalments.

Short-term incentive

The short-term incentive for members of the Management Board is determined mainly by the development of return on capital employed (RoCE) and net earnings (NE) on the basis of a financial year. The use of the metric NE combined with RoCE rewards profitable growth of METRO GROUP. EBIT is divided by capital employed to determine RoCE. NE principally amount to profit for the period. The Supervisory Board may resolve an adjustment for special items. To ensure the individual performance orientation of Management Board remuneration, the Supervisory Board of METRO AG now also reserves the general right to reduce or increase the weight of the individual short-term incentive by up to 30 per cent at its discretion.

For a financial year, members of the Management Board receive between €500 and €833 per 0.01 percentage point of RoCE above 7 per cent. For each additional €1 million in NE, they receive an additional €304 to €506. The amounts are set by the Supervisory Board of METRO AG based on the company's strategy and medium-term targets, are regularly reviewed and are adjusted if necessary. The payout of the short-term performance-based remuneration granted for RoCE and NE is capped each year. The following individual values were determined as the basis for Management Board remuneration in financial year 2013/14:

€ p.a.	Amount per 0.01 percentage points of RoCE above 7 per cent	Amount per €1 million in NE	Payout cap for financial year 2013/14
Olaf Koch	833	506	3,900,000
Mark Frese ¹	594	361	2,470,000
Pieter Haas	500	304	2,080,000
Heiko Hutmacher	625	380	2,600,000

¹ Proportionate average level for financial year 2013/14, based on the following amounts: RoCE €500 for 1 October to 31 December 2013 and €625 for 1 January to 30 September 2014; NE €304 for 1 October to 31 December 2013 and €380 for 1 January to 30 September 2014

The short-term performance-based remuneration of members of the Management Board is generally paid out four months after the end of a financial year.

Long-term incentive

The long-term incentive is a performance-based compensation component with a long-term incentive effect. It is designed to achieve sustainable growth in the company's value and applies a multi-year assessment basis.

Sustainable performance plan 2013/14–2015/16

After the last tranche of the performance share plan was paid in the short financial year 2013, the Supervisory Board of METRO AG decided on 10 December 2013 to approve a three-tranche, long-term performance-based remuneration scheme for financial years 2013/14, 2014/15 and 2015/16: the sustainable performance plan. The sustainable performance plan creates incentives for the sustainable and successful performance of METRO GROUP under consideration of the long-term expectations of shareholders and other stakeholders as well as the group's environmental responsibility. Performance will be measured both by share-based key indicators as well as by qualitative aspects of business, environmental and social company management.

A target value in euros is set for each member of the Management Board. 75 per cent of this amount will be based on the so-called TSR component (total shareholder return), a metric that will be determined on the basis of the METRO ordinary share's performance relative to a defined reference index during a performance period. The remaining 25 per cent will be based on a so-called sustainability component that considers the ranking that METRO AG achieves during the performance period as part of the Corporate Sustainability Assessment conducted by the independent agency RobecoSAM AG. In case of employment termination, separate rules for the payout of the tranches have been agreed upon.

The timing of the sustainable performance plan is structured as follows:

Timing of the sustainable performance plan (SPP)

To calculate the **TSR component**, the Xetra closing prices of the METRO ordinary share will be recorded over a period of 40 trading days that directly follow the Annual General Meeting of METRO AG. The arithmetic mean calculated from these prices will then be used as the starting share price. The performance period for the respective tranche will begin on the 41st trading day following the Annual General Meeting. In the next step that will also cover a period of 40 trading days directly following the

Annual General Meeting held three years after the determination of the starting share price and the issuance of the respective tranche, the Xetra closing prices of METRO's ordinary share will be recorded. The arithmetic mean calculated from these prices will then be used as the ending share price. The TSR percentage value will be determined on the basis of the change in the METRO share price and the total amount of reinvested dividends throughout the performance period in relation to the starting and ending share prices.

The METRO TSR calculated in this manner will be compared with the TSR of the Dow Jones STOXX Europe 600 Retail Index (index TSR) during the performance period, and the factor for computing the TSR component will be determined in this way:

- If METRO's TSR is identical to the index TSR, the factor for the TSR component will be one.
- If METRO's TSR is 30 percentage points or more below the index TSR, the factor for the TSR component will be zero.
- If METRO's TSR is 30 percentage points above the index TSR, the factor for the TSR component will be two.
- If METRO's TSR is 60 percentage points or more above the index TSR, the factor for the TSR component will be a maximum of three (cap).
- Outside these values, the TSR factor for the sustainable performance plan will be determined using the linear interpolation method and calculated to the hundredth place value.

If the TSR factor is zero, no payment will be made and the TSR component will be closed. If the TSR factor is positive, the following additional condition will apply: a payment of 75 per cent of the target amount multiplied by the TSR factor will be made only if the calculated ending price of the METRO share does not fall below the starting share price. Should this condition not be met, the calculated amount will not be paid initially. In this case, an entitlement to payment will exist only if the Xetra closing price of the METRO ordinary share is higher than or equivalent to the starting share price for 40 consecutive trading days within a three-year period after the completion of the performance period, or oxa period. Should this condition not be met within the three years after the performance period ends, no payment of the TSR component of the tranche will be made.

To determine the factor of the **sustainability component**, METRO AG takes part in the Corporate Sustainability Assessment conducted by the independent agency RobecoSAM AG during each year of the three-year performance period of the sustainable performance plan. RobecoSAM AG uses this as-

assessment to determine the ranking of METRO AG within the industry group “Food and Staples Retailing” that is defined in accordance with the Global Industry Classification Standard (GICS). S&P Dow Jones Indices uses this ranking as the basis for decisions regarding a company’s inclusion in the Dow Jones Sustainability Indices (DJSI). METRO AG is informed each year by RobecoSAM AG about its new ranking. The company’s average ranking – rounded to whole numbers – is determined on the basis of the three rankings communicated by RobecoSAM AG during the performance period. The factor for the sustainability component is determined in the following manner on the basis of the average ranking during the performance period:

Average ranking (rounded)	Sustainability factor tranche for financial year 2013/14	Sustainability factor tranche for financial year 2014/15	Sustainability factor tranche for financial year 2015/16
1	3.00	3.00	3.00
2	3.00	3.00	2.50
3	3.00	2.50	2.00
4	2.50	2.00	1.50
5	2.00	1.50	1.25

9	0.50	0.33	0.25
Below 9	0.00	0.00	0.00

The following additional condition will also apply: A payment of 25 per cent of the target amount multiplied by the sustainability factor will be made only if the ranking of METRO AG does not fall by more than two places below the last announced ranking before the issuance of the tranche in any year of the performance period. Otherwise, the factor for the sustainability component will be zero.

Performance share plan 2009–2013

By resolution of the Personnel Committee of the Supervisory Board and with the approval of the Supervisory Board, METRO AG introduced a five-year performance share plan in 2009. The last tranche of this plan was paid in the short financial year 2013. A target value in euros was set for each member of the Management Board. The target number of performance shares was calculated by dividing this target value by the share price upon allotment, based on the average price of the METRO share during the three months up to the allotment date. The key metric in this calculation was the three-month average price of the METRO share before allotment. A performance share entitles its holder to a cash payment in euros matching

the price of the METRO share on the payment date. The key metric in this calculation was also the three-month average price of the METRO share before the payment date.

Based on the relative performance of the METRO share compared with the median of the DAX 30 and Dow Jones Euro STOXX Retail indices – total return – the final number of payable performance shares is determined after the end of a performance period of at least three and at most 4.25 years. It corresponds to the target number of shares when an equal performance with said stock indices is achieved. Up to an out-performance of 60 per cent, the number increases on a straight-line basis to a maximum of 200 per cent of the target amount. Up to an underperformance of 30 per cent, the number is accordingly reduced to a minimum of 50 per cent. In the case of an underperformance of more than 30 per cent, the number is reduced to zero.

Payment can be made at six possible times that are set in advance. The earliest payment date is three years after allotment of the performance shares. From this time, payment can be made every three months. The members of the Management Board can choose the date upon which they want to exercise performance shares. A distribution over several payment dates is not permitted. The payment cap in euros amounts to five times the target value.

METRO GROUP introduced so-called share ownership guidelines along with its performance share plan: as a precondition for the payout of performance shares, the members of the Management Board are obliged to undertake a significant continuous self-financed investment in METRO shares up to the end of the three-year blocking period. This ensures that, as shareholders, they will directly participate in share price gains as well as potential losses of the METRO share. Their investment in company shares promotes the remuneration system’s long-term structure and orientation towards sustainable development and results in a healthy balance of the various remuneration elements. The self-financed investment applies to the entire term of the performance share plan.

Pension provisions

In 2009, company pension provisions were introduced for members of the Management Board. These provisions consist of direct benefits with a defined contribution component and a performance-based component.

The defined contribution component is financed by the Management Board and the company based on an apportionment of “7 + 7 + 7”. When a member of the Management Board makes a contribution of 7 per cent of his or her defined basis for assessment, the company will contribute the same amount. Depending on the economic situation, the company will pay the same amount again. In view of the macroeconomic environment, the additional amount was again suspended in the reporting period. When a member of the Management Board leaves the company before retirement age, the contributions retain the level they have reached. The performance-based component is congruently reinsured by Hamburger Pensionsrückdeckungskasse VVaG (HPR). The interest rate for the contributions is paid in accordance with the profit-sharing system of the HPR with a guarantee applying to the paid-in contribution.

An entitlement to pension benefits exists

- if the working relationship ends with or after the reaching of standard retirement age as it applies to the German state pension scheme,
- as early retirement benefits, if the working relationship ends at the age of 60 or after the age of 62 for pension benefits that were granted after 31 December 2011, as well as ends before reaching standard retirement age,
- as disability benefits, if the working relationship ends before the standard retirement age is reached and pre-conditions have been fulfilled,
- as surviving dependants’ benefits, if the working relationship is ended by the person’s death.

Payment can be made in the form of capital, instalments or a life-long pension. A minimum benefit is granted in the case of invalidity or death. In such instances, the total amount of contributions that would have been credited to the member of the Management Board for every calendar year up to a credit period of ten years, but limited to the point when the individual turns 60, will be added to the benefits balance. This performance-based component is not reinsured, but will be provided directly by the company when the benefit case occurs.

Further benefits in case of an end to employment

The active members of the Management Board receive no additional benefits beyond the described pension provisions should their employment end. In particular, no retirement payments will be granted. In the event of the death of a member of the Management Board during active service, his or her surviving dependants will be paid the fixed salary for the month in which the death occurred as well as for an additional six months.

Supplemental benefits

The supplemental benefits granted to members of the Management Board include non-cash benefits and expense allowances (for example, company cars).

In financial year 2013/14, a new company car scheme for the members of the Management Board called the Green Car Policy was approved by the Supervisory Board. It represents the first time that the company has placed a limit on the CO₂ emissions of company cars as a sustainability criteria – similar to the new company car policy for METRO GROUP executives. It also contains a cap on the non-cash benefit covering the private use of company cars.

Other

The members of the Management Board of METRO AG are not entitled to additional remuneration or special benefits as a result of a change of control.

¹ Statements pursuant to § 285 Sentence 1 No. 9 a and § 314 Section 1 No. 6 a of the German Commercial Code (HGB) [excluding pension provisions]² In the short financial year 2013, no data for the short-term incentive was reported, as it was calculated on the basis of the 2013 calendar year and, according to German Accounting Standard 17 (GAS 17), may only be shown upon full entitlement. In financial year 2013/14, the short-term incentive for both the short financial year 2013 and financial year 2013/14 is shown.³ Shown here is the fair value at the time of granting the tranche⁴ Total of the columns fixed salary, supplemental benefits, the short-term incentive and value of the granted tranche⁵ Total of the columns fixed salary, supplemental benefits, the short-term incentive and payout from the tranches of the long-term incentive granted in the past⁶ Member of the Management Board since 1 April 2013⁷ Reported figures for the short financial year 2013 relate to active members of the Management Board in financial year 2013/14

Long-term incentives in financial year 2013/14

The target value for the 2013/14 tranche is €1.6 million for Mr Koch, €1.2 million each for Mr Frese and Mr Hutmacher, and €0.96 million for Mr Haas. The value of the tranche distributed in financial year 2013/14 as part of the sustainable performance plan was calculated at the time of granting by external experts using recognised financial-mathematical methods.

Sustainable performance plan (tranches 2013/14–2015/16)

Tranche	End of the performance period	Starting price for the TSR component	Target amount Management Board as of 30/9/2014
2013/14	41st trading day following the Annual General Meeting three years after the issuance of the tranche	€29.73	€4,960,000

In addition to the tranche from the sustainable performance plan in financial year 2013/14, the active members of the Management Board in this financial year possess rights from the following tranches of the performance share plan: Mr Koch possesses rights from the tranches from 2010, 2011, 2012 and 2013; Mr Haas rights from the tranches from 2013; and Mr Hutmacher rights from the tranches from 2012 and 2013.

Performance share plan (tranches 2009–2013)

Tranche	End of the blocking period	Three-month average price before allotment	Number of Management Board performance shares as of 30/9/2014
2009	August 2012	€36.67	Expired
2010	August 2013	€42.91	11,652
2011	August 2014	€41.73	11,982
2012	April 2015	€29.18	87,731
2013	April 2016	€22.84	154,117

The blocking period for the 2010 and 2011 tranches ended in August 2013 and August 2014, respectively. No payouts from these tranches were made to members of the Management Board in financial year 2013/14.

In financial year 2013/14, value changes resulted from the current tranches of performance-based payment programmes with a long-term incentive effect. The company's expenses amounted to €0.54 million for Mr Koch, €0.4 million for Mr Haas and €0.36 million for Mr Hutmacher. The total for Mr Frese was €0.4 million.

Services after the end of employment in financial year 2013/14 (including pension provisions)

In financial year 2013/14, a total of €0.57 million according to International Financial Reporting Standards (IFRS) and €0.54 million according to the German Commercial Code (HGB) were used for the remuneration of the active members of the Management Board of METRO AG for benefits to be provided after the end of their employment (9M 2013 determined on the basis of IFRS and HGB: €4.6 million). Of this total, approximately €0.169 million was allotted to Mr Koch for pension provisions according to IFRS, approximately €0.129 million to Mr Frese, approximately €0.144 million to Mr Haas and approximately €0.131 million to Mr Hutmacher.

According to the German Commercial Code (HGB), approximately €0.165 million was allocated to Mr Koch, approximately €0.123 million to Mr Frese, approximately €0.129 million to Mr Haas and approximately €0.121 million to Mr Hutmacher.

The cash value of provisions according to IFRS and the German Commercial Code (HGB) was approximately €0.007 million for Mr Koch, approximately €0.015 million for Mr Frese, approximately €0.026 million for Mr Haas and approximately €0.016 million for Mr Hutmacher.

Total compensation of former members of the Management Board in financial year 2013/14

Former members of the Management Boards of METRO AG and the companies that were merged into METRO AG as well as their surviving dependants received €3.5 million (9M 2013: €7.0 million).

The corresponding cash value of provisions for current pensions and pension entitlements according to IFRS amounts to €54.3 million (30/9/2013: €54.1 million).

The corresponding cash value of provisions for current pensions and pension entitlements according to the German Commercial Code (HGB) amounts to €44.0 million (30/9/2013: €46.6 million).

Long-term incentive for executives

Pursuant to the recommendation in Subsection 7.1.3 of the German Corporate Governance Code, the share-based compensation of executives of METRO GROUP will also be reported in the following section.

Sustainable performance plan 2013/14–2015/16

The sustainable performance plan 2013/14–2015/16 applies not only to the members of the Management Board, but also to high-level executives of METRO AG as well as to high-level managing directors and executives of METRO GROUP companies. Under this scheme, eligible managers are given an individual target amount as part of the sustainable performance plan (target value) in accordance with the significance of their responsibilities. The additional rules of this plan correspond to provisions for the Management Board.

Sustainable performance plan (tranches 2013/14–2015/16)

Tranche	End of the performance period	Starting price for the TSR component	Target amount executives as of 30/9/2014
	41st trading day following the Annual General Meeting three years after the issuance of the tranche		
2013/14		€29.73	€3,355,000

The value of the tranches allotted in financial year 2013/14 as part of the sustainable performance plan amounted to €2.3 million at the time of allotment (previous year performance share plan 9M 2013: €17.3 million) and was calculated by external experts using recognised financial-mathematical methods.

Performance share plan 2009–2013

The performance share plan 2009–2013 also applies not only to the members of the Management Board, but also to high-level executives of METRO AG as well as to high-level managing directors and executives of METRO GROUP companies. Under this scheme, eligible managers are given an individual target amount as part of the performance share plan (target value) in accordance with the significance of their responsibilities. The

additional rules of this plan correspond to provisions for the Management Board.

With the performance share plan, the share ownership guidelines were also applied to this group of eligible individuals. The required investment volume generally amounts to approximately 50 per cent of the individual target value.

Like those for the Management Board, the following conditions apply:

Performance share plan (tranches 2009–2013)

Tranche	End of the blocking period	Three-month average price before allotment	Number of Management Board performance shares as of 30/9/2014
2009	August 2012	€36.67	Expired
2010	August 2013	€42.91	252,125
2011	August 2014	€41.73	289,993
2012	April 2015	€29.18	465,434
2013	April 2016	€22.84	647,535

The blocking period for the 2010 and 2011 tranches ended in August 2013 and August 2014 respectively. No payouts from these tranches were made to members of the Management Board in financial year 2013/14.

Compensation of members of the Supervisory Board

Remuneration of members of the Supervisory Board is regulated by § 13 of the Articles of Association of METRO AG. Following a proposal by the Management Board and Supervisory Board, the Annual General Meeting 2013 decided to switch to

only fixed compensation for members of the Supervisory Board. For this reason, no variable compensation was paid in financial year 2013/14. Fixed compensation totals €65,000 for every ordinary member of the Board.

The value added tax payable to the compensation is reimbursed to the members of the Supervisory Board in accordance with § 13 Section 5 of METRO AG's Articles of Association.

Remuneration factors	
Chairman of the Supervisory Board	● ● ●
Vice Chairman	● ●
Committee Chairmen ¹	● ●
Committee members ¹	● ●
Members of the Supervisory Board	●

¹ With a minimum of two meetings/resolutions

The individual amount of Supervisory Board remuneration takes into account the duties and responsibilities of the individual members of the Supervisory Board by considering special assignments. The compensation of the Chairman of the Supervisory Board is three times higher than that of an ordinary member of the Supervisory Board; that of the Vice Chairman and the Chairmen of the committees is twice as high; and that of the other members of the committees is 1.5 times higher. The remuneration for membership or chairmanship of a committee will be paid only if at least two meetings or other resolutions took place during the respective financial year. A member of the Supervisory Board who holds several offices at once receives compensation for only one office; in the case of different levels of remuneration, the member is compensated for the most highly paid office.

The relevant individual amounts for financial year 2013/14 are as follows:

¹ Plus value added tax

² Financial year 2013 was the short financial year (1 January to 30 September 2013)

³ Remuneration paid in the reporting period by a group company with a different financial year

Beyond this, the members of the Supervisory Board were not granted any remuneration or benefits for work performed, in particular consulting and brokerage services, on behalf of companies of METRO GROUP in the sense of Subsection 5.4.6 of the German Corporate Governance Code.

10. Notes pursuant to § 315 Section 4 and § 289 Section 4 of the German Commercial Code and explanatory report of the Management Board

Composition of capital (§ 315 Section 4 No. 1 and § 289 Section 4 No. 1 of the German Commercial Code)

On 30 September 2014, the share capital of METRO AG totalled €835,419,052.27. It is divided into a total of 324,109,563 ordinary bearer shares (proportional value of the share capital: ca. €828,572,941, ca. 99.18 per cent) as well as 2,677,966 preference bearer shares (proportional value of the share capital: ca. €6,846,111, ca. 0.82 per cent). The proportional value per share amounts to about €2.56.

Each ordinary share grants one voting right. In addition, ordinary shares entitle the holder to dividends. In contrast to ordinary shares, preference shares principally do not carry voting rights and give a preferential entitlement to profits in line with § 21 of the Articles of Association of METRO AG, which state:

“(1) Holders of non-voting preference shares will receive from the annual balance sheet profit a preference dividend of €0.17 per preference share.

(2) Should the balance sheet profit available for distribution not suffice in any one financial year to pay the preference dividend, the arrears (excluding any interest) shall be paid from the balance sheet profit of future financial years in an order based on age; that is, in such manner that any older arrears are paid off prior to any more recent ones and that the preference dividends payable from the profit of a financial year are not distributed until all of any accumulated arrears have been paid.

(3) After the preference dividend has been distributed, the holders of ordinary shares will receive a dividend of €0.17 per ordinary share. Thereafter, a non-cumulative extra dividend of €0.06 per share will be paid to the holders of non-voting preference shares. The extra dividend shall amount to 10 per cent of such dividend as, in accordance

with Section 4 herein below, will be paid to the holders of ordinary shares insofar as such dividend equals or exceeds €1.02 per ordinary share.

(4) The holders of non-voting preference shares and of ordinary shares will equally share in any additional dividends paid in the proportion of their shares in the share capital.”

Other rights associated with ordinary and preference shares include in particular the right to attend the Annual General Meeting (§ 118 Section 1 of the German Stock Corporation Act), the right to information (§ 131 of the German Stock Corporation Act) and the right to file a legal challenge or a complaint for nullity (§§ 245 Nos. 1–3, 246, 249 of the German Stock Corporation Act). In addition to the previously mentioned right to receive dividends, shareholders principally have a subscription right when the share capital is increased (§ 186 Section 1 of the German Stock Corporation Act), claims to liquidation proceeds after the closure of the company (§ 271 of the German Stock Corporation Act) and to compensation and settlements as a result of certain structural measures, particularly pursuant to §§ 304 ff., 320 b, 327 b of the German Stock Corporation Act.

Limitations relevant to voting rights (§ 315 Section 4 No. 2 and § 289 Section 4 No. 2 of the German Commercial Code)

To the knowledge of the Management Board, the following agreements exist or existed during financial year 2013/14. These agreements can be regarded as restrictions in the sense of § 315 Section 4 No. 2 and § 289 Section 4 No. 2 of the German Commercial Code:

A pooling agreement exists among Otto Beisheim Betriebs GmbH, Otto Beisheim Holding GmbH and OB Beteiligungsgesellschaft mbH, which includes the METRO AG shares held by Otto Beisheim Holding GmbH and OB Beteiligungsgesellschaft mbH.

Until the end of the day on 31 October 2014, an agreement also existed among BVG Beteiligungs- und Vermögensverwaltung GmbH, Franz Haniel & Cie. GmbH, Haniel Finance B.V., Haniel Finance Deutschland GmbH, METRO Vermögensverwaltung GmbH & Co. KG, METRO Vermögensverwaltung GmbH, 1. HSB Beteiligungsverwaltung GmbH & Co. KG and 1. HSB Verwaltung GmbH to coordinate the exercise

of voting rights associated with shares of METRO AG. Furthermore, until the end of the day on 31 October 2014, an agreement existed among BVG Beteiligungs- und Vermögensverwaltung GmbH, Franz Haniel & Cie. GmbH, Haniel Finance Deutschland GmbH and Haniel Finance B. V. to coordinate the joint exercise of interests from the METRO AG shares economically attributable to the shareholder groups Haniel and Schmidt-Ruthenbeck. Both of these agreements expired at the end of the day on 31 October 2014.

In addition, legal restrictions on voting rights may exist, for example, in the sense of § 136 of the German Stock Corporation Act or, insofar as the company holds own shares, in the sense of § 71 b of the German Stock Corporation Act.

Capital interests (§ 315 Section 4 No. 3 and § 289 Section 4 No. 3 of the German Commercial Code)

At the time that the financial statements were prepared, the following direct and indirect (pursuant to § 22 of the German Securities Trading Act) capital interests exceed 10 per cent of the voting rights:

At the time that the financial statements were prepared
(24 November 2014)

Name/company	Direct/indirect stakes exceeding 10 per cent of voting rights
METRO Vermögensverwaltung GmbH & Co. KG, Düsseldorf, Germany	Direct and indirect (together)
METRO Vermögensverwaltung GmbH, Düsseldorf, Germany	Indirect
Haniel Finance Deutschland GmbH, Duisburg, Germany	Direct and indirect
Franz Haniel & Cie. GmbH, Duisburg, Germany	Indirect
Palatin Verwaltungsgesellschaft mbH, Essen, Germany	Direct
BVG Beteiligungs- und Vermögensverwaltung GmbH, Essen, Germany	Indirect
Gebr. Schmidt GmbH & Co. KG, Essen, Germany	Indirect
Gebr. Schmidt Verwaltungsgesellschaft mbH, Essen, Germany	Indirect
Dr Michael Schmidt-Ruthenbeck, Zurich, Switzerland	Indirect

Until the the end of the day on 31 October 2014, an agreement existed among BVG Beteiligungs- und Vermögensverwaltung GmbH, Franz Haniel & Cie. GmbH, Haniel Finance B. V., Haniel Finance Deutschland GmbH, METRO Vermögensverwaltung

GmbH & Co. KG, METRO Vermögensverwaltung GmbH, 1. HSB Beteiligungsverwaltung GmbH & Co. KG and 1. HSB Verwaltung GmbH to coordinate the exercise of voting rights associated with shares of METRO AG. Until the end of the day on 31 October 2014, an agreement existed among BVG Beteiligungs- und Vermögensverwaltung GmbH, Franz Haniel & Cie. GmbH, Haniel Finance Deutschland GmbH and Haniel Finance B. V. to coordinate the joint exercise of interests from the METRO AG shares economically attributable to the shareholder groups Haniel and Schmidt-Ruthenbeck. Both of these agreements expired at the end of the day on 31 October 2014.

As of the closing date, the following direct and indirect (pursuant to § 22 of the German Securities Trading Act) capital interests exceeded 10 per cent of the voting rights:

As of the closing date (30 September 2014)

Name/company	Direct/indirect stakes exceeding 10 per cent of voting rights
METRO Vermögensverwaltung GmbH & Co. KG, Düsseldorf, Germany	Direct and indirect
METRO Vermögensverwaltung GmbH, Düsseldorf, Germany	Indirect
1. HSB Beteiligungsverwaltung GmbH & Co. KG, Schönefeld-Waltersdorf, Germany	Direct and indirect

Gebr. Schmidt GmbH & Co. KG, Essen, Germany	Indirect
Gebr. Schmidt Verwaltungsgesellschaft mbH, Essen, Germany	Indirect
Dr Michael Schmidt-Ruthenbeck, Zurich, Switzerland	Indirect

The information contained in the tables is particularly based on notifications under § 21 of the German Securities Trading Act that METRO AG has received and released.

Notifications of voting rights published by METRO AG can be found on the website www.metrogroup.de in the Investor Relations section – Legal Announcements.

Owners of shares with special rights and type of voting rights control where capital interests are held by employees (§ 315 Section 4 Nos. 4 and 5 and § 289 Section 4 Nos. 4 and 5 of the German Commercial Code)

The company has not issued any shares with special rights pursuant to § 315 Section 4 No. 4 and § 289 Section 4 No. 4 of the German Commercial Code. No capital interests are held by employees pursuant to § 315 Section 4 No. 5 and § 289 Section 4 No. 5 of the German Commercial Code.

Regulations governing the appointment and removal of members of the Management Board and changes to the Articles of Association (§ 315 Section 4 No. 6 and § 289 Section 4 No. 6 of the German Commercial Code)

In instances where members of the Management Board of METRO AG are appointed and removed, legal regulations laid down in §§ 84, 85 of the German Stock Corporation Act and §§ 30, 31, 33 of the German Co-determination Act apply. A supplementary regulation is contained in § 5 of METRO AG's Articles of Association. It states that the Management Board shall have not less than two members and that, apart from this, the actual number of members of the Management Board will be determined by the Supervisory Board.

Changes to the Articles of Association of METRO AG are determined principally in accordance with §§ 179, 181, 133 of the German Stock Corporation Act. Numerous other sections of the German Stock Corporation Act would apply to a change to the Articles of Association and modify or supersede the previously mentioned regulations, for example, §§ 182 ff. of the German Stock Corporation Act during capital increases, §§ 222 ff. of the German Stock Corporation Act during capital reductions or § 262 of the German Stock Corporation Act during the dissolution of the AG. Pursuant to § 14 of METRO AG's Articles of Association, changes that would affect only the text of the Articles of Association may be decided by the Supervisory Board without a vote by the Annual General Meeting.

Authorities of the Management Board (§ 315 Section 4 No. 7 and § 289 Section 4 No. 7 of the German Commercial Code)

Authorities to issue new shares

The Annual General Meeting on 23 May 2012 authorised the Management Board to increase the share capital, with the consent of the Supervisory Board, by issuing new ordinary bearer shares in exchange for cash or non-cash contributions in one or several tranches for a total maximum of €325,000,000 by 22 May 2017 (authorised capital I).

In the process, a subscription right is to be granted to existing shareholders. The new shares may also be acquired by banks chosen by the Management Board if the banks agree to tender them to the shareholders. However, the Management Board is authorised, with the consent of the Supervisory Board, to exclude shareholder subscription rights in the following cases:

- to compensate for fractions of shares from rounding;
- insofar as shares are issued in exchange for non-cash contributions for the purpose of corporate mergers or for the acquisition of companies, divisions of companies or interests in companies;
- in the event of a capital increase in exchange for cash capital contributions to the extent necessary to grant subscription rights to new shares to the holders of warrant or convertible bearer bonds issued by METRO AG and affiliates thereof in which METRO AG holds at least 90 per cent of shares, directly or indirectly, in the scope to which they would be entitled upon exercise of the warrant or conversion rights or fulfilment of the warrant or conversion obligations;
- in the event of capital increases in exchange for cash capital contributions if the aggregate par value of such capital increases does not exceed 10 per cent of the company's share capital and the issue price of the new shares is not substantially lower than the stock exchange price of existing shares of the same class. The limit of 10 per cent of the company's share capital is diminished by the fraction of the share capital represented by the company's own shares which are (i) used as own shares or sold during the term of authorised capital while excluding subscription rights in application of § 186 Section 3 Sentence 4 of the German Stock Corporation Act *mutatis mutandis* or (ii) issued from contingent capital to service warrant and convertible bearer bonds which, in turn, have

been or are issued while excluding subscription rights in application of § 186 Section 3 Sentence 4 of the German Stock Corporation Act *mutatis mutandis*. Once a new authorisation for the exclusion of shareholder subscription rights issued by the Annual General Meeting pursuant to § 186 Section 3 Sentence 4 of the German Stock Corporation Act has become effective, the limit diminished in accordance with the above sentence is raised again to the extent of the new authorisation, but to a maximum of 10 per cent of the share capital.

The Management Board is authorised, with the consent of the Supervisory Board, to define further details of the capital increases. To date, the authorised capital I has not been used. No concrete plans as to the utilisation of this authorisation exist.

Authorisation to issue warrant and/or convertible bonds

The Annual General Meeting on 5 May 2010 authorised the Management Board, with the consent of the Supervisory Board, to issue warrant or convertible bearer bonds (in aggregate, “bonds”) with an aggregate par value of €1,500,000,000 prior to 4 May 2015, at once or in several stages, and to grant the holders of warrant or convertible bearer bonds warrant or conversion rights or impose warrant or conversion obligations upon them for ordinary bearer shares in the company representing up to €127,825,000 of the share capital in accordance with the terms of the warrant or convertible bearer bonds. This authorisation results in contingent capital of up to €127,825,000.

The bonds may also be issued by affiliates of METRO AG in accordance with § 18 of the German Stock Corporation Act in which METRO AG holds at least 90 per cent of shares, directly or indirectly. In that case, the Management Board is authorised, with the consent of the Supervisory Board, to assume a guarantee for those bonds on behalf of the company and grant their holders warrant or conversion rights to ordinary bearer shares in METRO AG or impose warrant or conversion obligations upon them.

Shareholders will be granted statutory subscription rights in that the bonds will be acquired by a bank or syndicate of banks contingent upon agreement to offer the bonds to the shareholders. If bonds are issued by an affiliate of METRO AG in accordance with § 18 of the German Stock Corporation Act in which METRO AG holds at least 90 per cent of shares, directly or indirectly, the company must ensure that statutory subscription rights are granted to the shareholders of METRO AG in accordance with the above sentence.

However, the Management Board is authorised, with the consent of the Supervisory Board, to exclude shareholder subscription rights for fractional amounts arising from proportional subscriptions to the extent necessary to grant or impose warrant or conversion rights or obligations with respect to the holders of existing warrant or conversion rights or obligations in the amount to which they would be entitled to as shareholders after exercise of the warrant or conversion right or fulfilment of the warrant or conversion obligation.

The Management Board is also authorised, with the consent of the Supervisory Board, to entirely exclude shareholder subscription rights to bonds issued in exchange for cash payment carrying warrant or conversion rights or obligations insofar as the Management Board concludes, after careful review, that the issue price of the bonds is not substantially lower than the hypothetical market value ascertained using recognised financial mathematical methods. This authorisation to exclude subscription rights applies for bonds which are issued with warrant or conversion rights or obligations to ordinary shares comprising no more than 10 per cent of the share capital both at the time the authorisation takes effect or – if this value is lower – at the time the authorisation is exercised. The following count towards the aforementioned 10 per cent limit: (i) new ordinary shares issued from authorised capital excluding subscription rights according to § 186 Section 3 Sentence 4 of the German Stock Corporation Act during the term of the authorisation prior to the issuance of bonds with warrant or conversion rights or obligations without subscription rights according to § 186 Section 3 Sentence 4 of the German Stock Corporation Act, (ii) ordinary shares acquired based on the authorisation of the Annual General Meeting according to § 71 Section 1 No. 8 of the German Stock Corporation Act and sold according to §§ 71 Section 1 No. 8 Sentence 5, 186 Section 3 Sentence 4 of the German Stock Corporation Act during the term of such authorisation, prior to the issuance of bonds with warrant or conversion rights or obligations excluding subscription rights according to § 186 Section 3 Sentence 4 of the German Stock Corporation Act.

If bonds carrying warrant or conversion rights or obligations are issued, the warrant or conversion price is determined based on the rules in § 4 Section 8 of METRO AG’s Articles of Association.

In the case of bonds carrying warrant or conversion rights or obligations, the warrant or conversion price may be adjusted after closer determination in order to preserve the value of such rights or obligations in the event their economic value is

diluted, to the extent that such an adjustment is not already provided for by law. The terms of the bonds may also provide for an adjustment of warrant or conversion rights or obligations in case of a capital reduction or other extraordinary measures or events (for example, unusually high dividends, acquisition of control by third parties). In case of the acquisition of control by third parties, the terms of the bonds may provide for adjustment of the warrant or conversion price in accordance with typical market terms. Furthermore, the terms of the bonds may provide for a variable conversion ratio and/or variable warrant and conversion price, whereby the warrant or conversion price is determined within a range to be set based on the development of the share price during the term. The minimum issue price based on the stipulations of § 4 Section 8 of METRO AG's Articles of Association may not be undercut.

The terms of the bonds may grant METRO AG the right, in lieu of providing ordinary shares upon the exercise of warrant or conversion rights, to make a cash payment corresponding to the volume-weighted average price of METRO AG ordinary shares on the Xetra trading system (or a functionally comparable successor system replacing the Xetra system) of the Frankfurt Stock Exchange during a period of several days before or after the exercise of warrant or conversion rights is announced for the number of ordinary shares which would otherwise be delivered. This period is to be determined by the Management Board. The terms of the bonds may also state that the warrant or convertible bonds may, at METRO AG's option, be converted into existing ordinary shares in METRO AG or shares in another exchange-listed company, in lieu of conversion into new ordinary shares from contingent capital, and that warrant rights or obligations can be fulfilled through the delivery of such shares.

The terms of the bonds may also call for a warrant or conversion obligation at the end of the term (or at any other time), or authorise METRO AG to grant bond holders ordinary shares in METRO AG or shares in another exchange-listed company upon maturity of bonds carrying warrant or conversion rights (including bonds which mature due to termination), in whole or in part, in lieu of a maturity payment in cash. The percentage of share capital represented by the ordinary shares in METRO AG issued upon the exercise of warrant or conversion rights must not exceed the par value of the bonds. §§ 9 Section 1, 199 Section 2 of the German Stock Corporation Act apply.

The Management Board is authorised, with the consent of the Supervisory Board, to determine the further details pertaining to the issuance and terms of the bonds, particularly the

coupon, issue price, term, division into shares, rules for the protection against dilution and the warrant or conversion period, or to define such details in consultation with the corporate bodies of the affiliate of METRO AG which issues the warrant or convertible bonds.

To date, the authorisation to issue warrant and/or convertible bonds has not been used and no concrete plans exist as to the utilisation of this authorisation.

Authorisation to buy back the company's own shares

The company is authorised to buy back its own shares in accordance with § 71 of the German Stock Corporation Act. On the basis of § 71 Section 1 No. 8 of the German Stock Corporation Act, the Annual General Meeting decided on 5 May 2010 to authorise the company to acquire shares of the company of any share class on or before 4 May 2015. The authorisation is limited to the acquisition of shares collectively representing a maximum of 10 per cent of the share capital issued as of the date the Annual General Meeting resolution is passed. The authorisation to acquire own shares may be exercised in whole or in part, and in the latter case may also be exercised several times. It may also be exercised for the acquisition of either ordinary shares or preference shares only.

Shares may be acquired on the stock exchange or by way of a public tender offer. In the process, the authorisation includes prescriptions regarding the purchase price and procedures to be followed in case a public tender offer is oversubscribed.

In addition to selling acquired company shares on the stock exchange or by offer to all shareholders, the Management Board is authorised, with the consent of the Supervisory Board, to use company shares acquired in accordance with the above authorisation or on the basis of an earlier authorisation for any of the following purposes:

- Listing of shares of the company on any foreign stock exchanges where they were not hitherto admitted for trading, whereby the authorisation includes prescriptions regarding the initial listing price.
- Transfer of shares in the company to third parties in connection with corporate mergers or in connection with the acquisition of other companies, divisions of other companies or interests in other companies.
- Redemption of shares of the company, without the need for any further resolution by the Annual General Meeting authorising such redemption and implementation of such. Such redemption may also be accomplished without a

reduction in capital by adjusting the proportional value of the remaining no-par-value shares to the share capital of the company. In this case, the Management Board is authorised to adjust the number of no-par-value shares in the Articles of Association.

- Sale of shares of the company by means other than via the stock exchange or via an offer to all shareholders, provided that the sale is for cash payment and at a price not substantially lower than the stock exchange price in effect for listed shares of the company with the same terms on the date of the sale. The foregoing authorisation is limited to the sale of shares collectively representing no more than 10 per cent of the share capital. The limit of 10 per cent of the share capital is reduced by the pro rata amount of share capital represented by any shares issued (i) during the effective period of this authorisation in the course of any capital increase under exclusion of subscription rights according to § 186 Section 3 Sentence 4 of the German Stock Corporation Act, or (ii) to service warrant or convertible bonds providing for warrant or conversion rights or obligations, insofar as such bonds were issued during the effective period of this authorisation under exclusion of subscription rights by application of § 186 Section 3 Sentence 4 of the German Stock Corporation Act *mutatis mutandis*.
- Delivery of shares to holders of warrant or convertible bonds of the company or its affiliates, according to the terms and conditions applicable to such warrant or convertible bonds; this also applies to the delivery of shares based upon the exercise of subscription rights, which in the event of a sale of company shares through an offer to all shareholders may be granted to holders of warrant or convertible bonds of the company or any of its affiliates, to the same extent that holders of such warrant or convertible bonds would have subscription rights for shares of the company after exercising the warrant or conversion rights or performing the warrant or conversion obligations. The shares transferred based upon this authorisation shall collectively not exceed a pro rata amount of 10 per cent of the share capital. Shares issued or sold by direct or application of § 186 Section 3 Sentence 4 of the German Stock Corporation Act *mutatis mutandis* during the effective period of this authorisation up to the date of use shall count towards the aforementioned limit.

The above authorisations to use the company's own shares may be exercised on one or several occasions, in whole or in part, individually or collectively. Company shares acquired based on the above authorisation as collateral for liabilities under the performance share plan 2009 may be sold exclusively via the stock exchange.

The subscription rights of shareholders are excluded if company shares are used for any of the purposes authorised above except for the authorisation for the redemption of shares.

To date, the authorisation to buy back the company's own shares has not been used and no concrete plans currently exist as to the use of this authorisation.

Fundamental agreements subject to change of control clauses in case of a takeover offer (§ 315 Section 4 No. 8 and § 289 Section 4 No. 8 of the German Commercial Code)

As a borrower, METRO AG is currently party to two syndicated loan agreements that the lender may cancel in the case of a takeover offer insofar as the credit rating of METRO AG drops in a way stipulated in the contract as a result of the takeover offer. The requirements of a takeover are, first, that the shareholders who controlled METRO AG at the time when each contract was signed lose control over METRO AG. The second requirement is the assumption of control of METRO AG by one or several parties. The lending banks may cancel the contract and demand the return of the loan only if the takeover and a resulting drop in the credit rating occur cumulatively. The regulations as described here are common market practice and serve the purpose of creditor protection. In the financial year 2013/14, these loan facilities were not drawn.

Compensation agreements in case of a takeover offer (§ 315 Section 4 No. 9 and § 289 Section 4 No. 9 of the German Commercial Code)

No compensation agreements with the members of the Management Board or employees have been concluded with a view to takeover offers.

11. Characteristics of the accounting-related internal control and risk management system and explanatory report of the Management Board

METRO GROUP's accounting-related internal control and risk management system employs coordinated instruments and measures for the prevention, early detection, assessment and management of risks. The Corporate Accounting department of METRO AG is responsible for the group-wide implementation of these instruments and measures.

Overarching responsibility for all processes related to the preparation of the consolidated and individual financial statements as well as the combined management report of METRO AG rests with the Board department of the Chief Financial Officer of METRO AG, Mr Mark Frese. The actual preparation of the financial statements as well as the combined management report in the legal sense, however, is the responsibility of the Management Board of METRO AG. Following the preparation of the financial statements, the consolidated and individual financial statements as well as the combined management report are audited and approved by the auditor. They are then discussed and reviewed by the Supervisory Board of METRO AG. The auditor attends this Supervisory Board meeting, reports the key findings of his audit and answers additional questions. Barring any objections on the part of the Supervisory Board, the annual financial statements and the combined management report are approved by the Supervisory Board. The annual financial statements of METRO AG are released once this approval is given.

Group-wide framework

Building on the "Internal Control – Integrated Framework" concept of the Committee of Sponsoring Organizations of the Treadway Commission (COSO), the Corporate Accounting department of METRO AG has defined group-wide minimum requirements regarding the design of the accounting-related internal control system of METRO AG, the sales lines and the major service companies. With these requirements, the company particularly wants to ensure adherence to the relevant accounting standards and the respective internal guidelines (for example the IFRS accounting guideline).

Among others, these requirements cover the design and implementation of controls, monitoring the effectiveness of controls and reporting about effectiveness analyses.

- Design of controls: Taking a top-down approach, the company has identified the risk of material errors with regard to financial reporting for eleven financial and accounting processes. In addition, the Corporate Accounting department has stipulated binding group-wide control objectives which the key group companies must meet through company-specific control activities.
- Implementation of controls: The group companies must keep records of the implementation of these controls. These provide the basis for an independent review of the effectiveness of controls by the Group Internal Audit department and the group's auditor.
- Effectiveness of controls: The major group companies are obliged to evaluate the effectiveness of controls at the end of each financial year (self-evaluation). In the process, they must apply the uniform, group-wide method stipulated by the Corporate Accounting department. In addition, the effectiveness of controls is reviewed as part of the risk-oriented, independent audits conducted by the Group Internal Audit department.
- Reporting: The results of the self-evaluations must be reported to the Corporate Accounting department using a standardised reporting format. The group companies must confirm that their self-evaluations were conducted using the stipulated method. Aside from the control activities, the group companies must also report on the other four components of the COSO framework: control environment, risk assessment, information and communication as well as monitoring. Companies' individual reports are validated by the Corporate Accounting department and compiled in an overall report on METRO GROUP's accounting-related internal control system. This is reported to the Governance, Risk and Compliance Committee (GRCC) as well as the Management Board of METRO AG.

The key requirements (for example, the IFRS accounting guideline), accounting processes, individual controls and independent review by the Group Internal Audit department and the auditor are described in detail below.

IFRS accounting guideline

The interim consolidated financial statements and the consolidated financial statements of METRO AG are prepared in accordance with the International Financial Reporting Standards (IFRS) as approved by the European Commission. A group-wide IFRS accounting guideline that is compulsory for all companies included in the consolidated financial statements ensures the uniform group-wide application of accounting procedures in accordance with IFRS. The guideline explains IFRS regulations to group companies and makes stipulations regarding accounting measurements. To monitor compliance with the IFRS accounting guideline, the management of each group company is obliged to confirm compliance by means of a letter of representation. The IFRS accounting guideline covers all IFRS relevant to METRO AG and does not relate only to certain accounting events. The Corporate Accounting department of METRO AG is responsible for ensuring compliance with this guideline. Amendments to IFRS are continually included in the IFRS accounting guideline and communicated to all companies included in the consolidated financial statements.

Accounting processes of companies included in the consolidated financial statements

The preparation of the individual financial statements of consolidated companies according to IFRS for consolidation purposes is principally carried out in SAP-based accounting systems (SAP FI). The organisational separation of central and subledger accounting, for example, asset accounting, provides for clear assignments among individual tasks related to the preparation of the financial statements. It also provides for a functional separation that ensures control processes such as the two-signature principle. These systems are used to prepare the individual financial statements of a large share of group companies based on a centrally managed table of accounts using uniform accounting rules.

The consolidation of financial data in the context of group reporting is carried out by means of a centralised, SAP-based consolidation system (SAP EC-CS). All consolidated METRO GROUP companies are integrated into this system without exception. This system provides for a uniform accounts table used by all consolidated companies in accordance with the IFRS accounting guideline. The accounts tables for the individual IFRS financial statements and the consolidated financial statements are interlinked.

Aside from failure to comply with accounting rules, risks can also arise from failure to observe formal deadlines. An online planning tool was introduced to help avoid these risks and document the obligatory processes required in the context of the preparation of individual and consolidated financial statements under IFRS, their sequence and the responsible persons. This tool is used to monitor content and timing of the processes related to the preparation of the individual and consolidated financial statements under IFRS. It provides for the necessary tracking and tracing systems to ensure that risks of overarching group units can be detected and eliminated early on.

The planning tool divides the process of preparing the individual financial statements into key milestones, which in turn are divided into individual activities. In terms of content, these milestones and activities are geared towards METRO GROUP's IFRS accounting guideline and thus reflect its implementation. Compliance with additional deadlines and milestones that are centrally provided by the planning tool for the purpose of structuring and coordinating the preparation of the consolidated financial statements is monitored by METRO AG's Corporate Accounting department. The scheduling and monitoring of the milestones and activities required to achieve these group milestones as part of the preparation of individual financial statements are part of the responsibilities of the respective company's management.

Once they have been transmitted from the individual financial statements under IFRS to the SAP-based consolidation system, the financial data are subjected to an automated plausibility review in relation to accounting-specific contexts and dependencies. Any errors or warning messages generated by the system during this validation process must be addressed by the person responsible for the individual financial statements before the data are transmitted to the consolidation facility.

The report in which all essential group companies provide a comparison of key items of the balance sheet and the income statement with prior-period figures as well as relevant comments represents another monitoring instrument. Every essential group company must provide this report to METRO AG in the context of the preparation of individual financial statements.

Access regulations for accounting-related EDP systems (SAP FI) provide for IT security. Each company included in the consolidated financial statements is subject to the regulations concerning IT security. These regulations are summarised in an IT security guideline, with group-wide compliance being monitored by the Group Internal Audit department of METRO AG. This ensures that users only have access to the information and systems needed to fulfil their specific task.

Accounting processes in the context of consolidation

The planning tool also divides the process of preparing the consolidated financial statements into key milestones, activities and deadlines. In the process, the completion of typical consolidation measures – including sales elimination as well as expense, income, liability and capital consolidation – represents specific milestones in the preparation of the consolidated financial statements. Personnel responsibilities for the consolidation measures mentioned above are documented in consideration of stand-in arrangements.

The group also relies on external service providers to handle support activities related to the preparation of the consolidated financial statements. These services essentially relate to valuations of real estate, pension obligations and share-based payments.

The consolidation measures required to prepare the consolidated financial statements are subject to various systematic and manual controls. The automated plausibility reviews

(validations) used in individual financial statements data also apply to the consolidation measures. Additional monitoring mechanisms at group level include target-performance comparisons as well as analyses dealing with the composition and changes of individual items in the balance sheet and the income statement. Compliance with internal controls covering the preparation and accounting process in the context of the compilation of the consolidated financial statements is regularly monitored by the Group Internal Audit department of METRO AG.

Access regulations for the consolidation system SAP EC-CS are implemented to ensure adherence to IT security regulations (writing and reading authorisations). Authorisations to use the consolidation system are managed centrally by METRO AG. The approval is given only from the Corporate Accounting and Corporate Planning & Controlling departments. This ensures that users only have access to data they require to fulfil their specific tasks.

Independent audit/control

Group Internal Audit

The Group Internal Audit department of METRO AG provides independent and objective audit and consulting services within METRO GROUP and supports the Management Board of METRO AG and the management of the group companies in reaching their goals through a potential-oriented assessment of key management and business processes. In coordination with the Management Board and the group companies, the Group Internal Audit department develops a risk-oriented annual audit and project plan.

Based on the described principles, the Group Internal Audit department carries out independent audits of the controls governing the process of preparing the consolidated financial statements, the implementation of the IFRS accounting guideline and group accounting processes within METRO GROUP. In the process, focal topics are defined as part of risk-oriented planning for the annual audit.

External audit

The IFRS accounting guideline is reviewed by the auditor of the consolidated financial statements and made available to the auditors of the companies included in the consolidated financial statements. These, in turn, confirm the consistent application of the IFRS accounting guideline by the companies included in the consolidated financial statements.

In addition, the individual IFRS financial statements prepared by the group companies for consolidation purposes as well as the consolidated financial statements and combined management report of METRO AG are reviewed and monitored for compliance with applicable accounting standards as well as with additional rules and regulations by the respective auditors.

The interim consolidated financial statements for the six-month period undergo an auditor's review and the full-year consolidated statements are audited. The final auditor's opinion on the consolidated financial statements is published as an audit certificate in the annual report.

12. Risk and opportunity report

Risk and opportunity management system

In a dynamic market environment, the early identification and systematic exploitation of opportunities is a fundamental entrepreneurial task. This is the precondition for our company's long-term success. We are regularly exposed to risks that can impede the realisation of our short-term and medium-term objectives or the implementation of long-term strategies. In some cases, we must consciously take controllable risks to be able to exploit opportunities in a targeted manner. We define risks as internal or external events resulting from uncertainty about future developments that can negatively impact the realisation of our corporate objectives. We define opportunities as possible successes that extend beyond the defined objectives and can thus positively impact our business development. We consider risks and opportunities as inextricably linked. For example, risks can emerge from missed or poorly exploited opportunities. Conversely, exploiting opportunities in dynamic growth markets or in new business areas always entails risks.

With this in mind, we regard our company's risk and opportunity management system as a tool that helps us to realise our corporate goals. It is a systematic, group-wide process. It helps the company's management to identify, classify and control risks and opportunities. As such, risk and opportunity management is a uniform process. Risk management renders developments and events that could hinder us from reaching our business targets transparent at an early stage and analyses their implications. This allows us to put the necessary countermeasures into place in a timely manner. At the same time, this forecasting process allows us to systematically exploit emerging opportunities.

Centralised management and efficient organisation

Group-wide risk and opportunity management tasks and responsibilities are clearly defined and reflect our corporate structure. We combine centralised business management by the management holding company METRO AG with the decentralised operating responsibility of the individual sales lines.

It is the responsibility and a legal requirement of the Management Board of METRO AG to organise a governance system for METRO GROUP. We regard the risk management system, the internal control system and the compliance management

system as well as internal auditing as components of the governance, risk and compliance system (GRC system). This organisational structure is based on the governance elements identified in § 107 Section 3 of the German Stock Corporation Act (AktG) as well as the German Corporate Governance Code. The fundamental principles of the GRC system are defined and documented in the governance, risk and compliance guideline. The goal of this guideline is to render structures and processes more transparent as well as provide for a uniform procedural-organisational framework for the subsystems. The guideline sets the binding framework for existing and future regulations. This is the foundation on which we plan to increase the overall efficiency of the GRC system within METRO GROUP and to continuously enhance its effectiveness.

The group committee for governance, risk and compliance (GRC committee) co-chaired by the CEO and the CFO of METRO AG regularly discusses ways to harmonise and refine the GRC subsystems. The committee also discusses the current risk and opportunity situation. Permanent members include representatives of Corporate Accounting (including Risk Management and Internal Control Finance), Corporate Planning & Controlling, Corporate Treasury, Corporate Legal Affairs & Compliance (including Internal Control Operations), Group Internal Audit, Group Strategy and M&A as well as the Group Finance Director.

Risk management

The Management Board of METRO AG assumes overall responsibility for the effectiveness of the risk management system as part of the GRC system. The sales lines and group companies are responsible for identifying, assessing and managing risks. Key elements of internal monitoring include effectiveness checks in the form of self-assessments by the management of the sales lines and group companies as well as internal audits.

The Supervisory Board of METRO AG also oversees the effectiveness of risk management. In compliance with the provisions of the German Corporate Sector Supervision and Transparency Act (KonTraG), the external auditor submits the company's early-detection system as part of the risk management system to a periodic review. The results of this review are presented to the Management Board and Supervisory Board.

The Risk Management department within the Corporate Accounting department of METRO AG is responsible for overseeing and refining our risk management system. In coordination with the GRC committee, METRO GROUP's risk management

officer determines the company’s risk management approaches, methods and standards. The risk management officer also coordinates the underlying process. Together with representatives from individual group departments who are also members of the GRC committee, the officer continuously and promptly informs the Management Board of METRO AG of important developments in risk management, facilitates an exchange of information within our company and supports the continued development of risk management in all sales lines, group companies and central departments.

The risk management system is organised as a closed loop. As a result, we ensure the design’s effectiveness with respect to the defined risk management rules. In addition, this allows us to guarantee effective implementation and continuous improvement of the system based on results and experiences.

Risk management as a closed loop

Reporting

Group reporting is the central element of internal risk and opportunity communication. It is complemented by risk and opportunity management reporting. The aim is to allow for the structured and continuous monitoring of risks and opportunities and document this in line with legal and regulatory stipulations.

We conduct an annual risk inventory to systematically map and assess all material group-wide risks based on quantitative and qualitative indicators and uniform criteria relating to loss potential and the probability of occurrence. The results of the risk inventory and the risk portfolio are updated on a regular basis.

The centrally responsible risk coordinators in functional terms, for example, in procurement, sales or administrative functions, validate the results reported by the sales lines, group companies and central departments. In a second step, they summarise these in a functional risk profile coupled with a detailed description of material individual risks. In a third step, risk profiles for selective categories are validated in direct interaction between the risk coordinators and the GRC committee, and specific steps to improve risk management are devised.

In addition, we consider the results of the SWOT (strengths, weaknesses, opportunities, threats) analysis carried out as part of the strategic planning process. We also consider analyses of reports that we compile as part of our medium-term planning and projections. Furthermore, we examine relevant results from the internal control system, the compliance management system, the opportunity management system and internal auditing.

The overarching risk and opportunity portfolio at METRO GROUP that emerges from these findings enables us to gain a very good understanding of the company's risk and opportunity situation. The so-called GRC report describes the current situation and includes recommendations on risk management and measures to improve the effectiveness of GRC subsystems.

The Management Board regularly informs the Supervisory Board and the Accounting and Audit Committee about risk and opportunity management issues. Once a year, the Supervisory Board receives a comprehensive written report informing it about the organisation and alignment of risk and opportunity management as well as the current risk and opportunity situation.

At the same time as the half-year financial report was being prepared, we reviewed and updated the overarching risk and

opportunity portfolio for METRO GROUP that was compiled in the short financial year 2013.

Furthermore, an emergency notification system takes effect if serious risks to our asset, financial and earnings position arise. In this case, the Management Board of METRO AG directly and promptly receives the necessary information.

Strict risk policy principles

In principle, METRO GROUP takes entrepreneurial risks only if they are manageable and if the associated opportunities promise reasonable added value.

Risks incurred in conjunction with the core processes of wholesaling and retailing are borne by METRO GROUP. The core processes include the development and implementation of business models, decisions about store locations, and the procurement and sale of merchandise and services. Risks from support processes are reduced within the group or, where this appears sensible, transferred to third parties. In principle, we do not assume risks that are not related to core processes or support processes.

Risk management details clearly defined

The coordinated application of risk management tools is assured by the compilation of all relevant facts in guidelines. These include the Articles of Association and by-laws of group companies, internal group procedures and our group-wide risk management guideline. It defines

- the risk management framework (terms, basic structure, strategy, principles),
- the risk management organisation (roles and responsibilities, risk units),
- processes (risk identification, assessment and management),
- risk reporting as well as
- monitoring and controlling the effectiveness of risk management.

Based on the internationally recognised COSO II standard, the risk management framework addresses the three levels of risk management: corporate objectives, processes and organisation.

The first level of risk management relates to the clustering of corporate objectives. In this respect, METRO GROUP has defined the following clusters:

- Strategic objectives related to safeguarding the company's future economic viability (cluster strategy)
- Operational objectives related to the attainment of set key operational metrics (cluster operations)
- Corporate management objectives related to compliance with laws, regulations, internal guidelines and specified procedures (cluster governance)
- Objectives related to appropriate preparations to mitigate event risks such as breakdowns, business interruptions and other crisis events (cluster events)

On the second risk management level – the process level – the definition of objectives also serves as the starting point for risk mapping. In this context, we identify, classify and manage risks that would jeopardise or inhibit the achievement of our objectives should they materialise. As a rule, we consider all external and internal risks.

In addition, clusters are delineated in terms of functional categories based on the group's organisational structures, such as procurement, sales, human resources or real estate. In principle, we consider risks over a prospective one-year period. Strategic risks cover at least the medium-term planning horizon (three years). Any risks that are likely to occur are included in our business plans and outlook.

Risk classification

All identified risks are classified based on uniform standards and quantitative and qualitative indicators with respect to loss potential (negative effects on our corporate objectives and key performance indicator EBIT) and probability of occurrence (in per cent). In our assessment, we classify the loss potential for the group on the basis of three categories: $\geq$ €50 million, $\geq$ €100 million and $\geq$ €500 million. The probability of occurrence is broken down into five classes: low (< 10 per cent), unlikely ($\geq$ 10 to 25 per cent), possible (> 25 to 50 per cent), likely (> 50 to 90 per cent), high (> 90 per cent). All risks are assessed on the basis of their potential impact at the time of the risk analysis and before potential risk-minimising measures (presentation of gross risks, that is, before the implementation of risk limitation measures).

Risk units

On the organisational level, we determine the corporate units responsible for setting objectives in a clearly defined area as well as for identifying, classifying and managing risks. METRO GROUP's risk management defines these areas in line with the corporate organisation using independent risk units – generally companies – as well as in terms of function using categories that are responsible for a certain operational function or administrative task. The risk units cover the entire consolidation group in the consolidated financial statements.

Presentation of the risk situation

We have classified METRO GROUP's overall risk portfolio into risk groups. In addition to general risks, the Management Board of METRO AG identified and assessed the especially relevant

risks (gross risks) to METRO GROUP during the reporting period. These are listed in the following overview along with their changes since the previous year: in financial year 2013/14, risk number 13 (geopolitical situation in Russia/Ukraine) was included in the particularly relevant risks for the first time.

Risk group	No.	Particularly relevant risks 2013/14	Change since 2013
Risks related to the business environment			
Macroeconomic and sociopolitical risks	13	Geopolitical conflict in Russia/Ukraine	New
Environmental risks			
Sector risks			
Risks related to the retail/wholesale business	1	Challenge of the business model/change in consumer habits	Unchanged
	2	Loss of customers with relatively low sales volumes (C customers) at METRO Cash & Carry	Unchanged
	3	Inadequate customer-oriented food and non-food strategy at METRO Cash & Carry	Probability of occurrence has fallen from "likely" to "possible"; expansion of risk monitor to food strategy
	8	Inadequate implementation of strategic projects	Unchanged
Real estate risks	4	Unprofitable use of selling space	Unchanged
Risks related to business performance			
Supplier and product risks			
Supply chain risks			
Financial risks			
	7	Unexpected deviations from the budget or outlook	Unchanged
	11	Impairment of goodwill and other assets	Unchanged
	12	Multiple rating downgrades with a negative impact on liquidity and group financing	Probability of occurrence lowered from "unlikely" to "low"
Other risks			
Risks from portfolio changes			
Information technology risks	5	Business interruptions caused by IT system failures	Unchanged
Human resources risks	6	Inadequate development and support of talented employees	Unchanged
Legal and tax risks	10.1	Violations of antitrust or competition law	Unchanged
Compliance risks	10.2	Corruption	Unchanged
	9	Inadequate or ineffective internal control systems in store, purchasing, expansion and construction processes	Unchanged

These particularly relevant risks are classified as follows on the basis of loss potential (before risk limitation steps) as well as on the basis of probability of occurrence:

Short financial year 2013

Size of circle = potential impact

≥ €500 million

≥ €100 million

≥ €50 million

Notes

Low < 10%

Unlikely ≥ 10–25%

Possible > 25–50%

Likely > 50–90%

High > 90%

The width of the rings visualises the underlying probability of occurrence.

Unlike in the previous year, the circles in the image denoting the individual risks were placed in the middle of the accordant probability of occurrence ring to clearly convey the fact that the assessment of probability of occurrence is only conducted within the specified range.

In the process, we only list risks with a low probability of occurrence (< 10 per cent) if a particularly relevant risk from the previous year has changed in this area.

The following sections outline the individual risk groups as well as key management measures and the especially relevant risks. In principle, all group segments are affected. For specific issues, the respective business segments are indicated.

Risks related to the business environment

Macroeconomic and sociopolitical risks

As an international company, METRO GROUP is dependent on the political and economic situation in the countries in which it operates.

The global economy did pick up speed somewhat during financial year 2013/14. Overall, though, the recovery that followed two years of economic crisis remained modest. Economic momentum slowed considerably in many emerging countries in Eastern Europe and Asia. At the same time, many political crises and conflicts intensified during the year, particularly in the Middle East.

In Europe, the Ukraine conflict cast a long shadow over the political agenda. This conflict slowed the economies of both Ukraine and Russia.

During the current financial year, we expect to see only a slight improvement in economic conditions. At the same time, global economic risks have risen as a whole. Furthermore, the effort to consolidate government debt in the eurozone is a drawn-out process that will continue to suffer setbacks. Overall, the global economy has not yet returned to a path of sustainable economic growth following the financial and sovereign debt crisis.

Compared with the previous year, the risk and opportunities profile for the short-to-medium-term development of the retail sector and thus for METRO GROUP has once again improved only slightly. We are continuing to systematically expand in the growth regions of Asia and Eastern Europe to reduce potential risks posed by the regional differences in economic performance.

Our international position requires us to address possible economic, legal and political risks. The situation in individual countries can change rapidly. Unrest, changes in political leadership, terrorist attacks or natural disasters can endanger METRO GROUP's business in the affected country. In this context, the Ukraine conflict in particular is important to note for

the reporting period (risk number 13, new). Risks emerging from this conflict for METRO GROUP pertain to the loss or destruction of property/real estate, exchange rate fluctuations, restrictions on the movement of goods and regulatory changes. We insure ourselves as far as possible and to the appropriate extent against the loss of tangible assets and business interruptions that, for example, are the result of political unrest. Professional crisis management allows for a fast response and crisis management. In this regard, we have responded rapidly and effectively to the ongoing crisis in Ukraine, implementing our crisis reaction plan for the METRO Cash & Carry stores impacted by the violence. This plan includes evacuation guidelines, training and standard operating procedures for local employees. As a result, we were able to keep our employees and customers from harm and compensate the losses incurred through business interruptions and destroyed property through existing insurance policies (risk number 13, new). Our international presence provides us with the opportunity to offset economic, legal and political risks as well as fluctuations in demand between individual countries.

To limit the risks of expansion as much as possible, we plan each investment and each market entry based on a structured process and proven methods. We identify risks and opportunities by using feasibility studies that consider legal, political and economic conditions. We only enter new markets when risks and opportunities are deemed to be manageable. Even though we base our expansion decisions on the best information available, we cannot rule out the possibility that the growth momentum in individual countries will fall short of our expectations in the coming years. Difficulties in dealings with local authorities represent another risk, particularly in emerging markets. Occurrence of these risks would result in lower-than-forecast sales and earnings.

In financial year 2013/14, METRO GROUP took a number of different steps designed to further optimise internal processes related to expansion decisions and their successful implementation and, thus, to counteract the corresponding risks (risk number 9, unchanged since last year). Committees from the sales lines are involved in the decision-taking process regarding the efficient use of investment funds for expansion. The coordination processes are being continuously improved. Furthermore, previously taken investment decisions are being carefully monitored in a revised process.

For more information about our assessment of the development of the economic environment, see chapter 13 Report on events after the closing date and outlook.

Environmental risks

METRO GROUP is aware of its responsibility for the environment and has firmly embedded the principle of sustainable business in its corporate strategy. Environmentally harmful practices along the supply chain can seriously damage our image over the long term and endanger our business. This is why we implement numerous measures to ensure environmentally responsible business practices.

Specific environmental risks are discussed in the sections “Supplier and product risks” and “Real estate risks”.

For more information about environmental protection, see chapter 8 Sustainability management.

Sector risks

Risks related to the retail/wholesale business

The saturated markets of Western Europe, in particular, are characterised by rapid change and intense competition. The resulting conditions can influence business development and represent natural business risks. A fundamental business risk is consumers' fluctuating propensity to consume.

Changes in consumer behaviour and customer expectations pose high risks, among others, in the face of demographic change, rising competition and increasing digitisation. Failing to adequately consider customer trends and price developments or missing trends in our assortments and with respect to appropriate sales formats and new sales channels can have a negative impact on group sales and jeopardise our growth objectives (number 1, unchanged since last year). To counter these risks, we are expanding our sales channels based on a multichannel strategy tailored to our different sales lines. In the process, we are strengthening our online activities and expanding our delivery service. In addition, we are developing new stores for METRO Cash & Carry on the basis of a franchise concept while intensifying our competitor analyses. Through the application of an array of different strategies, we are working to further improve our purchasing and sales processes and to create added value for our customers.

The METRO Cash & Carry sales line faces the risk of losing customers with relatively low sales volumes, also known as C customers (number 2, unchanged from last year). We have started to implement systematic assortment, price, communication and marketing measures to counter this risk. These steps include a change in the communication model and concentrate on the continued digitisation and modification of marketing campaigns. Thanks to its cutting-edge IT technologies,

METRO Cash & Carry can increasingly employ new forms of interaction with customers – including social media and other new digital communications channels.

In principle, METRO Cash & Carry faces the potential risk of not meeting customers' needs in the food and non-food business (risk number 3). To create a broad overview, we have added the food strategy to our year-on-year risk assessment in this reporting period. To address this risk and to provide targeted product ranges, we continuously optimise our sales concepts and refine them to cater to the needs and shopping behaviour of our customers. In one reflection of this, we are expanding our range of regionally traded products in all sales lines and increasingly gearing our assortments to meet our customers' increasing demands with regard to environmental, social and health considerations. The probability of occurrence for risk number 3 has fallen from "likely" last year to "possible" now that the steps we have taken to create an improved, customer-oriented assortment design are taking effect.

We pursue transformation programmes aimed at boosting long-term sales and earnings and protecting the intrinsic value of our assets. In this context, risks emerge from the insufficient implementation and execution of strategic projects (risk number 8, unchanged since last year). To limit these risks, we have set up a comprehensive system that monitors project progress in the national subsidiaries and have created training programmes that are designed to facilitate project implementation.

To recognise market trends and changing consumer expectations at an early stage, we regularly analyse internal and external information. In the process, the group's own market research draws on qualitative market and trend analyses as well as on quantitative methods such as time series analyses or forecasts of market developments derived from analyses of sales data and the results of panel market research. Time series analyses also include the observation of product segments on the market over a certain period of time.

Real estate risks

Various factors pose a risk to the intrinsic value of METRO GROUP's store network. These include

- the unprofitable use of selling space; this also includes the risk emerging from unused selling space for which no further useful purpose can be found (risk number 4, unchanged since last year),

- intense competition for suitable properties during expansion,
- the risk of incorrect decisions in the selection of business locations and
- a deterioration in the profitability of a location, for example due to social-demographic changes in the catchment area.

To prevent maintenance and repair backlogs in stores, a far-sighted maintenance plan has been put into place. In addition, some locations may suffer loss of rental income as a result of a tenant's bankruptcy or possible deficient rental cover. We counteract this risk by continuously monitoring rental income and conducting new negotiations at an early stage. In addition, we get involved in the search for new tenants with good credit histories and in the development of new usage concepts for our real estate. In some regions, our real estate portfolio is also exposed to such natural disasters as earthquakes, flooding and storms. We seek protection against their potential effects by introducing structural measures and by taking out insurance.

We counter these risks through strategic and operational real estate management, far-sighted investment planning and technical risk management. Our active real estate management is primarily designed to increase the value of our entire real estate portfolio and is based on continuous market monitoring, transparent profitability audits and strategic decisions. In all countries, we select our locations on the basis of an intense examination. Since we continually monitor the profitability of our network of locations, we can identify adverse developments at individual stores or retail outlets early on and respond quickly. Should the measures we have taken not produce any successful results and should we think that a long-range improvement of the situation at the particular store or outlet is unlikely to occur, we will close the location, ensuring the continuous optimisation of the store network in the process.

In our real estate operations, we also intend to assume our responsibility for the environment and address possible risks (see the section "Environmental risks"). In this manner, we reduce the ecological footprint of our business locations. By 2020, we will reduce our specific greenhouse gas emissions by 20 per cent from their level in 2011. To achieve this goal, we are investing in such things as technical energy-saving solutions and in programmes designed to change the behaviour patterns of every employee. With the help of these energy-saving measures, we can also reduce our energy costs or at least cap them in the face of rising prices.

Risks related to business performance**Supplier and product risks**

As a retail company, METRO GROUP depends on external producers and providers for the supply of goods and services. We choose our suppliers very carefully, especially in the own-brand area. We place a particularly high priority on the reliability of our own-brand suppliers in terms of product quality and compliance with safety and social standards as well as suppliers' own efforts with regard to compliance. Defective or unsafe products, an exploitation of our environment or inhumane working conditions as well as failure to adhere to our compliance standards would cause continuous damage to the image of METRO GROUP and pose a long-range threat to the company's success. For this reason, we continuously monitor our own-brand suppliers to determine whether they adhere to METRO GROUP's high procurement and compliance policy standards. In particular, these include the quality standards tested by the Global Food Safety Initiative (GFSI), such as the International Food Safety Standard and the GLOBALGAP certification for agricultural products. They help to ensure the safety of foods on all cultivation, production and sales levels.

We are not the only ones who have these concerns. Our customers place priority on quality and safety and are becoming increasingly interested in the environmental and social sustainability of the products sold in our stores and of the processes used to make these products. In light of this shift, METRO GROUP approved a group-wide, cross-product purchasing policy for sustainable supply chain and procurement management at the end of 2013.

In addition, METRO GROUP has been committed to promoting humane working conditions at its suppliers for many years and conducts a broad range of measures in support of this goal. For example, our own-brand suppliers are required to protect fundamental human rights and to guarantee fair working conditions. As proof of this, our supplier contracts demand an audit based on the BSCI (Business Social Compliance Initiative) standard or an equivalent standard. This requirement applies to own-brand suppliers of non-food articles who manufacture end products in high-risk countries as defined by the BSCI. With systematic training programmes, we help suppliers, particularly in emerging countries, to create fair and humane working conditions. As part of our effort to support the international fire safety agreement for increased building safety in the Bangladesh textile industry, the Bangladesh Accord on Fire and Building Safety, we are working to increase building safety in the factories of all of our producers in Bangladesh. Our require-

ments on suppliers are contractually regulated. We regularly check to determine whether the requirements are being met. Violations of conditions can lead to exclusion from our supplier network or, in case of unacceptable production methods such as sandblasting of jeans, which is harmful to health, to a procurement ban on a product. In this way, we further minimise our supplier risk. Should, however, an incident related to quality occur, the process steps described in our manual on incidents and crises take effect. Our top priority is to correctly manage the incident in the customers' best interest. In addition, we examine possible improvements to our quality assurance systems.

To prevent disruptions in the supply of goods and to avoid becoming dependent on individual companies, we work with a variety of suppliers and ensure that we do not become dependent on individual companies. By taking this approach, we ensure that the desired product is practically always in stock in the desired quality and quantity and, in the process, achieve high levels of customer satisfaction.

Our success also depends heavily on the purchase prices of the products offered for sale. In many cases, our large purchasing volumes in numerous countries have a positive effect. Product prices are based on the availability of the required raw materials that may temporarily or continually become scarce. This can drive up purchase prices or lead to a certain level of volatility. We address procurement risks by continuously optimising the purchasing process. Such steps include joint procurement and the negotiation of terms with our suppliers. Prompt implementation of these improvements is a key success factor.

Over the medium term, such global challenges as climate change, the overfishing of the world's seas and access to clean water could restrict the availability of raw materials, including reductions in populations of certain types of fish. These trends can trigger price increases. For this reason, METRO GROUP has been supporting standards for more sustainable fishing and fish farming for years and has been working with relevant suppliers.

Another example is METRO GROUP's decision to join the Roundtable on Sustainable Palm Oil (RSPO) in 2011. The organisation, which includes companies and non-governmental organisations, promotes the sustainable cultivation of palm oil, a raw material primarily used in cosmetics and sweets. METRO GROUP plans to only use certified sustainable palm oil in its own-brand products beginning in 2020.

Other examples of product risks include supply bottlenecks after natural disasters, longer delivery times and price increases. METRO GROUP's purchasing and supply chain management create the structures that are needed to ensure the availability of goods at all times.

METRO GROUP comprehensively reports about the risks and opportunities resulting from climate change as part of its annual participation in a survey conducted by the independent non-governmental organisation CDP (formerly: the Carbon Disclosure Project). The CDP assessment shows whether companies are effectively addressing the effect of climate change on their business processes and whether they provide transparent information on these efforts.

For more information about our work to create a sustainable supply chain, see chapter 8 Sustainability management.

Supply chain risks

The responsibility of the supply chain is to ensure maximum product availability at optimised cost structures while considering aspects related to sustainability, such as energy and fuel consumption.

The growing variety of items in the product range and high merchandise turnover, however, result in organisational, IT, logistics and inventory risks. The growing internationalisation of our suppliers and the focus on regional and local product assortments increase these risks. The lack of active inventory management conducted on the basis of adequate planning parameters can result in significantly higher warehousing costs, above-average write-downs on products and, in exceptional cases, in the destruction of goods. Disruptions in the value chain, including in the transport of goods from the supplier to our stores or customers (during delivery), can intensify this effect. We counteract this by optimising inventory and product group management.

Inadequate regular communications regarding future product volume as a result of such things as non-existent or incorrect projections can result in insufficient product availability and inefficiencies in logistics. We respond to this risk by systematically reassigning and bundling responsibilities for customer order processing, procurement planning and master data administration in the Supply Chain Planning department.

Incomplete or poorly managed product and customer master data can lead to serious delays and disruptions in the inclusion and removal of products as well as the product supply to our

customers. For this reason, we have intensified our efforts to ensure the completeness and accuracy of master data by taking such steps as regularly monitoring relevant performance indicators.

Additional challenges arise from the expansion of our online activities, our multichannel business, delivery options and the increased complexity that results from these activities as well as other innovative sales formats. We address the resulting risks by intensifying cooperation among the affected departments. We also expect to produce synergies with joint supply chain solutions.

We prevent unnecessary complexity in the portfolio of our external logistics service providers and thus excessively high total costs by harmonising business partners. In the process, we also work to prevent dependencies on individual service providers from emerging.

Another logistics risk arises from the generally complex and at the same time underdeveloped supply structures that prevail in particular in emerging and developing markets. In many cases, these go hand-in-hand with particularly challenging climatic conditions that can result in food spoilage on the way from the producer to the store. METRO GROUP creates the necessary structures to ensure consistently high quality in the supply chain at all times. We conduct qualification programmes to prepare our suppliers and logistics providers in emerging markets for these logistics requirements. In this way, we also make a lasting contribution to local food supplies and counter the problem of food waste.

In case of product incidents, our logistics systems must be prepared to trace the product's itinerary and origin within a very short time. This is done with the help of modern technologies and product identification standards. We are actively involved in various international organisations to foster the developments of these standards and promote the introduction of innovative technologies for improved product identification.

Financial risks

The risk of price changes (interest rate risks, currency risks, share price risks), liquidity risks, credit risks in dealings with counterparties in the context of financial transactions and risks arising from cash flow fluctuations may have a significant negative impact on our financial result. For this reason, the financial risks of METRO GROUP are centrally managed.

Ensuring METRO GROUP's unlimited access to the capital markets is integral to the management of financial risks. Multiple rating downgrades would have a significant negative impact on our liquidity and group financing (risk number 12). To prevent this, our current strategy focuses on debt reduction. Among other things, this is achieved by continuously optimising our net working capital and focusing our investment funds on measures that add value to the company. In this way, we gain additional flexibility to finance the transformation of our business models in response to the continuously changing needs and demands of our customers while allowing for a stabilisation and medium-term improvement of our rating. In comparison to last year, the probability of occurrence of risk number 12 has fallen from "unlikely" to "low" because the debt has been further reduced and rating-relevant metrics have improved slightly.

Another identified risk concerns unexpected deviations from our budget or outlook (risk number 7, unchanged since last year). This could mean we would not hit our target figures and would have to revalue our assets, including our goodwill. In turn, this would have a negative impact on our asset and earnings position (risk number 11, unchanged since last year). For this reason, we attach a high priority to measures designed to limit these risks. In one reflection of this, we are implementing systematic strategic earnings improvement measures for the sales lines of METRO GROUP, focusing in particular on countries that are subject to impairment risk.

In addition, the steps we take to counter this risk include careful monitoring of risks and opportunities as well as the effective internal controls for the budget and forecast process. The Internal Audit department regularly reviews the effectiveness of the internal control system as part of its audit schedule. During the past financial year, we further intensified the planning and the related internal coordination process. The change of financial year has resulted in additional early planning security because our very profitable Christmas business now takes place at the beginning of the financial year, instead of at the end of it. Finally, the outlook offers far-reaching insights into the group's expectations for business development during the coming financial year.

For more information about financial risks and their management, see the notes to the consolidated financial statements in no. 43 Management of financial risks.

Other risks

Risks from portfolio changes

METRO GROUP aims to continuously optimise its portfolio. All portfolio changes and the related strategic and investment or divestment decisions are guided by their contribution to the company's success in terms of value-based management. We can reduce risks related to the intrinsic value of our assets – both in terms of individual groups of assets and in terms of our overall portfolio – through value-based management.

In financial year 2013/14, the disposal of the Eastern European business of the Real sales line (excluding Turkey) with the sale and subsequent deconsolidation of Real Poland was concluded after fulfilment of the final condition precedent. The disposal of Real's business in Turkey was also completed during the reporting period following the review of antitrust authorities in the summer of 2014. As a result of inadequate market opportunities, the Management Board of METRO AG decided to pull METRO Cash & Carry out of Denmark. As part of this decision, two stores will be sold, subject to the approval of antitrust authorities. The three remaining stores will close on 31 December 2014. The closure of METRO Cash & Carry's business in Egypt was completed in the first quarter of 2013/14. METRO GROUP also decided to sell METRO Cash & Carry's operations in Vietnam. The disposal of METRO Cash & Carry's business in Vietnam is expected to be concluded in financial year 2014/15 and is still subject to fulfilment of the usual conditions of execution and approvals by the responsible authorities. These transactions will increase the flexibility of METRO GROUP and facilitate investments in future growth. Risks resulting from these portfolio changes are reflected in the financial statements to the extent that this is required in the balance sheet.

During financial year 2013/14, METRO GROUP also acquired a 75 per cent stake in the Spanish food service distribution company MIDBAN. The aim of the transaction is to grow the food service distribution business at METRO Cash & Carry Spain and to sustainably secure the company's excellent market position.

Information technology risks

The demands of our information technology (IT) have markedly increased as a result of new formats and sales channels and their increasing importance to the group's business, such as online retail and deliveries. Other tasks of information technology include real-time analyses of business processes and timely monitoring and management of goods flows. Regulations such as those regarding data protection in credit card processing, the use of customer-specific information in big

data solutions that are associated with an increased public debate about misuse as well as the growing complexity of IT generate additional risks for our company.

As a result, we have reinforced the organisational measures that ensure our compliance with internal and external IT regulations. We regularly check systems connected to the Internet for weak spots. We counter the high complexity of modern IT landscapes through clear management regulations and a centralised corporate architecture, known as enterprise architecture management.

Important business processes such as purchasing/product ordering, marketing and sales have used IT systems for many years. New systems for online retailing must be continuously available, as these systems are a prerequisite for unlimited access outside normal store hours. As a result, the continuous availability of the infrastructure is a critical factor in the development and implementation of our IT solutions. Systems that are essential business operations in the stores, especially checkouts, are largely self-contained and can continue to be used for some time, even during events such as network failures or the failure of central systems. In case of partial network failures, they can automatically reroute shipments or switch to redundant routes.

Modern technologies such as remote server management and cloud computing allow us to use our hardware efficiently. In addition, in the event of one or several server failures, centralised IT systems can be quickly restored. We operate several central computer centres, which even enable us to compensate for business interruptions and to limit them to a minimum. We have introduced a contingency plan to restore computer centres in Germany following longer-term outages (for example, as a result of fires, natural disasters or criminal actions) (risk number 5, unchanged since last year).

Information is a key resource for all companies of METRO GROUP. This means that it must enjoy the same protection as all other assets. For this reason, METRO AG developed a documented IT security management system (ISMS), which was launched at the start of 2013. The aim of this system's framework is to ensure the confidentiality (access only for authorised users) and integrity (accuracy and completeness) of this information. Among other things, the management principles for IT security describe our operational and organisational structures. We have implemented IT security controls in accordance with the industry standard ISO 27000. For example, the IT security

guideline sets out requirements for the assignment of passwords. In this way, we ensure that the data we process are correct and complete and can only be viewed by authorised staff. The necessary user accounts and access authorisations are administered centrally according to predefined, partially automated processes. We regularly review whether group specifications are followed in terms of critical user rights and provide centralised reports on the results of our examinations. Affected employees are made aware of IT security issues, prepared for these and kept up-to-date through regular, standardised training courses in accordance with ISO 27000. In addition, the key processes and IT systems of our central IT company METRO SYSTEMS are reviewed by internal audit and by external inspectors who examine and certify them in accordance with the international standard for audit reports of service organisations ISAE 3402 (International Standard on Assurance Engagements).

Awareness of the importance of data protection was further strengthened at all levels of our group. The commitment to adhere to the data protection standards of the German Federal Data Protection Act (BDSG) is part of all employment contracts. In particular employees of company units that have access to and handle sensitive data undergo on-site training on data protection. Employees with privileged access rights (for example, administrators) must sign an additional formal obligation.

Human resources risks

The expertise, dedication and motivation of our employees are key success factors that have a decisive impact on METRO GROUP's competitive position. One prerequisite for achieving strategic goals are highly qualified experts and managers. It is an ongoing challenge to recruit and retain such valuable employees for the group, in particular in the face of demographic change and intense competition for the best people. Intra-company programmes for the continued qualification of employees and the strengthening of corporate culture are also indispensable. To ensure that our employees have the requisite expertise and leadership skills, we optimise training and professional development programmes at all levels. Training courses and effective human resource development measures promote entrepreneurial thinking and actions; variable pay components based on the attainment of corporate and individual objectives serve as an incentive. Direct participation in business success increases employees' identification with METRO GROUP and enhances their awareness of opportunities and risks in all entrepreneurial decisions.

One thing is certain: METRO GROUP can only grow if we support our employees. This is reflected in annual performance reviews in which past achievements are assessed and future development measures are agreed upon with individual employees. With targeted training programmes, which we implement in cooperation with various partners, we manage to attract young people to METRO GROUP and to optimally develop their particular strengths. In Germany, in particular, METRO GROUP companies therefore place great value on their own training programmes for employees. With a share of 7.7 per cent in the reporting period, we are one of Germany's largest providers of occupational training.

Succession planning at METRO GROUP, in particular in senior management positions, is guaranteed through customised career paths and development plans. All these measures serve to counter the key risks of insufficient talent development and promotion (risk number 6, unchanged since last year).

Health promotion concepts, occupational safety measures and locally coordinated programmes such as back therapy training, fitness classes, company sports activities, dietary tips, stress prevention training courses, ergonomic advice, computer glasses and employee counselling programmes provide for a safe, hazard-free work environment. We counter risks of non-compliance with applicable labour regulations by introducing clear guidelines and compliance rules in connection with a respectful approach to our employees. This effort is supported by guidelines on fair working conditions and social partnership. Our guidelines on occupational safety and health management aim to create a work environment characterised by respect, fairness and partnership.

For more information about METRO GROUP's human resources policy, see chapter 6 Employees.

Legal and tax risks

Legal risks arise primarily from labour and civil law cases as well as from changes in trade laws. In addition, risks for METRO GROUP may arise from preliminary investigations, for example, possible infringements of antitrust or competition law (risk number 10.1, unchanged since last year). Anti-trust law risks may arise in the context of business dealings with METRO GROUP suppliers in such areas as the resale price of retail goods. For pending antitrust law proceedings, where sufficiently substantiated, necessary risk provisions were created.

Tax risks mainly emanate from external audits which take a differing view of certain circumstances and transactions. In addition, risks may result from interpretations of sales tax regulations. The Corporate Group Tax department of METRO AG has established appropriate guidelines to ensure early detection and minimisation of tax risks. These risks are regularly and systematically examined. The resulting risk minimisation measures are coordinated by the Corporate Group Tax department of METRO AG and the national subsidiaries.

Control of Media-Saturn-Holding GmbH

Based on the arbitral award of 8 August 2012, the approval of this decision by the Higher Regional Court of Munich of 18 December 2013 as well as the binding ruling by the Munich court on 9 August 2012, the Management Board feels confirmed in its opinion that the consolidation of the Media-Saturn group of companies was rightfully effected according to the relevant IFRS (International Financial Reporting Standards) regulations, both in the past and in the consolidated financial statements as of 30 September 2014.

Through its fully owned subsidiary METRO Kaufhaus und Fachmarkt Holding GmbH (METRO KFH), METRO AG indirectly holds 78.38 per cent of the shares in Media-Saturn-Holding GmbH (MSH). In March 2011, the shareholders' general meeting of MSH decided, with the votes of METRO KFH, to create an advisory board to strengthen the governance structures at MSH. The advisory board takes decisions by simple majority in number on operational measures proposed by the executive board of MSH that require approval. According to the Articles of Association of MSH, METRO AG, or METRO KFH, has the right to delegate one more member to the advisory board than the collective body of shareholders and therefore has a majority by number on the advisory board. The appellate court dealing with the appeal of a non-controlling shareholder ruled fully in favour of METRO AG, endorsing the effective establishment of an advisory board and determining that an arbitration court is the responsible authority for all issues of authority and majority requirements of the advisory board. Upon the appeal of METRO KFH, the arbitration court endorsed key aspects of METRO's position in its arbitral ruling of 8 August 2012: the advisory board can take decisions by simple majority in number on operational transactions proposed by the executive board of MSH that require approval. However, a minority shareholder of MSH has appealed the ruling of the Munich court that endorsed the arbitral award to the German Federal Court of Justice.

In addition, the member of the advisory board appointed by the non-controlling shareholder has filed several legal challenges against MSH and raised questions about decisions taken by the advisory board of MSH. This concerns, among other things, the budget resolutions for 2012/13 and 2013/14. They particularly criticise that a majority of 80 per cent is required in the advisory board and that this majority had not been reached, representing a violation of the division of authorities determined in the articles of incorporation. Most of these actions – in connection with the approval of the preparation of the annual financial statements of MSH as of 30 September 2012 and in relation to budget resolutions for 2012/13 – have already been dismissed in the first instance. The relevant defeated claimant filed an appeal against these verdicts with the Higher Regional Court of Munich. Meanwhile, the Higher Regional Court of Munich decided that it intends to dismiss the appeal because the senate believed it was without merit. In response, the claimant in this case regarding the approval of the preparation of the annual financial statements has withdrawn the appeal. Furthermore, in connection with the budget resolutions for 2012/13, the Higher Regional Court of Munich dismissed the appeal on the basis of the previous resolution. The claimant filed a complaint relating to non-admission with the German Federal Court of Justice. In METRO's view, the chances of success of the non-admission complaint and other challenges are also low. In particular, METRO does not expect the courts to deviate from the arbitration court's decision regarding the majority voting requirement for the advisory board.

Moreover, the minority shareholder filed additional complaints against MSH – namely against resolutions of the shareholders' meeting regarding the individual location changes implemented in the meantime and the minority shareholder's aspired dismissal of a managing director installed by METRO. After MSH and METRO won the case involving the location changes before the Ingolstadt District Court, the Higher Regional Court of Munich upheld the appeal in part and demanded in concrete circumstances an individual content-related vote by METRO. MSH and METRO have filed a complaint relating to non-admission with the German Federal Court of Justice. The Ingolstadt District Court has not yet reached a decision on the complaint of the minority shareholder through which the shareholder aims to achieve the dismissal of a managing director installed by METRO. The Ingolstadt District Court has already dismissed the minority shareholder's request for an injunction against the managing director that would have prohibited him from performing his duties. The minority shareholder has filed an appeal with the Higher Regional Court of Munich.

Furthermore, a METRO AG shareholder filed a nullity plea regarding the approved annual financial statements of METRO AG as of 31 December 2012, citing an alleged infringement of the regulations governing the structure of the annual financial statements due to the allegedly flawed consolidation of the Media-Saturn group of companies in the consolidated financial statements of METRO AG. On 3 April 2014, the Düsseldorf District Court ruled in METRO's favour in a legally binding decision.

If, contrary to the expectations of the Management Board, the German Federal Court of Justice were to side with the minority shareholder, the arbitral verdict were invalidated and, in another procedural step, another arbitral court were to decide this matter to the disadvantage of METRO, or a court were to reach a ruling that contradicted the arbitral verdict in relevant issues as a result of other legal challenges filed by such individuals as members of the advisory board, the Management Board's opinion on the full consolidation of the Media-Saturn group of companies would have to be reviewed. In that case, a deconsolidation of the Media-Saturn group of companies might become necessary if the sustained power to exercise control cannot be assumed any more. A deconsolidation of the Media-Saturn group of companies based on current values would lead to one-time non-cash deconsolidation income. Following the deconsolidation, the interest in the Media-Saturn group of companies would have to be recognised at equity. This change regarding the consolidation of the Media-Saturn group of companies could impact the company's key financials.

For more information about legal issues, see the notes to the consolidated financial statements in no. 46 Other legal issues.

Compliance risks

The activities of METRO GROUP are subject to various legal stipulations and self-imposed standards of conduct. Legal requirements in the various jurisdictions as well as the expectations of our customers and the public regarding corporate compliance have generally continued to increase and become more complex. In response to these requirements, METRO GROUP has established a group-wide compliance system that it continuously refines. The aim of this system is to systematically and sustainably prevent regulatory infringements within the company. METRO GROUP regularly identifies behavioural corporate risks.

Our compliance management is primarily focused on preventing corruption and antitrust law risks. On the one hand, corruption risks arise in dealings with public authorities and public

officials, for example, in the context of the company's international expansion or authorisation processes. On the other hand, they can arise in business dealings with suppliers and other business partners (risk number 10.2, unchanged since last year). In addition, the group-wide compliance management system covers other relevant criminal and penal risks, data protection and labour law-related risks such as discrimination.

As part of the compliance management system, the necessary organisational structures are established in consideration of all identified and assessed compliance risks. The responsible departments consistently manage and control the risks within the existing structures.

METRO AG has introduced group-wide standards of conduct to manage the identified compliance risks, including a handbook on antitrust law that provides guidelines on supplier negotiations, among other areas. This handbook also contains templates for antitrust law-compliant communications with suppliers. In addition, METRO AG has introduced group-wide anti-corruption policies outlining standards of conduct for dealings with both authorities and public officials and with business partners. The anti-corruption guidelines also stipulate that a compliance check must be carried out before entering into a business relationship with business partners in high-risk areas.

Compliance guidelines are continuously updated and adjusted in a risk-based manner. These efforts are complemented by compulsory training courses, systematic and target group-oriented communications and the consistent, disciplined handling of compliance incidents and relevant follow-up measures. In addition, METRO GROUP employees, their business partners and customers have access to a professional reporting system that enables them to notify the company of compliance violations and potential violations in all group languages. If necessary, incidents may be reported anonymously. The compliance organisation ensures that all reported cases are investigated in an appropriate fashion.

By strengthening its internal control system, the company ensures that compliance and governance requirements are being increasingly integrated into its operational business and financial processes and reviewed.

In sensitive process areas, particularly expansion, construction, purchasing and store processes, we will continue to apply the improvements we initiated in the previous financial year (risk

number 9, unchanged since last year). This is the reason that we conduct risk analyses as well as modify or expand our operational control structures. In addition, we increasingly assess the effectiveness of standard controls for specific processes.

Presentation of the opportunity situation

METRO GROUP has numerous opportunities to ensure long-term positive business development. Above all, these are due to the fact that we respond in a rigorous manner and at an early stage to the needs of private consumers and professional customers. Our key goal is to create value for our customers. As part of this work, we employ new sales channels and exploit the opportunities created by demographic trends and the increasing differentiation of the mature markets of Western Europe and population growth in developing and emerging countries. We analyse the relevant global and national trends and take decisions aimed at systematically exploiting opportunities in the future and creating competitive edges.

Opportunities from the development of business conditions

During the current financial year, we expect to see only a slight improvement in business conditions for retail.

Our sales and earnings could profit from the slightly improved business situation. Demand – including for the long term – is rising in countries with growing populations. METRO GROUP does business in many markets where we can benefit from this trend. In addition, we are continuing our selective expansion in the growth regions of Asia and Eastern Europe. In the process, we are focusing on business units and countries where we can build a distinct profile and strong market position. As a result, we plan to continue expanding our activities in China, Russia and Turkey as well as India.

The removal of bureaucratic barriers can help ease METRO GROUP's entry into new markets. Trade between countries of the European Union (EU) and third countries with which the EU has concluded free-trade agreements (including Canada, Moldova, South Korea and Ukraine) or with which the EU is currently conducting negotiations (including India, Japan, the United States and Vietnam) could be conducted with no or limited customs duties. In our view, ongoing negotiations regarding an agreement to facilitate trade are also particularly promising. Imports and exports could be streamlined and the costs of international shipments of goods could be reduced by

up to 10 per cent. For this reason, METRO GROUP welcomes the results of the Ninth WTO (World Trade Organization) Ministerial Conference in Bali in December 2013 and the decision of the 160 WTO members to conclude a multilateral agreement aimed at streamlining customs-clearing procedures and boosting the efficiency of the customs processes used by WTO member countries.

Strategic business opportunities

METRO GROUP's sales lines have high levels of brand equity in the countries where they do business. We have assumed leading positions in many markets. We must further strengthen and expand these. Weaker market participants have withdrawn from the market, especially in countries that were hit particularly hard by the ongoing economic and financial crisis. We are working to fill these gaps or, when reasonable, to take over individual locations. Market exits of competitors would create additional opportunities for market share gains. In addition, we see potential in the successful repositioning of national subsidiaries operating in a challenging economic environment (including Germany and Southern Europe). The ongoing transformation and restructuring measures we have already launched aim to improve these companies' market position and boost their profitability.

By optimising sales concepts, continuing to focus on core target groups and modernising stores, we are creating opportunities to win new customer groups and to bolster existing customer relationships. To this end, METRO GROUP continuously provides funds for investment. The company's investment strategy is aimed at protecting and consolidating the competitive strength of all sales brands while addressing customers even better and in an even more targeted manner. Examples include a distinct intensification of our online activities and multichannel business, measures to strengthen our own brands, franchise concepts, investments in innovative sales formats and customer-centric services and solutions. In all sales lines, we see great opportunity in the sensible dovetailing of stationary and electronic retailing. In the cash-and-carry business, we see further substantial potential in the continued expansion of our delivery channel and in tapping additional professional customer groups. For Real's business, opportunities are being created by the strategic transformation that is focusing on store refurbishment, the optimisation of the store network and a stronger customer orientation, among other things.

Online sales remain an important opportunity for our company's future success. Online retail is experiencing strong growth. We still believe that this development will continue and project continued competitive momentum both in the stationary business and in online retail over the medium term. As a result, it is imperative for METRO GROUP to further strengthen its online sales channel. All our sales lines now have online shops in Germany and in many other countries. During the past financial year 2013/14, we continuously improved the online shops of Media Markt, Saturn, Redcoon, Real and Galeria Kaufhof. By doing so, we made additional strides in the shift from strictly stationary retail to integrated multichannel marketing. Unlike strictly online providers, we create real added value for customers this way. All sales lines of METRO GROUP are evolving into multichannel companies with the aim of becoming no-line retailers, that is, optimally linking store, online and mobile offerings. The dynamic development of information technologies creates opportunities for our company to optimise its own processes and offer its customers new solutions. Our first step in this area is to launch a pilot project to test the extent to which we can deploy an innovation at our company and to invest in interesting start-up companies. This approach ensures control over feasibility and security risks as well as risks related to the integration of these innovations into our existing systems. On the basis of its key strengths – name recognition, customer frequency, store network and purchasing power – the group focuses on five innovation areas in its drive to move the company forward:

- Store: offer products via mobile devices that had previously only been available online;
- Channel: integrate sales channels and continue to develop new channels: e-commerce, mobile commerce, food e-commerce;
- Marketing: individualise and improve effectiveness and efficiency of marketing and of customer relationship management/smart data;
- Logistics, supply chain and delivery: deliver the right products at the right time to the right place for the lowest price possible;
- New products and services: introduce and link new products and services.

These innovation areas are being fuelled in particular by information technologies that are more widely and easily used, including mobile communications (“mobile computing”), social media and cloud solutions. The implementation of solutions to process large amounts of data (big data) should create improved marketing instruments, more efficient logistics and an opportunity to introduce new products and services.

Demographic trends offer another tremendous opportunity for METRO GROUP. Ageing populations in Western Europe and the growing concentration in economic and cultural centres dominate our customers’ current and future needs. The stores of our sales lines are easy to reach and, as a rule, are located on the ground level. In addition, the outlets offer assistance and products designed to meet the needs of customers from all generations. As a result, we see good opportunities to gain additional market share.

Business performance opportunities

In addition to rigorously leveraging cost-cutting opportunities, we are creating a foundation for long-term success by increasing our productivity, especially through process optimisations. This effort includes a number of projects that we have already initiated and will now systematically continue to pursue. As a result, we will continue to expand our delivery activities and increase the share of high-margin own-brand products in total sales. Should we make more progress in the implementation of further productivity enhancements than we currently expect, this could have a positive impact on our business development.

In addition to cost components, quality and freshness are critical differentiating factors that are particularly relevant for food. By having employees who continuously check and ensure quality, we can gain an edge on our competitors and create customer perception that will have a positive effect on sales and earnings.

Additional opportunities will arise from efforts to cut our greenhouse gas emissions. Our climate protection goal will indeed require investments. But as a result of lower costs, particularly for energy, these investments will create savings over the medium and long term. These savings will result in financial and environmental benefits and improvements.

The operational activities of our real estate company METRO PROPERTIES were integrated into the sales lines on 1 October 2013 to ensure efficient processes and solid cooperation in the context of METRO GROUP’s current transformation. METRO PROPERTIES applies its expertise to the key value drivers in portfolio and asset management, project development and real estate sales. METRO PROPERTIES conducts regular benchmarking with leading real estate companies to ensure the delivery of best-in-class solutions for the group. In addition, the company promotes select project developments that help the sales lines to enhance their appeal to customers while raising the value of METRO GROUP’s property portfolio. These values are supported by active, comprehensive and intelligent real estate. Targeted transactions ensure that risks and opportunities in the property portfolio are carefully balanced. In this way, METRO PROPERTIES makes an important contribution to the strength of METRO GROUP.

Overall assessment of the risk situation by the company's management

The Management Board and the Supervisory Board of METRO AG are regularly informed about the company's risk and opportunities situation. Overall, the risk and opportunities profile of METRO GROUP remains at last year's level due to the slow recovery of the global economy during the reporting period. To evaluate the present risk situation, risks and opportunities were not only examined in isolation: the interdependencies between risks were analysed and rated according to their probability. Our assessment shows that the risks are generally manageable and that the identified individual and cumulative

risks do not represent any of those that jeopardise the continuity of the group due to illiquidity or over-indebtedness over a period of at least one year. We are confident that METRO GROUP's earnings strength provides a solid foundation for sustained positive business development and the exploitation of numerous opportunities. This assessment is mirrored by the ratings of the internationally leading, independent rating agencies that we have commissioned: both Moody's and Standard & Poor's continue to award METRO GROUP an investment grade rating with a stable outlook. The Management Board of METRO AG currently does not expect any fundamental change in the risk and opportunities situation.

13. Report on events after the closing date and outlook

Report on events after the closing date

Events after the closing date

Between the closing date (30 September 2014) and the preparation of the consolidated financial statements (24 November 2014), the following events of material importance to an assessment of the earnings, financial and asset position of METRO AG and METRO GROUP occurred:

As part of the decision taken during the reporting period to withdraw from the wholesale business in Denmark, METRO GROUP signed an agreement in October on the partial sale of METRO Cash & Carry Denmark to Euro Cater, a leading grocery wholesaler in Denmark and Sweden. Subject to the approval of Danish antitrust authorities, Euro Cater will take over the wholesale stores in Glostrup and Aarhus. In addition, METRO GROUP will close the remaining three wholesale stores in Denmark on 31 December 2014 and thus withdraw from the Danish market. The anticipated financial effects of the disposal and closure were recognised in the annual financial statements for 2013/14 by means of asset impairments and the creation of provisions for expected closure costs. For this reason, these events should have only a minimal impact on the financial result in coming financial years.

On 21 October 2014, METRO GROUP successfully issued a benchmark bond in the corporate Eurobond market, thus optimising its financing maturity profile. The seven-year bond has a volume of €500 million and a coupon of 1.375 per cent. The issue was priced at 75 basis points above the seven-year swap rate.

In November 2014, 100 per cent of shares in MAKRO Cash & Carry Wholesale S.A., Greece, were sold to INO S.A., a company 70 per cent owned by the Greek retail company I. & S. Sklavenitis Trade S.A. The sale comprises all assets and liabilities from the operating business and real estate. MAKRO Cash & Carry Greece generated sales of €289 million in financial year 2013/14. The sale was concluded at a company value of €65 million and will likely result in revenue of a similar amount. The transaction is still subject to the approval of the Supervisory

Board of METRO AG as well as the responsible antitrust authorities. It will likely be concluded in the first half of the 2015 calendar year.

Outlook

The outlook of METRO GROUP considers relevant facts and events that were known at the time of preparation of the consolidated financial statements and that can have an impact on future business developments. The outlook on economic parameters is based on the evaluation of leading indicators. In addition, it draws on the analyses of a number of national and international economic research institutes and organisations. The outlook is largely based on the analyses of Consensus Economics, Fitch IBCA, Moody's and the Economist Intelligence Unit (EIU). Fundamentally speaking, the following conclusions reflect a mid-range scenario of expectations.

Economic parameters for 2014/15

During the reporting period, global economic momentum increased slightly once again. However, the recovery that followed two years of economic weakness remained subdued.

While leading indicators in the United States are developing relatively robustly overall, the economies of eurozone countries are weakening once again. Overall, economic conditions in the eurozone and in emerging economies remain challenging. For these reasons, we expect that economic growth in 2015 will likely at most be slightly above the growth forecast for 2014 of 2.4 per cent. As a result, growth will again likely remain below-average in a long-term comparison.

At the same time, global economic risks have risen again slightly. The conflict between Ukraine and Russia is impeding growth beyond these countries' own borders. In addition, the political conflicts in the Middle East are fuelling uncertainty overall. Moreover, the eurozone is still in the process of consolidating government debt, and new setbacks cannot be ruled out. As a result, we anticipate at most a slight uptick in growth for Western Europe during the new financial year. For Eastern Europe, we expect to see a somewhat higher growth rate following the weak basis for growth of under 1 per cent in 2014. We do not expect the region to produce significant growth momentum. The same is true for Asia. Here, our best-case scenario is a growth rate slightly above this year's level.

Overall, the global economy has not yet returned to a path of sustainable economic growth following the financial and sovereign debt crisis.

Germany

In the past financial year, the German economy initially picked up speed but then lost significant momentum as the year progressed. Overall, though, the German economy continued to produce above-average growth compared with the rest of Western Europe, expanding by an estimated 1.3 per cent. However, the most recent leading indicators are pointing to a slowdown – due in part to global economic weakness. While we expect to see solid economic growth of 1 per cent for 2015, it will likely remain below 2014 levels. However, this level of growth should be sufficient to ensure stable development in the job market. As a result, we expect private consumption and retailing to produce solid growth similar to that seen in the past financial year. The German economy is still in good shape compared with the rest of Europe. However, continued below-average levels of investment could impede medium term growth prospects.

Western Europe

Despite the moderate pace of recovery, economic momentum in Western Europe remained altogether subdued. The ongoing efforts to consolidate sovereign debt continue to act as a drag on economic recovery. In addition, foreign demand is only growing at a slow rate overall. Leading indicators for many countries are pointing to a slowdown. The risk of the region falling into another recession is a real possibility. Overall, we expect that economic growth in 2015 will be along the lines of 2014 at nearly 1 per cent. Growth will be supported by the weakening of the euro against the US dollar, a development that will improve export prospects altogether.

Due to the continued below-average growth prospects, the unemployment rate will decline only very slowly. As a result, we foresee little momentum for retail growth. Following a nominal growth rate of nearly 0.5 per cent in the past financial year, we expect to see at most a slightly higher nominal gain of 1 per cent for the current financial year. On a price-adjusted basis, this would mean stagnation.

At the same time, the divergent economic development of the periphery countries hurt by the economic crisis and the considerably more robust core countries is still visible. However, significant differences are already being observed among the former crisis countries. Spain is performing particularly well.

Both its economy as a whole and the retail sector are also likely to grow at an above-average rate in Western European comparison during the new financial year. By contrast, the economic situation in Italy remains challenging. The country still needs to implement far-reaching reforms to improve economic output. With a view to the core countries, we expect France in particular to produce only weak economic growth during the new financial year. Aside from Germany, we expect to see above-average economic growth and thus robust retail conditions, especially in Austria, Switzerland and the Scandinavian countries.

Eastern Europe

During the past financial year, the economies of Central and Eastern Europe moved in different directions. The countries of Central Europe in particular were able to participate somewhat in the slow recovery of Western Europe thanks to their economic ties to the region. In Eastern Europe, by contrast, economic conditions proved challenging, especially in Russia and Ukraine as a result of their political conflict, as well as in Turkey.

Despite slightly improved economic prospects in Central Europe, Eastern Europe as a whole was only able to grow by just around 1 per cent in the past financial year. For 2015, we again expect to see slightly higher growth overall. However, it is very likely that growth will remain below 2 per cent and thus below the region's growth potential for yet another year. Key factors influencing the region's economic prospects will be the ongoing conflict in Ukraine and developments in the eurozone. Altogether, we expect that the countries of the region will continue to develop at varying speeds in 2015. The countries of Central Europe – particularly Poland, Hungary, the Czech Republic and Slovakia – are likely to produce solid economic growth. While the Ukrainian economy is likely to continue to weaken, we expect the Russian economy to produce at least a slight gain in growth again. In the medium term, we anticipate that economic momentum in Eastern Europe will increase and the high degree of catch-up potential will be fully tapped.

Below-average economic growth will continue to create challenging retail conditions. Higher nominal retail growth rates, as seen in Russia and Turkey, are primarily price-driven. Food prices have risen dramatically in recent months, particularly in Russia as a result of the ban on food imports. This situation is likely to persist for some time. For the countries of Central Europe, we project considerably more modest retail growth rates of 3 per cent. Despite the anticipated extremely low rate of inflation, price-adjusted growth would still represent real growth of nearly 2 per cent.

Asia

The emerging economies of Asia once again recorded the highest growth in the past financial year. For 2015, we project that Asia will again generate the highest growth among the regions where METRO GROUP does business. Growth will likely total approximately 4 per cent (2014: 3.8 per cent) – including Japan. For this country, we anticipate growth of approximately 1 per cent or slightly more. Over the medium term, the growth potential of Asia's emerging economies will remain high. However, the region still needs to implement structural reforms to boost economic output.

During the reporting period, China recorded a growth rate of more than 7 per cent. As in previous years, this was the highest growth of all countries where METRO GROUP does business. For 2015, we project that growth will slip slightly below this level. Overall, the world's second-largest economy will continue to generate less growth momentum than it had in previous years. The steps undertaken by the government to reduce existing imbalances and further liberalise the economy should be sufficient to increase growth momentum over the medium term.

Retail conditions in Asia's emerging economies are still relatively good overall. For China and India, we project nominal double-digit retail growth rates once again for 2015. In India, this growth will continue to be inflation-driven: consumer prices are only slowly declining due to the current account deficit and the devaluation of the country's currency. In the saturated Japanese market, we foresee only moderate retail momentum in 2015 following the value added tax (VAT) increase that took effect during the reporting period and the related pull-forward effects.

Building on our forecast for economic and retail sector developments, the following section provides an overview of the resulting implications for individual sectors as well as our sales lines.

Future sector trends and developments at METRO GROUP

METRO Cash & Carry

The performance of the self-service wholesale trade industry can be seen against the backdrop of current macroeconomic parameters. For the upcoming financial year, we expect the global economy to experience a slow and uneven recovery in the regions. For this reason, we assume that the

varied development of the economic regions will be reflected in the performance of the cash-and-carry segment.

For Germany and Western Europe, we expect to see only small growth impulses for self-service wholesale trade in light of the relatively subdued economic momentum overall. Demand for food products should reach about the same level as in past years. As inflation related to food prices will likely remain low, we expect price increases to produce only few positive growth impulses. For non-food products, we expect to see a slightly negative trend in those countries with weak economies. In other countries, we believe demand will pick up a bit. Overall, we expect to see a slight increase in sales in the Western European cash-and-carry segment.

In Eastern Europe, we foresee growth for self-service wholesale trade sales in local currency during the upcoming financial year. Growth could be affected by the political crises in the region. Should the conflict in Ukraine continue to intensify, we anticipate negative effects on demand in both Ukraine and Russia. For Turkey, we continue to project dynamic growth, under the condition that the political conflict in Syria will not negatively impact economic momentum in Turkey. In addition, we expect price increases in the region to support growth in the upcoming financial year. Overall, there is still potential for growth within the region's cash-and-carry segment, even though we believe that the growth rates in this segment will lag behind those of the fast-growing modern food retail segment.

For the upcoming reporting period, we expect Asia's emerging economies to produce the highest cash-and-carry growth rates. Macroeconomic conditions continue to form a good basis for dynamic retail growth. In particular in India, we expect positive impulses from price increases to support segment sales. In spite of the easing of the ban on direct investments in India made by international retail companies, we project that competition from modern grocery retailing formats will remain relatively weak there in the near future. As a result, traditional retailers, an important customer group for self-service wholesale trade, continue to act as the most critical supply channel for food in large parts of the region. For this reason, the region offers tremendous potential for self-service wholesale trade.

In spite of the intended disposal of activities in Vietnam, Asia and Eastern Europe will remain a focus of METRO Cash & Carry's strategic expansion during the upcoming financial year.

Media-Saturn

Because economic conditions in Europe are expected to differ widely, divergent regional trends in consumer electronics retailing will continue.

In Germany, consumer electronics retailing performed extremely well during the past financial year, generating growth of around 4 per cent. Due to the base effect associated with this, we are now projecting only a slight gain of around 1 per cent for 2015. While demand for such trendy product groups as tablets and smartphones is weakening, innovations beyond the TV and mobile segments are gaining relevance.

In audio, streaming-enabled devices, such as multi-room systems, mini-speakers and sound bars, hold the greatest sales potential. The product family of so-called wearables, such as smart watches and fitness bands, is still in the early stages of market introduction.

Both trends are creating a completely new demand situation with regard to the connected world, a segment all modern sales formats must address.

In Western Europe, the sector will again face a number of challenges during the upcoming year. This applies especially to Italy, while the Iberian markets have stabilised following a period of weakness and will produce moderate sales growth, according to our estimates.

On the other hand, we foresee sales stagnation in the Benelux countries, Austria, Switzerland and Sweden given their already high level. In these mature markets, we expect a significant shift towards multichannel concepts.

In Eastern Europe, we anticipate stagnation over the short term due to the charged political conflict and strained economic situation, which – should the crisis come to a rapid end – will likely spur moderate sales growth for consumer electronics stores in Russia and Poland.

Across all regions, multichannel providers will grow if they are able to more closely dovetail their online and stationary stores.

Real

For the food retail business, economic conditions in Germany have so far provided a good foundation for robust growth. For this reason, we foresee slight growth in sales in 2015 – provided that geopolitical tensions do not intensify and consumer

sentiment does not decline further. Overall, we again expect to see somewhat higher price increases than in the past financial year. However, these should remain moderate.

In the face of tough competition in stationary food retailing, Real will continue to bolster its competitiveness through innovative concepts, targeted investments in its store network and the systematic expansion of cross-channel activities.

Galeria Kaufhof

Overall, business conditions in Germany are also favourable for the department store segment. For 2015, we indeed believe that the department store segment will trail behind the retail industry as a whole for another year. But Galeria Kaufhof, acting as the store, concept and system leader in the department store business, will be able to profit from robust business conditions. This will be supported by our multichannel marketing offensive and the related systematic integration of stationary and digital department store worlds. As a multichannel provider, Galeria Kaufhof will therefore continue to outperform its competitors in years to come.

Expected earnings position: outlook for METRO GROUP and its segments

The outlook is based on the current group structure and adjusted for currency effects. It also assumes a stable geopolitical situation.

Expected sales development at METRO GROUP in 2014/15

For financial year 2014/15, METRO GROUP expects to see a slight rise in overall sales, despite the persistently challenging economic environment.

In like-for-like sales, METRO GROUP foresees a slight increase that will follow the reporting period's small rise of 0.1 per cent.

Expected earnings development at METRO GROUP in 2014/15

In financial year 2014/15, earnings development will also be shaped by the persistently challenging economic environment.

Nevertheless, METRO GROUP is confident that it can again achieve a slight earnings increase as a result of the progress it has made and will continue to make in transforming its business models. In addition, METRO GROUP will again closely focus on efficient structures and strict cost management in 2014/15.

For these reasons, we expect EBIT before special items to rise slightly above the €1,727 million achieved in financial year 2013/14, including usual levels of income from real estate sales.

At the Media-Saturn and Real sales lines, the decline in like-for-like sales recorded in financial year 2013/14 should be reversed by the measures we have already introduced. This outlook is supported by the positive trend that emerged during the fourth quarter of 2013/14. For this reason, METRO GROUP expects that these two sales lines will also make a positive contribution to the slight increase in like-for-like sales and EBIT before special items during the upcoming financial year.

Overall statement by the Management Board of METRO AG on the medium term development of METRO GROUP

METRO GROUP's goal for the upcoming financial years is to continue the positive trend in sales and earnings. We will continue to sustainably expand METRO GROUP's position as one of the leading international retail companies. In particular, multichannel sales and the delivery business still hold great growth potential.

METRO GROUP has a successful portfolio of sales lines and countries, qualified employees and a corporate culture that places an emphasis on individual responsibility and entrepreneurial action. For this reason, METRO GROUP is well positioned for the future.

14. Supplementary notes for METRO AG (pursuant to the German Commercial Code)

Overview of financial year 2013/14 and outlook of METRO AG

As the management holding company of METRO GROUP, METRO AG is highly dependent on the development of METRO GROUP in terms of its own business development, position and potential development with its key opportunities and risks.

In light of the holding structure, the most important performance indicator for METRO AG in terms of GAS 20 is commercial net profit or loss – contrary to the case for the group as a whole.

Business development of METRO AG

The business development of METRO AG is primarily characterised by the development and dividend distributions of its investments. METRO AG's annual financial statements prepared under German commercial law serve as the basis for dividend distribution. The income statement and balance sheet of METRO AG prepared in accordance with the German Commercial Code (HGB) are outlined below. The results as of the closing date of 30 September 2014 are compared with the previous year's annual financial statements for the short financial year from 1 January 2013 to 30 September 2013.

Earnings position of METRO AG and profit appropriation

Income statement for the financial year from

Income taxes	0	-7
Other taxes	1	-2
Net profit or loss	225	586
Retained earnings from the previous year	22	0
Additions to reserves retained from earnings	-110	-267
Balance sheet profit	137	319

For financial year 2013/14, METRO AG posted investment income of €811 million, compared with €347 million in the previous year. In this regard, it should be noted that the reporting year represents a period of twelve months, while the comparative period of the previous year comprised a nine-month period.

Income from investments with profit and loss transfer agreements totalling €410 million (9M 2013: €478 million) primarily includes income from the Media-Saturn and Galeria Kaufhof sales lines, losses incurred by METRO Cash & Carry Germany and Real Germany as well as income from the intra-group transfer of shares to METRO Cash & Carry Russia.

Income from investments without profit and loss transfer agreements totalling €485 million (9M 2013: €147 million) essentially stems from disbursements of group real estate companies. It includes income from intra-group transfers of shares to real estate companies.

In light of the high amount of income from intra-group real estate transactions (€764 million), the possible collection of earnings from the operational business activities of foreign cash-and-carry companies was waived in financial year 2013/14.

In financial year 2013/14, losses of €16 million were assumed on the basis of profit and loss transfer agreements (9M 2013: €138 million). These losses were incurred in the group real estate service businesses.

Of impairments for investments in affiliates in the financial year, €29 million can be attributed to international cash-and-carry activities and €6 million to the real estate area.

Expenses arising from the disposal of financial assets in the amount of €33 million stem from the sale of the Real sales line's Turkish business.

The financial result amounted to €–95 million (9M 2013: €–101 million).

Under the transfer pricing system, METRO AG acts as a franchisor to the METRO Cash & Carry sales line. Services provided essentially include the provision and continued development of business concepts, software applications and holding services. In order to be able to render these services, the company acquires IT services and software in particular from METRO SYSTEMS GmbH, which leads to higher other expenses and write-downs. Services are billed at arm's-length prices. In financial year 2013/14 METRO AG billed the national and international operating companies of the METRO Cash & Carry sales line a franchise fee totalling €289 million (9M 2013: €222 million). The franchise fee itself represents a portion of the sales and earnings of the operating company calculated on the basis of the degree of service utilisation. During financial year 2013/14, these franchise fees billed to subsidiaries increased compared with the previous year due to the longer billing period.

Income from administrative services rendered for subsidiaries increased due to the longer billing period compared with the previous year.

Other operating income, other operating expenses and depreciation/amortisation on intangible and tangible assets of METRO AG resulted in an overall decrease in earnings from €67 million in the previous year to €27 million as of the closing date.

On average during the four quarters of financial year 2013/14, METRO AG employed 1,072 people (9M 2013: 940). Part-time employees and temporary workers were converted into full-time equivalents. Personnel expenses amounted to €148 million (9M 2013: €89 million). Apart from the effects of the longer reporting period in comparison to the short financial year as well as the increase in employees from the acquisition of group real estate companies, higher performance-based remuneration components led to an increase in personnel expenses.

Net profit amounted to €586 million (9M 2013: €225 million), slightly above the forecast for financial year 2013/14 provided at the beginning of the reporting period.

With €267 million having been transferred to reserves retained from earnings, the balance sheet profit of the company amounted to €319 million, compared with €137 million in the short financial year 2013.

Regarding the appropriation of the balance sheet profit for 2013/14, the Management Board of METRO AG will propose to the Annual General Meeting to distribute dividends in the amount of €0.90 per ordinary share and €1.13 per preference share from the reported balance sheet profit of €319 million – that is, a total of €295 million – and to carry forward the remaining amount to the new account. The dividend proposal contains a preference dividend of €0.17 per preference share to cover the dividend that was not paid in the short financial year 2013 and that must be subsequently paid in accordance with § 140 Section 2 of the German Stock Corporation Act and § 21 Section 2 of the Articles of Association of METRO AG.

Financial position of METRO AG

Cash flows

During the reporting period, cash flows primarily resulted from financial transactions with METRO GROUP companies. Short-term financial investments provided by the sales lines at the end of the financial year amounted to €381 million as of the closing date (9M 2013: €739 million). The decrease compared with the previous year primarily results from the fact that existing liquidity has increasingly been used to reduce financial liabilities.

Capital structure

Equity and liabilities

€ million	30/9/2013	30/9/2014
Equity		
Share capital	835	835
Ordinary shares	828	828
Preference shares	7	7
(Contingent capital)	(128)	(128)
Capital reserve	2,558	2,558
Reserves retained from earnings	2,256	2,660
Balance sheet profit	137	319
	5,786	6,372
Provisions	326	384
Liabilities	4,948	4,352
Deferred income	6	5
	11,066	11,113

Liabilities consisted of equity of €6,372 million (9M 2013: €5,786 million) and provisions, liabilities and deferred income of €4,741 million (9M 2013: €5,280 million). As of the closing date, the equity ratio amounted to 57.3 per cent compared with 52.3 per cent in the previous year. Provisions as of the closing date totalled €384 million (9M 2013: €326 million). Liabilities from bonds decreased slightly by €47 million to €2,834 million. Liabilities to banks increased slightly to €470 million (9M 2013: €465 million). Liabilities to associates declined to €956 million (9M 2013: €1,491 million). This decline was primarily due to the fact that the sales lines provided fewer short-term funds. As of the closing date, other liabilities stood at €81 million, which is €16 million below the previous year's level of €97 million.

Asset position of METRO AG

Assets

€ million	30/9/2013	30/9/2014
Fixed assets		
Intangible assets	18	8
Tangible assets	2	2
Financial assets	8,375	7,886
	8,395	7,896
Current assets		
Receivables and other assets	1,919	2,819
Cash on hand, bank deposits and cheques	739	381
	2,658	3,200
Prepaid expenses and deferred charges	13	17
	11,066	11,113

As of the closing date, assets totalled €11,113 million and were mostly comprised of financial assets in the amount of €7,886 million, receivables from affiliated companies at €2,552 million and bank deposits at €381 million. Financial assets declined by €489 million compared with the previous year and now account for 71.0 per cent of total assets. This overall decline stemmed from the €976 million reduction and a simultaneous new issue of a loan in the amount of €422 million from the area of long-term intra-group loans. Impairment losses for investments in affiliated companies were incurred in the amount of €35 million. Receivables from affiliated companies rose by €975 million compared with the previous year – this item reflects the group companies' short-term financing requirements as of the closing date and represents 23.0 per cent of total assets.

Cash on hand, bank deposits and cheques fell by €358 million to €381 million compared with the previous year. This decline in comparison with the previous year's closing date of 30 September 2013 primarily results from the fact that existing liquidity was increasingly used to reduce financial liabilities.

Risk situation of METRO AG

As METRO AG is closely engaged with the companies of METRO GROUP through financing and guarantee commitments as well as direct and indirect investments, among other things, the risk situation of METRO AG is highly dependent on the risk situation of METRO GROUP. As a result, the summary of the risk situation of METRO AG issued by the company's management also reflects the risk situation of METRO AG.

Forecast of METRO AG

The business development of METRO AG as the holding company essentially depends on the development and dividend distributions of its investments. Assuming a positive development of the participating sales lines, the company expects an increase in franchise fees from its function as franchisor. Assuming a stable financial result and a largely unchanged cost structure, we expect the net profit for financial year 2014/15 will remain at the level of the current financial year.

Planned investments of METRO AG

In the context of METRO GROUP's investment activities, METRO AG will support group companies with increases in shareholdings or loans, where necessary. In addition, investments in shareholdings in affiliated companies may result from intra-group share transfers.

Declaration on corporate management

The declaration on corporate management pursuant to § 289 a of the German Commercial Code (HGB) is available on the company's website (www.metrogroup.de) in the section Company – Corporate Governance.

Declaration of compliance pursuant to § 312 of the German Stock Corporation Act (AktG)

Pursuant to § 312 of the German Stock Corporation Act (AktG), the Management Board of METRO AG prepared a report about relations with affiliated companies for financial year 2013/14. At the end of the report, the Management Board made the following statement:

"The Management Board of METRO AG declares that the company, in accordance with all known circumstances at the time at which legal transactions were made or measures taken, received an adequate quid pro quo for each legal transaction and was not put at a disadvantage through the implementation of such measures. No other actions requiring reporting applied during the financial year."

Notes to the group accounting principles and methods

Accounting principles

METRO AG, the parent company of METRO GROUP, has its head office at Metro-Straße 1 in Düsseldorf, Germany. These consolidated financial statements as of 30 September 2014 were prepared in accordance with the International Financial Reporting Standards (IFRS) of the International Accounting Standards Board (IASB), London. They comply with all mandatory applicable accounting standards and interpretations adopted by the European Union as of this date. Compliance with these standards and interpretations ensures a true and fair view of the asset, financial and earnings position of METRO AG.

The consolidated financial statements in their present form comply with the stipulations of § 315 a of the German Commercial Code (HGB). Together with Regulation (EC) No. 1606/2002 of the European Parliament and Council of 19 July 2002 concerning the application of international accounting standards, they form the legal basis for group accounting according to international standards in Germany.

The date at which the Management Board of METRO AG signed the consolidated financial statements (24 November 2014) also represents the date at which the Management Board released the consolidated financial statements for publication and submitted them to the Supervisory Board.

These consolidated financial statements are based on the historical cost method except for financial instruments recognised at fair value and financial assets and liabilities that are recognised at fair value as hedged items within a fair value hedge. Furthermore, non-current assets held for sale and disposal groups are recognised at fair value less costs to sell as long as this value is lower than the carrying amount. Liabilities from cash-settled share-based payments are also recognised at fair value. In addition, financial liabilities from put options granted to non-controlling interests are recognised at fair value.

The income statement has been prepared using the cost of sales method.

Certain items in the income statement and the balance sheet have been combined to increase transparency and informative

value. These items are listed separately and described in detail in the notes.

The consolidated financial statements have been prepared in euros. All amounts are stated in million euros (€ million) unless otherwise indicated. Amounts below €0.5 million are rounded down and reported as €0 million. Since 2012, only the amounts in the income statement, the reconciliation from profit or loss for the period to total comprehensive income, the balance sheet, the statement of changes in equity and the cash flow statement are rounded to produce the respective totals. In all other tables, the individual amounts and the totals were rounded separately. Rounding differences may occur.

The following accounting and measurement methods were used in the preparation of the consolidated financial statements.

Change of financial year

METRO AG adopted a new financial year in 2013. Since then, the financial years of METRO AG close on 30 September rather than on 31 December. During the transition, the financial year 2013 was a nine-month short financial year from 1 January 2013 to 30 September 2013. The current financial year 2013/14 is a regular, twelve-month financial year from 1 October 2013 to 30 September 2014.

To ensure the best possible comparability with the reporting period, these consolidated financial statements will present the adjusted comparable period 12M 2012/13 (1 October 2012 to 30 September 2013) as well as the reported previous year's figures from the period 9M 2013 (1 January 2013 to 30 September 2013) of the short financial year 2013. For the comparative figures of 12M 2012/13, the figures of the short financial year 2013 are added to the unaudited figures from 1 October 2012 to 31 December 2012 (Q4 2012). This method of comparison is applied both in this report's tables and text. The developments shown in movement schedules essentially cover the three-month period from 1 October 2012 to 31 December 2012/1 January 2013, the nine-month period from 1 January 2013 to 30 September 2013/1 October 2013 and the twelve-month period from 1 October 2013 to 30 September 2014.

The application of the revised IAS 19 (Employee Benefits) became mandatory on 1 January 2013. In accordance with the transitional provisions, METRO GROUP applied this for the first time retrospectively. The figures for the first quarter of 2012/13

included in these interim consolidated financial statements as part of 12M 2012/13 have been adjusted accordingly. Because the first quarter of 2012/13 had not been reported in the past in a separate quarterly report with figures according to the old rules, no tables will include notes relating to this change.

Application of new accounting methods

No first-time application of accounting standards in financial year 2013/14

In 2013, METRO AG changed its financial year to end on 30 September. These consolidated financial statements represent the financial year 2013/14, which comprises the period from 1 October 2013 to 30 September 2014. All new financial report-

ing standards applicable to financial years beginning on or after 1 January 2014 will be taken into consideration with the start of the next financial year, beginning on 1 October 2014. As a result, the consolidated financial statements as of 30 September 2014 did not apply any new financial reporting standards.

Accounting standards that were published but not yet applied in financial year 2013/14

A number of other accounting standards and interpretations newly adopted or revised by the IASB were not yet applied by METRO AG during the financial year 2013/14 because they were either not yet mandatory or have not yet been endorsed by the European Commission.

IFRS 9 (Financial Instruments)

The new IFRS 9 standard (Financial Instruments) will replace IAS 39 (Financial Instruments: Recognition and Measurement) covering the classification and measurement of financial instruments.

Financial instruments are recognised when the company preparing the financial statements becomes a contractual partner and thus has retained the rights of the financial instrument or assumed comparable obligations. As a rule, the initial measurement of financial assets and liabilities is at fair value adjusted for transaction costs, if applicable. Only trade receivables without a significant financing component are recognised at the transaction price.

At the time of recognition, standards for classification are to be taken into account. According to IAS 39, the subsequent measurement of a financial asset and a financial liability is linked to its classification. Financial assets are classified on the basis of the characteristics of contractual cash flow of the financial asset and the business model which the entity uses to manage the financial asset. The original four measurement categories for financial assets were reduced to two categories: Financial assets recognised at amortised cost (category 1) and financial assets measured at fair value (category 2), wherein the latter category has two subcategories (for more information on financial instruments, see next section).

If the financial asset is held within a business model whose objective is collecting payments such as principal and interest, and if the contract terms stipulate certain payments are exclusively for principal and interest, this financial instrument shall be recognised at amortised cost (category 1). If the objective of the business model is collecting payments and selling financial assets, and if the payment dates are fixed, the changes in its fair value are recognised in other comprehensive income outside of profit or loss (subcategory 2 a). If these criteria are not cumulatively met, the financial asset is measured at fair value through profit or loss (subcategory 2 b). Amortised cost is determined using the effective interest, while IFRS 13 (Fair Value Measurement) is applied to determine fair value measurement.

As a rule, equity instruments are classified as subcategory 2 b based on the classification criteria stated above. However, for equity instruments not meeting the cash flow criteria, an irrevocable election can be made upon initial recognition to classify these as subcategory 2 a. Additionally, financial instruments

can be classified as subcategory 2 b contrary to the definition of the fair value option according to IAS 39, but exclusively to eliminate accounting mismatches in doing so.

In general, financial liabilities are measured at amortised cost (category 1). In some cases, however, such as with financial liabilities held for trading, fair value measurement through profit or loss is required (subcategory 2 b). In addition, the fair value option of measurement at fair value through profit or loss also applies here in the case of inconsistencies. In contrast to financial assets, financial liabilities can include embedded derivatives that are required to be separated. If separation is required, the host contract is usually measured according to the rules of category 1 and the derivative according to the rules of subcategory 2 b.

Unlike IAS 39 (Incurred Loss Model), IFRS 9 focuses on expected losses. This expected loss model uses a three-stage approach for recognising impairment. At the first stage, impairment losses are recognised in the amount of the losses resulting from default on the financial instrument expected in the next twelve months after the closing date. At the second stage, the total losses due to default expected over the contractual term of a portfolio of similar instruments are taken into account, provided that these are trade receivables or certain leasing receivables or if the credit risk has significantly increased since initial recognition and exceeds a certain credit risk. At the third and final stage, impairment losses are recognised for additional objective indications with respect to the individual financial instrument.

In order to reduce the complexity and make hedge accounting more comprehensible on the balance sheet, the following key changes were made. The scope of possible hedged items was expanded. For example, several risk positions can now be more easily combined into a single hedged item and hedged. The net position can be designated as the hedged item if the risks partially offset each other in the combined risk position. In addition, non-derivative financial instruments classified as subcategory 2 b can be designated as hedging instruments. Furthermore, thresholds are no longer stipulated for measuring effectiveness. Effectiveness is assessed in reference to the economic relationship between the hedged item and hedging transaction taking into account the hedging ratio and default risk.

IFRS 9 in its current version is scheduled to apply in the EU as of 1 January 2018. Thus, IFRS 9 will be applied at METRO AG for

the first time in financial year 2018/19 starting on 1 October 2018. As a result, the potential impact of this new standard cannot be determined at this point.

**IFRS 10 (Consolidated Financial Statements),
IFRS 11 (Joint Arrangements) and IFRS 12
(Disclosure of Interests in Other Entities)**

The new standards IFRS 10, 11 and 12 contain changes in accounting and disclosure requirements for consolidated financial statements. IFRS 10 (Consolidated Financial Statements) includes a new definition of control that determines which entities are consolidated. It replaces previous regulations governing consolidated financial statements included in IAS 27 (Consolidated and Separate Financial Statements – in the future, only Separate Financial Statements) and SIC-12 (Consolidation – Special Purpose Entities). The key change resulting from IFRS 10 concerns the introduction of a uniform definition of control. In the future, three criteria must be met for the existence of control. For one, the investor has power over the investee. This means that the investor has existing rights that give it the ability to direct the relevant activities; that is, the activities that significantly affect the investee's results. In addition, the investor is exposed, or has rights, to variable returns from its involvement with the investee, and has the ability to affect those returns through its power over the investee.

IFRS 11 (Joint Arrangements) describes the accounting for arrangements in which several parties have joint control over a joint venture or a joint operation. It replaces IAS 31 (Interests in Joint Ventures) and SIC-13 (Jointly Controlled Entities – Non-Monetary Contributions by Venturers) and amends IAS 28 (Investments in Associates – in the future: Investments in Associates and Joint Ventures). IFRS eliminates the option currently granted under IAS 31 to apply proportionate consolidation to joint ventures. In the future, joint ventures must be recognised using the equity method in accordance with the stipulations of IAS 28. As METRO AG has not made use of the option to apply proportionate consolidation, this amendment has no effect on the consolidated financial statements of METRO AG. According to IFRS 11, the individual partners in joint arrangements recognise their portion of jointly held assets and jointly incurred liabilities in their own balance sheet. Analogously, they also include their respective portion of sales, income and expenses deriving from the joint arrangement in their income statement.

The new IFRS 12 (Disclosure of Interests in Other Entities) markedly expands the disclosure requirements for investments in other entities. In the future, detailed information must be

provided on subsidiaries, associates, joint arrangements, joint ventures, consolidated special purpose entities (so-called structured entities) and all special purpose entities that are not consolidated but with which an entity maintains a relationship.

The new standards IFRS 10, 11 and 12 as well as the amendments to IAS 27 and 28 apply from 1 January 2013. However, in its endorsement of the new standards, the EU postponed the date of application for listed companies within the EU to 1 January 2014. As a result of the company's change of financial year, METRO AG will therefore apply the new standards for the first time as of financial year 2014/15 starting on 1 October 2014. The first-time application of these standards is not expected to have a material effect on the consolidated financial statements of METRO AG.

IFRS 15 (Revenue from Contracts with Customers)

The new IFRS 15 will replace IAS 18 (Revenue) and IAS 11 (Construction Contracts) and related interpretations and stipulates a uniform and comprehensive model for recognising revenue from customers.

The new standard uses a five-step model to determine the amount of revenue and the date of realisation. In the first step, contracts with the customers are identified. According to IFRS 15, a contract is entered into by the contractual partners, the company can identify the rights of the customer to goods and services and the payment terms, and the agreement has economic substance. In addition, it is probable that the company will collect on the contract. If a company has more than one contract with a single customer at (virtually) the same time, and if certain criteria are met, the contracts can be combined and treated as a single contract.

As a rule, a contract as defined in IFRS 15 can include several performance obligations. In the second step, possible separate performance obligations are therefore identified within a single contract. In this step, contract terms and customary business practices are evaluated in order to identify which goods and services should be accounted for as separate performance obligations. A separate performance obligation is identified when a good or service is distinct. This is the case when the customer can use a good or service on its own or together with other readily available resources and it is separately identifiable from other commitments in the contract. Under certain circumstances, homogeneous goods or services can be treated as a single performance obligation.

In the third step, the transaction price corresponding to the expected consideration is determined. The consideration may include fixed and variable components. For variable compensation, the expected amount is estimated based on either the expected value or the most probable amount, depending on which amount best reflects the amount of consideration. In addition, the consideration includes the interest rate effect if the contract includes a financing component significant to the contract, the fair value of non-cash considerations and the effects of payments made to the customer such as rebates and coupons.

The allocation of the transaction price to separate performance obligations is carried out in the fourth step. In principle, the transaction price is to be allocated to the separately identified performance obligations in relation to the relative stand-alone selling price. Observable data must be used to determine the stand-alone selling price. If this is not possible, estimates are to be made. For this purpose, IFRS 15 suggests various methods for estimating according to which the estimates are based on market prices for similar services or expected costs plus a surcharge. In exceptional cases, the estimate can also be based on the residual value method.

In the fifth and final step, revenue is recognised at the point in time when the performance obligation is satisfied. The performance obligation is satisfied when the control of the good or service is transferred to the customer. The performance obligation can be satisfied at a point in time or over a period of time. If the performance obligation is satisfied over time, the revenue is recognised over the period the performance obligation is satisfied in a manner that best reflects the continuous transfer of control over time.

In addition to the five-step model, IFRS 15 addresses various special topics such as the treatment of costs for obtaining and fulfilling a contract, presentation of contract assets and liabilities, rights of return, commission business, customer retention and customer loyalty programmes.

In addition, the disclosures in the notes are significantly expanded. Accordingly, this includes qualitative and quantitative disclosures to be made in the future on contracts with customers, on significant estimates and judgements and to changes over time.

IFRS 15 is scheduled to apply in the EU as of 1 January 2017. Thus, IFRS 9 will be applied at METRO AG for the first time in

financial year 2017/18 starting on 1 October 2017. As a result, the potential impact of this new standard cannot be determined at this point.

IAS 32 (Financial Instruments: Presentation)

Pursuant to IAS 32 (Financial Instruments: Presentation), financial assets and financial liabilities should be offset if the following two preconditions are met: first, the entity must have a legally enforceable right to set off the amounts as of the closing date; second, it must intend to either settle on a net basis or to realise the asset and settle the liability simultaneously. The amendment to IAS 32 "Offsetting of Financial Assets and Financial Liabilities" specifies when these conditions are considered met. In particular, it determines criteria for the existence of a legally enforceable right.

The amendment to IAS 32 will apply to financial years from 1 January 2014. Given the change of financial year, METRO AG will therefore implement this amendment for the first time in financial year 2014/15, which starts on 1 October 2014. At present, this amendment is not expected to have any material effect on the asset, financial and earnings position of METRO AG.

Additional IFRS amendments

Within the scope of the annual improvements to IFRS 2010–2012, slight revisions were made to IFRS 3 (Business Combinations) and IFRS 8 (Operating Segments), among others. In IFRS 3, clarification was provided that a contingent consideration is only classified as equity or a financial liability when there is a financial instrument. Additionally, the option to recognise effects from the subsequent measurement of contingent considerations outside of profit or loss in other comprehensive income was eliminated. In the future, their recognition through profit or loss is mandatory. Future transactions with contingent considerations will result in individual impacts on earnings for METRO AG.

Furthermore, aggregation of several operating segments to a single reportable segment in accordance with IFRS 8 requires a description of the aggregated operating segments. Additionally, the metrics used as a criterion for evaluating the existence of similar economic characteristics must be disclosed in the future. In the future, a reconciliation of segment assets to group assets is necessary only if the segment assets are part of reporting to the responsible corporate decision-maker. However, for the time being, METRO AG will continue to report the reconciliations from segment assets to group assets and from

segment liabilities to group liabilities. Until adopted by the EU, these amendments are to be applied by METRO AG in financial year 2014/15 beginning on 1 October 2014.

At this point, the first-time application of the other standards and interpretations listed in the table is not expected to have a material impact on the group's asset, financial and earnings position.

Changes to the accounting and measurement methods and the reporting structure

Revised presentation

Change of the segments

As part of METRO GROUP's transformation process for customer value and growth, the operational activities of METRO PROPERTIES were transferred to the sales lines in order to bundle all activities relating to customers and markets within one area of responsibility. Based on this shift, METRO AG modified its segment structure as of 1 October 2013. Real estate is no longer reported separately as a segment. Instead, this information is now reported in the sales lines' segments or the Others segment. The previous year's figures have been adjusted accordingly. This does not affect disclosures on segments by regions.

Adjustment of previous year's figures

Future lease payments from subleasing

In-depth analyses of lease agreements have led to the conclusion that individual lease payments due in the future to METRO GROUP from assets and shown as subleasing of assets held under operating leases in the notes to the consolidated financial statements as of 30 September 2013 are to be reclassified retrospectively. Future lease payments due to METRO GROUP coming from the subleasing of assets shown under operating leases were therefore reduced by €383 million to €538 million as of 30 September 2013. As a result, future lease payments due to METRO GROUP coming from the subleasing of assets shown under finance leases increased firstly by €34 million to €212 million as of 30 September 2013. Secondly, future lease payments for the rental of properties legally owned by METRO GROUP increased by €349 million to €463 million as of 30 September 2013 (< 1 year by €59 million to €75 million; > 1 year < 5 years by €157 million to €204 million; > 5 years by €133 million to €184 million).

Consolidation group

Apart from METRO AG, the consolidated financial statements comprise all companies in which METRO AG has indirect or direct control. Control exists if there is a possibility to control a company's financial and business policy through a majority of voting rights or according to the articles of association, company contract or contractual agreement in order to benefit from this

company's business activities. These include 723 German (30/9/2013: 710) and 613 international (30/9/2013: 614) companies indirectly or directly controlled by METRO AG in accordance with IAS 27 (Consolidated and Separate Financial Statements) in conjunction with SIC-12 (Consolidation – Special Purpose Entities).

The group of consolidated companies changed as follows in financial year 2013/14:

As of 1/10/2013	1,325
Changes in financial year 2013/14	
Companies merged with other consolidated subsidiaries	–10
Disposal of shares	–5
Other disposals	–11
Newly founded companies	23
Acquisitions	15
As of 30/9/2014	1,337

Disposals primarily include two Polish companies and one Turkish company related to the disposal of Real's Eastern European business. Mergers with other group companies mainly comprise six companies of the Media-Saturn sales line. Other disposals mostly include roll-ups and liquidations in the other disposals area (9 companies). Additions from newly founded companies (23 companies) pertain mainly to the Media-Saturn (7 companies) and Galeria Kaufhof sales lines (6 companies). Acquisitions primarily concern the Real sales line (13 companies).

Effects from changes in the consolidation group that are of special significance are explained separately in the respective items.

7 associates (30/9/2013: 6) and 7 joint ventures (30/9/2013: 7) are recognised in the consolidated financial statements according to the equity method. A total of 7 companies (30/9/2013: 7) in which METRO AG indirectly or directly holds between 20 and 50 per cent of the voting rights were valued at cost because they did not qualify as associates or because materiality considerations made the use of the equity method unnecessary.

————— A complete list of group companies and associates is shown in no. 54 Overview of the major fully consolidated group companies. In addition, a complete list of all group companies and associates is shown in no. 56 Affiliated companies of the group METRO AG as of 30 September 2014 pursuant to § 313 of the German Commercial Code.

Consolidation principles

The financial statements of German and foreign subsidiaries included in the consolidated accounts are prepared using uniform accounting and measurement methods as required by IAS 27 (Consolidated and Separate Financial Statements).

Consolidated companies that, unlike METRO AG, do not close their financial year on 30 September, prepared interim financial statements for IFRS consolidation purposes.

In accordance with IFRS 3 (Business Combinations), capital consolidation is accomplished using the purchase method. In the case of business combinations, the carrying amounts of the investments are offset against the revalued pro rata equity of the subsidiaries as of their acquisition dates. Any positive differences remaining after the allocation of hidden reserves and hidden burdens are capitalised as goodwill. Goodwill is tested for impairment regularly once a year – or more frequently if changes in circumstances indicate a possible impairment. If the carrying amount of a unit that was assigned a goodwill exceeds the recoverable amount, an impairment loss of the goodwill is recognised to the amount of the difference between both values.

In addition, in the case of company acquisitions, hidden reserves and burdens attributable to non-controlling interests must be disclosed and reported in equity as "non-controlling interests". METRO GROUP does not use the option to recognise the goodwill attributable to non-controlling interests. In accordance with IFRS 3, any negative differences remaining after the allocation of hidden reserves and burdens as well as after another review during the period in which the business combination took place are recognised through profit or loss.

Acquisitions of additional shareholdings in companies where a controlling interest has already been acquired are recognised as equity transactions. As a result, the assets and liabilities are not remeasured at fair value, nor are any gains or losses recognised. Any differences between the cost of the additional shareholding and the carrying amount of the net assets on the date of acquisition are directly offset against the capital attributable to the buyer.

Investments accounted for using the equity method are treated in accordance with the principles applying to full consolidation, with existing goodwill being included in the amount capitalised for investments, and any impairment losses of this goodwill

being included in the result from associates and joint ventures in the financial result. Any deviating accounting and measurement methods used in the equity valuation's underlying financial statements are retained as long as they do not substantially contradict METRO GROUP's uniform accounting and measurement methods.

Any impairment losses and reversals of impairment losses to shares in consolidated subsidiaries carried in the individual financial statements are reversed.

Intra-group profits and losses are eliminated, sales, expenses and income as well as receivables and liabilities and/or provisions are consolidated. Interim results in fixed assets or inventories resulting from intra-group transactions are eliminated unless they are of minor significance. In accordance with IAS 12 (Income Taxes), deferred taxes are recognised for consolidated procedures. Unrealised gains from transactions with companies accounted for using the equity method are derecognised against the investment in the amount of the group's share in the investee.

A reduction in the holding in a subsidiary must be recognised in reserves retained from earnings as an equity transaction outside of profit or loss as long as the parent company can continue to exercise a control opportunity. If a reduction in the holding or its complete disposal entails a loss of control, full consolidation of the subsidiary is ended when the parent company loses its control opportunity over the subsidiary. All assets, liabilities and equity items that were previously fully consolidated will then be derecognised at amortised group carrying amounts. Deconsolidation of the derecognised holdings is carried out in line with the general rules on deconsolidation. Any remaining residual shares are recognised at fair value as a financial instrument according to IAS 39 or as a holding valued based on the equity method pursuant to IAS 28.

Currency translation

Foreign currency transactions

In the subsidiaries' separate financial statements, transactions in foreign currency are valued at the rate prevailing on the transaction date. Monetary assets and liabilities in foreign currency are valued at the exchange rate at closing date. Non-monetary assets and liabilities that are measured at fair value in foreign currency are translated at the rate prevailing at the time the fair value was determined. Non-monetary items measured at historical acquisition or production costs in foreign currency are translated at the rate valid at the transaction date.

In principle, gains and losses from exchange rate fluctuations incurred until the closing date are recognised in profit or loss. Currency translation differences from receivables and liabilities in foreign currency, which must be regarded as a net investment in a foreign operation, equity instruments held for sale and qualified cash flow hedges are reported as reserves retained from earnings outside of profit or loss.

Foreign operations

The annual financial statements of foreign subsidiaries are translated into euros according to the functional currency concept of IAS 21 (The Effects of Changes in Foreign Exchange Rates). The functional currency is defined as the currency of the primary economic environment of the subsidiary. Since all consolidated companies operate as financially, economically and organisationally autonomous entities, their respective local currency is the functional currency. Assets and liabilities are therefore converted at the current exchange rate prevailing on the closing date, whereas income statement items are translated at the average exchange rate during the financial year. Differences from the translation of the financial statements of foreign subsidiaries do not affect income and are shown as separate items under reserves retained from earnings. To the extent that foreign subsidiaries are not under the full control of the parent company, the relevant share of currency differences is allocated to the non-controlling interests.

The currency differences are recorded through profit or loss in the year in which foreign subsidiaries are disposed of. In a partial disposal in which a controlling interest in the foreign subsidiary is retained, the relevant share of cumulated currency differences is allocated to the non-controlling interests. Should foreign associates or jointly controlled entities be partially sold without the loss of significant influence or joint con-

trol, the relevant share of the cumulated currency differences is recognised in the income statement.

For the financial year 2013/14, translations were made using the average exchange rate for the period from 1 October 2013 to 30 September 2014; the nine-month short financial year 2013 used the average exchange rate for the period from 1 January 2013 to 30 September 2013. For the comparative figures for the period 12M 2012/13, translations for the nine months of the short financial year were made using the average exchange rate defined above and for the three months of the

fourth quarter of 2012 using the average exchange rate of the financial year 2012. The exchange rates at the closing date were determined for 30 September 2014 and 30 September 2013.

In financial year 2013/14, no functional currency of a consolidated company was classified as hyperinflationary as defined by IAS 29 (Financial Reporting in Hyperinflationary Economies).

The following exchange rates were applied in the translation of key currencies outside the European Monetary Union that are of major significance for METRO GROUP:

			Average exchange rate per €	Exchange rate at closing date per €	
		9M 2013	12M 2013/14	30/9/2013	30/9/2014

Income statement

Recognition of income and expenses

In accordance with IAS 18 (Revenue), sales and other operating income are reported immediately upon rendering of the service or delivery of the goods. In the latter case, the timing is determined by the transfer of risk to the customer. Where customers are granted the right to return goods and cancel services, sales are recognised only if the probability of return can be reliably estimated. To this end, return rates are calculated on the basis of historical data and projected to future take-back obligations. No sales are recognised for the portion allocated to the expected returns; instead, a provision is recognised. Sales are

shown after deduction of value added tax, rebates and discounts. Gross amounts are shown – that is, at the level of the customer payment (less sales tax and revenue reduction) – where the company assumes the essential opportunities and risks associated with the sale of the goods or services. Net sales – that is, margins – are shown for commission business, as defined by the company. Sales revenues from contracts with several contractual components (for example, sale of goods plus additional services) are realised when the respective contractual components have been fulfilled. Sales realisation is based on the estimated relative fair value of the individual contractual components.

Performance-based **government grants** attributable to future periods are recognised on an accrual basis according to the corresponding expenses. Performance-based grants for subsequent periods which have already been received are shown as deferred income, and the corresponding income is recognised in subsequent periods.

Operating expenses are recognised as expenses upon use of the service or on the date of their causation.

The **financial result** at METRO GROUP primarily comprises dividends and interest. As a rule, dividends are recognised when the legal claim to payment arises. Interest is recognised as income or expenses and, where applicable, on an accrual basis using the effective interest method. Interest expenses on borrowings that are directly attributable to the acquisition, construction or production of a so-called qualified asset represent an exception as they must be included in the cost of the asset capitalised pursuant to IAS 23 (Borrowing Costs).

Income taxes

Income taxes concern direct taxes on income and deferred taxes. As a rule, they are recognised through profit or loss unless they are related to business combinations or an item that is directly recognised in equity or other comprehensive income.

Balance sheet

Goodwill

In accordance with IFRS 3 (Business Combinations), **goodwill** is capitalised. Goodwill resulting from business combinations is attributed to the group of so-called cash-generating units (CGUs) that benefits from the synergies of this business combination. In accordance with IAS 36 (Impairment of Assets), a CGU is defined as the smallest identifiable group of assets that generates cash inflows largely independently from the cash inflows of other assets or groups of assets. As a rule, single locations represent CGUs at METRO GROUP. Goodwill within METRO GROUP is monitored at the level of the organisational unit sales line per country for internal management purposes. Goodwill impairment tests are therefore conducted at the level of this respective group of cash-generating units.

Goodwill is tested for impairment regularly once a year – or more frequently if changes in circumstances indicate a possible impairment. If an impairment exists, an impairment loss is recognised through profit or loss. To determine a possible impairment, the recoverable amount of a CGU is compared to the respective carrying amount of the CGU. The recoverable amount is the higher of value in use and fair value less costs to sell. An impairment of the goodwill allocated to a CGU applies only if the recoverable amount is lower than the total of carrying amounts. No reversal of an impairment loss is performed if the reasons for the impairment in previous years have ceased to exist.

Other intangible assets

Purchased other intangible assets are recognised at cost of purchase. **Internally generated intangible assets** are capitalised at their production cost if the capitalisation criteria of IAS 38 (Intangible Assets) are met. Research costs, in contrast, are not capitalised, but immediately recognised as expenses. Development costs include all expenditures directly attributable to the development process. This may include the following costs:

Direct costs	Direct material costs
	Direct production costs
	Special direct production costs
Overhead (directly attributable)	Material overhead
	Production overhead
	Depreciation/amortisation/impairment losses
	Development-related administrative costs

Borrowing costs are factored into the determination of production costs only in the case of so-called qualified assets pursuant to IAS 23 (Borrowing Costs). Qualified assets are defined as non-financial assets that take a substantial period of time to prepare for their intended use or sale.

The subsequent measurement of other intangible assets is effected based on the cost model. No use is made of the revaluation option. All other intangible assets of METRO GROUP have a limited useful life and are therefore subject to straight-line amortisation. Capitalised internally created and purchased software as well as comparable intangible assets are amortised over a period of up to ten years, licences over their useful life. These intangible assets are examined for indications of impairment at each closing date. If the recoverable amount is below the amortised cost, an impairment loss is recognised. The impairment loss is reversed if the reasons for the impairment in previous years have ceased to exist.

Property, plant and equipment

Property, plant and equipment used in operations for a period of more than one year are recognised at amortised cost pursuant to IAS 16 (Property, Plant and Equipment). The production costs of internally generated assets include both direct costs and appropriate portions of attributable overhead. Borrowing costs are only capitalised in relation to qualified assets as a component of acquisition or production costs. In line with IAS 20 (Accounting for Government Grants and Disclosure), **investment grants** received are offset against the acquisition or production costs of the corresponding asset without recognition of an item of deferral for the grants on the liabilities side. **Dismantling and removing obligations** are included in the acquisition or production costs at the discounted settlement amount. Subsequent costs for acquiring or producing an item of property, plant and equipment are capitalised only if they result in a higher future economic benefit for METRO GROUP.

Items of property, plant and equipment are depreciated solely on a straight-line basis using the cost model pursuant to IAS 16. The optional revaluation model is not applied. Throughout the group, depreciation is based on the following useful lives:

Buildings	10 to 50 years
Leasehold improvements	8 to 15 years or shorter rental contract duration
Business and office equipment	3 to 13 years
Machinery	3 to 8 years

Capitalised costs of dismantling and removal are depreciated on a pro rata basis over the useful life of the asset.

Pursuant to IAS 36, an impairment test will be carried out if there are any indications of impairment of property, plant and equipment. Impairment losses on property, plant and equipment will be recognised if the recoverable amount is below the amortised cost. Impairment losses are reversed if the reasons for the impairment have ceased to exist.

In accordance with IAS 17 (Leases), economic ownership of leased assets is attributable to the lessee if all the material risks and rewards incidental to ownership of the asset are transferred to the lessee (**finance lease**). If economic ownership is attributable to a METRO GROUP company acting as lessee, the leased asset is capitalised at fair value or at the lower present value of the minimum lease payments when the lease is signed. In analogy to the comparable purchased property, plant and equipment, leased assets are subject to depreciation over their useful lives or the lease term if the latter is shorter. However, if it is sufficiently certain that ownership of the leased asset will be transferred to the lessee at the end of the lease term, the asset is depreciated over its useful life. Payment obligations resulting from future lease payments are carried as liabilities.

An **operating lease** applies when economic ownership of the leased object is not transferred to the lessee. The lessee does not recognise assets or liabilities for operating leases, but merely recognises rental expenses in its income statement over the term of the lease using the straight-line method.

In the case of leasing agreements relating to buildings and related land, these two elements are generally treated separately and classified as finance or operating leases.

Investment properties

In accordance with IAS 40 (Investment Properties), **investment properties** comprise real estate assets that are held to earn rentals and/or for an increase in value. In analogy to property, plant and equipment, they are recognised at cost less depreciation and potentially required impairment losses based on the cost model. Measurement at fair value through profit or loss based on the fair value model does not apply. Depreciation of investment properties is effected over a useful life of 15 to 33 years. Furthermore, the fair value of these properties is stated in the notes. It is determined either on the basis of recognised measurement methods or independent expert opinions.

Financial assets

Financial assets that do not represent **associates** under IAS 28 (Investments in Associates) or **joint ventures** under IAS 31 (Interests in Joint Ventures) are recognised in accordance with IAS 39 (Financial Instruments: Recognition and Measurement) and assigned to one of the following categories:

- “Loans and receivables”
- “Held to maturity”
- “At fair value through profit or loss”
- “Available for sale”

The first-time recognition of financial assets is effected at fair value. In the process, incurred transaction costs are considered for all categories with the exception of “at fair value through profit or loss”. Measurement is effected at the trade date.

Depending on the classification to the categories listed above, financial assets are capitalised either at amortised cost or at fair value:

- “**Loans and receivables**” are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are recognised at amortised cost using the effective interest method.
- The measurement category “**held to maturity**” includes non-derivative financial assets with fixed or determinable payments and fixed maturity, with the company having both the positive intention and ability to hold them to maturity. They are also recognised at amortised cost using the effective interest method.
- The category “**at fair value through profit or loss**” comprises all financial assets “held for trading” as the fair value option of IAS 39 is not applied within METRO GROUP. For clarification purposes, the entire category is referred to as “held for trading” in the notes to the consolidated

financial statements. Financial instruments “held for trading” are financial assets that are either acquired or incurred principally for the purpose of selling or repurchasing in the near term or that are part of a portfolio of financial instruments that are managed together and for which there is evidence of a recent pattern of short-term profit-taking. Furthermore, this category includes derivative financial instruments that are not part of an effective hedge. Financial instruments “held for trading” are measured at fair value through profit or loss.

- The category “**available for sale**” represents a residual category for primary financial assets that cannot be assigned to any of the other three categories. METRO GROUP does not make use of the optional designation of financial assets to the category “available for sale”. “Available for sale” financial assets are recognised at fair value in equity. Fluctuations in the fair value of “available for sale” financial assets are recognised in other comprehensive income. The amounts recognised are not reclassified to profit or loss for the respective period until the financial asset is derecognised or an impairment of the assets has occurred.

Investments are assets to be classified as “available for sale”. **Securities** are classified as “held to maturity”, “available for sale” or “held for trading”. **Loans** are classified as “loans and receivables”.

Financial assets designated as **hedged items** as part of a fair value hedge are recognised at fair value through profit or loss. Equity instruments for which no quoted price on an active market exists and whose fair value cannot be reliably measured, as well as derivatives on such equity instruments, are recognised at cost. This applies to several investments of METRO GROUP.

At each closing date, financial assets that are not measured at fair value through profit or loss are examined for objective, substantial indications of impairment. Such indications include delayed interest or redemption payments, defaults and changes in the borrower’s creditworthiness. If there are any such indications, the respective financial asset is tested for impairment by comparing the carrying amount to the present value. The present value of financial assets measured at amortised cost corresponds to the present value of expected future cash flows, discounted at the original effective interest rate. However, the present value of equity instruments measured at cost in the category “available for sale” corresponds to expected future cash flows discounted at the current market interest

rate. If the present value is lower than the carrying amount, an impairment loss is recognised for the difference. Where decreases in the fair value of financial assets in the category “held for sale” were previously recognised in other comprehensive income outside of profit or loss, these are now recognised in profit or loss to the amount of determined impairment.

If, at a later date, the present value increases again, the impairment loss is reversed accordingly. In the case of financial assets recognised at amortised cost, the impairment loss reversal is limited to the amount of amortised cost which would have occurred without the impairment. In the category “available for sale”, the reversal of previously recognised impairment losses for equity instruments is shown outside of profit or loss in other comprehensive income, while for debt instruments it is shown in profit or loss up to the amount of the impairment previously recognised through profit or loss. Increases in value for debt instruments beyond this are recognised outside of profit or loss in other comprehensive income.

Financial assets are derecognised when the contractual rights to cash flows from the item in question are extinguished or have expired or the financial asset is transferred.

Other financial and non-financial assets

The financial assets included in **other financial and non-financial assets** that are classified as “loans and receivables” under IAS 39 are measured at amortised cost.

Other assets includes, among others, investments and derivative financial instruments to be classified as “held for trading” in accordance with IAS 39. All other receivables and assets are recognised at amortised cost.

Prepaid expenses and deferred charges comprise transitory accruals.

Deferred tax assets and deferred tax liabilities

Deferred tax assets and deferred tax liabilities are determined using the asset-liability method in accordance with IAS 12 (Income Taxes). Deferred tax assets and liabilities are recognised for temporary differences between the carrying amounts of assets or liabilities in the consolidated financial statements and their tax base. Deferred tax assets are also considered for unused tax loss and interest carry-forwards.

Deferred tax assets are recognised only to the extent that it is probable that sufficient taxable profit will be available in the

future to allow the corresponding benefit of that deferred tax asset to be realised.

Deferred tax assets and deferred tax liabilities are netted if these income tax assets and liabilities concern the same tax authority and refer to the same tax subject or a group of different tax subjects that are jointly assessed for income tax purposes. Deferred tax assets are remeasured at each closing date and adjusted if necessary.

Deferred taxes are determined on the basis of the tax rates expected in each country upon realisation. In principle, these are based on the valid laws or legislation that has been passed at the time of the closing date.

The assessment of deferred taxes reflects the tax consequences arising from how METRO GROUP expects to recover the carrying amounts of its assets and settle its obligations as of the closing date.

Inventories

In accordance with IAS 2 (Inventories), merchandise carried as **inventories** is reported at cost of purchase. The cost of purchase is determined either on the basis of a separate measurement of additions from the perspective of the procurement market or by means of the weighted average cost method. Supplier compensation to be classified as a reduction in the cost of purchase lowers the carrying amount of inventories.

Merchandise is valued as of the closing date at the lower of cost or net realisable value. Merchandise is written down on a case-by-case basis if the anticipated net realisable value declines below the carrying amount of the inventories. Such net realisable value corresponds to the anticipated estimated selling price less the estimated direct costs necessary to make the sale.

When the reasons for a write-down of the merchandise have ceased to exist, the previously recognised impairment loss is reversed.

METRO GROUP’s inventories never meet the definition of so-called qualified assets. As a result, interest expenses on borrowings relating to inventories are not capitalised pursuant to IAS 23 (Interest Expense on Borrowings).

Trade receivables

In accordance with IAS 39, **trade receivables** are classified as “loans and receivables” and recognised at amortised cost. Where their recoverability appears doubtful, the trade receivables are recognised at the lower present value of the estimated future cash flows. Aside from the required specific bad debt allowances, a generalised specific allowance is carried out to account for the general credit risk.

Income tax assets and liabilities

The disclosed **income tax assets and liabilities** concern domestic and foreign income taxes for the reporting period as well as prior periods. They are determined in compliance with the tax laws of the respective country.

In addition, the effects of tax risks are considered in the determination of income tax liabilities. The premises and assessments underlying these risks are regularly reviewed and considered in the determination of income tax.

Cash and cash equivalents

Cash and cash equivalents comprise cheques, cash on hand and bank deposits with a term of up to three months and are recognised at their respective nominal values.

Assets held for sale, liabilities related to assets held for sale and discontinued operations

In accordance with IFRS 5 (Non-current Assets Held for Sale and Discontinued Operations), an asset is classified as an **asset held for sale** if the respective carrying amount will be recovered principally through a sale transaction rather than through continuing use. A sale must be planned and realisable within the subsequent twelve months. The valuation of the asset's carrying amount pursuant to the relevant IFRS must directly precede a first-time classification as held for sale. In case of reclassification, the asset is measured at the lower of carrying amount and fair value less costs to sell and presented separately in the balance sheet. Analogously, liabilities related to assets held for sale are presented separately in the balance sheet.

In accordance with IFRS 5, a **discontinued operation** is recognised as such if it is held for sale or has already been disposed of. An operation is a component of an entity representing a separate material business operation or geographical business operation which forms part of an individual, approved plan for divestment of a separate material business operation or geographical business operation or represents a subsidiary that

was acquired solely for resale. The valuation of the component of an entity's carrying amount pursuant to the relevant IFRS must directly precede the first-time classification as held for sale. In case of reclassification, the discontinued operation is measured at the lower value of carrying amount and fair value less costs to sell. Discontinued operations are presented separately in the income statement, the balance sheet, the cash flow statement and the segment reporting, and explained in the notes. With the exception of the balance sheet, previous year's amounts are restated accordingly.

Employee benefits

Employee benefits include:

- Short-term employee benefits
- Post-employment benefits
- Obligations similar to pensions
- Termination benefits
- Share-based compensation

Short-term employee benefits include wages and salaries, social security contributions, vacation pay and sickness benefits and are recognised as liabilities at the repayment amount as soon as the associated job has been performed.

Post-employment benefits are provided in the context of defined benefit or defined contribution plans. In the case of **defined contribution plans**, periodic contribution obligations to the external pension provider are recognised as expenses for post-employment benefits at the same time as the beneficiary's job performance. Missed payments or pre-payments to the pension provider are accrued as liabilities or receivables. Liabilities with a term of over twelve months are discounted accordingly.

The actuarial measurement of pension provisions for company pension plans as part of a **defined benefit plan** is effected in accordance with the projected unit credit method stipulated by IAS 19 (Employee Benefits) on the basis of actuarial opinions. Based on biometric data, this method takes into account known pensions and pension entitlements at closing date as well as expected increases of future wages and pensions. Where the employee benefit obligations determined or the fair value of the plan assets increase or decrease between the beginning and end of a financial year as a result of experience adjustments (for example, a higher fluctuation rate) or changes in underlying actuarial assumptions (for example the discount rate), this will result in so-called actuarial gains or losses. These are recognised in other comprehensive income with no effect on

profit or loss. Effects of plan changes and curtailments are recognised fully under service costs through profit or loss. The interest element of the addition to the provision contained in the pension expense is shown as interest paid under the financial result. Insofar as plan assets exist, the amount of the provision is generally the result of the difference between the present value of defined benefit obligations and the fair value of the plan assets.

Provisions for obligations similar to pensions (such as anniversary allowances and death benefits) are comprised of the present value of future payment obligations to the employee less any associated assets measured at fair value. The amount of provisions is determined on the basis of actuarial opinions in line with IAS 19. Actuarial gains and losses are recognised in profit or loss in the period in which they are incurred.

Termination benefits comprise severance payments to employees. These are recognised as liabilities with an effect in profit or loss when contractual or factual payment obligations towards the employee are to be made in relation to the termination of the employment relationship. Such an obligation is given when a formal plan for the early termination of the employment relationship exists to which the company is bound. Benefits with terms of more than twelve months after the closing date must be recognised at their present value.

The share bonuses granted under the share-based payment system are classified as “**cash-settled share-based payments**” pursuant to IFRS 2 (Share-based Payment). Proportionate provisions measured at the fair value of the obligations entered into are formed for these payments. The proportionate formation of the provisions is prorated over the underlying lockup period and recognised in profit or loss as personnel expenses. The fair value is remeasured at each closing date during the lockup period until exercised based on an option pricing model. Provisions are adjusted accordingly in profit or loss.

Where granted share-based payments are hedged through corresponding hedging transactions, the hedging transactions are measured at fair value and shown under other financial and non-financial assets. The portion of the hedges' value fluctuation that corresponds to the value of fluctuation of the share-based payments is recognised in personnel expenses. The surplus amount of value fluctuations is recognised in other comprehensive income outside of profit or loss.

(Other) provisions

In accordance with IAS 37 (Provisions, Contingent Liabilities and Contingent Assets), **(other) provisions** are formed if legal or constructive obligations to third parties exist that are based on past business transactions or events and will probably result in an outflow of financial resources that can be reliably determined. The provisions are stated at the anticipated settlement amount with regard to all identifiable risks attached. With individual obligations, the settlement amount with the highest possible probability of occurrence is used. If the determination of the provision for an individual situation results in a range of equally probable settlement amounts, the provision will be set at the average of these settlement amounts. For a multitude of uniform situations, the provision is set at the expected value resulting from the weighting of all possible results with the related probabilities.

Long-term provisions with a term of more than one year are discounted to the closing date using an interest rate for matching maturities which reflects current market expectations regarding interest rate effects. Provisions with a term of less than one year are discounted accordingly if the interest rate effect is material. Claims for recourse are not netted with provisions, but recognised separately as an asset if their realisation is considered virtually certain.

Provisions for onerous contracts are formed if the unavoidable costs of meeting the obligations under a contract exceed the expected economic benefits resulting from the contract. Provisions for deficient rental cover related to leased objects are based on a consideration of individual leased properties. Provisions in the amount of the present value of the funding gap are formed for all closed properties or properties with deficient rental cover. In addition, a provision is created for store-related risks related to leased, operational or not yet closed stores insofar as a deficient cover of operational costs or a deficient rental cover despite consideration of a possible subleasing for the respective location arises from current corporate planning over the basic rental term.

Provisions for restructuring measures are recognised if a constructive obligation to restructure was formalised by means of the adoption of a detailed restructuring plan and its communication vis-à-vis those affected as of the closing date. Restructuring provisions comprise only obligatory restructuring expenses that are not related to the company's current activities.

Warranty provisions are formed based on past warranty claims and the sales of the current financial year.

Financial liabilities

According to IAS 39, **financial liabilities** that do not represent liabilities from finance leases are assigned to one of the following categories:

- “At fair value through profit or loss”
 (“held for trading”)
- “Other financial liabilities”

The first-time recognition of financial liabilities and subsequent measurement of financial liabilities “held for trading” is based on the same stipulations as for financial assets.

The category “**other financial liabilities**” comprises all financial liabilities that are not “held for trading”. They are carried at amortised cost using the effective interest method, as the fair value option is not applied within METRO GROUP.

Financial liabilities designated as the hedged item in a fair value hedge are carried at their fair value. The fair values indicated for the financial liabilities have been determined on the basis of the interest rates prevailing on the closing date for the remaining terms and redemption structures.

In principle, financial liabilities from finance leases are carried at the present value of future minimum lease payments.

A financial liability is derecognised only when it has expired; that is, when the contractual obligations have been redeemed or annulled or have expired.

Other financial and non-financial liabilities

Other financial and non-financial liabilities are carried at their settlement amounts unless they represent derivative financial instruments or put options given out to non-controlling interests, which are recognised at fair value under IAS 39.

Deferred income comprises transitory deferrals.

Trade liabilities

Trade liabilities are recognised at amortised cost.

Other

Contingent liabilities

Contingent liabilities are, on the one hand, possible obligations arising from past events whose existence is confirmed only by the occurrence or non-occurrence of uncertain future events that are not entirely under the company’s control. On the other hand, contingent liabilities represent current obligations arising from past events for which, however, an outflow of economic resources is not considered probable or whose amount cannot be determined with sufficient reliability. According to IAS 37, such liabilities are not recognised in the balance sheet but disclosed in the notes. Contingent liabilities are determined on the basis of the principles applying to the measurement of provisions.

Accounting for derivative financial instruments and hedge accounting

Derivative financial instruments are exclusively utilised to reduce risks. They are used in accordance with the respective group guideline.

In accordance with IAS 39, all derivative financial instruments are recognised at fair value and shown under other financial and non-financial assets or other financial and non-financial liabilities.

Derivative financial instruments are measured on the basis of interbank terms and conditions, possibly including the credit margin or stock exchange price applicable to METRO GROUP. Where no stock exchange prices are used, the fair value is determined by means of recognised financial models.

In the case of an effective hedge accounting transaction (**hedge accounting**) pursuant to IAS 39, fair value changes of derivatives designated as fair value hedges and the underlying transactions are reported in profit or loss. In cash flow hedges, the effective portion of the fair value change of the derivative is recognised in other comprehensive income outside of profit or loss. A transfer to the income statement is effected only when the underlying transaction is realised. The ineffective portion of the change in the value of the hedging instrument is immediately reported in profit or loss.

Supplier compensation

Depending on the underlying circumstances, **supplier compensation** is recognised as a reduction in the cost of purchase, reimbursement or payment for services rendered. Supplier

compensation is accrued at closing date insofar as it has been contractually agreed upon and is likely to be realised. Accruals relating to supplier compensation tied to certain calendar year targets are based on projections.

Summary of selected measurement methods

Item	Measurement method
Assets	
Goodwill	Cost (subsequent measurement: impairment test)
Other intangible assets	
Purchased other intangible assets	(Amortised) cost
Internally generated intangible assets	Development costs (direct costs and directly attributable overhead)
Property, plant and equipment	(Amortised) cost
Investment properties	(Amortised) cost
Financial assets	
“Loans and receivables”	(Amortised) cost
“Held to maturity”	(Amortised) cost
“At fair value through profit or loss” (“held for trading”)	At fair value through profit or loss
“Available for sale”	At fair value recognised in equity
Inventories	Lower of cost and net realisable value
Trade receivables	(Amortised) cost
Cash and cash equivalents	At nominal value
Assets held for sale	Lower of carrying amount and fair value less costs to sell
Equity and liabilities	
Provisions	
Pension provisions	Projected unit credit method (benefit/years of service method)
Other provisions	Discounted settlement amount (with highest probability of occurrence)
Financial liabilities	
“At fair value through profit or loss” (“held for trading”)	At fair value through profit or loss
“Other financial liabilities”	(Amortised) cost
Other financial and non-financial liabilities	At settlement amount or fair value
Trade liabilities	(Amortised) cost

Judgements, estimates and assumptions

The preparation of the consolidated financial statements was based on a number of **judgements, estimates and assumptions** that had an effect on the value and presentation of the reported assets, liabilities, income and expenses as well as contingent liabilities.

Judgements

Information on the key discretionary decisions that materially affected the amounts reported in these consolidated financial statements can be found in the following notes:

- Determination of the consolidation group by assessing control opportunities (chapter Consolidation group). Aside from special purpose entities, this particularly concerns investments where the control opportunity is not necessarily tied in with a simple majority of voting rights due to special regulations in the Articles of Association.
- Classification of leases as finance leases or operating leases – including sale-and-lease-back transactions (no. 2 Other operating income and no. 20 Property, plant and equipment)
- Classification of real estate assets as investment properties (no. 21 Investment properties)
- Classification of financial instruments to the category “held to maturity” (no. 40 Carrying amounts and fair values according to measurement categories)

Estimates and assumptions

Information on estimates and underlying assumptions with significant effects on these consolidated financial statements is included in the following notes:

- Uniform group-wide determination of useful lives for assets with a definite useful life (no. 14 Depreciation/amortisation/impairment losses, no. 19 Other intangible assets and no. 20 Property, plant and equipment)
- Impairment testing of assets with a definite useful life if warranted by events (no. 14 Depreciation/amortisation/impairment losses, no. 19 Other intangible assets and no. 20 Property, plant and equipment)
- Annual goodwill impairment tests (no. 18 Goodwill – including sensitivity analyses)
- Recoverability of receivables – particularly receivables from suppliers (no. 23 Other financial and non-financial assets)
- Recognition of supplier compensation on an accrual basis (no. 23 Other financial and non-financial assets)

- Ability to realise future tax receivables – particularly from tax loss carry-forwards (no. 24 Deferred tax assets/deferred tax liabilities)
- Measurement of inventories (no. 25 Inventories)
- Determination of pension provisions (no. 32 Provisions for pensions and similar obligations)
- Determination of other provisions – for example, for deficient rental cover, restructuring, warranties and risks emerging from legal proceedings and litigation (no. 33 Other provisions [non-current]/provisions [current])

Although great care has been taken in making these estimates and assumptions, actual values may deviate from them in individual cases. The estimates and assumptions used in the consolidated financial statements are regularly reviewed. Changes are taken into account at the time new information becomes available.

Capital management

The aim of the capital management strategy of METRO GROUP is to secure the company's continued business operations, to enhance its enterprise value, to create solid capital resources to finance its profitable future growth and to provide for attractive dividend payments and capital service.

The capital management strategy of METRO GROUP has remained unchanged compared with the previous year.

EBIT after cost of capital (EBITaC)

Such metrics as EBIT after cost of capital (EBITaC) and return on capital employed (RoCE) are used in the context of value-based management. The focus is on the successful deployment of business assets and the achievement of a value contribution for METRO GROUP exceeding the cost of capital.

Additional information on EBITaC and RoCE is included in the combined management report in chapter 4 Earnings position in the section Value-based management.

Rating

METRO GROUP's ratings by the two international agencies Moody's and Standard & Poor's communicate the company's creditworthiness to existing and potential debt capital investors. Based on the current ratings, METRO GROUP has access to all financial markets.

For more information about the METRO GROUP rating, see the combined management report in chapter 5 Financial and asset position in the section Financial management.

Equity, liabilities and net debt in the consolidated financial statements

Equity amounts to €4,999 million (30/9/2013: €5,206 million), while debt amounts to €23,005 million (30/9/2013: €23,605 million). Net debt amounts to €4,655 million compared with €5,391 million as of 30/9/2013.

€ million	30/9/2013	30/9/2014
Equity	5,206	4,999
Liabilities	23,605	23,005
Net debt	5,391	4,655
Borrowings (incl. finance leases)	7,963	7,068
Cash and cash equivalents according to the balance sheet	2,564	2,406
Financial investments > 3 months ≤ 1 year ¹	8	7

¹ Shown in the balance sheet under "other financial and non-financial assets (current)"

Local capital requirements

The capital market strategy of METRO GROUP consistently aims to ensure that the group companies' capital resources comply with local requirements. During the current financial year, all external capital requirements were fulfilled. This includes, for example, adherence to a defined level of indebtedness or a fixed equity ratio.

Notes to the income statement

1. Sales

Sales (net) can be broken down as follows:

€ million	9M 2013	12M 2012/13	12M 2013/14
METRO Cash & Carry	22,559	31,165	30,513
Media-Saturn	14,405	21,053	20,981
Real	7,261	10,366	8,432
Galeria Kaufhof	2,086	3,082	3,099
Others	10	14	10
	46,321	65,679	63,035

Sales shown in the Others segment primarily concern MGB METRO Group Buying HK Ltd. at €6 million (12M 2012/13: €8 million; 9M 2013: €6 million) and the logistics companies at €3 million (12M 2012/13: €4 million; 9M 2013: €3 million).

Of total sales, €37.6 billion (12M 2012/13: €40.1 billion; 9M 2013: €28.5 billion) are attributable to international group companies.

———— Sales developments by business and geographical segments are presented in segment reporting.

2. Other operating income

€ million	9M 2013	12M 2012/13	12M 2013/14
Rents incl. reimbursements of subsidiary rental costs	336	458	418
Services/cost refunds	231	315	321
Services rendered to suppliers	234	353	222
Gains from the disposal of fixed assets and gains from the reversal of impairment losses	215	394	150
Income from deconsolidation	192	219	44
Miscellaneous	184	239	217
	1,393	1,978	1,372

Gains from the disposal of fixed assets and gains from the reversal of impairment losses primarily include income in the amount of €107 million from the disposal of real estate that will subsequently continue to be used by METRO GROUP as part of a lease agreement (12M 2012/13: €304 million; 9M 2013: €137 million). They mainly concern the sale of individual office properties at METRO GROUP's headquarters in

Düsseldorf. Income in the amount of €21 million (12M 2012/13: €63 million; 9M 2013: €62 million) was generated from the disposal of real estate properties primarily or entirely used by third parties. In addition, this item primarily includes income from reversals of impairment losses in the amount of €11 million (12M 2012/13: €15 million; 9M 2013: €7 million).

Services rendered to suppliers mainly consists of €174 million (12M 2012/13: €151 million; 9M 2013: €121 million) from METRO Cash & Carry and €28 million (12M 2012/13: €179 million; 9M 2013: €99 million) from Real. The decline is primarily due to the disposal of Real's Eastern European business operations.

Income from deconsolidation essentially includes income from the disposal of Real's business in Eastern Europe (12M 2012/13: €194 million from the disposal of Real's business in Eastern Europe and €26 million from the disposal of the wholesale business in the United Kingdom; 9M 2013: €192 million from the disposal of Real's business in Eastern Europe).

Miscellaneous other operating income includes, in particular, income from compensation in the amount of €23 million (12M 2012/13: €18 million; 9M 2013: €11 million). Among others, this item also includes income from the derecognition of lapsed liabilities of €11 million (12M 2012/13: €8 million; 9M 2013: €7 million), public sector subsidies of €10 million (12M 2012/13: €10 million; 9M 2013: €7 million), income from other commissions of €6 million (12M 2012/13: €12 million; 9M 2013: €10 million) and income from construction services of €4 million (12M 2012/13: €31 million; 9M 2013: €26 million).

3. Selling expenses

€ million	9M 2013	12M 2012/13	12M 2013/14
Personnel expenses	4,375	5,901	5,793
Cost of material	4,511	6,280	5,975
	8,886	12,181	11,768

The decline in selling expenses compared with the comparable period of the previous year is largely due to the disposal of Real's Eastern European business operations. In the item "cost of material", this primarily involves rental expenses and depreciation.

In addition, the item “cost of material” was impacted in the previous year by higher expenses for the creation of impairments and provisions related to the decision to withdraw the Media Markt sales brand from the Chinese market.

4. General administrative expenses

€ million	9M 2013	12M 2012/13	12M 2013/14
Personnel expenses	581	778	765
Cost of material	463	711	643
	1,044	1,489	1,408

The decline in general administrative expenses is primarily due to the disposal of Real's Eastern European business operations.

In this context, the item “cost of material” included higher impairment losses and consulting expenses in the previous year.

5. Other operating expenses

€ million	9M 2013	12M 2012/13	12M 2013/14
Impairment losses on goodwill	31	101	88
Losses from the disposal of fixed assets	58	68	38
Miscellaneous	42	76	16
	131	246	143

Impairment losses on goodwill of €88 million stem solely from METRO Cash & Carry in the Netherlands (12M 2012/13: €65 million from METRO Cash & Carry Hungary, €20 million from METRO Cash & Carry Greece and €16 million from METRO Cash & Carry Denmark ; 9M 2013: €16 million from METRO Cash & Carry Denmark and €15 million from METRO Cash & Carry Hungary).

For more information about impairment losses on goodwill, see no. 18 Goodwill.

Losses from the disposal of fixed assets essentially include expenses related to the disposal of other property, plant and equipment in the amount of €35 million (12M 2012/13: €30 million; 9M 2013: €21 million).

Miscellaneous other operating expenses include, in particular, expenses from construction services totalling €3 million (12M 2012/13: €32 million; 9M 2013: €28 million).

6. Result from associates and joint ventures

The group's share of income from associates and joint ventures amounts to €9 million (12M 2012/13: €6 million; 9M 2013: €6 million).

7. Other investment result

The other investment result of €78 million (12M 2012/13: €19 million; 9M 2013: €7 million) primarily comprises income totalling €62 million from the disposal of a 9 per cent stake in Booker Group PLC which had been held since the financial year 2012 as a component of the purchase price from the disposal of METRO GROUP's wholesale business in the United Kingdom.

8. Net interest income/interest expenses

The interest result can be broken down as follows:

€ million	9M 2013	12M 2012/13	12M 2013/14
Interest income	62	89	50
thereof finance leases	(0)	(1)	(0)
thereof from company pensions	(5)	(17)	(7)
thereof from financial instruments of the measurement categories according to IAS 39:			
loans and receivables incl. cash and cash equivalents	(33)	(41)	(30)
held to maturity	(0)	(0)	(0)
held for trading incl. derivatives in a hedging relationship according to IAS 39	(6)	(8)	(5)
available for sale	(0)	(0)	(0)
Interest expenses	-427	-606	-459
thereof finance leases	(-93)	(-126)	(-99)
thereof from company pensions	(-40)	(-65)	(-54)
thereof from financial instruments of the measurement categories according to IAS 39:			
held for trading incl. derivatives in a hedging relationship according to IAS 39	(-10)	(-13)	(-9)
other financial liabilities	(-256)	(-339)	(-265)
	-365	-517	-409

Interest income and interest expenses from financial instruments are assigned to the measurement categories according to IAS 39 on the basis of the underlying transactions.

Interest expenses in the measurement category “other financial liabilities” primarily included interest expenses for issued bonds (including the commercial paper programme) of €196 million (12M 2012/13: €243 million; 9M 2013: €184 million) and for liabilities to banks of €46 million (12M 2012/13: €59 million; 9M 2013: €41 million).

The decline in interest expenses was the result of both more favourable refinancing terms and lower debt.

9. Other net financial result

The other financial income and expenses from financial instruments are assigned to measurement categories according to IAS 39 on the basis of the underlying transactions. Besides income and expenses from the measurement of financial instruments according to IAS 39, this also includes the measurement of foreign currency positions according to IAS 21.

The overall result from currency effects and measurement results from hedging transactions and hedging relationships totalled €–61 million (12M 2012/13: €–59 million; 9M 2013: €–51 million). As in the previous year, this figure largely results from foreign currency financings in Eastern Europe. In addition, the other net financial result reflects €–122 million (12M 2012/13: €–66 million; 9M 2013: €–66 million) in currency effects resulting from the translation of the financial statements of foreign subsidiaries that are recognised through profit or loss in the year the subsidiary is deconsolidated or in the year business activities are discontinued.

For more information about possible effects from currency risks, see no. 43 Management of financial risks.

€ million	9M 2013	12M 2012/13	12M 2013/14
Other financial income	167	206	161
thereof currency effects	(143)	(137)	(91)
thereof hedging transactions	(20)	(25)	(36)
Other financial expenses	–329	–355	–403
thereof currency effects	(–190)	(–191)	(–166)
thereof hedging transactions	(–24)	(–30)	(–21)
Other net financial result	–162	–148	–242
thereof from financial instruments of the measurement categories according to IAS 39:			
loans and receivables incl. cash and cash equivalents	(–43)	(–58)	(–32)
held to maturity	(0)	(0)	(0)
held for trading	(–16)	(–14)	(–22)
available for sale	(0)	(1)	(0)
other financial liabilities	(–30)	(–38)	(–65)
thereof fair value hedges:			
underlying transactions	(0)	(0)	(0)
hedging transactions	(0)	(0)	(0)
thereof cash flow hedges:			
ineffectiveness	(1)	(–1)	(9)

10. Net results according to measurement categories

The key effects of income from financial instruments are as follows:

9M 2013								
€ million	Invest- ments	Interest	Fair value measure- ments	Currency translation	Disposals	Impair- ments	Other	Net result

Income and expenses from financial instruments are assigned to measurement categories according to IAS 39 on the basis of the underlying transactions.

Investment income and income effects from the disposal of investments are included in other investment income. Interest income and expenses are part of the interest result. Fair value measurements and effects from currency translation are included in the other net financial result. Income effects from the derecognition of other financial liabilities are included in earnings before interest and taxes (EBIT). Income effects from the disposal of assets classified as available for sale are included in the other net financial result to the extent that these do not concern investments. Expenses from impairments are essentially included in earnings before interest and taxes (EBIT).

For more information about impairments, see no. 27
Impairments of capitalised financial instruments.

Remaining financial income and expenses included in the other net financial result primarily concern bank commissions and similar expenses that are incurred within the context of financial assets and liabilities.

11. Income taxes

Income taxes include the expected taxes on income paid or owed in the individual countries as well as deferred taxes.

€ million	9M 2013	12M 2013/14
Actual taxes	232	496
thereof Germany	(67)	(128)
thereof international	(165)	(368)
thereof tax expenses / income of current period	(240)	(473)
thereof tax expenses / income of previous periods	(-8)	(23)
Deferred taxes	28	31
thereof Germany	(-9)	(43)
thereof international	(37)	(-12)
	260	527

The fact that figures for the reporting period cover a period of twelve months and the short financial year 2013 comprised only nine months results in limited comparability. An additional comparative period of twelve months cannot be presented in detail, as a corresponding tax calculation was not prepared for it.

The income tax rate of the German companies of METRO GROUP consists of a corporate income tax of 15.00 per cent plus a 5.50 per cent solidarity surcharge on corporate income tax as well as the trade tax of 14.70 per cent given an average assessment rate of 420.00 per cent. All in all, this results in an aggregate tax rate of 30.53 per cent. The tax rates are unchanged from the previous year. The income tax rates applied to foreign companies are based on the respective laws and regulations of the individual countries and vary within a range of 0.00 per cent (tax holidays) to 38.00 per cent (9M 2013: 36.15 per cent).

Deferred income tax liabilities for the financial year include gains of €2 million from changes in tax rates; the reporting period for 9M 2013 did not include any effect from changes in tax rates.

€ million	9M 2013	12M 2013/14
Deferred taxes in the income statement	28	31
thereof from temporary differences	(21)	(89)
thereof from loss and interest carry-forwards	(7)	(-58)

At €527 million (9M 2013: €260 million), income tax expenses, which are fully included in the result from ordinary activities, are €311 million (9M 2013: €202 million) higher than the expected tax expenses of €216 million (9M 2013: €58 million) that would have resulted if the German corporate income tax rate had been applied to the group's taxable income for the year.

Reconciliation of estimated to actual income tax expenses is as follows:

€ million	9M 2013	12M 2013/14
EBT (earnings before taxes)	189	709
Expected income tax expenses (30.53 %)	58	216
Effects of differing national tax rates	-47	-18
Tax expenses and income relating to other periods	-8	23
Non-deductible business expenses for tax purposes	77	105
Effects of not recognised or impaired deferred taxes	187	218
Additions and reductions for local taxes	16	18
Tax holidays	-8	-28
Other deviations	-15	-7
Income tax expenses according to the income statement	260	527
Group tax rate (in %)	137.81	74.32

The disproportionately high tax rate in the short financial year 2013 can largely be attributed to the lower pre-tax result that was due to the fact that the Christmas business was not included. By contrast, tax expenses were relatively high because no tax benefit from the measurement of current domestic tax losses was considered.

12. Profit or loss for the period attributable to non-controlling interests

Of profit or loss for the period attributable to non-controlling interests, profit shares accounted for €121 million (12M 2012/13: €152 million; 9M 2013: €53 million) and loss shares for €66 million (12M 2012/13: €59 million; 9M 2013: €53 million). This mainly concerns profit/loss shares of non-controlling interests in the Media-Saturn sales line.

13. Earnings per share

Earnings per share are determined by dividing profit or loss for the period attributable to METRO AG shareholders by the weighted number of issued shares. In the calculation of earnings per share, an additional dividend is generally deducted from profit or loss for the period attributable to METRO AG shareholders. Holders of preference shares are entitled to the retroactive payment of a preference dividend of €0.17 for the short financial year 2013 in accordance with § 140 Section 2 of the German Stock Corporation Act and § 21 Section 2 of the Articles of Association of METRO AG. There was no dilution in the reporting period or the previous year from so-called potential shares.

	9M 2013	12M 2012/13	12M 2013/14
Weighted number of no-par-value shares outstanding	326,787,529	326,787,529	326,787,529
Profit or loss for the period attributable to shareholders of METRO AG (€ million)	-71	-35	127
Earnings per share in € (basic = diluted)	-0.22	-0.11	0.39

In financial year 2013/14, earnings per preference share amounted to €0.45 (12M 2012/13: €0.06; 9M 2013: €-0.05) and thus exceed earnings per share by the amount of the additional dividend for preference shares of €0.06. In financial years 12M 2012/13 and 9M 2013, earnings per preference share included the retroactive payment of a preference dividend of €0.17 per preference share in accordance with the Articles of Association of METRO AG.

14. Depreciation/amortisation/impairment losses

Depreciation/amortisation/impairment losses of €1,283 million (12M 2012/13: €1,496 million; 9M 2013: €997 million) include impairment losses totalling €204 million (12M 2012/13: €367 million; 9M 2013: €157 million). Thereof, €88 million are attributable to the goodwill impairment losses related to METRO Cash & Carry Netherlands that were recognised in the second quarter of 2013/14 in light of negative business developments. The portfolio changes and selling space optimisations at METRO Cash & Carry required impairments of property, plant and equipment in the amount of €34 million. In addition, impairment losses include impairments of property, plant and equipment at Media-Saturn Russia in the amount of €30 million resulting, among other things, from measures undertaken to optimise the selling space of existing stores. Impairments related to the disposal of Real's business operations in Turkey also contributed €14 million to impairment losses. The attribution of depreciation/amortisation/impairment losses in the income statement and the affected asset categories is as follows:

€ million	9M 2013	12M 2012/13	12M 2013/14
Cost of sales	15	20	18
thereof depreciation/amortisation	(15)	(20)	(18)

	997	1,496	1,283

¹ Goodwill and other intangible assets were shown as intangible assets in the previous year

² Including investments accounted for using the equity method

Of impairment losses, METRO Cash & Carry accounted for €139 million (12M 2012/13: €162 million; 9M 2013: €83 million, revised presentation – see chapter Notes to the group accounting principles and methods), Media-Saturn for €38 million (12M 2012/13: €78 million; 9M 2013: €16 million), Real for €17 million (12M 2012/13: €88 million; 9M 2013: €39 million) and other companies for €10 million (12M 2012/13: €40 million; 9M 2013: €19 million, revised presentation – see chapter Notes to the group accounting principles and methods).

15. Cost of materials

The cost of sales includes the following cost of materials:

€ million	9M 2013	12M 2012/13	12M 2013/14
Cost of raw materials, supplies and goods purchased	36,331	51,219	48,909
Cost of services purchased	14	20	36
	36,345	51,238	48,945

16. Personnel expenses

Personnel expenses can be broken down as follows:

€ million	9M 2013	12M 2012/13	12M 2013/14
Wages and salaries	4,414	5,960	5,838
Social security expenses, expenses for post-employment benefits and related employee benefits	1,023	1,368	1,356
thereof post-employment benefits	(66)	(78)	(88)
	5,437	7,328	7,194

Wages and salaries shown in personnel expenses include expenses relating to severance payments of €94 million (12M 2012/13: €95 million; 9M 2013: €55 million). In addition, wages and salaries include restructuring expenses of €59 million (12M 2012/13: €29 million; 9M 2013: €20 million), which also comprise severance components. Wages and salaries also include expenses for share-based payments totalling €3 million (12M 2012/13: €6 million; 9M 2013: €7 million).

Annual average number of group employees:

Number of employees (by headcount)	9M 2013	12M 2012/13	12M 2013/14
Blue collar/white collar	269,493	272,867	255,033
Apprentices/trainees	9,101	9,262	9,109
	278,594	282,129	264,142

This includes an absolute number of 72,548 (12M 2012/13: 75,861; 9M 2013: 75,144) part-time employees. The percentage of employees working outside of Germany (full-time equivalents) stood at 61.5 per cent (12M 2012/13: 63.7 per cent; 9M 2013: 63.5 per cent).

17. Other taxes

Other taxes (for example, tax on land and buildings, motor vehicle tax, excise tax and transaction tax) of €134 million (12M 2012/13: €164 million; 9M 2013: €118 million) are included in the cost of sales and the selling and general administrative expenses.

Notes to the balance sheet

18. Goodwill

Goodwill amounts to €3,671 million (30/9/2013: €3,763 million).

A number of shares in Media-Saturn-Holding GmbH held by a non-controlling shareholder were granted a put option. In exercising this put option the non-controlling shareholder sold his share in METRO Kaufhaus- und Fachmarkt Holding GmbH during the short financial year 2013. The final price determination in the current financial year resulted in a €1 million increase in goodwill (30/9/2013: increase of €10 million from delivery of the shares).

In 2009, the non-controlling shareholders of METRO Cash & Carry Romania were granted stock tender rights by METRO GROUP. The subsequent measurement of these put options resulted in a goodwill decrease of €7 million (30/9/2013: increase of €5 million).

At the closing date, the breakdown of goodwill among the major cash-generating units was as follows:

30/9/2013			30/9/2014		
		WACC			WACC
	€ million	%	€ million		%
Real Germany	1,083	5.8	1,083	5.7	
METRO Cash & Carry France	398	5.8	398	5.7	
Media-Saturn Germany/ Redcoon group	300	7.5	300	6.7	
METRO Cash & Carry Netherlands	352	5.9	264	5.9	
METRO Cash & Carry Poland	257	6.4	257	6.5	
METRO Cash & Carry Germany	223	5.8	223	5.7	
METRO Cash & Carry Hungary	174	8.1	174	8.0	
METRO Cash & Carry Italy	171	6.8	171	6.6	
METRO Cash & Carry Belgium	145	5.9	145	5.8	
METRO Cash & Carry Spain/Portugal	142	7.3	142	6.6	
Media-Saturn Italy	72	8.7	72	7.7	
Galeria Inno Belgium	57	6.7	57	6.2	
METRO Cash & Carry Romania	61	7.9	54	7.3	
Other companies (each < €50 million or corporate assets)	328		331		
	3,763		3,671		

In accordance with IFRS 3 in conjunction with IAS 36, goodwill is tested for impairment once a year. This is carried out at the level of a group of cash-generating units. In the case of goodwill, this group is the organisational unit sales line per country. Exceptions to this rule concern the cash-generating units METRO Cash & Carry Spain/Portugal and Media-Saturn Germany/Redcoon group. After acquiring the outstanding shares of Redcoon group and combining the central administrative functions of Media-Saturn Germany and Redcoon group, the new group of the cash-generating unit Media-Saturn Germany/Redcoon group was tested for impairment. In the impairment test, the cumulative carrying amount of the group of cash-generating units is compared with the recoverable amount. The recoverable amount is defined as the fair value less costs to sell, which is calculated from discounted future cash flows and the level 3 input parameters of the fair value hierarchy (for an explanation of the fair value hierarchy, see no. 40 Carrying amounts and fair values according to measurement categories). Expected future cash flows are based on a qualified planning process under consideration of intra-group experience as well as macroeconomic data collected by third-party sources. In principle, the detailed planning period comprises three years. In exceptional cases, it may amount to five years in

the event of longer-term detailed planning. As in the previous year, the growth rates considered at the end of the detailed planning period are generally 1.0 per cent, with the exception of the group of the cash-generating unit Real Germany, for which a growth rate of 0.5 per cent is assumed. The capitalisation rate as the weighted average cost of capital (WACC) is determined using the capital asset pricing model. In the process, an individual peer group is assumed for all groups of cash-generating units operating in the same business segment. In addition, the capitalisation rates are determined on the basis of an assumed basic interest rate of 2.5 per cent (30/9/2013: 2.5 per cent) and a market risk premium of 6.0 per cent (30/9/2013: 6.5 per cent) in Germany. Country-specific risk premiums based on the respective country rating are applied to the equity cost of capital and to the debt cost of capital. The capitalisation rates after taxes determined individually for each group of cash-generating units range from 5.7 to 8.9 per cent (30/9/2013: 5.8 to 9.7 per cent).

The mandatory annual impairment test as of 30 September 2014 resulted in the following assumptions regarding the development of sales, EBIT and the EBIT margin targeted for the purposes of the balance sheet during the detailed planning period:

	Sales	EBIT	EBIT margin	Detailed planning period (years)
Real Germany	Slight growth	Strong growth	Strong growth	5
METRO Cash & Carry France	Solid growth	Solid growth	Unchanged	3
METRO Cash & Carry Netherlands	Slight growth	Strong growth	Strong growth	5
METRO Cash & Carry Poland	Substantial growth	Strong growth	Slight growth	3
METRO Cash & Carry Germany	Slight growth	Strong growth	Strong growth	5
Media-Saturn Germany	Solid growth	Solid growth	Unchanged	3
METRO Cash & Carry Hungary	Solid growth	Strong growth	Strong growth	5
METRO Cash & Carry Italy	Solid growth	Strong growth	Strong growth	3

As of 30 September 2014, the prescribed annual impairment test confirmed the recoverability of all capitalised goodwill. On 31 March 2014, impairment of €88 million was already carried out on the goodwill of METRO Cash & Carry Netherlands due to business development.

In addition to the impairment test, three sensitivity analyses were conducted for each group of cash-generating units. The first sensitivity analysis was based on the assumption of a 1 percentage point lower growth rate. In the second sensitivity analysis, the interest rate for each group of cash-generating units was raised by 10.0 per cent. In the third sensitivity analysis, a lump sum discount of 10.0 per cent was applied to assumed perpetual EBIT. With the exception of Real Germany, METRO Cash & Carry Netherlands, METRO Cash & Carry Germany and METRO Cash & Carry Hungary, these changes to the underlying assumptions would not result in impairment at any of the groups of cash-generating units.

In the goodwill impairment test at Real Germany, the fair value less costs to sell exceeded the carrying amount by €9 million. The corresponding amount for METRO Cash & Carry Germany was €20 million, and the amount for METRO Cash & Carry Hungary was €12 million. Assuming a 0.04 percentage point lower growth rate or a capitalisation rate of 5.71 per cent rather than 5.69 per cent or an assumed perpetual EBIT of €162 million rather than €163 million, the fair value less costs to sell of Real Germany would correspond to the carrying amount. At METRO Cash & Carry Netherlands, a perpetual EBIT of €45 million was assumed. For METRO Cash & Carry Germany, fair value less costs to sell would correspond to the carrying amount assuming a 0.2 percentage point lower growth rate or a capitalisation rate of 5.8 per cent rather than 5.7 per cent or an assumed perpetual EBIT of €84 million rather than €86 million. Assuming a 0.6 percentage point lower growth rate or a capitalisation rate of 8.4 per cent rather than 8.0 per cent or an assumed perpetual EBIT of €24 million rather than €25 million, the fair value less costs to sell of METRO Cash & Carry Hungary would correspond to the carrying amount.

¹ Disposals and transfers to IFRS 5 were shown as disposals in the previous year

The other intangible assets have a finite useful life and are therefore subject to depreciation/amortisation. Impairment losses concern internally generated software at €1 million (12M 2012/13: €11 million; 9M 2013: €3 million) lease and usage rights at €2 million (12M 2012/13: €3 million; 9M 2013: €2 million) as well as acquired concessions, rights and licenses at €1 million (12M 2012/13: €4 million; 9M 2013: €0 million).

The additions to depreciation/amortisation on other intangible assets are shown in the cost of sales at an amount of €4 million (12M 2012/13: €4 million; 9M 2013: €3 million), in selling expenses at €56 million (12M 2012/13: €52 million; 9M 2013: €38 million), in general administrative expenses at €71 million (12M 2012/13: €111 million; 9M 2013: €72 million).

Research and development expenses recognised in expenses essentially concern internally generated software and amounted to €39 million in the current financial year (12M 2012/13: €46 million; 9M 2013: €32 million).

As in the previous year, there are no material limits to the title or right to dispose of intangible assets. Purchasing obligations amounting to €1 million (30/9/2013: €3 million) were recorded.

20. Property, plant and equipment

As of 30 September 2014, property, plant and equipment totalling €10,025 million (30/9/2013: €10,709 million) were recognised. The decline in property, plant and equipment is due to negative currency effects in the amount of €268 million (12M 2012/13: €288 million; 9M 2013: €235 million). In the current financial year, these apply mainly to Russia and Ukraine.

Disposals of property, plant and equipment totalling €215 million (12M 2012/13: €165 million; 9M 2013: €62 million) also contributed to this decline. Included in this amount are disposals of properties totalling €145 million (12M 2012/13: €96 million; 9M 2013: €9 million). They result primarily in €113 million from the sale of individual office properties at METRO GROUP's headquarters in Düsseldorf as well as in €19 million from the sale of the Brandenburg property.

In addition, this item includes reclassifications of assets to "assets held for sale", reducing property, plant and equipment in the amount of €172 million (12M 2012/13: €918 million; 9M 2013: €100 million). Of these, €113 million relates to the wholesale business in Vietnam held for sale and €26 million to portions of the Turkish location in Merter owned by METRO PROPERTIES.

¹ Including asset transfers from "assets held for sale" to "property, plant and equipment"² Disposals and transfers to IFRS 5 were shown as disposals in the previous year

Restrictions on titles in the form of liens and encumbrances for property, plant and equipment amounted to €179 million (30/9/2013: €272 million).

Contractual commitments for the acquisition of property, plant and equipment in the amount of €128 million (30/9/2013: €125 million) were recorded.

Assets used by METRO GROUP under the terms of finance lease agreements were valued at €879 million (30/9/2013: €976 million). The assets involved are mainly leased buildings.

Finance leases generally have terms of 15 to 25 years with options under expiration to extend them at least once for five years. The interest rates in the leases vary by market and date of signing between 4.4 and 6.7 per cent.

In addition to finance leases, METRO GROUP also signed other types of leases classified as operating leases based on their economic value. Operating leases generally have an initial term of up to 15 years. The interest rates in the leases are based partly on variable and partly on fixed rents.

Payments due under finance and operating leases in subsequent periods are shown as follows:

€ million	Up to 1 year	1 to 5 years	Over 5 years
Finance leases 30/9/2013			
Future lease payments due (nominal)	232	737	1,449
Discount	-17	-164	-771
Net present value	215	573	678
Operating leases 30/9/2013			
Future lease payments due (nominal)	1,536	4,789	4,047

€ million	Up to 1 year	1 to 5 years	Over 5 years
Finance leases 30/9/2014			
Future lease payments due (nominal)	210	645	1,178
Discount	-15	-139	-600
Net present value	195	506	578
Operating leases 30/9/2014			
Future lease payments due (nominal)	1,422	4,312	3,632

Future payments due on finance leases contain payments amounting to €42 million (30/9/2013: €42 million).

The nominal value of future lease payments due to METRO GROUP coming from the subleasing of assets held under finance leases amounts to €199 million (30/9/2013: €212 million, adjustment of previous year's figures – see chapter Notes to the group accounting principles and methods).

The nominal value of future lease payments due to METRO GROUP coming from the subleasing of assets held under operating leases amounts to €470 million (30/9/2013: €538 million, adjustment of previous year's figures – see chapter Notes to the group accounting principles and methods).

Profit or loss for the period includes payments made under leasing agreements amounting to €1,585 million (12M 2012/13: €1,627 million; 9M 2013: €1,231 million) and payments received under leasing agreements in the amount of €341 million (12M 2012/13: €381 million; 9M 2013: €279 million).

Contingent lease payments from finance and operating leases recognised as expenses during the period amount to €10 million (12M 2012/13: €12 million; 9M 2013: €10 million) and €55 million (12M 2012/13: €55 million; 9M 2013: €46 million), respectively.

Lease payments due in subsequent periods from entities outside METRO GROUP for the rental of properties that are legally owned by METRO GROUP (METRO GROUP as lessor) are shown below:

€ million	Up to 1 year	1 to 5 years	Over 5 years
Finance leases 30/9/2013			
Future lease payments due (nominal)	1	3	7
Discount	0	-1	-4
Net present value	1	2	2
Operating leases 30/9/2013			
Future lease payments due (nominal) ¹	75	204	184

¹ Adjustment of previous year's figures
(see chapter Notes to the group accounting principles and methods)

€ million	Up to 1 year	1 to 5 years	Over 5 years
Finance leases 30/9/2014			
Future lease payments due (nominal)	0	0	0
Discount	0	0	0
Net present value	0	0	0
Operating leases 30/9/2014			
Future lease payments due (nominal)	84	235	192

Due to the termination of finance leases from the perspective of the lessor, there are no nominal minimum lease payments in the current reporting period (30/9/2013: €11 million). There is no unguaranteed residual value in the reporting period (30/9/2013: €2 million). Thus, the resulting gross investment value also amounts to €0 (30/9/2013: €13 million). As a result, unrealised financial income is also €0 (12M 2012/13: €6 million; 9M 2013: €5 million).

21. Investment properties

Investment properties are recognised at depreciated cost. As of 30 September 2014, investment properties totalling €223 million (30/9/2013: €156 million) were recognised. The increase of €67 million was mainly the result of the reclassification of the Turkish sites owned by METRO PROPERTIES from property, plant and equipment to "investment properties". The overcompensation of investing activities in the current financial year by depreciation and impairment losses constituted offsetting effects.

The fair values of these real estate properties total €311 million (30/9/2013: €236 million). They can be determined on the basis of observable market prices. As a result, the fair values are determined on the basis of internationally recognised measurement methods, particularly the comparative value procedure and the discounted cash flow method (level 3 of the three-level valuation hierarchy of IFRS 13 [Fair Value Measurement]). This measurement is based on a detailed planning period of ten years. Aside from headline rents, market-based discount rates were used as key valuation parameters. The discount rates are determined on the basis of analyses of relevant real estate markets as well as evaluations of comparable transactions and market publications issued by international consulting firms. The resulting discount rates reflect both the respective country and location risk as well as the property-specific real estate risk.

Rental income from these properties amounts to €40 million (12M 2012/13: €33 million; 9M 2013: €24 million). The related expenses amount to €25 million (12M 2012/13: €18 million; 9M 2013: €14 million). Expenses of €1 million (12M 2012/13: €1 million; 9M 2013: €0 million) resulted from properties without rental income.

Restrictions on titles in the form of liens and encumbrances amounted to €19 million (30/9/2013: €25 million). As in the previous year, no contractual commitments for the acquisition of investment properties were made.

¹ Disposals and transfers to IFRS 5 were shown as disposals in the previous year

Of the disposals of investments amounting to €269 million, €246 million concern the sale of a 9 per cent stake in Booker Group PLC. These shares were gained as part of the agreement regarding the sale of METRO GROUP's wholesale business in the United Kingdom.

The following table gives a summary of the financial information related to the main investments accounted for using the equity method:

	Closing date	Share in %	Total assets € million	Total liabilities € million	Net assets € million	Profit or loss € million	Group's share of net assets € million	Carrying amounts € million	Group's share of profit € million
Habib METRO Pakistan (Pvt) Ltd (associated company)	30/6/2014	40.00	67	3	64	4	26	45	2
OPCI FRENCH WHOLESALE PROPERTIES – FWP (associated company)	30/9/2014	4.99	265	107	158	11	8	8	2
OPCI FRENCH WHOLESALE STORES – FWS (associated company)	30/9/2014	25.00	256	105	151	11	38	39	3

The share of the company OPCI FRENCH WHOLESALE PROPERTIES – FWP was reduced by 25.74 per cent to 4.99 per cent in financial year 2013/14. METRO GROUP's representation on the supervisory board of OPCI FRENCH WHOLESALE PROPERTIES – FWP ensures that significant influence will be maintained and accounted for according to the equity method.

23. Other financial and non-financial assets

€ million	30/9/2013			30/9/2014		
	Remaining term			Remaining term		
	Total	up to 1 year	over 1 year	Total	up to 1 year	over 1 year
Receivables due from suppliers	1,389	1,360	29	1,524	1,505	19
Miscellaneous financial assets	672	652	21	669	649	19
Other financial assets	2,062	2,012	50	2,193	2,154	39
Other tax receivables	368	368	0	464	464	0
Prepaid expenses and deferred charges	430	154	276	376	150	226
Miscellaneous non-financial assets	78	66	12	75	68	7
Other non-financial assets	876	589	288	915	681	234
Other financial and non-financial assets	2,938	2,601	337	3,108	2,836	272

Receivables due from suppliers comprise both invoiced and deferred income for subsequent supplier compensation (for example, bonuses, advertising subsidies) and creditors with debit balances. The deviation from the previous year primarily stems from the improvement of agreed terms and conditions of subsequent supplier compensation.

Miscellaneous financial assets essentially comprise receivables from METRO Unterstützungskasse e. V. in the amount of €208 million (30/9/2013: €168 million), receivables from credit card transactions in the amount of €104 million (30/9/2013: €116 million), receivables from other financial transactions in the amount of €59 million (30/9/2013: €30 million), receivables and other assets in the real estate area amounting to €52 million (30/9/2013: €77 million) and financing provisions amounting to €22 million (30/9/2013: €19 million), receivables from the disposal of Real's Eastern European business amounting to €15 million (30/9/2013: €48 million).

Other tax receivables include entitlements to sales tax refunds totalling €263 million (30/9/2013: €147 million), not yet clearable input tax in the amount of €187 million (30/9/2013:

€206 million) and other entitlements to tax refunds totalling €14 million (30/9/2013: €16 million).

The item of prepaid expenses and deferred charges includes deferred rental, leasing and interest prepayments as well as miscellaneous deferrals.

Miscellaneous non-financial assets primarily include raw materials, supplies and goods purchased in the amount of €28 million (30/9/2013: €25 million).

24. Deferred tax assets / deferred tax liabilities

Deferred taxes on tax loss carry-forwards and temporary differences amount to €835 million, a decline of €2 million compared with 30 September 2013. The carrying amounts of deferred tax liabilities increased by €3 million to €130 million compared with the previous year.

Deferred taxes recognised concern the following balance sheet items:

€ million	30/9/2013		30/9/2014	
	Asset	Liability	Asset	Liability
Goodwill	177	176	152	170
Other intangible assets	97	68	101	73

Provisions for pensions and similar obligations	319	62	368	62
Other provisions	94	5	96	7
Borrowings	404	5	369	6
Other financial and non-financial liabilities	136	57	131	63
Liabilities related to assets held for sale	0	0	0	0
Outside basis differences	0	0	0	0
Write-downs of temporary differences	-84	0	-106	0
Loss carry-forwards	246	0	304	0
Total	1,760	1,050	1,762	1,057
Offset	-923	-923	-927	-927
Carrying amount of deferred taxes	837	127	835	130

Of the deferred tax assets shown, €492 million are attributable to the incorporated companies of METRO AG. Based on business planning, realisation of this tax asset is to be considered sufficiently probable.

In accordance with IAS 12 (Income Taxes), deferred tax liabilities relating to differences between the carrying amount of a subsidiary's pro rata assets and liabilities in the balance sheet and the carrying amounts of the investments for this subsidiary in the parent company's tax statement must be capitalised (so-called outside basis differences) if the tax benefit is likely to be realised in future. The differences can primarily be attributed to retained earnings of subsidiaries in Germany and abroad. No deferred taxes were recognised for these retained earnings as they will be reinvested over an indefinite period of time or are not subject to relevant taxation. Any dividends paid by subsidiaries would be subject to a dividend tax of 5 per cent. In addition, foreign dividends may trigger a withholding tax. As of 30 September 2014, €0 million in deferred tax liabilities from outside basis differences were recognised for planned dividend payments. At the time of this report being prepared, the ap-

proved dividend payments were fully recognised. For this reason, no deferred tax liabilities were recognised in this context. Due to the hierarchical structure of METRO GROUP, the determination of the taxable temporary differences would require undue efforts.

No deferred tax assets were capitalised for the following tax loss carry-forwards and interest carry-forwards or temporary differences because realisation of the assets in the short-to-medium term is not expected:

€ million	30/9/2013	30/9/2014
Corporate tax losses	7,666	7,896
Trade tax losses	7,844	7,908
Interest carry-forwards	132	19
Temporary differences	324	415

The losses primarily concern Germany. They can be carried forward without limitation.

Other changes	0	0	0	0	0	0	0	0	0
Remaining income tax on other comprehensive income	0	-9	-9	0	2	2	0	-4	-4
	-18	-13	-31	-96	8	-88	-335	27	-308

As a result of non-taxable events as well as the non-recognition and impairment of deferred taxes, the recog-

nised tax does not correspond to the estimated tax for each item.

25. Inventories

€ million	30/9/2013	30/9/2014
Food merchandise	1,953	2,032
Non-food merchandise	3,903	3,914
	5,856	5,946

Inventories can be broken down by sales line as follows:

€ million	30/9/2013	30/9/2014
METRO Cash & Carry	2,254	2,319
Media-Saturn	2,148	2,182
Real	622	578
Galeria Kaufhof	515	540
Others	316	327
	5,856	5,946

Compared with 30 September 2013, inventories increased by €90 million. The increase is primarily due to various new store openings as well as higher product purchasing as a result of, among other things, METRO Cash & Carry's 50th anniversary. The opposite effect was produced by the reclassification of inventories from METRO Cash & Carry Vietnam as "assets held for sale" and from the disposal of Real's business in Turkey.

Inventories include impairments of €229 million (30/9/2013: €267 million).

26. Trade receivables

Of total trade receivables of €560 million (30/9/2013: €547 million), €17 million (30/9/2013: €15 million) is due in over one year.

27. Impairments of capitalised financial instruments

Impairments of capitalised financial instruments that are measured at amortised cost are as follows:

€ million	Category "loans and receivables"	Category "held to maturity"
As of 1/10/2012	162	0
Currency translation	0	0
Additions	29	0
Reversal	-11	0
Utilisation	-13	0
Transfers	-5	0
As of 31/12/2012 / 1/1/2013	161	0
Currency translation	-3	0
Additions	87	0
Reversal	-31	0
Utilisation	-27	0
Transfers	0	0
As of 30/9 / 1/10/2013	189	0
Currency translation	-2	0
Additions	67	0
Reversal	-36	0
Utilisation	-52	0
Transfers	-31	0
As of 30/9/2014	135	0

In the category "loans and receivables", which includes, in particular, loans, trade receivables, receivables from suppliers as well as receivables and other assets in the real estate area, negative earnings effects from impairments amount to €30 million (12M 2012/13: €73 million; 9M 2013: €55 million). This also includes earnings from the receipt of cash from receivables of €2 million (12M 2012/13: €2 million; 9M 2013: €1 million) derecognised due to expected irrecoverability. In the current financial year, this item includes reclassifications of assets to "assets held for sale" in the amount of €1 million (12M 2013: €5 million; 9M 2013: €0 million).

As in the previous year, no earnings effects existed in the category "held to maturity".

In the current financial year, there are no negative earnings effects from impairments of receivables from finance leases (amount according to IAS 17) (12M 2012/13: €4 million; 9M 2013: €4 million).

In principle, impairment losses on capitalised financial instruments are recognised using an adjustment account. They reduce the carrying amount of financial assets.

28. Maturities and impairments of capitalised financial instruments

Capitalised financial instruments had the following maturities and impairments as of the closing date:

€ million	Total carrying amount 30/9/2013	thereof not past due, not impaired	thereof past due, not impaired				
			within the last 90 days	for 91 to 180 days	for 181 to 270 days	for 271 to 360 days	for more than 360 days
Assets							
in the category "loans and receivables"	2,647	2,241	101	5	1	0	1
in the category "held to maturity"	0	0	0	0	0	0	0
in the category "held for trading"	18	0	0	0	0	0	0
in the category "available for sale"	267	1	0	0	0	0	0
	2,932	2,243	101	5	1	0	1

	thereof past due, not impaired						
€ million	Total carrying amount 30/9/2014	thereof not past due, not impaired	within the last 90 days	for 91 to 180 days	for 181 to 270 days	for 271 to 360 days	for more than 360 days
Assets							
in the category "loans and receivables"	2,757	2,368	87	9	3	0	1
in the category "held to maturity"	0	0	0	0	0	0	0
in the category "held for trading"	26	0	0	0	0	0	0
in the category "available for sale"	19	1	0	0	0	0	0
	2,803	2,369	87	9	3	0	1

Loans and receivables due within the last 90 days largely result from standard business payment transactions with immediate or short-term payment targets. For unimpaired loans and receivables more than 90 days past due, there is no indication as of the closing date that debtors will not fulfil their payment obligations. For capitalised financial instruments which are not past due and which are not impaired, there is no indication based on the debtor's creditworthiness that would require an impairment.

29. Cash and cash equivalents

€ million	30/9/2013	30/9/2014
Cheques and cash on hand	109	110
Bank deposits and money in transit	2,455	2,296
	2,564	2,406

For more information, see the cash flow statement and no. 41 Notes to the cash flow statement.

30. Assets held for sale / liabilities related to assets held for sale

Divestment of Real's Eastern European business

By contractual agreement dated 30 November 2012, METRO GROUP and the French retailing company Groupe Auchan agreed on the sale of Real's business in Poland, Russia, Romania and Ukraine to Groupe Auchan. The agreement relating to Real in Russia, Romania and Ukraine was implemented during the short financial year 2013. As the last of the remaining conditions precedent were met in January 2014, the Polish Real business could be deconsolidated in the second quarter of 2013/14.

Continued operating activities have led to an increase in the "assets held for sale" of the Real business in Poland from €174 million to €247 million since the beginning of financial year 2013/14. Correspondingly, "liabilities related to assets held for sale" have increased from €264 million to €320 million. The assets and liabilities disposed of as a result of the deconsolidations can be broken down as follows:

€ million	30/9/2014
Assets	
Property, plant and equipment	32
Inventories	146
Trade receivables	5
Other financial and non-financial assets (current)	23
Cash and cash equivalents	41
	247
Liabilities	
Borrowings (non-current)	69
Other financial and non-financial liabilities (non-current)	16
Trade liabilities	191
Provisions (current)	14
Borrowings (current)	1
Other financial and non-financial liabilities (current)	29
	320

Earnings affecting EBIT from the divestment of Real's business in Eastern Europe amounted to €37 million. These are primarily shown with €43 million as other operating income and €6 million as selling expenses. In segment terms, they impact the Real segment in the full amount. The currency translation differences recognised outside of profit or loss in equity until the date of deconsolidation result in expenses of €28 million that impact the other net financial result on the occasion of their reversal.

Additional assets are scheduled to be sold to Groupe Auchan as well as other buyers in the context of the divestment of Real's Eastern European business. After the full reintegration of a Russian store amounting to €10 million into the METRO Cash & Carry segment, outstanding assets of €3 million will be accounted to "assets held for sale" and contribute in the same level in the Others segment to segment assets. They do not contribute to the segment assets in the Real segment. "Liabilities related to assets held for sale" do not exist for these additional assets.

Disposal of Real's Turkish business

In light of the renewed focus on Real's business in Germany, Real's business in Turkey was sold following the successful sale of Real's business in Eastern Europe. The contract to this effect with the buyer, Mr Hacı Duran Beğendik, was signed on 27 June 2014. After the final conditions for execution had been met in July 2014, the Turkish Real business was deconsolidated in the annual financial statements as of 30 September 2014. In light of this, assets of €73 million were recognised as "assets held for sale" and €80 million as "liabilities related to assets held for sale" as of 30 June 2014. Disposals from these items took place during the deconsolidation on 30 September 2014. Before the reclassification to "assets held for sale" and "liabilities related to assets held for sale", a write-down of the assets and liabilities to fair value less costs to sell was performed. This resulted in expenses affecting EBIT of €14 million that fully impacted the segment earnings of the Real sales line. In addition, there were no further earnings impacting EBIT during the deconsolidation. The reversal of currency translation differences recognised directly in equity until the date of deconsolidation results in an expense of €109 million, which is shown in other net financial result.

Sale of wholesale business in Vietnam

On 7 August 2014, METRO Cash & Carry reached an agreement with the Thai retail group Berli Jucker Public Company Limited (BJC) for the sale of all 19 Vietnamese wholesale stores including the associated real estate portfolio. The agreement is still subject to fulfilment of the usual conditions of execution and approvals by the responsible authorities. Until this time, the Vietnamese wholesale business will remain part of METRO GROUP and will continue to contribute to group results. Upon the agreement's effective date, all assets and liabilities affected by the agreement are treated as a disposal group pursuant to IFRS 5. Following consolidation of all intra-group assets and liabilities, they are therefore shown in the item "assets held for sale" (€221 million) or "liabilities related

to assets held for sale” (€192 million) in the consolidated balance sheet as of 30 September 2014. The assets and liabilities can be broken down as follows:

€ million	30/9/2014
Assets	
Property, plant and equipment	113
Other financial and non-financial assets (non-current)	48
Inventories	32
Trade receivables	3
Other financial and non-financial assets (current)	22
Cash and cash equivalents	3
	221
Liabilities	
Provisions for pensions and similar obligations	1
Borrowings (non-current)	97
Trade liabilities	45
Provisions (current)	6
Borrowings (current)	36
Other financial and non-financial liabilities (current)	7
	192

In the METRO Cash & Carry segment, assets and liabilities held for sale that are related to the Vietnamese wholesale business contribute €212 million to segment assets and €59 million to segment liabilities.

Expenses of €1 million in connection with the sale to BJC were incurred in financial year 2013/14. They are reported under general administrative expenses and are attributable to the METRO Cash & Carry segment. No expenses were incurred in connection with the measurement of the disposal group at fair value less costs to sell.

METRO GROUP assumes that the outstanding conditions for the accounting treatment of the disposal of the Vietnamese whole-sale business will be fulfilled within a period of twelve months.

Real estate

By contractual agreement of 23 April 2014, METRO GROUP purchased ten properties used by the Real sales line from the Delek Group, Netanya, Israel, with the aim of reselling these within a short period of time. The transaction was made through the direct purchase of shares in ten property companies as well as the purchase of loan receivables from the property companies. As a result of this transaction, the value of assets held for sale increased by €172 million. The transaction had no impact on earnings. For purposes of the cash flow statement, the transaction is shown as other investments under the cash flow from investing activities.

In addition, the value of individual properties available for sale has declined over the course of financial year 2013/14 by €75 million as a result of the sale of real estate assets and by €3 million as a result of currency effects. The reintegration of a real estate asset into non-current assets also resulted in a reduction of €1 million. Plans to dispose of additional real estate assets over the course of one year added €36 million. In addition, increased renovation-related additional capitalisations of real estate assets already recognised under “assets held for sale” added €3 million to this balance sheet item.

METRO GROUP expects to dispose of the real estate assets recognised as “assets held for sale” during the course of financial year 2014/15. No impairment losses to a lower fair value less costs to sell became necessary. Within segment reporting, these assets are recognised in segment assets of the METRO Cash & Carry (€7 million), Real (€172 million) and Others (€57 million) segments.

31. Equity

In terms of amount and composition – that is, the ratio of ordinary to preference shares – subscribed capital has not changed compared with 30 September 2013 and totals €835,419,052.27. It is divided as follows:

No-par-value bearer shares, accounting par value approximately €2.56		30/9/2013	30/9/2014
Ordinary shares	Shares	324,109,563	324,109,563
	€ approx.	828,572,941	828,572,941
Preference shares	Shares	2,677,966	2,677,966
	€ approx.	6,846,111	6,846,111
Total shares	Shares	326,787,529	326,787,529
Total share capital	€ approx.	835,419,052	835,419,052

Each ordinary share grants one voting right. In addition, ordinary shares of METRO AG entitle the holder to dividends. In contrast to ordinary shares, preference shares principally do not carry voting rights and give a preferential entitlement to profits in line with § 21 of the Articles of Association of METRO AG, which states:

- “(1) Holders of non-voting preference shares will receive from the annual net earnings a preference dividend of €0.17 per preference share.
- (2) Should the net earnings available for distribution not suffice in any one financial year to pay the preference dividend, the arrears (excluding any interest) shall be paid from the net earnings of future financial years in an order based on age; that is, in such manner that any older arrears are paid off prior to any more recent ones and that the preference dividends payable from the profit of a financial year are not distributed until all of any accumulated arrears have been paid.
- (3) After the preference dividend has been distributed, the holders of ordinary shares will receive a dividend of €0.17 per ordinary share. Thereafter, a non-cumulative extra dividend of €0.06 per share will be paid to the holders of non-voting preference shares. The extra dividend shall amount to 10 per cent of such dividend as, in accordance with Section 4 herein below, will be paid to the holders of ordinary shares insofar as such dividend equals or exceeds €1.02 per ordinary share.

- (4) The holders of non-voting preference shares and of ordinary shares will equally share in any additional profit distribution in the proportion of their shares in the share capital.”

Authorised capital

The Annual General Meeting on 23 May 2012 authorised the Management Board to increase the share capital, with the consent of the Supervisory Board, by issuing new ordinary bearer shares in exchange for cash or non-cash contributions in one or several tranches for a total maximum of €325,000,000 by 22 May 2017 (authorised capital I). The Management Board is authorised, with the consent of the Supervisory Board, to exclude shareholder subscription rights in certain cases. To date, the authorised capital I has not been utilised.

Contingent capital

The Annual General Meeting on 5 May 2010 resolved a contingent increase in the share capital by up to €127,825,000, divided into up to 50,000,000 ordinary bearer shares (contingent capital I). This contingent capital increase is connected to the creation of a new authorisation for the Management Board to issue warrant or convertible bearer bonds (“bonds”), with the consent of the Supervisory Board, with a nominal value of up to €1,500,000,000 in one or several tranches by 4 May 2015 and to grant the bond holders warrant or conversion rights for up to 50,000,000 new ordinary shares in the company based on the conditions of the bonds, to provide for the respective warrant or conversion obligations or to provide for the company’s right to redeem the bonds by providing ordinary shares in METRO AG, in whole or in part, in lieu of cash payment. The Management Board is authorised, with the consent of the Supervisory Board, to exclude shareholder subscription rights in certain cases. To date, no warrant and/or convertible bonds have been issued based on said authorisation.

Share buyback

On the basis of § 71 Section 1 No. 8 of the German Stock Corporation Act, the Annual General Meeting on 5 May 2010 authorised the company on or before 4 May 2015 to acquire shares of the company of any share class representing a maximum of 10 per cent of the share capital issued as of the date the Annual General Meeting resolution date passed. To date, neither the

company nor any company controlled or majority-owned by the company or any other company acting on behalf of the company or of any company controlled or majority-owned by the company has exercised this authorisation.

For more information about authorised capital, contingent capital, on the authorisation to issue warrant and/or convertible bonds as well as on share buybacks, see the combined management report in chapter 10 Notes pursuant to § 315 Section 4 and § 289 Section 4 of the German Commercial Code and explanatory report of the Management Board.

Capital reserve

The capital reserve amounts to €2,551 million (30/9/2013: €2,551 million).

Reserves retained from earnings

€ million	30/9/2013	30/9/2014
Effective portion of gains/losses from cash flow hedges	61	82
Gains/losses from the revaluation of financial instruments in the category "available for sale"	70	0
Currency translation differences from translating the financial statements of foreign operations	-407	-441
Remeasurement of defined benefit pension plans	-611	-865
Income tax on components of "other comprehensive income"	174	201
Other reserves retained from earnings	2,506	2,625
	1,793	1,602

Changes in the financial instruments presented above and the corresponding deferred tax effect consist of the following components:

€ million	9M 2013	12M 2012/13	12M 2013/14
Initial or subsequent measurement of derivative financial instruments	14	2	24
Derecognition of cash flow hedges	-8	3	-3
thereof in inventories	(-11)	(-3)	(-6)
thereof in financial result	(3)	(6)	(3)
Effective portion of gains/losses from cash flow hedges	6	5	21
Gains/losses from the revaluation of financial instruments in the category "available for sale"	65	68	-70
	71	73	-49
Net deferred tax effect thereon ¹	-1	0	-3
	70	73	-52

¹ Adjustment of previous year's figures for the sole presentation of the tax effect of the recognised components shown above

In addition, currency translation differences of €34 million reduced equity (12M 2012/13: €-129 million; 9M 2013: €-91 million).

The translation of the local balance sheets to the group currency resulted in a decline of €156 million in equity with no effect on profit or loss. The recognition in the amount of €122 million from the cumulated currency differences of companies that will be deconsolidated within this financial year or discontinue their operations in profit or loss had the opposite effect.

Other reserves retained from earnings increased by €119 million from €2,506 million to €2,625 million. This increase was primarily influenced by the profit for the period attributable to the shareholders of METRO AG of €127 million.

Non-controlling interests

Non-controlling interests comprise the shares held by third parties in the share capital of the consolidated subsidiaries. They amounted to €11 million at the end of the financial year (30/9/2013: €27 million). The decline is primarily the result of the dividend distribution of €86 million. The amount of total comprehensive income attributable to non-controlling interests had the opposite effect (€57 million). Significant non-controlling interests exist only at Media-Saturn-Holding GmbH.

Appropriation of the balance sheet profit, dividends

Dividend distribution of METRO AG is based on METRO AG's annual financial statements prepared under German commercial law.

As resolved by the Annual General Meeting on 12 February 2014, total reported net retained profit of €137 million for the short financial year 2013 was added to other reserves retained from earnings in financial year 2013/14.

Regarding the appropriation of the balance sheet profit for 2013/14, the Management Board of METRO AG will propose to the Annual General Meeting to distribute from the reported balance sheet profit of €319 million a dividend in the amount of €0.90 per ordinary share and €1.13 per preference share – that is, a total of €295 million – and to carry forward the remaining amount to the new account. The dividend proposal contains a preference dividend of €0.17 per preference share to cover the dividend that was not paid in the short financial year 2013 and that must be subsequently paid in accordance with § 140 Section 2 of the German Stock Corporation Act and § 21 Section 2 of the Articles of Association of METRO AG.

32. Provisions for pensions and similar obligations

€ million	30/9/2013	30/9/2014
Pension provisions (employer's commitments)	769	853
Provisions for indirect commitments	547	631
Provisions for voluntary pension benefits	6	6
Provisions for company pension plans	112	116
Provisions for obligations similar to pensions	76	77
	1,508	1,684

Pension provisions are recognised in accordance with IAS 19 (Employee Benefits).

Pension provisions consist of commitments primarily related to benefits defined by the provisions of company pension plans. These take the form of defined benefit plans directly from the employer (employer's commitments) and defined benefit plans from external providers (benevolent funds in Germany and international pension funds). The external providers' assets serve exclusively to finance the pension entitlements and qualify as plan assets. The benefits under the different plans are based on performance and length of service. The length-of-service benefits are provided on the basis of fixed amounts.

The most important performance-based pension plans are described in the following.

Germany

METRO GROUP grants many employees in Germany retirement, disability and surviving dependant's benefits. New commitments are granted in the form of "defined benefit" commitments in the meaning of IAS 19 (Employee Benefits), which comprise a payment contribution component and an employer-matching component. Contributions are paid to a pension reinsurance from which contributions are paid out when the insured event occurs. A provision is recognised for entitlements not covered by reinsurance.

In addition, various pension funds exist that are closed for new contributions. In general, these provide for lifelong pensions starting with the statutory retirement age or recognised invalidity. Benefits are largely defined as fixed payments or on the basis of set annual increases. In special cases, benefits are calculated in consideration of accrued statutory pension entitlements. These commitments provide for a widow's or widower's pension of varying size depending on the benefits the former

employee received or would have received in case of invalidity. Legacy commitments are partially covered by assets held in benevolent funds. Provisions are recognised for those commitments not covered. The benevolent funds' decision-making bodies (management board and general assembly of members) comprise both employer and employee representatives. The management board decides on the deployment of funds and financial investments. It may commission third parties to manage fund assets. No statutory minimum endowment obligations exist. Insofar as pledged benefits cannot be paid out of the benevolent fund assets, the employer is obliged to directly assume these payments (subsidiary liability).

Netherlands

A defined benefit pension plan exists in the Netherlands and foresees pension payments in addition to invalidity and death benefits. The amount of the benefits depends on the pensionable salary per year of service. Benefits are funded through a pension fund whose decision-making bodies (management board, as well as administration, finance and investment committee) include employer and employee representatives. The fund's executive committee has responsibility for asset management. The pension fund's investment committee exists for this purpose. In line with statutory minimum funding requirements, the pension fund's executive committee must ensure that commitments are covered by assets at all times. In case of underfunding, the pension fund's executive committee may take different measures to compensate for this. These measures include the requirement for additional contributions by the employer and cutbacks in employee benefits.

In addition, another defined benefit plan exists in the Netherlands that is recognised as a defined contribution plan (multi-employer plan).

United Kingdom

In July 2012, METRO GROUP sold its cash-and-carry business in the United Kingdom to Booker Group PLC. Pension commitments were not part of the sale. Since the date of the sale, only vested benefits and current pensions from service years at METRO GROUP exist. In accordance with legal stipulations, the vested interests must be adjusted for inflation effects. The commitments are covered by assets which are managed and invested by a corporate trustee. The executive committee of this corporate trustee consists of employer and employee representatives. In any case, the trustee must ensure that benefits can be paid at all times in future. This is regulated on the basis of statutory minimum financing requirements. In case

of underfunding, the trustee may require additional employer contributions to close the funding gap.

Belgium

There are both retirement pensions as well as capital commitments whose size depends on the pensionable length of service and pensionable income. In addition, benefits are paid to employees aged 58 and older who become unemployed. In principle, benefits are funded through group insurance contracts that are subject to Belgian regulatory law.

Considered individually, other retirement plans are immaterial and are shown cumulatively under “rest of the world”.

The following table provides an overview of the present value of defined benefit obligations by METRO GROUP countries as well as material obligations:

%	30/9/2013	30/9/2014
Germany	67	66
Netherlands	15	16
United Kingdom	7	7
Belgium	3	3
Rest of the world	8	8
	100	100

The plan assets of METRO GROUP are distributed proportionally to the following countries:

%	30/9/2013	30/9/2014
Germany	36	32
Netherlands	36	39
United Kingdom	15	17
Belgium	5	5
Switzerland	8	7
	100	100

The above pension commitments are valued on the basis of actuarial calculations in accordance with IAS 19. The basis for the valuation are the legal, economic and tax circumstances prevailing in each country.

The following material parameters are used in the actuarial valuation:

30/9/2013						30/9/2014					
%	Germany	Netherlands	United Kingdom	Belgium	Rest of the world	Germany	Netherlands	United Kingdom	Belgium	Rest of the world	Rest of the world
Actuarial interest rate	3.35	3.75	4.50	3.35	3.27	2.60	2.70	4.20	2.60	2.60	2.60
Inflation rate	2.00	2.00	2.60	2.00	2.03	2.00	2.00	2.50	2.00	1.92	1.92

As in previous years, METRO GROUP used generally recognised methods to determine the actuarial rate of interest. With these, the respective actuarial rate of interest based on the yield of investment grade corporate bonds is determined as of the closing date in consideration of the currency and maturity of the underlying obligations. The actuarial rate of interest for the eurozone and the UK is based on the results of a method applied in a uniform manner across the group. The interest rate for this is set on the basis of the returns of high-quality corporate bonds and the duration of commitments. In countries without a liquid market of suitable corporate bonds, the actuarial interest rate was determined on the basis of government bond yields.

Aside from the actuarial interest rate, the inflation rate represents another key actuarial parameter. In the process, the nominal rate of wage and salary increases was determined on the basis of expected inflation and a real rate of increase. In Germany, the rate of pension increases is derived directly from the inflation rate insofar as pension adjustments can be determined on the basis of the increase in the cost of living. In international companies, pension adjustments are also generally determined on the basis of the inflation rate.

The extent of other, non-essential parameters used to determine pension commitments corresponds to the long-term expectations of METRO GROUP. The impact of changes in fluctuation and mortality assumptions was analysed for major plans. Calculations of the mortality rate for the German group companies are based on the 2005 G tables from Prof. Dr Klaus Heubeck. The actuarial valuations outside of Germany are based on country-specific mortality tables. The resulting effects of fluctuation and mortality assumptions have been deemed immaterial and are not listed as a separate component.

The following is a sensitivity analysis for the key valuation parameters with respect to the present value of pension entitlements. The actuarial rate of interest and the inflation rate were identified as key parameters with an impact on the present value of pension entitlements. In the context of the sensitivity analysis, the same methods were applied as in the previous year. The analysis considered changes in parameters that are appropriately considered possible. Stress tests or worst-case scenarios, in turn, are not part of the sensitivity analysis. The selection of the respective spectrum of possible changes in parameters is based on historic multi-year observations. This almost exclusive reliance on historic data to derive possible future developments represents a methodical constraint.

The following illustrates the impact of an increase/decline in the actuarial rate of interest by 100 basis points or an increase/decrease in the inflation rate by 25 basis points:

		30/9/2013					30/9/2014				
€ million		Germany	Nether-lands	United Kingdom	Belgium	Rest of the world	Germany	Nether-lands	United Kingdom	Belgium	Rest of the world

The granting of defined benefit pension entitlements exposes METRO GROUP to various risks. These include general actuarial risks resulting from the valuation of pension commitments (for example, interest rate risks) as well as capital and investment risks related to plan assets.

With a view to the funding of future pension payments from indirect commitments and a stable actuarial reserve, METRO GROUP primarily invests plan assets in low-risk investments. The funding of direct pension commitments is secured through operating cash flow at METRO GROUP.

The fair value of plan assets by asset category can be broken down as follows:

30/9/2013			30/9/2014		
	%	€ million		%	€ million
Fixed-interest securities	47	481	37	407	
Shares, funds	27	264	21	231	
Real estate	13	137	16	177	
Other assets	13	137	26	290	
	100	1,019	100	1,105	

Fixed-interest securities, shares and funds are regularly traded on active markets. As a result, the relevant market prices are available. The asset category "fixed-interest securities" only includes investments in investment grade corporate bonds, government bonds and mortgage-backed bonds (Pfandbriefe). Risk within the category "shares, funds" is minimised through geographic diversification.

Real estate assets are not traded on an active market. These are primarily used by METRO GROUP itself.

Other assets essentially comprise receivables from insurance companies in Germany, Switzerland and Belgium. All of these are first-rate insurance companies.

The actual gain from plan assets amounted to €30 million in the reporting period (12M 2012/13: €48 million; 9M 2013: €32 million).

In financial year 2013/14, pension reinsurance policies were taken out in the United Kingdom to largely cover the risks arising from pension obligations. For these pension reinsurance policies, plan assets in the form of shares and fixed-interest securities with a present value of €147 million were exchanged. In addition, a cash payment of €85 million was made. The transaction resulted in valuation effects totalling €75 million, which were recognised in other comprehensive income. As of the closing date, €40 million in pension obligations not covered by pension reinsurance were recognised for the United Kingdom and are backed by plan assets in the form of fixed-interest securities totalling €31 million.

For the financial year 2014/15, the company expects employer payments to external pension providers totalling approx. €21 million and employee contributions of €12 million in plan assets, with contributions in the Netherlands accounting for the major share of this total. Expected contributions from payment contribution commitments in Germany are not included in expected payments.

Changes in the present value developed as follows:

€ million	9M 2013	12M 2012/13	12M 2013/14
Present value of defined benefit obligations			
As of the beginning of the period	2,467	2,427	2,442
Interest expenses	62	87	83
Service cost (incl. employee contributions)	33	43	42
Past service cost (incl. curtailments and changes)	-1	-13	7
Benefit payments (incl. tax payment)	-96	-128	-126
Settlement payments	-7	-7	-4
Actuarial gains/losses from demographic assumptions (-/+)	0	3	3
Actuarial gains/losses from financial assumptions (-/+)	7	55	274
Actuarial gains/losses from experience-based adjustments (-/+)	-16	-14	-28
Change in consolidation group	0	0	0
Currency effects	-7	-11	15
As of end of the period	2,442	2,442	2,708

The weighted average term of defined benefit commitments for the countries with material pension obligations amounts to:

Years	30/9/2013	30/9/2014
Germany	13	13
Netherlands	21	22
United Kingdom	19	19
Belgium	6	6
Rest of the world	11	11

The present value of defined benefit obligations can be broken down as follows based on individual groups of eligible employees:

%	30/9/2013	30/9/2014
Active member	30	30
Former claimants	15	18
Pensioners	55	52

The fair value of plan assets developed as follows:

€ million	9M 2013	12M 2012/13	12M 2013/14
Change in plan assets			
Fair value of plan assets as of beginning of period	1029	1,024	1,019
Return on plan assets	26	38	36
Return/loss on plan assets, excluding the amount included in interest income (+/-)	6	10	-6
Settlement payments	-7	-7	0
Benefit payments (incl. tax payment)	-58	-77	-77
Employer contributions	19	25	107
Contributions from plan participants	8	11	12
Change in consolidation group	0	0	0
Currency effects	-4	-5	14
Fair value of plan assets as of end of period	1,019	1,019	1,105

€ million	30/9/2013	30/9/2014
Financing status		
Present value of defined benefit obligations	2,442	2,708
Fair value of plan assets	-1,019	-1,105
Commitments measured based on local criteria	1	0
Asset adjustment (asset ceiling)	4	2
Net liability/assets	1,428	1,605
Recognised assets pursuant to IAS 19.64	4	2
Provisions for retirement benefits as of end of period	1,432	1,607

At one Swiss company, plan assets exceeded the value of commitments as of the closing date. Since the company cannot draw any economic benefits from this overfunding, the balance sheet amount was reduced to €0 in line with IAS 19.64 (b). The change in the effect of the asset ceiling of approximately €2 million was recognised as expenses in other comprehensive income. In addition, a surplus exists in a defined benefit plan in Belgium. An asset adjustment is not necessary here.

The pension expenses of the direct and indirect company pension plans can be broken down as follows:

€ million	9M 2013	12M 2012/13	12M 2013/14
Current service cost ¹	25	32	30
Net interest expenses	36	49	47
Past service cost (incl. curtailments and changes)	-1	-13	9
Settlements	0	0	-2
Pension expenses	60	68	84

¹ Netted against employees' contributions

In addition to expenses from defined benefit commitments, expenses for payments to external pension providers relating to defined contribution pension commitments of €49 million (12M 2012/13: €54 million; 9M 2013: €40 million) were recorded.

Media-Saturn in the Netherlands participates in a multi-employer plan classified as a defined benefit plan. However, it is administered by a fund that is not able to provide sufficient information to allow it to be accounted for as a defined benefit plan. Therefore, it is treated as a defined contribution plan in accordance with IAS 19.34 and IAS 19.148. This is a typical, strictly regulated Dutch pension plan. In case of deficient coverage, Media-Saturn Netherlands would be obliged to

compensate this deficient coverage by making higher contributions to this fund in future. These higher contributions would then apply to all participating companies. Media-Saturn cannot be held liable for these commitments by other companies. Approximately 28,000 companies in the retail industry participate in this plan and make contributions for a total of more than 238,000 employees. Media-Saturn Netherlands currently makes contributions to this plan for 5,703 employees. Contributions are calculated for five years (currently from 2012 to 2016). These correspond to a set percentage of an employee's salary (currently 19.4 per cent), with employees assuming part of the contributions for salaries above €12,561 and no contributions being paid for salaries above €51,414. In financial year 2014/15, contributions to the "Bedrijfspensioen-fonds voor de Detailhandel" fund are expected to total approximately €7 million. In September 2014, the coverage ratio stood at 114 per cent.

The **provisions for obligations similar to pensions** essentially comprise commitments from employment anniversary allowances, death benefits and pre-retirement part-time plans. Provisions amounting to €77 million (30/9/2013: €76 million) were formed for these commitments. The commitments are valued on the basis of actuarial expert opinions. In principle, the parameters used are identical to those employed in the company pension plan.

33. Other provisions (non-current)/provisions (current)

In the reporting period, other provisions (non-current)/provisions (current) changed as follows:

€ million	Real estate-related obligations	Obligations from trade transactions	Restructuring	Taxes	Miscellaneous	Total
As of 1/10/2013	239	149	141	144	377	1,050

Transfer	-4	-0	6	-1	-13	-11
As of 30/9/2014	265	111	118	155	443	1,093
Non-current	153	0	18	125	182	478
Current	112	111	100	30	262	615
As of 30/9/2014	265	111	118	155	443	1,093

Provisions for real estate-related obligations concern store-related risks in the amount of €121 million (30/9/2013: €123 million), deficient rental cover amounting to €63 million (30/9/2013: €49 million), rental commitments amounting to €35 million (30/9/2013: €37 million) and dismantling and removing obligations amounting to €21 million (30/9/2013: €21 million).

Other real estate obligations in the amount of €25 million (30/9/2013: €10 million) stem essentially from maintenance obligations.

Significant components of the obligations from trade transactions are provisions for rebates from customer loyalty programmes in the amount of €52 million (30/9/2013: €72 million), provisions for warranty services in the amount of €20 million (30/9/2013: €42 million) as well as provisions for rights of return of €25 million (30/9/2013: €24 million).

Restructuring provisions totalling €118 million (30/9/2013: €141 million) essentially concern METRO Cash & Carry in the amount of €55 million (30/9/2013: €32 million) and Real in the amount of €29 million (30/9/2013: €48 million).

Other provisions mainly concern provisions for litigation costs/risks in the amount of €144 million (30/9/2013: €52 million) and for severance obligations totalling €53 million (30/9/2013: €48 million). In addition, other provisions include interest for other provisions in the amount of €47 million (30/9/2013: €47 million) as well as surety and guarantee risks of €23 million (30/9/2013: €19 million), risk provisions for portfolio measures amounting to €22 million (30/9/2013: €71 million) and provisions for share-based payments amounting to €15 million (30/9/2013: €12 million).

For more information about share-based payments, see no. 49 Long-term incentive for executives.

Transfers concern both reclassifications within other reserves as well as reclassifications carried out in connection with the planned disposal of the wholesale business in Vietnam to “liabilities related to assets held for sale”.

Depending on the respective terms and countries, interest rates of non-interest-bearing, non-current provisions range from 0.9 per cent to 8.0 per cent.

34. Liabilities

	20,656	14,717	3,813	2,126	19,900	15,271	3,244	1,385

35. Trade liabilities

The increase in trade liabilities by €125 million compared with 30 September 2013 (revised presentation – see chapter Notes to the group accounting principles and methods) is mainly attributable to the sales lines Media-Saturn (€206 million) and METRO Cash & Carry (€82 million). This is primarily due to new store openings and higher product purchasing for both sales lines. The opposite effect was produced by the reclassification of €45 million from the disposal of METRO Cash & Carry Vietnam to liabilities related to “assets held for sale”.

In addition, trade liabilities at Real declined by €147 million due to increased regulations, greater offsetting and the disposal of Real's business in Turkey.

36. Financial liabilities

An ongoing capital market programme serves as a source of **medium-term and long-term financing**. In financial year 2013/14, no new transactions were conducted in the context of this programme. The €500 million bond that matured in November 2013 and the €600 million bond that matured in July 2014 were repaid according to schedule.

Short-term financing requirements are covered through the Euro Commercial Paper Programme and a commercial paper programme geared especially to French investors. Both programmes have a maximum volume of €2 billion each. The average amount utilised from both programmes in financial year 2013/14 was €782 million (2012/13: €1,143 million). As of 30 September 2014, the used volume totalled approximately €938 million (30/9/2013: €383 million).

In addition, METRO GROUP has access to syndicated lines of credit totalling €2,525 million (30/9/2013: €2,500 million) with terms ending between January 2017 and April 2019. If the lines of credit are used, the interest rates range between EURIBOR +50.0 basis points (BP) and EURIBOR +55.0 BP. The average amount drawn on the lines of credit in financial year 2013/14 was €0 million (2012/13: €0 million), the average amount drawn as of the closing date was €0 million (30/9/2013: €0 million).

The contract terms for the syndicated lines of credit provide for an increase of 5 to 10 BP in the spread if METRO GROUP's credit rating is lowered by one step. In the event of a downgrade in METRO GROUP's rating, the margins increase by 20 to 25 BP.

As of 30 September 2014, METRO GROUP had access to additional bilateral bank lines of credit totalling €1,430 million (30/9/2013: €1,826 million), of which €300 million (30/9/2013: €405 million) is due in up to one year. On the closing date,

€865 million (30/9/2013: €1,096 million) of the bilateral lines of credit had been utilised. Of this amount, €260 million (30/9/2013: €310 million) had a remaining term of up to one year.

Unutilised lines of credit of METRO GROUP

The defaulting of a lender can be covered at any time by the existing unutilised credit facilities or the available money and capital market programmes. METRO GROUP therefore does not bear any credit default risk.

METRO GROUP principally does not provide collateral for borrowings. One exception concerns the first-time consolidation of METRO PROPERTIES GmbH & Co. KG as well as its subsid-

aries in 2003. As of 30 September 2014, collateral in the amount of €221 million (30/9/2013: €328 million) was provided for financial liabilities.

The following tables show the maturity structure of the financial liabilities. The carrying amounts and fair values indicated include the interest accrued when the maturity is less than one year.

The fixed interest rate for short-term and medium-term borrowings and the repricing dates of all fixed-interest liabilities essentially correspond to the displayed remaining terms. The repricing dates for variable interest rates are less than one year.

— The effects that changes in interest rates concerning the variable portion of borrowings have on the profit or loss for the period and equity of METRO GROUP are described in detail in no. 43 Management of financial risks.

37. Other financial and non-financial liabilities

Key items in remaining other financial liabilities concern liabilities from the purchase of other fixed assets of €322 million (30/9/2013: €299 million), liabilities towards customers of €160 million (30/9/2013: €155 million), liabilities from put options of non-controlling interests of €72 million (30/9/2013: €78 million) as well as liabilities from real estate totalling

€34 million (30/9/2013: €31 million). In addition, the remaining other liabilities also include numerous other individual items.

Other tax liabilities include sales tax, land tax, wage and church tax as well as other taxes.

Deferred income includes accrued rental, leasing and interest income as well as accrued sales from customer loyalty programmes, the sale of vouchers and guarantee contracts and other accruals.

Material items in remaining other liabilities include prepayments received on orders of €46 million (30/9/2013: €47 million) as well as liabilities from leases (no finance leases) totalling €71 million (30/9/2013: €47 million).

€ million	30/9/2013			30/9/2014

Liabilities from finance leases	1,278	0	1,278	0	0	1,278
	19,516	897	18,619	63	5	18,552

The corresponding amounts that are not netted in the balance sheet include both financial instruments and collateral. The financial instruments that have not been netted could be netted based on the underlying framework agreements, but do not fulfil the netting criteria of IAS 32 (Financial Instruments:

Presentation). Collateral may include both financial assets provided as collateral for liabilities to third parties and financial liabilities which METRO GROUP has received from a third party as collateral for assets.

For more information about collateral, see no. 43 Management of financial risks.

39. Undiscounted cash flows of financial liabilities

The undiscounted cash flows of borrowings, trade liabilities and derivative liabilities are as follows:

€ million	Carrying amount 30/9/2013	Cash flows up to 1 year		Cash flows of 1 to 5 years		Cash flows over 5 years	
		Interest	Redemp- tion	Interest	Redemp- tion	Interest	Redemp- tion

Liabilities not classified according to IFRS 7	9,385	n/a	n/a	n/a	n/a
Unrealised gain (+) / loss (–) from total difference between fair value and carrying amount					–478

Classes were formed based on similar risks for the respective financial instruments and correspond to the categories of IAS 39. Derivative financial instruments in a hedging relationship under IAS 39 and other financial liabilities are classified in each case to a separate class.

The fair value hierarchy comprises three levels which reflect the degree of closeness to the market of the input parameters used in the determination of the fair values. In cases in which the valuation is based on different input parameters, the fair value is attributed to the hierarchy level corresponding to the input parameter of the lowest level that is significant for the valuation.

Input parameters for level 1: Quoted prices (that are adopted unchanged) in active markets for identical assets or liabilities which the company can access at the valuation date.

Input parameters for level 2: Other input parameters than the quoted prices included in level 1 which are either directly or indirectly observable for the asset or liability.

Input parameters for level 3: Input parameters that are not observable for the asset or liability.

Of the total carrying amount of investments of €18 million (30/9/2013: €266 million), €18 million (30/9/2013: €13 million) are recognised at historical cost because a fair value cannot be reliably determined. These concern off-exchange financial instruments without an active market. The company currently

does not plan to dispose of the investments recognised at historical cost. Exchange-listed investments totalling €0 million (30/9/2013: €253 million) are recognised at fair value in equity.

Miscellaneous financial liabilities include liabilities from put options of non-controlling interests in the amount of €72 million (30/9/2013: €78 million). They are recognised at fair value in equity.

The following table depicts the financial instruments that are recognised at fair value in the balance sheet. These are classified into a three-level fair value hierarchy whose levels reflect the degree of closeness to the market of the data used in the determination of the fair values:

€ million	30/9/2013				30/9/2014			
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Assets	272	254	18	0	50	1	49	0
Held for trading								
Derivative financial instruments not in a hedging relationship according to IAS 39	18	0	18	0	26	0	26	0
Available for sale								
Investments	253	253	0	0	0	0	0	0
Securities	1	1	0	0	1	1	0	0
Derivative financial instruments in a hedging relationship according to IAS 39	0	0	0	0	23	0	23	0
Equity and liabilities	105	0	27	78	81	0	9	72
Held for trading								
Derivative financial instruments not in a hedging relationship according to IAS 39	7	0	7	0	5	0	5	0
Miscellaneous financial liabilities	0	0	0	0	0	0	0	0
Other financial liabilities								
Miscellaneous financial liabilities	78	0	0	78	72	0	0	72
Derivative financial instruments in a hedging relationship according to IAS 39	20	0	20	0	5	0	5	0
	167	254	-9	-78	-31	1	40	-72

The measurement of securities (level 1) is carried out based on quoted market prices on active markets.

Interest rate swaps and currency transactions (all level 2) are measured using the mark-to-market method based on quoted exchange rates and market yield curves.

The fair value of commodity derivatives (level 2) is calculated as the average of the past month's price noted on the exchange.

No transfers between levels 1 and 2 were effected during the reporting period.

Level 3 includes the fair values of liabilities from put options of non-controlling interests. The fair value measurement is based on the respective contract design.

Fair values of liabilities from put options, which are determined using the discounted cash flow method, are based on expected future cash flows over a detailed planning period of three years (as on 30/9/2013) plus a perpetuity. The assumed growth rate for the perpetuity is 2.5 to 8.7 per cent (30/9/2013: between 4.1 and 7.7 per cent). The respective local WACC is used as the discount rate. In the reporting period, discount rates ranged from 11.6 to 15.2 per cent (30/9/2013: between 11.1 and 15.8 per cent). If individual interest rates were to increase by 10 per cent, the fair value of these liabilities would decline by €6 million (30/9/2013: €9 million). An interest rate decrease of 10 per cent would increase the fair value of these liabilities by €8 million (30/9/2013: €13 million).

Changes in the value of put options developed as follows between 1 October 2013 and 30 September 2014:

€ million	2012/13	2013/14
As of 1/10	388	78
Transfer to level 3	0	0
Transfer from level 3	0	0
Total gains (-) or losses (+) for the period	-42	1
Profit or loss for the period	-37	0
Other comprehensive income	-6	1
Other changes in value outside of profit or loss	3	-7
Transaction-related changes	-270	0
Granting of new rights	0	0
Redemption of existing rights	-270	0
As of 30/9	78	72

Changes in the value of put options recognised as of 30 September 2014 lowered goodwill by €7 million and other comprehensive income by €1 million.

In the previous year, changes in the value of put options existing as of 30 September 2013 led to an increase in goodwill by €13 million and an increase in other comprehensive income by €2 million.

Financial instruments that are recognised at amortised cost in the balance sheet, but for which the fair value is stated in the notes, are also classified according to a three-level fair value hierarchy.

Due to their mostly short terms, the fair values of receivables due from suppliers, trade receivables and liabilities as well as cash and cash equivalents essentially correspond to their carrying amounts.

The measurement of the fair value of bonds, liabilities to banks and promissory note loans is based on the market interest rate curve following the zero-coupon method in consideration of credit spreads (level 2). The amounts comprise the interest prorated to the closing date.

The fair values of all other financial assets and liabilities that are not listed on an exchange correspond to the present value of payments underlying these balance sheet items. The calculation was based on the applicable country-specific yield curves (level 2) as of the closing date.

Other notes

41. Notes to the cash flow statement

In accordance with IAS 7 (Cash Flow Statement), the consolidated cash flow statement describes changes in the group's cash and cash equivalents through cash inflows and outflows during the reporting period.

The item cash and cash equivalents includes cheques and cash on hand as well as cash in transit and bank deposits with a remaining term of up to three months.

The cash flow statement distinguishes between changes in cash levels from operating, investing and financing activities. Cash flows from discontinued operations are shown separately where they concern discontinued operations.

During the reporting period, net cash provided by operating activities amounted to €2,008 million (12M 2012/13: €2,667 million; 9M 2013: €-1,768 million). Impairment losses concern property, plant and equipment at €1,048 million (12M 2012/13: €1,171 million; 9M 2013: €802 million), goodwill at €88 million (12M 2012/13: €101 million; 9M 2013: €31 million), other intangible assets at €130 million (12M 2012/13: €168 million; 9M 2013: €113 million) and "investment properties" at €16 million (12M 2012/13: €20 million; 9M 2013: €16 million). On the other hand, reversals of impairment losses amount to €11 million (12M 2012/13: €15 million; 9M 2013: €7 million).

The change in net working capital amounts to €-28 million (12M 2012/13: €468 million; 9M 2013: €-2,395 million) and includes changes in inventories, trade receivables and receivables due from suppliers included in the item "other financial and non-financial assets", credit card receivables and prepayments made on inventories. In addition, the item includes changes in trade liabilities and liabilities to customers, deferred sales related to vouchers, customer loyalty programmes, provisions for customer loyalty programmes and rights of return as well as prepayments made on orders.

Other operating activities resulted in a total cash outflow of €-38 million (12M 2012/13: €-320 million; 9M 2013: €-459 million). This item includes changes in other assets and liabilities as well as deferred income and prepaid expenses. In

addition, it includes changes in the assets and liabilities held for sale, unrealised currency effects and elimination of EBIT by deconsolidation results. The change compared with the previous year primarily stemmed from revised deconsolidation gains from the previous year (12M 2012/13: €-188 million; 9M 2013: €-162 million).

In the reporting period, investing activities led to cash outflow of €715 million (12M 2012/13: cash inflow of €721 million; 9M 2013: cash inflow of €747 million). This includes payments from the disposal of Real's Eastern European business in the amount of €89 million. In the previous year (12M 2012/13), cash flow from investing activities included cash inflows of €953 million from the disposal of Real's Eastern European business as well as €341 million from the sale of the OPCI real estate properties in France.

The amount of investments in property, plant and equipment shown as cash outflow differs from the inflows shown in the asset reconciliation in the amount of non-cash transactions. These essentially concern additions from finance leases, currency effects and changes in liabilities from the acquisition of miscellaneous other assets.

Other investments include payments of €169 million for the acquisition of ten single property companies for resale. In addition, a payment of €85 million was made to a British pension fund to take out a reinsurance policy. Investments in intangible assets amounted to €131 million (12M 2012/13: €165 million; 9M 2013: €123 million); investments in financial assets amounted to €2 million (12M 2012/13: €58 million; 9M 2013: €56 million).

Alongside disposals of subsidiaries, divestments comprise incoming payments related to the sale of 9 per cent of shares in Booker PLC totalling €244 million as well as cash inflow related to the divestment of individual office properties of METRO GROUP's headquarters in Düsseldorf totalling €187 million. In addition, 25.75 per cent of the shares in OPCI FRENCH WHOLESALE PROPERTIES – FWP were divested for €40 million.

During the reporting period, the cash outflow from financing activities totalled €1,448 million (12M 2012/13: €-2,814 million; 9M 2013: €-1,690 million).

42. Segment reporting

Segment reporting has been carried out in accordance with IFRS 8 (Operating Segments). The segmentation corresponds to the group's internal controlling and reporting structures and is generally based on the division of the business into individual sectors.

As of the beginning of financial year 2013/14, the Real Estate segment is no longer shown separately. Since then, segment-relevant information has been shown in the sales lines' segments or in the Others segment. This change has no effect on data shown for the geographical segments.

METRO Cash & Carry

METRO Cash & Carry operates in the cash-and-carry sector in 28 countries in Europe, Asia and Africa through its METRO and MAKRO brands. In Germany, the portfolio is complemented by the C+C Schaper brand. Its broad product and service range is geared to commercial customers, in particular: hotel and restaurant owners, catering firms, independent retailers as well as service providers and public authorities.

Media-Saturn

Media-Saturn offers a comprehensive assortment of the latest brand products in consumer electronics retailing. The sales line is represented in 15 countries by its two strong sales brands Media-Markt and Saturn. In addition, Media-Saturn comprises the online retailer Redcoon, the Russian online shop 003.ru as well as the company 24-7 Entertainment.

Real

Real is a hypermarket operator in Germany where it operates both stationary stores and an online store. All stores offer a broad food assortment with a large proportion of fresh produce complemented by a non-food assortment.

Galeria Kaufhof

Galeria Kaufhof operates department stores in Germany and Belgium. In Belgium, the sales line operates under the Galeria Inno name. The Galeria department stores offer international assortments and high-quality own brands with a focus on clothing. The stationary business is closely dovetailed with the online store.

Aside from the information on the operating segments listed above, equivalent information is provided on the METRO GROUP regions. Here, a distinction is made between the regions Germany, Western Europe (excluding Germany), Eastern Europe and Asia/Africa.

- External sales represent sales of the operating segments to third parties outside the group.
- Internal sales represent sales between the group's operating segments.
- Segment EBITDAR represents EBITDA before rental expenses less rental income.
- Segment EBITDA comprises EBIT before depreciation and reversals of impairment losses of property, plant and equipment, intangible assets and investment properties.
- EBIT is the key ratio for segment reporting and describes operating earnings for the period before net financial result and income taxes. Intra-group rental contracts are shown as operating leases in the segments. The properties are leased at market rates. In principle, store-related risks and impairment risks related to non-current assets are only shown in the segments where they represent group risks. In analogy, this also applies to deferred assets and liabilities, which are only shown at segment level if this was also required in the consolidated balance sheet.
- Segment investments include additions to non-current intangible assets and property, plant and equipment (including additions to the consolidation groups) as well as investment properties except for additions due to the reclassification of "assets held for sale" as non-current assets.
- Segment assets include non-current and current assets. They do not include mostly financial assets, investments accounted for using the equity method, tax items, cash and cash equivalents and assets allocable to discontinued operations.

The reconciliation from segment assets to group assets is shown in the following table:

€ million	30/9/2013	30/9/2014
Segment assets	24,223	23,821
Non-current and current financial assets	327	72
Investments accounted for using the equity method	132	95
Cash and cash equivalents	2,564	2,406
Deferred tax assets	837	835
Entitlements to income tax refunds	297	223
Other entitlements to tax refunds ¹	368	464
Assets held for sale	12	9
Receivables from other financial transactions ²	30	59
Other	20	18
Group assets	28,811	28,004

¹ Included in the balance sheet item "other financial and non-financial assets" (current)

² Included in the balance sheet items "other financial and non-financial assets" (non-current and current)

- Segment liabilities include non-current and current liabilities. They do not include, in particular, borrowings, tax items and liabilities allocable to discontinued operations.

The reconciliation from segment liabilities to group liabilities is shown in the following table:

€ million	30/9/2013	30/9/2014
Segment liabilities	14,645	14,839
Financial liabilities	7,963	7,068
Deferred tax liabilities	127	130
Income tax liabilities	181	198
Income tax provisions ¹	107	120
Other tax liabilities ²	338	371
Liabilities from other financial transactions ²	31	12
Liabilities to non-controlling interests ²	82	76
Liabilities related to assets held for sale	77	139
Interest for other provisions ¹	47	47
Other	9	4
Group liabilities	23,605	23,005

¹ Included in the balance sheet items "other provisions" (non-current) and "provisions" (current)

² Included in the balance sheet items "other financial and non-financial liabilities" (non-current and current)

- In principle, transfers between segments are made based on the costs incurred from the group's perspective.

43. Management of financial risks

The treasury of METRO AG manages the financial risks of METRO GROUP. These include, in particular,

- price risks,
- liquidity risks,
- credit risks and
- cash flow risks.

For more information about the risk management system, see the combined management report in chapter 5 Financial and asset position.

Price risks

For METRO GROUP, price risks result from the impact of changes in market interest rates, foreign currency exchange rates, share price fluctuations or changes in commodity prices on the value of financial instruments.

Interest rate risks are caused by changes in interest rate levels. Interest rate swaps are used to cap these risks.

METRO GROUP's remaining interest rate risk is assessed in accordance with IFRS 7 using a sensitivity analysis. In the process, the following assumptions are applied in the consideration of changes in interest rates:

- The total impact determined by the sensitivity analysis relates to the actual balance as of the closing date and reflects the impact for one year.
- Primary floating-rate financial instruments whose interest payments are not designated as the underlying transaction in a cash flow hedge against changes in interest rates are recognised in net interest result in the sensitivity analysis. The sensitivity for a change of ten basis points is determined due to the currently low level of interest rates.
- Primary fixed-interest financial instruments are generally not recognised in net interest result. They are only recognised in other financial result if they are designated as the underlying transaction within a fair value hedge and measured at fair value. In this case, however, the interest-related change in the value of the underlying transaction is offset by the change in the value of the hedging transaction upon full effectiveness of the hedging transaction. The variable interest flows within the group that result from a fair value hedge are recognised in net interest result.
- Financial instruments designated as the hedging transaction within a cash flow hedge to hedge against variable interest flows will only be recognised in net interest result

when the payment flows have actually been initiated. However, the measurement of the hedging transaction at fair value is recognised in reserves retained from earnings outside of profit or loss.

- Interest rate derivatives that are not part of a qualified hedging transaction under IAS 39 are recognised at fair value in other financial result and, through resulting interest flows, in net interest result.

As of the closing date, METRO GROUP's remaining interest rate risk is primarily the result of variable interest rate receivables and liabilities with banks with an aggregate debit balance after consideration of hedging transactions of €1,043 million (30/9/2013: €2,089 million).

For this total balance, an interest rate increase of ten basis points would result in a higher return of €1 million per year reported in the interest result (12M 2012/13: €2 million). An interest rate decrease of ten basis points would have the opposite effect of €-1 million (12M 2012/13: €-2 million).

In the event of an interest rate rise of 10 basis points, the measurement of interest rate swaps and interest rate/currency swaps with a nominal volume of €187 million (30/9/2013: €310 million), which are part of a cash flow hedge, would result in an increase in equity in the amount of €0 million (12M 2012/13: €0 million). A drop in interest rates would result in a decrease in equity of €0 million (12M 2012/13: €0 million). Unlike in the previous year's annual report, the sensitivity variables for cash flow hedges are specified at 10 BP (previous year's annual report: 100 BP). The presentation was changed for the purpose of harmonising the sensitivity variable for the interest result and in light of the low level of interest rates. Due to the changed methodology, the previous year's figures were adjusted.

METRO GROUP faces **currency risks** in its international procurement of merchandise and because of costs and financings that are incurred in a currency other than the relevant local currency or are pegged to the price of another currency. In accordance with the group guideline "Foreign Currency Transactions", resulting foreign currency positions must be hedged. Exceptions from this hedging requirement exist where hedging is not economically reasonable and in the case of legal and regulatory restrictions in the respective countries. Forex futures as well as interest rate swaps and currency swaps are used to limit currency risks.

In line with IFRS 7, the presentation of the currency risk resulting from the exceptions is also based on a sensitivity analysis. In the process, the following assumptions are made in the consideration of a devaluation or revaluation of the euro vis-à-vis other currencies:

In terms of its amount and result characteristic, the total effect presented by the sensitivity analysis relates to the amounts of foreign currency held within the consolidated subsidiaries of METRO GROUP and states the effect of a devaluation or revaluation of the euro.

A devaluation of the euro will result in a positive effect if a foreign currency receivable exists at a subsidiary which uses the euro as its functional currency and if a liability in euros exists at a subsidiary which does not use the euro as its functional currency. A devaluation of the euro will result in a negative effect if a receivable in euros exists at a subsidiary which does not use the euro as its functional currency and if a liability in the foreign currency exists at a subsidiary which uses the euro as its functional currency. Conversely, any appreciation of the euro will have the opposite effect.

In the sensitivity analysis, the effects of the measurement of non-equity foreign currency positions that are calculated based on the closing date price in line with IAS 21 are recognised in the income statement. In the case of net investments in a foreign operation, the effects of the closing date measurement are recognised in equity (other comprehensive income) outside of profit or loss.

Foreign currency futures/options and interest rate and currency swaps that are not part of a qualified hedging relationship under IAS 39 are recognised through the fair value measurement in the income statement. In fully effective hedging transactions, this effect is offset by the effect from the measurement of the underlying foreign currency transaction.

Foreign currency futures/options and interest rate and currency swaps that are designated as the hedging transaction within a cash flow hedge to hedge against payment flows in foreign currency will only be recognised in the income statement when the payment flows are actually initiated. The measurement of the hedging transaction at its fair value, however, is recognised in reserves retained from earnings outside of profit or loss.

Effects from the currency translation of financial statements whose functional currency is not the reporting currency of METRO GROUP do not affect cash flows in local currency and are therefore not part of the sensitivity analysis.

As of the closing date, the remaining currency risk of METRO GROUP was as follows:

Impact of devaluation/appreciation of euro by 10%					
€ million	Currency pair	Volume	30/9/2013	Volume	30/9/2014
Profit or loss for the period					
	CHF / EUR	0	+/-0	16	+/-2
	CNY / EUR	-1	+/-0	16	+/-2
	CZK / EUR	-131	+/-13	-128	+/-13
	EGP / EUR	-52	+/-5	-25	+/-2
	HUF / EUR	2	-/+0	2	+/-0
	JPY / EUR	60	+/-6	0	+/-0
	KZT / EUR	-228	+/-23	-137	+/-14
	MDL / EUR	-38	+/-4	-36	+/-4
	PLN / EUR	-100	+/-10	-13	+/-2
	RON / EUR	-86	+/-9	-46	+/-5
	RSD / EUR	-27	+/-3	-24	+/-2
	RUB / EUR	-121	+/-12	-55	+/-5
	SEK / EUR	-2	+/-0	-3	+/-0

	USD / EUR	242	+/-24	262	+/-26
			+/-97		+/-74
			+/-190		+/-127

Currency risks existing in addition to these are mainly the result of USD currency holdings in various subsidiaries in which the functional currency is not the US dollar. At a nominal US dollar volume of €-109 million, a devaluation of the US dollar would result in favourable effects of €11 million in the profit or loss for the period (12M 2012/13: €18 million). Conversely, an appreciation of the US dollar will have negative effects of €11 million (12M 2012/13: €18 million).

Share price risks result from share-based payment to METRO GROUP executives. The remuneration (monetary bonus) is essentially based on the price development of the METRO ordinary share as well as the ordinary share's relative performance in relation to defined indices.

To date, the share price risk from the performance share plan has not been limited.

Price risks related to equity instruments result from holdings in other companies. In the event of a value gain of 10 per cent, the measurement of these holdings with a carrying amount of €0 million (30/9/2013: €253 million) would result in an increase in equity in the amount of €0 million (12M 2012/13: €25 million). An impairment would result in a decrease in equity of €0 million (12M 2012/13: €25 million).

The portfolio of **electricity derivatives** expired on 31 December 2013. Due to the marginal value of the portfolio as of 30 September 2013, the company already elected not to apply value-at-risk valuation in the last annual report.

Interest rate and currency risks are substantially reduced and limited by the principles laid down in the internal treasury guidelines of METRO GROUP. These include a group-wide regulation whereby all hedging operations must adhere to predefined limits and may by no means lead to increased risk exposure. METRO GROUP is aware that this severely limits the opportunities to exploit current or expected interest rate and exchange rate movements to optimise results.

In addition, hedging may be carried out only with standard financial derivative instruments whose correct actuarial and accounting mapping and valuation in the treasury system are guaranteed.

As of the closing date, the following derivative financial instruments were being used for risk reduction:

30/9/2013			
€ million	Fair values		
	Nominal volume	Financial assets	Financial liabilities
Interest rate transactions			
Interest rate swaps	126	0	5
thereof within fair value hedges	(0)	(0)	(0)

The nominal volume of forex futures/options and interest limitation agreements results from the net position of the buying and selling values in foreign currency underlying the individual transactions translated at the relevant exchange rate on the closing date. The nominal volume of interest rate swaps or interest rate/currency swaps and interest rate hedging agreements is shown. The nominal volume of commodity futures refers to diesel derivatives in metric tons (t), which corresponds to about 1,183 litres, and to electricity derivatives in gigawatt hours (GWh).

All fair values represent the theoretical value of these instruments upon dissolution of the transaction at the end of the period. Under the premise that instruments are held until the end of their term, these are unrealised gains and losses that, by the end of the term, will be fully set off by gains and losses from the underlying transactions in the case of fully effective hedging transactions.

For the purpose of showing this reconciliation appropriately for the period, relationships are created between hedging transactions and underlying transactions and recognised as follows:

- Within a fair value hedge, both the hedging transaction and the hedged risk of the underlying transaction are recog-

nised at their fair value. The value fluctuations of both trades are shown in the income statement, where they will be fully set off against each other in the case of full effectiveness.

- Within a cash flow hedge, the hedging transactions are also principally recognised at their fair value. In the case of full effectiveness of the hedging transaction, the value changes will be recognised in equity until the hedged payment flows or expected transactions impact the result. Only then will they be recognised in the income statement.
- Hedging transactions that, according to IAS 39, are not part of a hedge are recognised at their fair value. Value changes are recognised directly in the income statement. Even if no formal hedging relationship was created, these are hedging transactions that are closely connected to the underlying business and whose impact on earnings will be netted by the underlying transaction (natural hedge).

The currency derivatives are used primarily for Chinese renminbi, Japanese yen, Polish złoty, Romanian leu, Russian rouble, Swiss franc, Czech koruna, Turkish lira, Hungarian forint as well as US dollar.

The derivative financial instruments have the following maturities:

€ million	30/9/2013 fair values			30/9/2014 fair values		
	Maturities			Maturities		
	up to 1 year	1 to 5 years	over 5 years	up to 1 year	1 to 5 years	over 5 years

	-1	-8	0	44	-4	0

Listed below the maturities are the fair values of the financial assets and liabilities that fall due during these periods.

The repricing dates for variable interest rates are less than one year.

Liquidity risks

Liquidity risk describes the risk of being unable to procure or provide funding or being able to only procure or provide funding at a higher cost. Liquidity risks may arise, for example, as a result of temporary capital market disruptions, creditor defaults, insufficient lines of credit or the absence of budgeted payment flows. METRO AG acts as financial coordinator for METRO GROUP companies to ensure that they are provided with the necessary financing to fund their operating and investing activities at all times and in the most cost-efficient manner possible. The necessary information is provided by means of a group financial plan, which is updated monthly and checked monthly for deviations. This financial plan is complemented by a weekly rolling 14-day liquidity plan.

Instruments used for financing purposes include money and capital market products (time deposits, call money, promissory note loans, commercial papers and listed bonds sold as part of ongoing capital market programme programmes) as well as bilateral and syndicated loans. METRO GROUP has a sufficient liquidity reserve so that there is no danger of liquidity risks even if an unexpected event has a negative financial impact on the company's liquidity situation. For more information about the instruments used for financing purposes and lines of credit, see the explanatory notes to the respective balance sheet items.

For more information, see no. 29 Cash and cash equivalents as well as no. 36 Financial liabilities.

Intra-group cash pooling reduces the amount of debt and optimises the money market and capital market investments of METRO GROUP, which has a positive effect on net interest result. Cash pooling allows the surplus liquidity of individual group companies to be used to fund other group companies internally.

In addition, METRO AG draws on all the financial expertise pooled in the treasury of METRO AG to advise the group companies in all relevant financial matters and provide support. This ranges from the elaboration of investment financing concepts to supporting the responsible financial officers of the individual group companies in their negotiations with local banks and financial service providers. This ensures, on the one hand, that the financial resources of METRO GROUP are optimally employed, and, on the other hand, that all group companies benefit from the strength and credit standing of METRO GROUP in negotiating their financing terms.

Credit risks

Credit risks arise from the total or partial loss of a counterparty, for example, through bankruptcy or in connection with monetary investments and derivative financial instruments with positive market values. METRO GROUP's maximum default exposure as of the closing date is reflected by the carrying amount of financial assets totalling €5,232 million (30/9/2013: €5,500 million).

For more information about the size of the respective carrying amounts, see no. 40 Carrying amounts and fair values according to measurement categories.

Cash on hand considered in cash and cash equivalents totalling €104 million (30/9/2013: €105 million) is not exposed to any default risk.

In the course of the risk management of financial investments totalling €2,205 million (30/9/2013: €2,308 million) and derivative financial instruments totalling €49 million (30/9/2013: €18 million), minimum creditworthiness requirements and maximum exposure limits have been defined for all business partners of METRO GROUP. Cheques and money in circulation are not considered in the determination of credit risks. This is based on a system of limits laid down in the treasury guidelines, which are based mainly on the ratings of international rating agencies, developments of credit default swaps or internal credit assessments. An individual limit is allocated to every counterparty of METRO GROUP; compliance is constantly monitored by the treasury systems.

The following table shows a breakdown of counterparties by credit rating:

Rating classes		Volume in %						Total
		Financial investments						
Grade	Moody's	Standard & Poor's	Germany	Western Europe excl. Germany	Eastern Europe	Asia and others	Derivatives with positive market values	
Investment grade	Aaa	AAA	0.0	0.0	0.0	0.0	0.0	
	Aa1 to Aa3	AA+ to AA-	0.3	1.1	0.1	1.3	0.3	
	A1 to A3	A+ to A-	20.5	29.2	4.5	10.7	0.9	
	Baa1 to Baa3	BBB+ to BBB-	9.1	7.7	5.5	0.5	0.0	
Non-investment grade	Ba1 to Ba3	BB+ to BB-	0.3	4.2	0.1	0.0	0.0	
	B1 to B3	B+ to B-	0.0	2.0	0.0	0.0	0.0	
	Caa to C	CCC to C	0.0	0.0	0.1	0.0	0.0	
No rating			0.0	1.6	0.0	0.0	0.0	
			30.2	45.8	10.3	12.5	1.2	

The table shows that, as of the closing date, about 92 per cent of the capital investment volume, including the positive market value of derivatives, had been placed with investment-grade counterparties, in other words, those with good or very good credit ratings. Most of the counterparties that do not yet have an internationally accepted rating are respected financial institutions whose creditworthiness can be considered flawless based on analyses. METRO GROUP also operates in countries where local financial institutions do not have investment-grade ratings due to the rating of their country. For country-specific reasons as well as cost and efficiency considerations, cooperation with these institutions is unavoidable. These institutions account for about 8 per cent of the total volume.

To manage creditworthiness risks related to long-term derivatives, METRO AG concludes Credit Support Annexes (CSA) with banks. The balance sheet item "other financial and non-financial assets" includes €5 million (30/9/2013: €10 million) in receivables from these contracts. The amount of the coverage payment depends on the market values and covers the payment obligations of these interest rate/currency swaps.

METRO GROUP's level of exposure to credit risks is thus very low.

Cash flow risks

A future change in interest rates may cause cash flow from variable interest rate asset and liability items to fluctuate. Part of the variable interest rate debt has been hedged with derivative financial instruments. Stress tests are used to determine the potential impact interest rate changes may have on cash flow.

44. Contingent liabilities

€ million	30/9/2013	30/9/2014
Liabilities from suretyships and guarantees	16	20
Liabilities from guarantee and warranty contracts	52	42
	68	62

Liabilities from guarantee and warranty contracts are primarily rent guarantees with terms of up to ten years if utilisation is not considered entirely unlikely.

45. Other financial liabilities

As of 30 September 2014, the nominal value of other financial liabilities amounted to €675 million (30/9/2013: €664 million) and primarily concerned purchasing commitments from service agreements.

For more information about contractual commitments for the acquisition of other intangible assets and property, plant and equipment, obligations from finance and operating leases as well as investment properties, see no. 19 Other intangible assets, no. 20 Property, plant and equipment and no. 21 Investment properties.

46. Other legal issues

Legal disputes in relation to Media-Saturn-Holding GmbH

For more information about specific legal disputes involving Media-Saturn-Holding GmbH, see the combined management report in chapter 12 Risk and opportunities report.

Legal actions filed under stock corporation law

Furthermore, a METRO AG shareholder filed a complaint for nullity regarding the approved annual financial statements of METRO AG as of 31 December 2012, citing an alleged infringement of the regulations governing the structure of the annual financial statements due to the allegedly flawed consolidation of the Media-Saturn group of companies in the consolidated financial statements of METRO AG. On 3 April 2014, the Düsseldorf District Court ruled in METRO's favour in a legally binding decision. The same shareholder also challenged the resolution of the Annual General Meeting of 8 May 2013 regarding the appropriation of the balance sheet profit for the financial year 2012 as well as the election of the auditor. This legal action is also based essentially on the alleged nullity of the annual financial statements of METRO AG and the alleged erroneous consolidation of the Media-Saturn group of companies in the consolidated financial statements of METRO AG. METRO AG sees no reason to doubt the validity of the annual financial statements, the resolution of the Annual General Meeting regarding the appropriation of the balance sheet profit for the financial year 2012 that was based on these financial statements or the other resolutions of the Annual General Meeting. In METRO AG's opinion, the plaintiff's arguments are invalid. The annual financial statements of METRO AG have been prepared on the basis of the accounting regulations of the German Commercial Code. METRO AG indirectly holds a majority of the voting rights of the shareholders of Media-Saturn-Holding GmbH (MSH) through its subsidiary METRO Kaufhaus und Fachmarkt Holding GmbH. As such, it irrefutably exerts power control over MSH pursuant to § 290 Section 2 No. 1 of the German Commercial Code. As a result, there can be no

doubt that MSH is an affiliated company in the meaning of the commercial law stipulations governing the annual financial statements. Furthermore, METRO AG continues to believe in the appropriateness of the consolidation of the Media-Saturn group of companies in the past and in the consolidated financial statements as of 31 December 2012 and thereafter, which were prepared in accordance with international financial reporting standards (IFRS as they are to be applied within the EU). However, even if the consolidation of the Media-Saturn group of companies in the consolidated financial statements of METRO AG had been erroneous, this would have no impact on the validity of the annual financial statements of METRO AG as only the commercial law stipulations and not the international accounting standards apply to these annual financial statements.

Investigations by the Federal Cartel Office

On 14 January 2010, the Federal Cartel Office searched former business premises of MGB METRO Group Buying GmbH. On 19 December 2011, the Federal Cartel Office extended the scope of the investigation to also include METRO AG, METRO Cash & Carry International GmbH and METRO Dienstleistungs-Holding GmbH. This extension results from the merger of MGB METRO Group Buying GmbH into METRO Dienstleistungs-Holding GmbH as part of the decentralisation of central procurement in Germany. The Federal Cartel Office used this as a reason to extend the investigation to the parent or group holding company in view of the risk that the legal opponent may cease to exist due to a corporate restructuring with a change of legal form. The Federal Cartel Office's investigation is ongoing; the authority sent a comprehensive hearing notification concerning one part of the proceedings to METRO AG and METRO Dienstleistungs-Holding GmbH in mid-October. In this notification, accusations are levelled against these companies concerning practices engaged in by the former MGB METRO Group Buying GmbH in the form of vertical price fixing agreements with a supplier. A comprehensive defence against these allegations is under way.

Antitrust law proceedings in Ukraine

The Ukrainian antitrust authority is currently conducting an antitrust proceeding against METRO Cash & Carry Ukraine and a large portion of the modern retail industry in Ukraine. In the relevant complaints, METRO Cash & Carry Ukraine has been accused of forming a procurement and selling price cartel by coordinating its actions with a large number of retailers and cooperating with a market research firm. With regard to possible sanctions, the complaints refer to the – internationally customary – legal fine of up to ten per cent of annual sales.

METRO AG and its legal advisers believe that these allegations are untenable both in legal terms and in terms of competition economics. A comprehensive defence against these allegations is under way.

International tax audit

In 2011, income tax arrears in the double-digit millions were incurred at an international group company in connection with a tax audit dating back to 2006. The case is currently pending. An assertion for possible claims for recourse is currently being made.

Claims for damages due to interbank fees in violation of antitrust law

METRO GROUP companies have filed suit in a London court against companies of the MasterCard group. The legal challenge asserts claims for damages based on a decision of the EU Commission which found that the cross-border interbank fees imposed by MasterCard in the period 1992 to 2007 as part of its credit card system, which also impacted national interbank fees, violated European antitrust law. Traditionally, retailers' banks charge interbank fees to the retailer as part of retail fees.

Further remaining legal issues

In addition, companies of METRO GROUP are parties to other judicial or arbitral and antitrust law proceedings in various European countries. At the present time, however, METRO GROUP does not expect the legal issues that are not detailed separately in this section to have a material effect on its asset, financial and earnings position.

In addition, METRO GROUP is increasingly exposed to regulatory changes related to procurement and changed sales tax regulations in some countries.

47. Events after the closing date

Between the closing date (30 September 2014) and the preparation of the consolidated financial statements (24 November 2014), the following events of material importance to an assessment of the earnings, financial and asset position of METRO AG and METRO GROUP occurred:

As part of its decision in the reporting period to withdraw from the wholesale business in Denmark, METRO GROUP signed an agreement in October on the partial sale of METRO Cash & Carry Denmark to Euro Cater, a leading grocery wholesaler in Denmark and Sweden. Subject to approval by Danish antitrust authorities, Euro Cater will take over the wholesale stores in Glostrup and Aarhus. In addition, METRO GROUP will close the remaining three wholesale stores in Denmark on 31 December 2014 and thus withdraw from the Danish market. The anticipated financial effects of the disposal and closure were recognised in the annual financial statements for 2013/14 by means of asset impairments and the creation of provisions for expected closure costs. For this reason, these events should have only a minimal impact on the financial result in coming financial years.

On 21 October 2014, METRO GROUP successfully issued a benchmark bond in the corporate Eurobond market, thus optimising its financing maturity profile. The seven-year bond has a volume of €500 million and a coupon of 1.375 per cent. The issue was priced at 75 basis points above the seven-year swap rate.

In November 2014, 100 per cent of shares in MAKRO Cash & Carry Wholesale S.A., Greece, were sold to INO S.A., a company 70 per cent owned by the Greek retail company I. & S. Sklavenitis Trade S.A. The sale comprises all assets and liabilities from the operating business and real estate. MAKRO Cash & Carry Greece generated sales of €289 million in financial year 2013/14. The sale was concluded at a company value of €65 million and will likely result in revenue of a similar amount. The transaction is still subject to the approval of the Supervisory Board of METRO AG as well as the responsible antitrust authorities. It will likely be concluded in the first half of the 2015 calendar year.

48. Notes on related parties

In financial year 2013/14, METRO GROUP maintained the following business relations to related companies:

€ million	9M 2013	12M 2012/13	12M 2013/14
Services provided	1	2	1
thereof to associates	(0)	(0)	(0)
Services received	13	17	16
thereof from associates	(2)	(3)	(3)
Receivables from services provided	0	0	0
Liabilities from services received	2	2	2

In financial year 2013/14, METRO GROUP companies provided services totalling €1 million to companies included in the group of related companies. This concerns primarily the granting of energy and lease rights.

The services totalling €16 million that METRO GROUP companies received from related companies in financial year 2013/14 consisted of services, at an amount of €10 million, and real estate leases, at an amount of €6 million.

Business relations with related parties are based on contractual agreements providing for arm's length prices. As in the short financial year 2013, METRO GROUP had no business relations with related natural persons in financial year 2013/14.

For more information about the basic principles of the remuneration system and the amount of Management and Supervisory Board compensation, see no. 50 Management Board and Supervisory Board.

49. Long-term incentive for executives

METRO AG has been implementing long-term incentive programmes since 1999 to enable senior executives to participate in the company's value development and reward their contribution to the sustained success of METRO GROUP compared with its competitors. The members of the Management Board and senior executives of METRO AG as well as managing directors and senior executives of the other operating METRO GROUP companies are eligible.

Sustainable performance plan 2013/14–2015/16

After the last tranche of the performance share plan was paid in the short financial year 2013, the first tranche of a long-term performance-based remuneration scheme initially limited to three tranches was issued for financial year 2013/14.

A target value in euros is set for the eligible managers. 75 per cent of this amount will be based on the so-called TSR component (total shareholder return), a metric that will be determined on the basis of the METRO ordinary share's performance relative to a defined reference index during a performance period. The remaining 25 per cent will be based on a so-called sustainability component that considers the ranking that METRO AG achieves during the performance period as part of the Corporate Sustainability Assessment conducted by the independent agency RobecoSAM AG. In case of employment termination, separate rules for the payout of the tranches have been agreed upon.

To calculate the **TSR component**, the Xetra closing prices of the METRO ordinary share will be recorded over a period of 40 trading days that directly follow the Annual General Meeting of METRO AG. The arithmetic mean calculated from these prices will then be used as the starting share price. The performance period for the respective tranche will begin on the 41st trading day following the Annual General Meeting. In the next step, that will also cover a period of 40 trading days directly following the Annual General Meeting held three years after the determination of the starting share price and the issuance of the respective tranche, the Xetra closing prices of METRO's ordinary share will be recorded. The arithmetic mean calculated from these prices will then be used as the final share price. The TSR percentage value will be determined on the basis of the change in the METRO share price and the total amount of reinvested dividends throughout the performance period in relation to the starting and ending share prices.

The METRO TSR calculated in this manner will be compared with the TSR of the Dow Jones STOXX Europe 600 Retail Index (index TSR) during the performance period, and the factor for computing the TSR component will be determined in this way:

- If METRO's TSR is identical to the index TSR, the factor for the TSR component will be one.
- If METRO's TSR is 30 percentage points or more below the index TSR, the factor for the TSR component will be zero.

- If METRO's TSR is 30 percentage points above the index TSR, the factor for the TSR component will be two.
- If METRO's TSR is 60 percentage points or more above the index TSR, the factor for the TSR component will be a maximum of three [cap].
- Outside these values, the TSR factor for the sustainable performance plan will be determined using the linear interpolation method and calculated to the hundredth place value.

If the TSR factor is zero, no payment will be made and the TSR component will be closed. If the TSR factor is positive, the following additional condition will apply: a payment of 75 per cent of the target amount multiplied by the TSR factor will be made only if the calculated final price of the METRO share does not fall below the starting share price. Should this condition not be met, the calculated amount will not be paid initially. In this case, an entitlement to payment will exist only if the Xetra closing price of the METRO ordinary share is higher than or equivalent to the starting share price for 40 consecutive trading days within a three-year period after the completion of the performance period, or over period. Should this condition not be met within the three years after the performance period ends, no payment of the TSR component of the tranche will be made.

To determine the factor of the **sustainability component**, METRO AG takes part in the Corporate Sustainability Assessment conducted by the independent agency RobecoSAM AG during each year of the three-year performance period of the sustainable performance plan. RobecoSAM AG uses this assessment to determine the ranking of METRO AG within the industry group "Food and Staples Retailing" that is defined in accordance with the Global Industry Classification Standard (GICS). S&P Dow Jones Indices uses this ranking as the basis for decisions regarding a company's inclusion in the Dow Jones Sustainability Indices (DJSI). METRO AG is informed each year by RobecoSAM AG about its new ranking. The company's average ranking – rounded to whole numbers – is determined on the basis of the three rankings communicated by RobecoSAM AG during the performance period. The factor for the sustainability component is determined on the basis of the average ranking during the performance period. The following additional condition will also apply: a payment of 25 per cent of the target amount multiplied by the sustainability factor will be made only if the ranking of METRO AG does not fall by more than two places below the last announced ranking before the issuance of the tranche in any year of the performance period. Otherwise, the factor for the sustainability component will be

zero. The payment cap for the sustainability component amounts to three times the target amount.

The value of the tranches allotted in financial year 2013/14 as part of the sustainable performance plan amounted to €6 million at the time of allotment (previous year performance share plan 9M 2013: €23 million) and was calculated by external experts using recognised financial-mathematical methods.

Sustainable performance plan (tranches 2013/14–2015/16)			
Tranche	End of the performance period	Starting price for the TSR component	Target amount as of 30/9/2014
	41st trading day following the Annual General Meeting three years after the issuance of the tranche		
2013/14		€29.73	€8,315,000

Performance share plan and share ownership guidelines (2009–2013)

In 2009, METRO AG introduced a performance share plan for a period of five years for which the last tranche was issued in the short financial year 2013.

Under this scheme, eligible managers were given an individual target amount for the performance share plan (target value) in accordance with the significance of their responsibilities. The target number of performance shares was calculated by dividing this target value by the share price upon allotment, based on the average price of the METRO share during the three months up to the allotment date. The key metric in this calculation was the three-month average price of the METRO share before allotment. A performance share entitles its holder to a cash payment in euros matching the price of the METRO share on the payment date. The key metric in this calculation was also the three-month average price of the METRO share before the payment date.

Based on the relative performance of the METRO share compared to the mean of the DAX 30 and Dow Jones Euro STOXX Retail indices – total return – the final number of payable performance shares is determined after the end of a performance period of at least three and at most 4.25 years. It corresponds to the target number of shares when an equal performance with said stock indices is achieved. Up to an outperformance of 60 per cent, the number increases on a straight-line basis to a maximum of 200 per cent of the target amount. Up to an underperformance

of 30 per cent, the number is accordingly reduced to a minimum of 50 per cent. In the case of an underperformance of more than 30 per cent, the number is reduced to zero.

Payment can be made at six possible times that are set in advance. The earliest payment date is three years after allotment of the performance shares. From this time, payment can be made every three months. The eligible managers can choose the date upon which they want to exercise performance shares. A distribution over several payment dates is not permitted. The payment cap amounts to five times the target value.

METRO GROUP introduced so-called share ownership guidelines along with its performance share plan: as a precondition for payments of performance shares, eligible executives are obliged to undertake a continuous self-financed investment in METRO shares up to the end of the three-year vesting period. This ensures that, as shareholders, they will directly participate in share price gains as well as potential losses of the METRO share. The required investment volume generally amounts to approximately 50 per cent of the individual target value.

Performance share plan (tranches 2009–2013)

Tranche	End of the blocking period	Three-month average price before allotment	Number of performance shares as of 30/9/2014
2009	August 2012	€36.67	Expired
2010	August 2013	€42.91	263,777
2011	August 2014	€41.73	301,975
2012	April 2015	€29.18	553,165
2013	April 2016	€22.84	801,652

The blocking period for the 2010 and 2011 tranches ended in August 2013 and August 2014, respectively. No payouts from these tranches were made to members of the Management Board in financial year 2013/14.

The current tranches of share-based payment programmes resulted in expenses of €3 million (12M 2012/13: €6 million; 9M 2013: €7 million).

The related provisions as of 30 September 2014 amount to €15 million (30/9/2013: €12 million). Of this total, the 2010 tranche accounts for €0 million (30/9/2013: €0 million), the 2011 tranche for €0 million (30/9/2013: €2 million), the 2012 tranche for €3 million (30/9/2013: €5 million), the 2013 tranche for €11 million (30/9/2013: €5 million) and the 2014 tranche for €1 million.

50. Management Board and Supervisory Board

Compensation of members of the Management Board in financial year 2013/14

Remuneration of the active members of the Management Board essentially consists of a fixed salary, the short-term performance-based compensation (short-term incentive) as well as the performance-based compensation with a long-term incentive effect (long-term incentive) granted in financial year 2013/14.

The amount of the short-term performance-based compensation for members of the Management Board essentially depends on the development of net earnings (NE) and the return on capital employed (RoCE) and also considers the attainment of individually set targets. The use of the metric NE combined with RoCE rewards profitable growth of METRO GROUP.

Remuneration of the active members of the Management Board in financial year 2013/14 amounted to €10.8 million (9M 2013: €8.6 million). This includes €3.7 million (9M 2013: €2.6 million) in fixed salaries, €3.4 million (9M 2013: €0.2 million in short-term performance-based remuneration, €3.4 million (9M 2013: €5.6 million) in performance-based remuneration with a long-term incentive effect and €0.3 million (9M 2013: €0.2 million) in other remuneration.

Performance-based compensation with a long-term incentive effect granted in financial year 2013/14 (sustainable performance plan) is shown at fair value as of the date granted. In financial year 2013/14, value changes resulted from the current tranches of performance-based payment programmes with a long-term incentive effect. The company's expenses amounted to €0.54 million for Mr Koch, €0.4 million for Mr Haas and €0.36 million for Mr Hutmacher. The total for Mr Frese was €0.4 million.

The target amount of the tranche 2013/14 for the members of the Management Board amounts to €4.96 million.

Other remuneration consists of non-cash benefits.

Total compensation of former members of the Management Board

Former members of the Management Boards of METRO AG and the companies that were merged into METRO AG as well as their surviving dependants received €3.5 million (9M 2013: €7.0 million). The present value of provisions for current pen-

sions and pension entitlements made for this group amounts to €54.3 million (30/9/2013: €54.1 million).

— The information released pursuant to § 314 Section 1 No. 6 a Sentence 5 to 9 of the German Commercial Code can be found in the combined management report in chapter 9 Remuneration report.

Compensation of members of the Supervisory Board

The total remuneration of all members of the Supervisory Board in financial year 2013/14 amounted to €1.7 million (9M 2013: €1.4 million).

— For more information about the compensation of the members of the Supervisory Board, see the combined management report in chapter 9 Remuneration report.

51. Auditor's fees

The following fees related to the services rendered by the auditor KPMG AG Wirtschaftsprüfungsgesellschaft were calculated.

€ million	9M 2013	12M 2012/13	12M 2013/14
Audit	7	12	7
Other assurance and audit-related services	2	3	2
Tax consultation services	1	1	0
Other services	2	2	2
	12	18	12

Only services that are consistent with the task of the auditor of the annual financial statements of METRO AG were provided.

52. Declaration of compliance with the German Corporate Governance Code

In September 2014, the Management Board and the Supervisory Board made a declaration of compliance with the recommendations of the Government Commission on the German Corporate Governance Code pursuant to § 161 of the German Stock Corporation Act (AktG), which can be accessed on the METRO AG website (www.metrogroup.de).

53. Election to be exempt from §§ 264 Section 3 and 264 b of the German Commercial Code

The following domestic subsidiaries in the legal form of stock corporations or partnerships will make use of the exemption requirements according to § 264 Section 3 and § 264 b of the German Commercial Code, and thus elect not to publish their annual financial statements for 2014 nor, for the most part, to prepare their notes and management report (according to the German Commercial Code).

AUDIT CERTIFICATE

We have audited the consolidated financial statements prepared by METRO AG, Düsseldorf, comprising the balance sheet, the income statement, the reconciliation from profit or loss for the period to total comprehensive income, the statement of changes in equity and the notes to the financial statements, together with the combined management report of the company and group for the financial year from 1 October 2013 to 30 September 2014. The company's Management Board is responsible for the preparation of the consolidated financial statements and group management report in accordance with IFRS as applied in the EU, as well as pursuant to § 315 a Section 1 of the German Commercial Code and the supplementary provisions of the Articles of Association. Our responsibility is to express an opinion on the consolidated financial statements and the group management report based on our audit.

We conducted our audit of the consolidated financial statements in accordance with § 317 of the German Commercial Code and generally accepted German standards for the audit of financial statements promulgated by the Institut der Wirtschaftsprüfer (IDW). Those standards require that we plan and perform the audit such that misstatements materially affecting the presentation of the asset, financial and earnings position in the consolidated financial statements in accordance with the applicable financial reporting framework and in the group management report are detected with reasonable assurance. Knowledge of the business activities and the economic and legal environment of the group

and expectations as to possible misstatements are taken into account in the determination of audit procedures. The effectiveness of the accounting-related internal control system and the evidence supporting the disclosures in the books and records, the consolidated financial statements and the group management report are examined primarily on a test basis within the framework of the audit. The audit includes assessing the annual financial statements of the companies included in the consolidated financial statements, the definition the consolidation group, the application of accounting and consolidation principles and significant estimates made by the Management Board, as well as evaluating the overall presentation of the consolidated financial statements and group management report. We believe that our audit provides a reasonable basis for our opinion.

Our audit has not led to any reservations.

In our opinion, based on the findings of our audit, the consolidated financial statements comply with IFRS as applied in the EU as well as with § 315 a Section 1 of the German Commercial Code and the supplementary provisions of the Articles of Association and give under consideration of these provisions a true and fair view of the asset, financial and earnings position of the group. The group management report is consistent with the consolidated financial statements and as a whole provides a suitable view of the group's position and suitably presents the opportunity and risks of future development.
